| Decision Requested | <p>Amend the 4th Paragraph of the policy as follows (strike through and bold):</p> <p><b><i>There may arise instances when activities carried out on private land create effects that carry beyond the property boundaries and adversely affect other people and environments. In such instances</i></b> <del>At times it may be necessary for wider public interest considerations to prevail over individual expectations and land use may need to be controlled. In these circumstances, compensation to the land owner is not payable under Section 85 of the RMA. The same section also provides the land user with the ability to challenge any provision of a plan on the grounds that the provision would render their land incapable of reasonable use. Section 86 of the RMA empowers the Council to acquire land with the agreement of the landowner and pay compensation for it.</del></p>   |       |          |   |                            |                 |
| 1042               | Port Underwood Association   | 2     | Volume 1 | 4 Use of Natural and Physical Resources | Policy 4.1.2               | Support in Part |
| Decision Requested | <p>Amend 1st Paragraph of Policy as follows (strike through and bold):</p> <p><i>May uses of coastal space, river beds, air and water resources are prohibited unless allowed by a rule in a regional plan or by resource consent (see Section 12 to 15 of the RMA). As a principle, the Council will continue to enable access to natural resources where the subsequent use of those resources has no more than minor adverse effect on the immediate or surrounding environment. This will be achieved through the use of permitted activity rules, including conditions where appropriate, avoiding the need for resource consent. Where the adverse effects are considered more than minor or where there is potential for cumulative effects, the resource consents will be required. Policies throughout the MEP help define sustainable resource use. <b>To ensure natural resource sustainability long-term resource consents (over 20 years) should not be granted in public spaces.</b></i></p> |       |          |   |                            |                 |
| 1042               | Port Underwood Association   | 3     | Volume 1 | 4 Use of Natural and Physical Resources | Policy 4.3.5               | Support in Part |

| Sub No             | Submitter   | Point | Volume   | Chapter                           | Provision    | Type            |
|--------------------|---|-------|----------|-----------------------------------|--------------|-----------------|
| Decision Requested | Amend Policy as follows (strike through and bold):<br><br><i>As described in the issue above, the Marlborough Sounds has already undergone considerable change as a result of the past use of natural and physical resources, the most dramatic possibly being the clearance of indigenous vegetation to allow agriculture to occur and, as agriculture has become economically marginal, the regeneration of indigenous vegetation. As a principle, it is important to recognise that the Marlborough Sounds environment is dynamic and will continue to change with or without human intervention. This means there is a capacity to absorb change within the environment without necessarily affecting the qualities of this unique and iconic environment. Indeed, some changes may actually enhance the qualities and improve the Marlborough Sounds environment. Regard should be had to this policy when considering new and existing activities involving the use, development and protection of the Marlborough Sounds environment. <b>And in recognition of this ability to change, there needs to be caution in assigning long term resource consents.</b></i> |       |          |                                   |              |                 |
| <b>1042</b>        | Port Underwood Association  | 4     | Volume 1 | 7 Landscape                       | Policy 7.2.3 | Support in Part |
| Decision Requested | Amend Policy as follows (bold and strike through):<br><br><i>Policy 7.2.3 - Control activities that have the potential to degrade the amenity values that contribute to those areas of the Marlborough Sounds Coastal Landscape not identified as being an outstanding natural feature and landscape by:<br/>(a) using a non-regulatory approach as the means of maintaining and enhancing landscape values in areas of this landscape zoned as Coastal Living;<br/>(b) setting standards/conditions that are consistent with the existing landscape values and that will require greater assessment where proposed activities and structures exceed those standards; and<br/>(c) requiring resource consent for commercial forestry activities <b>including re-establishment after harvest.</b></i>  |       |          |                                   |              |                 |
| <b>1042</b>        | Port Underwood Association  | 5     | Volume 1 | 8 Indigenous Biodiversity         | Issue 8A     | Support in Part |
| Decision Requested | Amend Issue 8A, Marine Environments, Paragraph 4 as follows (bold and strike through):<br><br><i>The condition and state of marine biodiversity can be affected by land or water based activities. Adverse impacts can arise from sedimentation, contamination, and habitat disturbance, <b>and changes in water flow.</b> Effects can be temporary, but in particular circumstances can result in permanent loss or damage. Long term or cumulative smaller scale, localised effects from impacts such as contamination and physical disturbance can also have significant effects on the functioning of marine systems <b>including nutrient, phytoplankton and zooplankton depletion.</b> Many activities, such as recreational swimming, do not affect or have an impact on marine biodiversity; however, other activities, including shipping (especially large and/or fast ships), reclamations or other coastal structures, marine farming and physical disturbance from certain fishing techniques can affect marine biodiversity.</i>  |       |          |                                   |              |                 |

| Decision Requested | Amend Policy as follows (bold and strike through):<br><br><i>Policy 13.10.22 - The visual impact of boatsheds on the values of the coastal environment will be reduced by:</i><br><i>(f) avoiding locating lights on boatsheds (other than those required to facilitate access). <b>Those lights that are necessary shall be fully shielded to prevent any light spillage above the horizontal plane of the light source;</b></i>  |       |          |                                   |                 |                 |
| <b>1042</b>        | Port Underwood Association   | 9     | Volume 1 | 17 Transportation                 | Policy 17.6.1   | Support in Part |
| Decision Requested | Amend Policy as follows (strike through ad bold):<br><br><i>Policy 17.6.1 - Maintain amenity values in rural and urban areas by encouraging the use of national and arterial routes by high volumes of traffic and heavy vehicles and discouraging high volume and heavy traffic use of collector routes and local routes, particularly where these pass through residential areas. The current state of vehicle technology in New Zealand means that noise and vehicle emissions can be expected from the operation of vehicles on roads. There is little the MEP can do to modify those conditions. However, the council can control the extent of these effects by adopting a road hierarchy, which encourages higher volumes of traffic and heavy traffic movements on certain routes and discourages them on others. An exception is made for some primary production activities, which need to use collector and local routes to transport produce to processing <b>facilities provided that no viable alternative route or method of transport exists. The maintenance of community amenity values will take precedence over commercial financial considerations.</b></i> |       |          |                                   |                 |                 |

| Decision Requested | <p>That the following amendments (bold) are made to 15.M.21:</p> <p><i>15.M.21 Information</i><br/> <i>Provide information, including guidelines, to landowners, resource users and the public:</i></p> <ul style="list-style-type: none"> <li><i>• to generally promote awareness of water quality issues; and</i></li> <li><i>• to encourage the adoption of appropriate land management practices to minimise <b>any adverse effects of non-point source discharges. This includes promoting industry Codes of Practice and industry guidelines and encouraging the adoption of Agreed Good Management Practices. (Industry Agreed Good Management Practices, Sept 2015 have been development and documented by the Primary industry sector groups in conjunction with Canterbury Regional Council.)</b></i></li> </ul> <p><i>Although the focus of this method will be on rural resource users, the information will also be applicable to residential situations (in both rural and urban environments).</i></p> <p><i>Provide information on the benefits of retiring and planting riparian margins. This will include information on the appropriate width of riparian margins and suitable plant species, taking into account the variation in the nature of waterbodies/coastal waters and the adjoining rural land uses. Information on options for formally protecting retired riparian margins can also be provided.</i></p> |       |          |  |           |                 |
| <b>1090</b>        | Ravensdown Limited   | 49    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | 15.M.24   | Oppose          |
| Decision Requested | <p>That the following amendment (strike-through) is made to 15.M.24 and amend 15. M.21 (submission point #48) to include support for the Industry Agreed Good Management Practices, Sept 2015, and industry guidelines and Codes of Practice.</p> <p><del><i>15.M.24 Codes of practice and industry guidelines</i></del><br/> <del><i>Advocate to rural industry groups that they, locally or nationally, prepare and adopt codes of practice or other guidelines aimed at reducing the effects of non-point source discharges where they do not already exist.</i></del></p>  |       |          |  |           |                 |
| <b>1090</b>        | Ravensdown Limited   | 50    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | 15.M.25   | Support in Part |

| Sub No             | Submitter   | Point | Volume   | Chapter                                | Provision     | Type            |
|--------------------|---|-------|----------|--|---------------|-----------------|
| Decision Requested | <p>That the following amendments (strike-through and bold) are made to 15.M.25:</p> <p><i>15.M.25 <del>Farm Environment</del> Management plans for dairy farming <b>intensively farmed livestock</b></i><br/> <del>Water Quality Management</del> <b>Farm Environment</b> Plans can be used as a means of demonstrating on an ongoing basis that any adverse effects on water quality resulting from dairy <b>and intensively farmed livestock</b> will be avoided, remedied or sufficiently mitigated. They provide the ability to consider all farm management practices with the potential to adversely affect surface or groundwater quality or wetlands and manage these risks in an integrated way. <del>This also enables the dairy farmer to progressively plan farm upgrades based on priority or in the case of new farms, at the time of establishment. Water Quality Management Plans can be used to support applications for land use consent to convert the use of land to dairying.</del></p> <p><b>The Farm Environment Plan should include:</b></p> <ul style="list-style-type: none"> <li>• <i>Nutrient Management Plans. <b>These</b> will be required as a means to demonstrate how nutrient inputs associated with dairy <b>and intensively farmed livestock</b> are to be managed to ensure any adverse effects on water quality will be avoided, remedied or mitigated. Nutrient Management Plans should be written documents that incorporate a nutrient budget developed by <del>an accredited nutrient adviser</del> <b>a Certified Nutrient Management Advisor</b> using OVERSEER® or similar. This should describe how the major plant nutrients (nitrogen, phosphorus, sulphur and potassium) and any other nutrients of importance to specialist crops will be managed (including all sources of nutrient - for example, discharges from farm dairy effluent systems, animal discharges and/or atmospheric nitrogen fixation.</i></li> <li>• <b>Good management plans.</b></li> <li>• <b>Riparian management plans.</b></li> <li>• <b>Details of the property including location of waterbodies.</b></li> </ul> |       |          |  |               |                 |
| <b>1090</b>        | Ravensdown Limited  | 51    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Issue 15F     | Oppose          |
| Decision Requested | <p>That the following amendments (bold) are made to the 4th paragraph of the explanation for Issue 15F:</p> <p><i>Soil contains essential mineral elements required by plants and animals. An inevitable consequence of the productive use of soil is that, at some time in the future, soils will become unable to sustain high levels of production unless those nutrients are replaced. Soil depletion refers to the reduction of soil nutrients to a level where their potential to sustain primary production is adversely affected. Although fertiliser use has decreased over time in Marlborough, many primary producers still apply it to maintain the nutrient status of the soil and therefore soil productivity. Excessive fertiliser application creates the potential for nutrients such as nitrogen and phosphate to runoff into adjoining rivers and wetlands or leach into underlying groundwater. <b>Council will encourage the application of fertiliser in accordance with the Code of Practice for Nutrient Management and Good Management Practices for farming activities to reduce the risk of nutrients entering surface and groundwater resources.</b></i></p>  |       |          |  |               |                 |
| <b>1090</b>        | Ravensdown Limited  | 52    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.4.2 | Support         |

|--------------------|---|-------|----------|-----------------------------------|-----------------|-----------------|
| Decision Requested | That the following amendment (bold) is made to the explanation for Policy 4.3.5:<br><br><i>As described in the issue above, the Marlborough Sounds has already undergone considerable change as a result of the past use of natural and physical resources, the most dramatic possibly being the clearance of indigenous vegetation to allow agriculture to occur and, as agriculture has become economically marginal, the regeneration of indigenous vegetation. As a principle, it is important to recognise that the Marlborough Sounds environment is dynamic and will continue to change with or without human intervention. This means there is a capacity to absorb change within the environment without necessarily affecting the qualities of this unique and iconic environment. Indeed, some changes may actually enhance the qualities and improve the Marlborough Sounds environment. Regard should be had to this policy when considering new and existing activities involving the use, development and protection of the Marlborough Sounds environment. <b>And in recognition of this ability to change, there needs to be caution in assigning long term resource consents.</b></i> |       |          |                                   |                 |                 |
| <b>845</b>         | Kenneth R and Sara M Roush  | 3     | Volume 1 | 8 Indigenous Biodiversity         | Issue 8A        | Support in Part |
| Decision Requested | That the following amendments (strike through and bold) are made to the 4th paragraph of the explanation under the heading <b>Marine environments</b> in Issue 8A:<br><br><i>The condition and state of marine biodiversity can be affected by land or water based activities. Adverse impacts can arise from sedimentation, contamination, <del>and</del> habitat disturbance, <b>and changes in water flow</b>. Effects can be temporary, but in particular circumstances can result in permanent loss or damage. Long term or cumulative smaller scale, localised effects from impacts such as contamination and physical disturbance can also have significant effects on the functioning of marine systems <b>including nutrient, phytoplankton and zooplankton depletion</b>. Many activities, such as recreational swimming, do not affect or have an impact on marine biodiversity; however, other activities, including shipping (especially large and/or fast ships), reclamations or other coastal structures, marine farming and physical disturbance from certain fishing techniques can affect marine biodiversity.</i>   |       |          |                                   |                 |                 |

| Decision Requested | That the following amendment (bold) is made to the explanation for Policy 17.6.1:<br><i>Policy 17.6.1 – Maintain amenity values in rural and urban areas by encouraging the use of national and arterial routes by high volumes of traffic and heavy vehicles and discouraging high volume and heavy traffic use of collector routes and local routes, particularly where these pass through residential areas. The current state of vehicle technology in New Zealand means that noise and vehicle emissions can be expected from the operation of vehicles on roads. There is little the MEP can do to modify those conditions. However, the Council can control the extent of these effects by adopting a road hierarchy, which encourages higher volumes of traffic and heavy traffic movements on certain routes and discourages them on others. An exception is made for some primary production activities, which need to use collector and local routes to transport produce to processing facilities <b>where no viable alternative route or method of transport exists.</b></i> |       |          |                                   |                 |                 |

| <b>715</b>         | Royal Forest and Bird Protection Society<br>NZ (Forest and Bird)  | 386   | Volume 2 | 3 Rural Environment Zone | 3.3.11.3. | Support in Part |
| Decision Requested | Clearance of indigenous vegetation must not occur: (a) on a Threatened Environments – Indigenous Vegetation Site. This is supported in part, but threatened environments do not cover all areas that are “significant” under the criteria in Policy 8.1.1. The rules allow clearance of significant indigenous vegetation as a permitted activity. Clearance of any indigenous vegetation meeting significance criteria should be a non-complying activity. Clearance of indigenous vegetation must not occur: (b) on land above mean high water springs that is within 20m of an Ecologically Significant Marine Site. Greater setbacks are required to protect the significant marine sites. Amend to address submission. |       |          |                          |           |                 |
| <b>715</b>         | Royal Forest and Bird Protection Society<br>NZ (Forest and Bird)  | 387   | Volume 2 | 3 Rural Environment Zone | 3.3.11.4. | Support in Part |
| Decision Requested | Amend to address all Policy 11 NZCPS areas  |       |          |                          |           |                 |
| <b>715</b>         | Royal Forest and Bird Protection Society<br>NZ (Forest and Bird)  | 388   | Volume 2 | 3 Rural Environment Zone | 3.3.11.5. | Oppose          |
| Decision Requested | Opposed – threshold is too high and will not maintain indigenous biodiversity as required under s 30 and 31. Permitted clearance of indigenous forest should only be allowed for clearly defined reasons: for a single dwelling on a site, for maintenance of existing infrastructure, roads and fence lines. Amend to address submissions.   |       |          |                          |           |                 |
| <b>715</b>         | Royal Forest and Bird Protection Society<br>NZ (Forest and Bird)  | 389   | Volume 2 | 3 Rural Environment Zone | 3.3.11.6. | Oppose          |
| Decision Requested | Delete Rule 3.3.11.6  |       |          |                          |           |                 |

Decision  
Requested

### **Pelorus Sound**

- Delete the seaward extent of the ONL above (north) of Hikapu Reach and above Maori Reach.
- Delete ONL at or on the Putanui Point.
- Amend the ONL that extends into Nydia Bay and Fairy Bay so that the seaward boundary abuts the MHWS.
- Amend the OHL at Yncyca Bay so that it is at least 500m from ML 8343 and abuts MHWS.
- Delete corner of ONL by ML 8343.
- Delete the OHL at Hopai Bay.
- Delete the OHL of Waimaru Bay.

### **Kenepura Sound**

- Delete the OML at Gold Reef by drawing the line at the Kenepuru Road.

### **Squally Cove**

- Amend the ONL so that it stretches from Lone Rock to Kakoho Point (west of Squally Cove).

### **Tawhitinui Reach**

- Delete the ONL at Tawe Point
- Move the ONL boundary at Cregoe so that it follows the creek line to the west.

### **Waitata Reach**

- Delete the ONL around Horseshoe Bay and
- Delete the so that it follows the bush line [sentence incomplete].

**Waitata Bay including Horseshoe, Richmond and Ketu Bays**

- Delete the ONL at Tapapa Point.

**Beatrix Bay**

- Delete the ONL at:

\* Kauauroa Bay

\* Tawhitinui Bay

\* Te Purakia Point [Te Puraka Point]

\* Waimaru Bay and Tuhitarata Bay by drawing the boundary below MT Kiwi.

\* Tawero Point

**Waikawa Bay**

- Delete seaward extent of the ONL in Savill Bay, Game Bay and pull back to MHWS.

- Delete ONL from Cregoe Rock that extends in a north west line and includes ML 8203 and is 400m from ML 8301.

|             |                 |     |          |              |              |        |
|-------------|-----------------|-----|----------|--------------|--------------|--------|
| <b>1140</b> | Sanford Limited | 105 | Volume 4 | Overlay Maps | Landscapes 1 | Oppose |
|-------------|-----------------|-----|----------|--------------|--------------|--------|

Decision Requested

**Pelorus Sound**

- Delete the ONL at Waihinau Bay, Homestead Bay and Waterfall Bay around Cape Horn and down to Te Akaroa (West Entry Point).

- Delete the ONL around Kaitira (East Entry Pint [Point]) where it is 400m from ML 8109.

- Delete the inclusion of the water space around:

\* Pipitawai

\* Harding Point

\* Paparoa

\* Blow Hole Point.

### **Waitata Reach**

- Delete the OND overlay on the northern side of Hamilton Cove so that it follows the bush line out to Yellow Cliffs in a straight [straight] line.

### **Waitata Bay including Horseshoe, Richmond and Ketu Bays**

- Delete the ONL at the southern end of Kaitira (East Entry Point).

### **Forysth [Forsyth] Bay**

- Delete the ONL at the southern end of Kaitira (East Entry Point).

### **Admiralty Bay**

- Amend the ONL around coastal boundary [boundary] at Clayface Point so that it includes the inner bays and does not extent seaward. This appears to make no difference to the ONL and recognises ML 8014.

- Amend the boundary of the ONL in Waikawa Bay by pulling the northern boundary up to Two Island Point.

### **Waikawa Bay**

- Delete the seaward extent of ONL in savill bay, Game Bay and pull back to MHWS.

### **Kenepura Sound**

- Delete the VHNC Gold Reef bay by drawing the line at the Kenepuru Road.

### **Squally Cove**

- Amend the VHNC so that it stretches from Lone Rock to Kakaho Point (west of Squally Cove).
- Delete the VHNC at Round Hill along the southern side of Whakitenga Bay.
- Delete the HNC around Oyster Bay (both sides) and Matarau Point.
- Draw a straight [straight] line in the HNC so that it does not include the two tounges [tongues] down to the foreshore by ML's 8271, 8272, 8273.

### **Beatrice Bay**

- Delete the HNC overlay around Tawhitinui Bay and Beatrice bay - parts of which are also ONL.
- Delete the VHNC at Kauauroa bay as no discernable [discernible] difference with surrounding landscape.
- Delete the VHNC at Tawero Point south towards Capsize Point.

### **Waikawa Bay**

- Delete the HNC landscape as they extend over bays of Fitzroy.
- Delete the VHNC west of Woodlands, around Canoe Bay and Camel Point and around, west of Elaine Bay.
- Dele [delete] the ONC from Cregoe Rock in a north west line to Camel Point.

| Decision Requested | That the wording "Removal of wilding pines in the Marlborough Sounds" is included in 7.AER.1.  |       |          |  |               |         |
| 1146               | Sea Shepherd New Zealand   | 23    | Volume 1 | 8 Indigenous Biodiversity              | Objective 8.1 | Support |
| Decision Requested | Retain the explanation of Objective 8.1 ( <b><i>inferred</i></b> ).  |       |          |  |               |         |
| 1146               | Sea Shepherd New Zealand   | 24    | Volume 1 | 8 Indigenous Biodiversity              | 8.AER.1       | Oppose  |
| Decision Requested | That by 2020 a robust and substantial Marine Protected Areas/Marine Park, including at least all of Queen Charlotte Sound and Tory Channel, is established ( <b><i>inferred</i></b> ).   |       |          |  |               |         |
| 1146               | Sea Shepherd New Zealand   | 25    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Issue 15C     | Oppose  |
| Decision Requested | <p>That the following new Methods of Implementation are included under Issue 15C:</p> <p><i>Management purpose (15-11)</i></p> <p><b><i>15.M.X Replanting Management Plan</i></b></p> <p><b><i>A mandatory plan that identifies areas at high risk of erosion and require retirement and implementation of buffers, such as gully heads and steep ephemeral gullies.</i></b></p> <p><b><i>Incentives</i></b></p> <p><b><i>15.M.X Greater recognition and encouragement of planting permanent forest (not for harvest) or allowing native regeneration. Assistance could include rates rebate and funding for control of wilding pines.</i></b></p> |       |          |  |               |         |
| 1146               | Sea Shepherd New Zealand   | 26    | Volume 2 | 4 Coastal Environment Zone             | 4.3.13.       | Oppose  |

| Sub No             | Submitter  | Point | Volume   | Chapter                                 | Provision      | Type    |
|--------------------|--|-------|----------|---|----------------|---------|
| Decision Requested | That the following new standards are included under Heading 4.3.13:<br><b>a) All road design, construction, and maintenance to be certified by a Chartered Professional Engineer (CPENZ) for land stability, and effective erosion and water control.</b><br><b>b) All areas of loose fill (soil) to have a grass cover established within 12 months of being created unless covered by natural revegetation.</b>  |       |          |   |                |         |
| <b>1146</b>        | Sea Shepherd New Zealand   | 27    | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4C       | Oppose  |
| Decision Requested | That a new policy and rules aimed at preventing wilding pines spreading beyond the borders of commercial forestry are included.<br>That a requirement to use the industry Wilding Spread Risk Calculator to assess the risk of tree spread for a site prior to planting taking place is included.  |       |          |   |                |         |
| <b>1146</b>        | Sea Shepherd New Zealand   | 28    | Volume 1 | 13 Use of the Coastal Environment       | Issue 13A      | Oppose  |
| Decision Requested | The submission does not include a decision requested.  |       |          |   |                |         |
| <b>1146</b>        | Sea Shepherd New Zealand   | 29    | Volume 1 | 13 Use of the Coastal Environment       | Policy 13.4.1  | Oppose  |
| Decision Requested | That the following amendments are made:<br>1. Habitat protection for Blue Cod, particularly from all fishing impacts in the Marlborough Sounds, should include all the enclosed bays and 463m off all islands (as at Long Island Marine Reserve) and includes fishing of any type only permitted in open channels.<br>2. Commercial dredging is not be allowed to resume at any time in the Queen Charlotte Sound, or ideally anywhere in the Marlborough Sounds.<br>3. There is a permanent and complete ban on recreation dredges in the Marlborough Sounds and that scallops should only be sustainably harvested by scuba/snorkel in future. |       |          |   |                |         |
| <b>1146</b>        | Sea Shepherd New Zealand   | 30    | Volume 1 | 13 Use of the Coastal Environment       | Issue 13E      | Support |
| Decision Requested | That permanent moorings should be provided in future marine protected areas and existing identified ecologically sensitive areas.  |       |          |   |                |         |
| <b>1146</b>        | Sea Shepherd New Zealand   | 31    | Volume 1 | 13 Use of the Coastal Environment       | Objective 13.7 | Support |

| Sub No             | Submitter  | Point | Volume   | Chapter                                | Provision     | Type    |
|--------------------|--|-------|----------|--|---------------|---------|
| Decision Requested | That future marine protected areas and existing identified ecologically sensitive areas are exempt from Objective 13.7.  |       |          |  |               |         |
| <b>1146</b>        | Sea Shepherd New Zealand   | 32    | Volume 1 | 13 Use of the Coastal Environment      | Policy 13.7.1 | Support |
| Decision Requested | That future marine protected areas and existing identified ecologically sensitive areas are exempt from Policy 13.7.1.   |       |          |  |               |         |
| <b>1146</b>        | Sea Shepherd New Zealand   | 33    | Volume 1 | 13 Use of the Coastal Environment      | Policy 13.7.2 | Support |
| Decision Requested | That future marine protected areas and existing identified ecologically sensitive areas are exempt from Policy 13.7.2.   |       |          |  |               |         |
| <b>1146</b>        | Sea Shepherd New Zealand   | 34    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | 15.           | Oppose  |
| Decision Requested | That the MEP include methods on how nitrogen levels will be monitored and managed in coastal waters, including the effects of forestry and Salmon farming ( <i>inferred</i> ).   |       |          |  |               |         |
| <b>1146</b>        | Sea Shepherd New Zealand   | 35    | Volume 2 | 4 Coastal Environment Zone             | 4.3.8.        | Oppose  |
| Decision Requested | <p>That the following new standard is included under Heading 4.3.8 Woodlot forestry harvesting:</p> <p><b><i>4.3.8.X All woody material &gt;100 mm diameter and &gt;3 metres in length from gullies (&gt;5000m or 0.5 hectare) must be removed as soon as practicable, but no later than 1 month, after harvest.</i></b></p> <p>That the above new standard also applies to forestry in the Rai/Pelorus River catchment, which feeds into the Pelorus Sound.</p> |       |          |  |               |         |
| <b>1146</b>        | Sea Shepherd New Zealand   | 36    | Volume 2 | 4 Coastal Environment Zone             | 4.7.1.        | Support |
| Decision Requested | Retain Rule 4.7.1 with the addition that there is no new commercial exotic forestry planting in the Marlborough Sounds.  |       |          |  |               |         |
| <b>1146</b>        | Sea Shepherd New Zealand   | 37    | Volume 2 | 4 Coastal Environment Zone             | 4.7.2.        | Support |
| Decision Requested | Reconsider prohibited activity 4.7.2. This could become an ongoing source of wilding pines. Suggest an option to harvest once (or poison) and take measures to control wilding pines while the land is regenerating.   |       |          |  |               |         |

| Sub No             | Submitter   | Point | Volume   | Chapter                    | Provision | Type            |

| Decision Requested | <p>That the entire section on <b>Fishing</b> (pages 13-11 to 13-12) is deleted and re-written with a view to placing emphasis on protecting and enhancing the marine environment, which is something the Marlborough District Council has both the authority and statutory obligation to do.</p> <p>The submission includes a draft of the proposed new section, which is provided below in italics.</p> <p><i>Marine Environment Protection, Restoration and Enhancement</i></p> <p><i>A healthy Marlborough Sounds marine environment is important for a number of reasons:</i></p> <ul style="list-style-type: none"> <li><i>• Is cultural significant and provides an on-going source of kai moana for Marlborough's tangata whenua iwi</i></li> <li><i>• Provides economic gain for commercial fishers</i></li> <li><i>• Supports a thriving aquaculture industry</i></li> <li><i>• Has an amenity value and cultural value for recreational users</i></li> <li><i>• Is of economic importance to the tourism industry and the region</i></li> <li><i>• Supports the complex biodiversity of the Sounds and therefore the health of marine ecosystems</i></li> </ul> <p><i>Under the Resource Management Act the Council is responsible for protecting habitats of indigenous fauna and maintaining indigenous biological diversity.</i></p> <p><i>By managing any adverse effects on marine environmental habitats, caused by activities over which it does have direct control, the Council can meet its statutory obligations under the RMA and Coastal Protection Act.</i></p> <p><i>The Council can take a lead role in supporting and encouraging marine environment protection, restoration and enhancement projects and in doing so will directly help to maintain and enhance healthy marine biodiversity in the Marlborough Sounds, which will support the cultural, spiritual and economic well-</i></p> |       |          |                                   |              |         |

*being of tangata whenua, Commercial and Recreational stakeholders, the tourism industry and the wider community.*

*The depletion of the marine habitat in the Marlborough Sounds is an area of concern. This was highlighted in Davidson Environmental Limited report prepared in 2011, Ecologically Significant Marine Sites in Marlborough and by others.*

*Maintaining a healthy marine environment is of particular importance to Marlborough's tangata whenua iwi.*

*I believe the Council has an advocacy role in ensuring a healthy marine environment is maintained in the Marlborough Sounds. Through environment thrive which will support abundant fisheries and aquaculture for future generations which will contribute to the economic, social, cultural and general community wellbeing of Marlborough's residents and visitors.*

*Objective - To ensure a healthy marine environment is maintained, protected, resorted and enhanced in the Marlborough Sounds.*

*Policy- That the recommendations of Davidson Environmental Limited report 2011, Ecologically Significant Marine Sites in Marlborough and the Expert Review Panel, be acted on and implemented with urgency to protect marine sites of significance with a 200 metre buffer zone.*

*Policy - That the disposition of mussel shells (whole or crushed) and other naturally occurring fouling organisms extracted as part of the factory processing of green shell mussel, to seawater, within designated buffer zones around Ecologically Significant Marine Sites, (and other appropriate sites as may be identified) for the purpose of benthic habitat protection, restoration or enhancement, become a permitted activity, subject to compliance with Council approval, guidelines and practices etc.*

*Policy - That the disposition of small, undersized, live mussels and other naturally occurring fouling organisms extracted as part of the factory processing of green shell mussel, to seawater, within designated buffer zones around Ecologically Significant Marine Sites, (and other appropriate sites as may be identified) for the purpose of benthic habitat protection, restoration or enhancement, become a permitted activity, subject to compliance with Council approval, guidelines and practices etc.*

*Policy- That the disposition of suitability graded, screened and washed, coarse sands, gravel, shingle, rock and shell to seawater, within designated buffer zones around Ecologically Significant Marine Sites, (and other appropriate sites as may be identified) for the purpose of benthic habitat protection, restoration or enhancement, become a permitted activity, subject to prior Council approval, and compliance with Council instructions, guidelines and practices etc.*

*Policy - Support community groups working towards ensuring a healthy marine environment is maintained in the Marlborough Sounds. Often local community groups provide the initial impetus for responding to issues and it is important to support these groups where possible.*

*Methods of implementation:*

- Follow the recommendation contained in Davidson Environmental Limited report 2011, Ecologically Significant Marine Sites in Marlborough and act urgently to protect marine sites of significance.*
- Create 'buffer zones' of 100 to 200 metres around the protected marine sites of significance.*
- Support initiatives of community groups working towards a healthy marine environment in the Marlborough Sounds by providing advice and financial support.*
- Engage in dialogue with the Mussel Industry to: develop a strategy to enhance the buffer zones (and other areas as may become apparent) by the controlled placement of discarded crushed or whole mussel shells and other marine material which is a waste bi-product of mussel processing.*
- Engage with Contractors involved in dredging operations either in the Sounds, estuaries or river mouths to assess the suitability of screened washed material to be placed in the buffer zones of protected marine sites of significance.*

- *Engage with Community Groups and Science to explore and implement habitat restoration and enhancement through the harvesting of healthy sea grass from areas of abundance and replanting in areas where sea grasses have become depleted.*

|--------------------|--|-------|----------|---------------------------------|----------------|-----------------|
| Decision Requested | Amend the explanation to the Policy as follows (bold) -<br><br><i>"Currently, a wide range of primary productive land uses are undertaken in Marlborough's rural environments, from viticulture to extensive forestry, pastoral farming, dairy farming and cropping. <b>It is also acknowledged that the extraction of rock and associated material. For instance, protection and development needs to occur at the site of raw material.</b> This policy provides for those uses to continue, which will assist in achieving Objective 14.1, although the management regime in the MEP will include controls to manage adverse effects. At times there may be a change in land use or management practices for primary production to enhance the efficient use of land resources and the MEP does not intend to unduly curtail any opportunity for this to occur. However, the management framework for rural environments, which includes rural areas within the Marlborough Sounds and elsewhere in the District, does include standards to maintain environmental quality, character and amenity values."</i><br><br><i>(Inferred)</i> |       |          |                                 |                |                 |

|--------------------|--|-------|----------|--------------------------|---------------|-----------------|
| Decision Requested | <p>That:</p> <ol style="list-style-type: none"> <li>1. MDC in conjunction with the local viticulture industry should research methods of disposal of cca treated vineyard (and other) posts and timber. At present, my understanding is that high temperature pyrolysis is the only safe way of disposing of such treated timber. To the best of my knowledge, no such facility exists in New Zealand or Australia, where the disposal problem is more acute.</li> <li>2. Ban the use of such vineyard posts in Marlborough unless a safe way of disposal of the stockpiles of such broken and discarded posts can be found.</li> <li>3. Until such time as a safe disposal method is created by MDC, ensure that the requirements of RMA and NES are met by vineyard owners and operators and monitor, record and manage such sites as contaminated under the existing HAIL protocol. EPA of South Australia has written rules for the intermediate storage of such treated timber until such time as safe disposal is available. The rules are aimed at minimising air, water and soil contamination.</li> </ol>   |       |          |                          |               |                 |
| <b>592</b>         | Clifford John Smith  | 2     | Volume 4 | Zoning Maps              | Zoning Map 60 | Oppose          |
| Decision Requested | <ol style="list-style-type: none"> <li>1. Review some zoning, including Rural Residential, Urban Residential, Rural Environment, Business 2 to better reflect Wairau Valley Township (<i>inferred</i>).</li> <li>2. Review speed limits.</li> <li>3. Define "Wairau Valley Township" geographically.</li> <li>3. Explain the provision for future residential expansion of the "Township".</li> </ol>  |       |          |                          |               |                 |
| <b>592</b>         | Clifford John Smith  | 3     | Volume 2 | 3 Rural Environment Zone | 3.3.5.1.      | Support in Part |
| Decision Requested | <p>The submission does not identify the decision requested and the standard(s) to which changes are to be made. <b><i>The following amendments have therefore, been inferred.</i></b></p> <p>That the following amendments (strike-through and bold) are made to Standard 3.3.5.1:</p> <p><i>3.3.5.1. A Category A or Category B device must not be operated:</i></p> <p><i>(c) within 160 <b>500m of Rural Residential or Urban Residential Zones</b> <del>the boundary or notional boundary of the nearest dwelling, visitor accommodation or other habitable building (except a dwelling, visitor accommodation or other habitable building on the same property as the audible bird-scaring device);</del></i></p> <p><i>(d) such that sound is emitted at a level greater than 65 dB LAE, measured at or within the <b>property</b> boundary (Urban Residential 1, Urban Residential 2 (including Greenfields) or Urban Residential 3 Zones, and Coastal Living and Rural Living Zones) <del>or notional boundary (Rural Environment or Coastal Environment Zones) of the nearest dwelling, visitor accommodation or other habitable building (except a dwelling, visitor accommodation or other habitable building on the same property as the audible bird-scaring device).</del></i></p> |       |          |                          |               |                 |
| <b>592</b>         | Clifford John Smith  | 4     | Volume 2 | 3 Rural Environment Zone | 3.3.5.1.      | Oppose          |

| 1158               | Spark New Zealand Trading Limited   | 1     | Volume 1 | 1 Introduction                          | Guiding principles | Support         |
| Decision Requested | Retain guiding principle relating to reverse sensitivity.   |       |          |   |                    |                 |
| 1158               | Spark New Zealand Trading Limited   | 2     | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4B           | Support in Part |
| Decision Requested | <p>Amend paragraph 1 beneath Issue 4B as follows:</p> <p><i>We rely on a range of physical resources to allow our communities function on a day-by-day basis. These resources include the water, stormwater and waste disposal services provided to townships and small settlements; the transport links within Marlborough and connecting Marlborough to the remainder of the country; the provision of electricity and telecommunications; and, on the Lower Wairau Plain, the drainage of land. Collectively, this infrastructure is <del>regionally</del> significant due to the contribution it makes to our social and economic wellbeing, health and safety. <b>Some of infrastructure is also nationally important, such as the</b> <del>Other infrastructure in (e.g. RNZAF Base Woodbourne, -) or running through Marlborough (e.g. the National Grid, the telecommunications network</del> and state highways) <del>also has national importance.</del> It is important that <del>this strategic</del> <b>all</b> infrastructure is able to operate efficiently, effectively and safely on an ongoing basis for community wellbeing. The ability to maintain, upgrade and replace existing infrastructure without significant constraint is important in this respect. Occasionally, new infrastructure may be required to provide for growth within the district.</i></p> |       |          |   |                    |                 |

|--------------------|--|-------|----------|-----------------------|----------------|---------|
| Decision Requested | Amend Objective 11.1 as follows:<br><i>Objective 11.1 – Reduce the risks to life, <b>and</b> property and regionally significant infrastructure from natural hazards. Natural hazards can have significant adverse effects on individuals and the community, including loss of life, personal injury, damage to property and disruption of day-to-day life, business and the provision of community infrastructure. For this reason, the objective seeks to reduce the risks and consequences of natural hazards. This objective also implements direction from the CDEMP, which signals that resource management provisions have an important role to play in risk reduction.</i> |       |          |                       |                |         |

| <b>143</b>         | Starborough Farming Company Ltd  | 1     | Volume 3 | Appendix 6 Environmental Flows and Levels | Schedule 3                                | Oppose |
| Decision Requested | <p>Remove the blanket cut off to all Springs water .</p> <p>Treat all Wairau Aquifer users equally (not just Springs sector users),and consider implementing a rationing restriction when the monitor wells drop below the set limit (example. 11.8m for Northern Springs). This would give all farmers/growers the opportunity to prioritise where the reduced volume of available water is utilised (not a blanket cut to only Springs Area – Northern, Central, Urban water users).</p> <p>Before implementing a blanket restriction wait for more scientific evidence of the complex aquifer/springs recharge process. A better understanding is required of the long term trend of the aquifer levels before setting lower limits and/or full cut off thresholds.</p> |       |          |   |   |        |

| Decision Requested | Only biodegradable material can be disposed of in farm dumps. |       |          |                            |            |                 |
| <b>1179</b>        | Thomas Robert Stein   | 19    | Volume 2 | 3 Rural Environment Zone   | 3.3.21.    | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter                    | Provision | Type            |
|--------------------|--|-------|----------|----------------------------|-----------|-----------------|
| Decision Requested | I <b>support</b> the need to exclude stock from waterways <b>however</b> the rule as it stands in 3.3.21.2 and 3.3.21.3 requires a high level of monitoring (presumably from council) and would be difficult to interpret on site by a land manager. Therefore, I <b>seek</b> to exclude all stock from all of the rivers and their tributaries listed in tables 15.1 and 15.2 of Volume 1 of this plan <b>and</b> for other rivers adopt rules similar to other areas that state "no heavy pugging or bare soil due to repeated or intense stock trampling should be obvious alongside or within the beds of rivers". |       |          |                            |           |                 |
| <b>1179</b>        | Thomas Robert Stein  | 20    | Volume 2 | 4 Coastal Environment Zone | 4.3.20.   | Support in Part |
| Decision Requested | I <b>support</b> the need to exclude stock from waterways <b>however</b> the rule as it stands in 4.3.20.2 and 4.3.20.3 requires a high level of monitoring (presumably from council) and would be difficult to interpret on site by a land manager. Therefore, I <b>seek</b> to exclude all stock from all of the rivers and their tributaries listed in tables 15.1 and 15.2 of Volume 1 of this plan <b>and</b> for other rivers adopt rules similar to other areas that state "no heavy pugging or bare soil due to repeated or intense stock trampling should be obvious alongside or within the beds of rivers". |       |          |                            |           |                 |
| <b>1179</b>        | Thomas Robert Stein  | 21    | Volume 2 | 3 Rural Environment Zone   | 3.3.11.   | Support in Part |
| Decision Requested | I <b>support</b> the need to limit indigenous vegetation clearance <b>however</b> rule 3.3.11.2 should not apply to 3.3.11.3. There is so little indigenous vegetation remaining within these threatened environments that any further loss should require a consent.  |       |          |                            |           |                 |
| <b>1179</b>        | Thomas Robert Stein  | 22    | Volume 2 | 3 Rural Environment Zone   | 3.3.11.2. | Oppose          |
| Decision Requested | I <b>oppose</b> rule 3.3.11.2(a) which allows for indigenous vegetation clearance under or anywhere within 50 metres of commercial or woodlot forest or shelterbelt. Clearance of vegetation growing under forestry is ok but 50 metres allows for large areas to be cleared. For example this would allow 100m wide tongues of native forest to be cleared within a commercial forest or woodlot. Resource consent should be required to achieve this.  |       |          |                            |           |                 |
| <b>1179</b>        | Thomas Robert Stein  | 23    | Volume 2 | 3 Rural Environment Zone   | 3.3.11.5. | Oppose          |
| Decision Requested | I <b>oppose</b> rule 3.3.11.5. There is so little indigenous forest taller than 6 metres remaining that all clearance of this forest should require a consent.   |       |          |                            |           |                 |
| <b>1179</b>        | Thomas Robert Stein  | 24    | Volume 2 | 4 Coastal Environment Zone | 4.3.10.   | Support in Part |
| Decision Requested | I <b>support</b> the need to limit indigenous vegetation clearance <b>however</b> rule 4.3.10.2 should not apply to 4.3.10.3. There is so little indigenous vegetation remaining within these threatened environments that any further loss should require a consent.  |       |          |                            |           |                 |
| <b>1179</b>        | Thomas Robert Stein  | 25    | Volume 2 | 4 Coastal Environment Zone | 4.3.10.2. | Oppose          |

| Sub No             | Submitter   | Point | Volume   | Chapter                          | Provision | Type   |
|--------------------|---|-------|----------|----------------------------------|-----------|--------|
| Decision Requested | I <b>oppose</b> rule 4.3.10.3(a) which allows for indigenous vegetation clearance under or anywhere within 50 metres of commercial or woodlot forest or shelterbelt. Clearance of vegetation growing under forestry is ok but 50 metres allows for large areas to be cleared. For example this would allow 100m wide tongues of native forest to be cleared within a commercial forest or woodlot. Resource consent should be required to achieve this. |       |          |                                  |           |        |
| <b>1179</b>        | Thomas Robert Stein   | 26    | Volume 2 | 4 Coastal Environment Zone       | 4.3.10.5. | Oppose |
| Decision Requested | I <b>oppose</b> rule 4.3.10.5. There is so little indigenous forest taller than 6 metres remaining that all clearance of this forest should require a consent.  |       |          |                                  |           |        |
| <b>1179</b>        | Thomas Robert Stein   | 27    | Volume 2 | 3 Rural Environment Zone         | 3.3.10.2. | Oppose |
| Decision Requested | I therefore seek that the rule should not apply to restoration planting of indigenous species.  |       |          |                                  |           |        |
| <b>1179</b>        | Thomas Robert Stein   | 28    | Volume 2 | 4 Coastal Environment Zone       | 4.3.9.2.  | Oppose |
| Decision Requested | I therefore seek that the rule should not apply to restoration planting of indigenous species.  |       |          |                                  |           |        |

| Decision Requested | Remove the word Deer from the definition of " Intensively Farmed Livestock " due to the fact that deer move quicker and less often than other classes of livestock.<br><br>Why have sheep been left out as they would create a greater impact when moving through a wet bed of a water body ?   |       |          |  |   |                 |
| <b>256</b>         | Justin Stevens  | 2     | Volume 2 | 25 Definitions                         | 25.                                       | Support in Part |
| Decision Requested | 1. I believe this definition needs to be clearer as the current wording is open to an individuals interpretation. An example would be that the" Hog Swamp Creek" may not be considered " intermittently flowing " as it has not flowed for the last two years. My assumption would be that it is not an intermittently flowing creek and would not be subject to the current Marlborough Environment Plan.<br><br>2. I believe that the Marlborough District Council need's to be clear and concise on each and every River ,Stream and Creek or body of water and to have a " catchment-specific plan "( Volume 1 page 15-12 ) for every River, Stream and Creek or body of water so as to remove any miss interpretation of rules and definition's. |       |          |  |   |                 |
| <b>256</b>         | Justin Stevens  | 3     | Volume 2 | 25 Definitions                         | 25.                                       | Oppose          |
| Decision Requested | Remove the word Deer from the definition of " Intensively Farmed Livestock " due to the fact that deer move quicker and less often than other classes of livestock.<br><br>Why have sheep been left out as they would create a greater impact when moving through a wet bed of a water body ?   |       |          |  |   |                 |
| <b>540</b>         | Arthur Stewart  | 1     | Volume 1 | 2 Background                           | Identifying regionally significant issues | Oppose          |

| Sub No             | Submitter  | Point | Volume   | Chapter                                 | Provision     | Type   |
|--------------------|--|-------|----------|---|---------------|--------|
| Decision Requested | Add a new issue to Volume 1 to recognise that aquaculture, farming, forestry and vineyards are regionally significant sectors in Marlborough's economy that sustains our communities.      |       |          |   |               |        |
| <b>540</b>         | Arthur Stewart   | 2     | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4B      | Oppose |
| Decision Requested | Amend issue 4B to recognise that regionally significant sectors are at risk if unable to operate efficiently and effectively.  |       |          |   |               |        |

| Decision Requested | The Trustees of Te Atiawa seek that objectives, policies, methods, rules, standards, matters of control and discretion be created and included in all chapters that relate to cultural values/issues to ensure that they are addressed.   |       |          |              |  |                 |
| <b>1186</b>        | Te Atiawa o Te Waka-a-Maui  | 7     | Volume 2 | All          |  | Support in Part |
| Decision Requested | Te Atiawa seeks the inclusion of a permitted rule within all Zones of the MEP whereby a pou or other structure/carving/sign can be erected to identify an area of Maori significance. Least Te Atiawa is left with no option but to oppose the recognition of all significant sites within the MEP.   |       |          |              |  |                 |
| <b>1186</b>        | Te Atiawa o Te Waka-a-Maui  | 8     | Volume 4 | Overlay Maps | Ecologically Significant Marine Sites 6  | Support         |
| Decision Requested | Te Atiawa seeks that there be an appropriate buffer provided around these sites within the Queen Charlotte Sound, Tory Channel, and Port Gore so that no further destruction can occur and some restoration/expansion within these sites can occur. Further, the Trustees seek preservation of customary practices and processes within these sites (specifically around Arapaoa Island). |       |          |              |  |                 |

| Decision Requested | I request that the council consider climate change and potentially limit water permits to a lesser duration to allow for the changing climate that may bring about longer periods of drought.  |       |          |   |                |                 |
| <b>166</b>         | Te Runanga o Toa Rangatira   | 8     | Volume 1 | 14 Use of the Rural Environment         | Policy 14.1.10 | Oppose          |

| Sub No             | Submitter  | Point | Volume   | Chapter                                | Provision    | Type            |
|--------------------|--|-------|----------|--|--------------|-----------------|
| Decision Requested | I request that this policy is deleted.   |       |          |  |              |                 |
| <b>166</b>         | Te Runanga o Toa Rangatira   | 9     | Volume 1 | 15 Resource Quality (Water, Air, Soil) | 15.          | Support in Part |
| Decision Requested | I request that the council add a dedicated policy for viticulture land use and develop subsequent methodologies including rules for this land use.   |       |          |  |              |                 |
| <b>166</b>         | Te Runanga o Toa Rangatira   | 10    | Volume 1 | 19 Climate Change                      | 19.          | Support in Part |
| Decision Requested | I request the council to consider this issue and make provision for further research in this matter.   |       |          |  |              |                 |
| <b>166</b>         | Te Runanga o Toa Rangatira   | 11    | Volume 1 | 3 Marlborough's tangata whenua iwi     | 3.M.2        | Support in Part |
| Decision Requested | Change the second sentence of this paragraph to: "The Council must also have regard to the Statutory Acknowledgement relating to a statutory area. Iwi must be consulted to identify whether they are an affected party in relation to..."                             |       |          |  |              |                 |
| <b>166</b>         | Te Runanga o Toa Rangatira   | 12    | Volume 1 | 3 Marlborough's tangata whenua iwi     | 3.M.2        | Support in Part |
| Decision Requested | Add "authority" after the first "iwi".   |       |          |  |              |                 |
| <b>166</b>         | Te Runanga o Toa Rangatira   | 13    | Volume 1 | 3 Marlborough's tangata whenua iwi     | 3.M.2        | Support in Part |
| Decision Requested | Add an appendix of all Statutory acknowledgements relating to the MDC area. This will satisfy the last sentence in the 3.M.2 paragraph.  |       |          |  |              |                 |
| <b>166</b>         | Te Runanga o Toa Rangatira   | 14    | Volume 1 | 3 Marlborough's tangata whenua iwi     | Policy 3.1.4 | Support in Part |
| Decision Requested | Change the wording in Policy 3.1.4. to Supporting iwi to develop iwi management plans. This will allow iwi to build capability and capacity in this space. It will ultimately help the council meets its requirements and so it should have resource dedicated for it. |       |          |  |              |                 |

| Sub No             | Submitter   | Point | Volume   | Chapter                            | Provision     | Type            |
|--------------------|---|-------|----------|------------------------------------|---------------|-----------------|
| <b>166</b>         | Te Runanga o Toa Rangatira  | 15    | Volume 1 | 3 Marlborough's tangata whenua iwi | Objective 3.4 | Support in Part |
| Decision Requested | Not constrain the papakainga opportunity to only Maori land. It should be available to iwi on any kind of land under the rules.   |       |          |                                    |               |                 |
| <b>166</b>         | Te Runanga o Toa Rangatira  | 16    | Volume 1 | 3 Marlborough's tangata whenua iwi | 3.            | Support in Part |
| Decision Requested | There should be a specific kaitiakitanga objective not blended as it is in the MEP. The Mauri objective could also be housed here.  |       |          |                                    |               |                 |
| <b>166</b>         | Te Runanga o Toa Rangatira  | 17    | Volume 1 | 3 Marlborough's tangata whenua iwi | 3.            | Support in Part |
| Decision Requested | <p>Develop specific rules and methods to ensure that councils legal obligations are met. This could include:</p> <ol style="list-style-type: none"> <li>1. requiring resource applicants to consult with iwi in certain areas.</li> <li>2. Kaitiakitanga as a permitted activity in all zones to allow for maori to have a relationship with their culture and traditions and their lands, waters, sites, waahi tapu and other taonga.</li> <li>3. Regional rules developed to ensure consultation between iwi, applicants and MDC. Develop a Tanagata Whenua programme, monitoring, support, information, guidelines. This could include Cultural health monitoring to measure the success of Policy 3.1.13</li> <li>4. 5.M.2 Add the River and Freshwater Advisory Committee here.</li> <li>5. 5.M.10 Make a rule to consult with iwi in and around coastal statutory areas.</li> <li>6. 8M11 Partnership should highlight the main partner (iwi). Add a description of this relationship here and or refer to the Tangata Whenua chapter.</li> </ol> |       |          |                                    |               |                 |

| <b>1192</b>        | The Fertiliser Association of New Zealand  | 40    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | 15.M.25        | Support in Part |
| Decision Requested | <p>Amend 15.M.25 as follows:</p> <p><u>Farm Management plans for dairy farming <del>intensively farmed livestock</del>.</u></p> <p><del>Water Quality Farm Management Plans can be used as a means of demonstrating on an ongoing basis that any adverse effects on water quality resulting from dairy and <u>intensively farmed livestock</u> will be avoided, remedied or sufficiently mitigated. They provide the ability to consider all farm management practices with the potential to adversely affect surface or groundwater quality or wetlands and manage these risks in an integrated way. This also enables the dairy farmer to progressively plan farm upgrades based on priority or in the case of new farms, at the time of establishment. Water Quality Farm Management Plans can be used to support applications for land use consent to convert the use of land to dairying.</del></p> <p><u>The Farm Management Plan should include:</u></p> <ul style="list-style-type: none"> <li>- <u>Nutrient Management Plans. These will be required as a means to demonstrate how nutrient inputs associated with dairy <del>and intensively farmed</del> <u>livestock</u> are to be managed to ensure any adverse effects of water quality will be avoided, remedied or mitigated. Nutrient Management Plans should be written documents that incorporate a nutrient budget developed by <del>an accredited nutrient adviser</del> <u>a Certified Nutrient Management Advisor</u> using OVERSEER® or similar. This should describe how the major plant nutrients (nitrogen, phosphorus, sulphur and potassium) and any other nutrients of importance to specialised crops will be managed (including all sources from dairy effluent systems, animal discharges and/or atmospheric nitrogen fixation.</u></li> <li>- <u>Good management practices.</u></li> <li>- <u>Riparian management plans.</u></li> <li>- <u>Details of the property including location of waterbodies.</u></li> </ul> |       |          |  |                |                 |
| <b>1192</b>        | The Fertiliser Association of New Zealand  | 41    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Issue 15F      | Support in Part |
| Decision Requested | <p>Amend Issue 15F Explanation:</p> <p><del>Although fertiliser use has decreased over time in Marlborough, many primary producers still apply it to maintain the nutrient status of the soil and therefore soil productivity. Excessive fertiliser application creates the potential for nutrients such as nitrogen and phosphate to runoff into adjoining rivers and wetlands or leach into underlying groundwater.</del></p> <p><u>Healthy productive soils are a finite natural resource and essential for the social, cultural and economic well-being of people and communities. It is important to manage the potential for adverse effects of land uses on soil health and function and practices including vegetation clearance, earthworks and forestry harvesting where they adversely affect soil quality or induce or exacerbate soil erosion.</u></p> <p><u>In addition, accelerated erosion from land use resulting in additional deposition of sediment in rivers and lakes can have a major impact on aquatic ecosystems and instream values.</u></p>   |       |          |  |                |                 |

Decision Requested

For clarity amend Rule 3.3.28 as follows:

3.3.28.1. The discharge must not occur into or onto a Soil Sensitive Area without demonstrating appropriate controls with a Nutrient Management Plan or Farm Management Plan.

3.3.28.2. The discharge must not occur within:

(a) 50m of a bore unless the bore intercepts the confined layer of Riverlands FMU or the confined layer of the Wairau Aquifer FMU,

(b) 20m of a river, lake, Significant Wetland, drainage channel or Drainage Channel Network;

(c) 10m of the boundary of any adjacent land in different ownership.

3.3.28.3. A High rate discharge system must not be used to discharge onto land with an average slope of 7° or greater, and the slope must not exceed 11.3° (1:5) at any point.

3.3.28.4. The discharge must not occur when the soil moisture exceeds field capacity.

3.3.28.5. Ponding must not be detectable beyond 24 hours after the discharge.

3.3.28.6. The discharge must not result in anaerobic soil conditions.

3.3.28.7. The total cumulative nitrogen (N) loading from all discharges on the areal extent of the land to be used for the discharge must not exceed 200kg N/hectare/year (excluding N from direct animal inputs) unless there is provision to manage nutrient discharges demonstrating appropriate controls with a Farm or Nutrient Management Plan to be provided to the Council.

3.3.28.8. For a new dairy farm established after 9 June 2016 and from 9 June 2019, for a dairy farm existing at 9 June 2016, the following standards apply:

3.3.28.1 there must be an on-site storage system with a minimum of 3 months storage or, if less than 3 months, the storage capacity must be certified by a recognised professional as being sufficient to allow for discharges to be deferred so that standards 3.3.28.4, 3.3.28.5 and 3.3.28.6 are not breached. The certification must be provided to the Council prior to effluent entering the storage system.

~~3.3.28.9.2. For a new dairy farm established after 9 June 2016,~~ the storage system must be sealed with an impermeable material certified by a recognised professional.

~~3.3.28.10.8.3. For a new dairy farm established after 9 June 2016,~~ the storage system must not be located within:

(a) 20m of a river, lake, Significant Wetland, drainage channel or Drainage Channel Network;

(b) 20m of the boundary of any adjacent land in different ownership;

(c) a Flood Hazard Area.

~~3.3.28.11. From 9 June 2019, Standards 3.3.28.8, 3.3.28.9 and 3.3.28.10 apply to a dairy farm existing at 9 June 2016 and a new dairy farm established after 9 June 2016.~~

| Decision Requested | <p>Appendix X - Farm Management Plan Requirements</p> <p>Part A - Farm Management Plans</p>   |       |          |  |           |                 |

A Farm Management Plan can be based on either of:

1. The material set out in Part B below;

OR

2. Industry prepared Farm Management Plan templates and guidance material that:

(a) Include the following minimum components:

(i) The matters set out in 1, 2, and 3 of Part B below;

(ii) Contains a methodology that will enable development of a plan that will identify actual and potential environmental effects and risks specific to the property, addresses those effects and risks and has a high likelihood of appropriately avoiding, remedying or mitigating those effects;

(iii) Performance measures that are capable of being audited; and

(b) Has been approved as meeting the criteria in (a) and being acceptable to the Marlborough District Council by the Chief Executive of the Marlborough District Council.

#### Part B - Farm Management Plan Default Content

The plan requirements will apply to:

1. a plan prepared for an individual property or farm enterprise; or

2. a plan prepared for an individual property which is part of a collective of properties, including an irrigation scheme, principal water supplier, or an Industry Certification Scheme.

The plan shall contain as a minimum:

1. Property or farm enterprise details

(a) Physical address

(b) Description of the ownership and name of a contact person

(c) Legal description of the land and farm identifier

2. A map(s) or aerial photograph at a scale that clearly shows:

(a) The boundaries of the property or land areas comprising the farm enterprise.

(b) The boundaries of the main land management units on the property or within the farm enterprise.

- (c) The location of permanent or intermittent rivers, streams, lakes, drains, ponds or wetlands.
  - (d) The location of riparian vegetation and fences adjacent to water bodies.
  - (e) The location on all waterways where stock access or crossings occurs.
  - (f) The location of any areas within or adjoining the property that are identified in a District Plan as "significant indigenous biodiversity".
3. A list of all Marlborough District Council resource consents held for the property or farm enterprise.
4. An assessment of the adverse environmental effects and risks associated with the farming activities and how the identified effects and risks will be managed, including irrigation, application of nutrients, effluent application, stock exclusion from waterways, offal pits and farm rubbish pits.
5. A description of how each of the following objectives will, where relevant, be met.
- (a) Nutrient management: To provide for sustainable production while minimising nutrient losses to water
  - (b) Irrigation management: To operate irrigation systems efficiently and ensuring that the actual use of water is monitored and is efficient.
  - (c) Soils management: To maintain or improve the physical and biological condition of the soils in order to minimise the movement of sediment, phosphorus and other contaminants to waterways.
  - (d) Collected animal effluent management: To manage the risks associated with the operation of effluent systems are compliant 365 days of the year.
  - (e) Livestock management: To manage wetlands and water bodies so that livestock are excluded as far as practicable from water, to avoid damage to the bed and margins of a waterbody, and to avoid the direct input of nutrients, sediment, and microbial pathogens.
  - (f) Offal pits: To manage the numbers and locations of pits to minimise risks to health and water quality.

The plan shall include for each objective in 5 above:

- (a) detail commensurate with the scale of the environmental effects and risks;
- (b) defined measurable targets that clearly set a pathway and timeframe for achievement;
- (c) a description of the good management practices together with actions required;
- (d) the records required to be kept for measuring performance and achievement of the target.

## Part C - Farming Information

Information to inform development of the Farm Management Plan includes the following:

1. Information detailing:

- (a) The site area to which the farming activity relates;
- (b) Monthly stocking rates (numbers, types and classes) including breakdown by stock class;
- (c) Annual yield of arable or horticultural produce;
- (d) A description of the farm management practices used on each block including:
  - (i) Ground cover - pasture, crops, fodder crops, non-grazed areas (including forestry, riparian and tree areas) and any crop rotation;
  - (ii) Stock management - lambing/calving/fawning dates and percentages, any purchases and sales and associated dates, types and age of stock;
  - (iii) Fertiliser application - types and quantities per hectare for each identified block, taking into account any crop rotation;
  - (iv) Quantities of introduced or exported feed;
- (e) Farm animal effluent, pig farm effluent, feed pad and stand-off pad effluent management including:
  - (i) Area of land used for effluent application;
  - (ii) Annual nitrogen loading rate and nitrogen load rate per application;
  - (iii) Instantaneous application rate;
- (f) Irrigation - areas, rates, monthly volumes and system type.

This information is to be collected for the period 1 July to 30 June.

| Decision Requested | <p>Amend text on pages 2-2 and 2-3 by adding a new point after (a) and amending point (d), as follows:</p> <p><i>(new) <u>Natural and physical resources exist on different spatial scales, some of which extend well beyond Marlborough. Resources should be managed at a scale appropriate to the nature of the resource.</u></i></p> <p><i>(d) That natural and physical resources cannot be managed without having regard to the social, economic and cultural interests of the community in Marlborough <u>and New Zealand as a whole.</u></i></p>  |       |          |                |  |                 |

| Sub No             | Submitter   | Point | Volume   | Chapter                                 | Provision  | Type   |
|--------------------|---|-------|----------|---|--|--------|
| 710                | The Fishing Industry Submitters   | 3     | Volume 1 | 2 Background                            | Relationship of the MEP to other policy statements, standards and strategies | Oppose |
| Decision Requested | Amend the text on page 2-8 to explicitly recognise the relevance of the Fisheries Act and associated provisions in achieving the sustainable management of natural and physical resources.  |       |          |   |  |        |
| 710                | The Fishing Industry Submitters   | 4     | Volume 1 | 3 Marlborough's tangata whenua iwi      | Policy 3.1.1   | Oppose |
| Decision Requested | <p>Amend the introductory text on page 3-2 to acknowledge the Fisheries Deed of Settlement and its implementation under the Maori Fisheries Act 2004.</p> <p>Amend Policy 3.1.1 by adding a new clause, as follows:</p> <p><i>Management of natural and physical resources in Marlborough will be carried out in a manner that: ...</i></p> <p><u><i>(f) recognises the fishing rights allocated and protected under the Maori Fisheries Settlement and avoids, remedies or mitigates any adverse effects on the exercise of those rights caused by activities managed under the RMA</i></u></p>  |       |          |   |  |        |
| 710                | The Fishing Industry Submitters   | 5     | Volume 1 | 4 Use of Natural and Physical Resources | Objective 4.1  | Oppose |
| Decision Requested | <p>Amend the explanatory text of Objective 4.1 by adding, after the words '<i>Freshwater is also used for the processing of crops</i>':</p> <p><u><i>Our fishing and aquaculture sectors rely on security of access to the coastal marine area, high coastal water quality, and healthy marine ecosystems.</i></u></p> <p>Add a new Policy and explanatory text following Policy 4.1.1, as follows:</p> <p>Policy: <u><i>Recognise the rights and interests of users of fisheries resources by integrating the Council's responsibilities under the RMA with the management of fisheries under the Fisheries Act 1996.</i></u></p> <p>Explanation: <u><i>Fisheries resources are managed by the Ministry for Primary Industries under the Fisheries Act 1996. The purpose of the Act is to provide for the utilisation of fisheries resources while ensuring sustainability. The Council has an important role, through the provisions of the MEP, to achieve the integrated management of natural and physical resources of the region. This includes fisheries resources. While the Council is not responsible for managing fisheries resources directly, it can, through the provisions of the MEP, ensure that integrated management is achieved and that adverse effects on fisheries resources and the management of fisheries under the Fisheries Act are avoided, remedied or mitigated. Policies throughout the MEP help achieve these outcomes.</i></u></p> |       |          |   |  |        |

Decision Requested

The Marlborough Environment Centre SEEKS consideration of the following issues and inclusion in the MEP:

1. Consideration of the location and distribution of proposals involving Genetically Modified Organisms (GMOs) on a district basis, together with protection of rural resources for organic or biodynamic farming, are important resource management matters for consideration by territorial authorities in carrying out their functions under the RMA.

**Potential Adverse Effects**

2. The outdoor use of GMOs has a potential to cause significant adverse effects on the environment. Adverse effects could include (inter alia):

(a) biological or ecosystem harm;

(b) harm to other existing or potential forms of land use including:

(i) organic farming (including organic certification and the requirement to be GMO free); and

(ii) agricultural activities dependent on an uncontaminated environmental brand.

3. GMOs have the potential to adversely affect ecological, economic, and resource management values, and the social and cultural well-being of people, communities and tangata whenua.

4. Application of integrated management and a precautionary approach to GMOs under the RMA is the best available technique for managing the potential adverse effects posed by GMOs to other land uses within the district.

**Sustainable Management and Part II**

5. It is consistent with the sustainable management purpose and Part II of the RMA to establish district plan provisions (e.g. issues, objectives, policies, rules and methods) that manage the release, location and management of GMOs where they have the potential to adversely affect other land use activities.

That the following policies to be adopted by the Council under the Proposed Plan:

a. To adopt a precautionary approach to the management of GMOs by prohibiting the field-testing or release of a GMO.

b. To adopt a resource management framework for the management of GMO that is District specific taking into account environmental, economic and social well-being considerations.

To review the Plan provisions relating to GMOs, particularly if there is new information that becomes available on the benefits/adverse effects of a Genetically Modified Organism activity.

| Decision Requested | Remove the coastal occupancy charges section from the environment plan.   |       |          |                                   |               |        |
| <b>203</b>         | Thomas Norton Te Awaiti Ltd   | 2     | Volume 1 | 13 Use of the Coastal Environment | Policy 13.9.2 | Oppose |
| Decision Requested | Remove the proposed section completely of land linking and one mooring per parcel of land. The bays where new mooring are creating an over crowding may need to look at sharing moorings or pushing out moorings to slightly deeper water and having to row a bit further. In the old days some of our deceased family members rowed from Tory Channel to Picton and back so 150 meter row in a bay is not too far. |       |          |                                   |               |        |

| 1198               | Transpower New Zealand Limited  | 1     | Volume 1 | 2 Background                            | Relationship of the MEP to other policy statements, standards and strategies | Support in Part |
| Decision Requested | <p><b>Amend</b> the commentary in relation to national policy statements and national environmental standards in the 'Background' as follows:</p> <p><i>“Central government can also prepare national environmental standards: technical standards relating to the use, development and protection of natural and physical resources. Such national standards provide an opportunity to promote nationally the use of consistent standards, requirements or practices. National standards <u>prevails</u> <del>override</del> existing provisions in plans <del>that require a lesser standard</del>. A rule in a plan cannot duplicate or conflict with a provision in a <u>national standard</u>. National environmental standards for air quality, sources of human drinking water, telecommunications facilities, electricity transmission and managing contaminants in soil have effect.</i></p> <p><i><u>The National Policy Statement on Electricity Transmission 2008 (NPSET) and the National Environmental Standards for Electricity Transmission Activities 2009 (NESETA) only apply to the National Grid and do not apply to electricity distribution. The NPSET recognises the national significance of the National Grid in its entirety. The NPSET facilitates the operation, maintenance and upgrade of the existing transmission network and the establishment of new transmission assets. The NESETA sets out a national framework of permissions and consent requirements for activities on National Grid lines existing at 14 January 2010. Activities include the operation, maintenance and upgrading of existing lines but exclude the development of new lines (post 14 January 2010) and substations.</u>”</i></p> |       |          |   |  |                 |
| 1198               | Transpower New Zealand Limited  | 2     | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4B   | Support in Part |
| Decision Requested | <p><b>Amend</b> Issue 4B as follows:</p> <p><i>“The social and economic wellbeing, health and safety of the Marlborough community are at risk if <del>community</del> infrastructure, <u>and particularly nationally and regionally significant infrastructure</u>, is not able to operate, <u>upgrade and develop</u> efficiently, effectively and safely”</i></p>   |       |          |   |  |                 |
| 1198               | Transpower New Zealand Limited  | 3     | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4B   | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter                                 | Provision     | Type            |
|--------------------|--|-------|----------|---|---------------|-----------------|
| Decision Requested | <p><b>Amend</b> the first paragraph of the explanatory text to Issue 4B as follows:</p> <p><i>“We rely on a range of physical resources to allow our communities function on a day-by-day basis. These resources include the water, stormwater and waste disposal services provided to townships and small settlements; the transport links within Marlborough and connecting Marlborough to the remainder of the country; the provision of electricity and telecommunications; and, on the Lower Wairau Plain, the drainage of land. Collectively, this infrastructure is regionally significant due to the contribution it makes to our social and economic wellbeing, health and safety. <u>Central government has recognised the importance of electricity transmission through the National Policy Statement on Electricity Transmission (NPSET), which came into effect in 2008. The NPSET establishes that the need to operate, maintain, develop and upgrade the National Grid is a matter of national significance. The Objective of the NPSET is to recognise the national significance of the National Grid by facilitating its operation, maintenance, upgrade and development while managing adverse effects of, and on, it. Other infrastructure in (e.g. RNZAF Base Woodbourne) or running through Marlborough (e.g. <del>the National Grid and</del> state highways) also has national importance. It is important that this strategic infrastructure is able to operate, <u>upgrade and develop</u> efficiently, effectively and safely on an ongoing basis for community wellbeing. The ability to maintain, upgrade and replace existing infrastructure without significant constraint is important in this respect. <del>Occasionally, n</del>New infrastructure may be required to provide for growth within the district.”</u></i></p> |       |          |   |               |                 |
| <b>1198</b>        | Transpower New Zealand Limited   | 4     | Volume 1 | 4 Use of Natural and Physical Resources | Objective 4.2 | Support in Part |
| Decision Requested | <p><b>Amend</b> Objective 4.2 as follows:</p> <p><i>“[RPS, C, R, D]</i><br/> <b>Objective 4.2 – Efficient, effective and safe operation, <u>upgrade and development of nationally and regionally significant infrastructure</u></b><br/> <i>The community relies on the considerable infrastructure that has been developed to protect and support the population. It is essential for the social and economic wellbeing, health and safety of the Marlborough community that this critical infrastructure continues to operate <u>and develop</u> efficiently, effectively and safely on an ongoing basis. This includes the ability to maintain, upgrade and replace existing infrastructure.”</i></p>   |       |          |   |               |                 |
| <b>1198</b>        | Transpower New Zealand Limited   | 5     | Volume 1 | 4 Use of Natural and Physical Resources | Policy 4.2.1  | Support in Part |

| Sub No             | Submitter   | Point | Volume   | Chapter                                 | Provision    | Type            |
|--------------------|---|-------|----------|---|--------------|-----------------|
| Decision Requested | <p><b>Amend</b> Policy 4.2.1 as follows:</p> <p><i>“[RPS, C, R, D]</i></p> <p><b>Policy 4.2.1 – Recognise and provide for the social, economic, environmental, health and safety benefits from the following infrastructure, either existing or consented at the time the Marlborough Environment Plan became operative, as regionally significant:</b></p> <p>...</p> <p><b>(e) National Grid (the assets used or owned by Transpower New Zealand Limited);</b></p> <p>...</p> <p><i>The policy identifies infrastructure considered regionally significant due to its contribution to the social and economic wellbeing or health and safety of a large proportion of Marlborough’s population, or because of its strategic importance nationally. These benefits will be taken into account when developing district and regional rules and when considering resource consent applications, notices of requirement and plan change requests. <del>This policy recognises the significance of the infrastructure existing or consented at the time that the MEP becomes operative.</del>”</i></p> |       |          |   |              |                 |
| <b>1198</b>        | Transpower New Zealand Limited  | 6     | Volume 1 | 4 Use of Natural and Physical Resources | Policy 4.2.2 | Support in Part |
| Decision Requested | <p><b>Amend</b> Policy 4.2.2 as follows:</p> <p><i>“[RPS, C, R, D]</i></p> <p><b>Policy 4.2.2 – Protect regionally significant infrastructure from the adverse effects of other subdivision, use and development activities.</b></p> <p><i>The effective and efficient operation of regionally significant infrastructure can be protected by avoiding the establishment of incompatible activities in close proximity to the infrastructure in the first place. This policy recognises that there has already been significant investment in the infrastructure and that there are usually considerable difficulties relocating the infrastructure in the event of conflict with other land uses. In respect of the electricity transmission network, it is a requirement of the National Policy Statement on Electricity Transmission (NPSET) for decision makers to manage activities to avoid reverse sensitivity effects on the network <u>to ensure that the National Grid is not compromised as much as possible.</u>”</i></p>   |       |          |   |              |                 |

| Decision Requested | <p><b>Amend</b> Method 4.M.8 as follows:</p> <p><b><i>“4.M.8 Designations</i></b><br/> <i>Encourage requiring authorities (as defined by Section 166 of the RMA) to utilise designations as an effective means of identifying, <u>developing</u> and protecting <u>nationally and regionally significant infrastructure</u>. Designations can then be explicitly included in the MEP.”</i></p>   |       |          |   |              |                 |
| 1198               | Transpower New Zealand Limited   | 11    | Volume 1 | 4 Use of Natural and Physical Resources | 4.M.9        | Support in Part |
| Decision Requested | <p><b>Amend</b> Method 4.M.9 as follows:</p> <p><b><i>“4.M.9 District and regional rules</i></b><br/> <i>Rules will be used to <u>provide for</u> <del>enable activities associated with the operation, maintenance, alteration, minor upgrading and replacement</del> <u>development of nationally and regionally significant infrastructure</u>. Standards will specify the extent of works involved with any of these activities.<br/> Rules will be used to control the proximity of <del>activities and uses</del> <u>activities</u> in river beds, and in the coastal marine area, that could have adverse effects on regionally significant infrastructure. This includes development in the vicinity of <del>within</del> the National Grid <del>corridor</del>.<br/> A buffer corridor for the National Grid transmission lines will be established through rules within which activities will be managed to reduce the risk of electrical hazard, <del>avoid the potential for reverse sensitivity effects and ensure that adverse effects on the structural integrity of the National Grid is not compromised</del>. The width of the corridor will vary depending on the activity, type of National Grid assets and the sensitivity of the network to the activity.<br/> This method gives effect to <u>Policy 10 and Policy 11</u> of the NPSET.<br/> <del>In addition to the rules in the MEP, the Resource Management (National Environmental Standards for Electricity Transmission Activities) Regulations 2009 contain separate rules for the operation, maintenance, upgrading, relocation or removal of</del> <u>establishes various classes of activity for certain activities relating to existing National Grid transmission lines. Except as provided for by Regulations, no rules in the MEP apply to such activities.</u>”</i></p> |       |          |   |              |                 |
| 1198               | Transpower New Zealand Limited   | 12    | Volume 1 | 4 Use of Natural and Physical Resources | 4.M.10       | Support in Part |
| Decision Requested | <p><b>Amend</b> Method 4.M.10 to replace “Transpower NZ” with <i>“<u>Transpower New Zealand Limited</u>”</i>.</p>  |       |          |   |              |                 |
| 1198               | Transpower New Zealand Limited   | 13    | Volume 1 | 6 Natural Character                     | Policy 6.2.1 | Support in Part |

| Sub No             | Submitter   | Point | Volume   | Chapter             | Provision    | Type            |
|--------------------|---|-------|----------|---------------------|--------------|-----------------|
| Decision Requested | <p><b>Amend</b> Policy 6.2.1 as follows:</p> <p><b><i>"Policy 6.2.1 – Avoid the adverse effects of <u>inappropriate</u> subdivision, use or development on areas of the coastal environment with outstanding natural character values and on lakes and rivers and their margins with high and very high natural character values.</i></b><br/> <i>Where the natural character of the coastal environment is outstanding, Section 6(a) of the RMA indicates that this level of preservation should be retained, particularly when coupled with the similar direction in Policy 13 of the NZCPS. This means that <u>the any</u> adverse effects of <u>inappropriate activities</u> on natural character values should be avoided. That is not to say that no subdivision, use or development can occur within the coastal environment - activities may not adversely affect the natural character of the surrounding environment, or may include features or benefits that maintain the existing levels of natural character. <u>In addition there are some activities, for instance National Grid assets, which have a technical, functional or operational need to locate in the coastal environment. This is recognised by Policy 6 of the NZCPS.</u></i><br/> <i>For freshwater bodies there is also a requirement in Section 6(a) to preserve the natural character of wetlands, lakes and rivers and their margins and to protect this natural character from inappropriate subdivision, use and development. Having regard to Policy 6.1.5, the Council has assessed the values of rivers and lakes and their level of significance in order to give effect to Section 6(a). In undertaking this assessment, the Council has determined that where the freshwater values are high or very high, then adverse effects on these values should be avoided, <u>except where the avoidance of adverse effects is not possible due to the technical, functional or operational requirements of nationally significant infrastructure.</u>"</i></p> |       |          |                     |              |                 |
| <b>1198</b>        | Transpower New Zealand Limited  | 14    | Volume 1 | 6 Natural Character | Policy 6.2.2 | Support in Part |
| Decision Requested | <p><b>Amend</b> Policy 6.2.2 as follows:</p> <p><b><i>"Policy 6.2.2 – Avoid significant adverse effects of <u>inappropriate</u> subdivision, use or development on coastal natural character, having regard to the significance criteria in Appendix 4.</i></b><br/> <i>The degree of adverse effects on coastal natural character is an important consideration under Policy 13(1)(b) of the NZCPS. Where the extent of change in the coastal environment from subdivision, use or development causes significant adverse effects on natural character, the NZCPS states those effects should be avoided. There is therefore a threshold beyond which remediation and/or mitigation of those adverse effects is not an appropriate management option. It is acknowledged that there are some activities that have a technical, functional and operational need to be located in areas identified as having natural character, such as the linear infrastructure that is nationally significant. The adverse effects of such activities cannot be avoided in all cases. That threshold will be determined on a case-by-case basis through the resource consent or plan change process. The significance of the adverse effect will depend on the nature of the proposal, the natural character context within which the activity is proposed to occur and the degree of change to the attributes that contribute to natural character in that context.</i><br/> <i>..."</i></p>   |       |          |                     |              |                 |
| <b>1198</b>        | Transpower New Zealand Limited  | 15    | Volume 1 | 6 Natural Character | Policy 6.2.8 | Support in Part |

| Sub No             | Submitter   | Point | Volume   | Chapter     | Provision    | Type            |
|--------------------|---|-------|----------|-------------|--------------|-----------------|
| Decision Requested | <p><b>Amend</b> Policy 6.2.8 as follows:</p> <p><b><u>"Policy 6.2.8 – Require land use activities to be set back from rivers, lakes and the coastal marine area in order to preserve natural character, except where nationally significant infrastructure has a locational, technical or operational need to traverse rivers, lakes and the coastal marine area.</u></b></p> <p><i>The proximity of land use activity to rivers, lakes and the coastal marine area has a significant influence on the potential for adverse effects on natural character. The closer the activity, the greater the potential for modification to the elements, patterns, processes and experiential qualities that contribute to natural character. For this reason, land use activities will be required to be set back from rivers, lakes and the coastal marine area. The setback will be implemented through permitted activity standards and application can be made for resource consent to undertake an activity within the setback. The adverse effects of any such proposal will be assessed against the provisions of this chapter, <u>and Chapter 4 where the proposal is for regionally significant infrastructure.</u>"</i></p>   |       |          |             |              |                 |
| <b>1198</b>        | Transpower New Zealand Limited  | 16    | Volume 1 | 7 Landscape | Policy 7.2.5 | Support in Part |
| Decision Requested | <p><b>Amend</b> Policy 7.2.5 as follows:</p> <p><b><u>" Policy 7.2.5 – Avoid adverse effects of inappropriate subdivision, use and development on the values that contribute to outstanding natural features and landscapes in the first instance. Where adverse effects cannot be avoided and the activity is not proposed to take place in the coastal environment, ensure that the adverse effects are remedied or mitigated.</u></b></p> <p><i>Where resource consent is required to undertake a particular activity in an outstanding natural feature or landscape, this policy provides a clear preference for avoiding adverse effects on the biophysical, sensory or associative values within the landscape. This does not mean that there can be no new resource use within outstanding natural features or landscapes; rather, the use or development of natural and physical resources may be able to be undertaken in a way that the quality and significance of the values is not diminished. Alternatively, adverse effects may be able to be remedied through careful planning or remedial works. Policy 7.2.7 provides further guidance in this regard. <del>The option of remedying adverse effects on landscape values does not apply to activities occurring within the coastal environment, as Policy 15 of the NZCPS requires that such adverse effects are avoided. It is recognised that some activities, for instance National Grid assets, have a technical, functional or operational need to locate within an outstanding natural feature or landscape and that the adverse effects of such activities cannot be avoided in all cases. Further direction in this regard is provided by Policy 7.2.6.</del>"</i></p> |       |          |             |              |                 |

| Decision Requested | <p><b>Amend</b> Policy 10.2.3 as follows:</p> <p><b><i>"Policy 10.2.3 – Consider approving any application to remove, trim or prune a notable tree or trees where:</i></b></p> <p><b><i>(a) the tree or trees are dying, diseased or have otherwise lost the essential qualities for which the tree was originally identified;</i></b></p> <p><b><i>(b) the tree or trees have become, or are likely to become a danger to people or the National Grid; or</i></b></p> <p><b><i>(c) the tree or trees are significantly restricting a particular use of the site that offers greater positive effects in terms of historic heritage or amenity values.</i></b></p> <p><b><i>..."</i></b></p>  |       |          |   |                |                 |
| <b>1198</b>        | Transpower New Zealand Limited  | 25    | Volume 1 | 11 Natural Hazards                      | Policy 11.1.21 | Oppose          |

| Sub No             | Submitter   | Point | Volume   | Chapter                           | Provision      | Type            |
|--------------------|---|-------|----------|-----------------------------------|----------------|-----------------|
| Decision Requested | <p><b>Amend</b> Policy 11.1.21 as follows:</p> <p><b><i>"Policy 11.1.21 – Locate new structures and works (except regionally significant infrastructure, where its location is constrained by technical and operational requirements) to:</i></b><br/> <b><i>(a) avoid them being damaged from the adverse effects of land instability; and</i></b><br/> <b><i>(b) avoid any increase in the adverse effects of slope instability that the structure or work may cause.</i></b></p> <p><i>Marlborough is characterised by steep terrain and in some locations, unstable geology. Combined with the potential for intense rainfall events, these factors create the potential for slope instability. Examples historically include rock/debris slumps, debris slides or flows, coastal erosion and tunnel gully erosion in various parts of the District. Establishing residential, commercial or industrial development <del>or infrastructure supporting that development or linking our communities</del> in locations prone to land instability will lead to unsustainable outcomes. This policy requires new structures and works to be located in environments that avoid adverse effects caused by land instability. It also addresses the situation of a structure or work exacerbating those adverse effects. The policy will primarily be implemented through the zoning of land and the scale/intensity of activity that the zone rules enable. However, the policy can also be applied in a resource consent context when an assessment of environmental effects for the structure or work identifies a risk of land instability. This includes subdivision undertaken to enable more intensive use of the land. A safe and stable building platform will have to be established for the subdivision of land in certain environments."</i></p> |       |          |                                   |                |                 |
| <b>1198</b>        | Transpower New Zealand Limited  | 26    | Volume 1 | 13 Use of the Coastal Environment | Policy 13.1.1  | Oppose          |
| Decision Requested | <p><b>Amend</b> Policy 13.1.1 as follows:</p> <p><b><i>" Policy 13.1.1 – Avoid adverse effects from <u>inappropriate</u> subdivision, use and development activities on areas identified as having:</i></b><br/> <b><i>(a) outstanding natural character;</i></b><br/> <b><i>(b) outstanding natural features and/or outstanding natural landscapes;</i></b><br/> <b><i>(c) significant marine biodiversity value and/or are a significant wetland; or</i></b><br/> <b><i>(d) significant historic heritage value.</i></b></p> <p><i>Policy 13.1.1 identifies four significant matters upon which the adverse effects of <u>inappropriate</u> activities are to be avoided. These matters are given particular direction through the principles of the RMA (Sections 6(a), (b), (c) and (f)) and through direction provided by Policies 11, 13, 15 and 17 of the NZCPS. However, it is important to acknowledge that implementing the policy does not mean that all activities are prohibited from occurring in the areas with the identified values; it simply makes clear that any adverse effects of <u>inappropriate</u> activities must be avoided in those areas, rather than being mitigated or remedied. <u>Some activities, for instance National Grid assets such as the Cook Strait Submarine Cables and connection to them, have a technical, functional or operational need to locate in the coastal environment. This is recognised by Policy 6 of the NZCPS."</u></i></p>  |       |          |                                   |                |                 |
| <b>1198</b>        | Transpower New Zealand Limited  | 27    | Volume 1 | 13 Use of the Coastal Environment | Policy 13.2.2  | Support         |
| Decision Requested | <p><b>Retain</b> Policy 13.2.2, and particularly clauses (a) and (g) as notified.</p>   |       |          |                                   |                |                 |
| <b>1198</b>        | Transpower New Zealand Limited  | 28    | Volume 1 | 13 Use of the Coastal Environment | Policy 13.10.1 | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter                           | Provision       | Type    |
|--------------------|--|-------|----------|-----------------------------------|-----------------|---------|
| Decision Requested | <p><b>Amend</b> Policy 13.10.1 as follows:</p> <p><b><i>"Policy 13.10.1 – Enable structures to be located within the coastal marine area where these are:</i></b><br/> <b><i>(a) necessary for the purposes of assisting with navigation of ships/vessels or are temporary in nature for scientific monitoring or research purposes; or</i></b><br/> <b><i>(b) National Grid submarine cables within the Cook Strait Cable Protection Zone.</i></b></p> <p><i>For safety reasons it is important that navigational aids can be strategically located in Marlborough's coastal marine area. Monitoring equipment for scientific purposes or research is often temporary in nature and does not usually involve significant alteration or occupation of the coastal marine area. An enabling approach to these types of structures is provided for through the rules, subject to standards. <u>Transpower's Cook Strait Cables, located and protected within the Cook Strait Cable Protection Zone, are nationally significant. It is appropriate to enable the cables given the benefits derived from a safe, reliable and effective and National Grid.</u>"</i></p>                                      |       |          |                                   |                 |         |
| <b>1198</b>        | Transpower New Zealand Limited   | 29    | Volume 1 | 13 Use of the Coastal Environment | Policy 13.10.10 | Oppose  |
| Decision Requested | <p><b>Amend</b> Policy 13.10.10 as follows:</p> <p><b><i>"Policy 13.10.10 – Coastal structures <del>shall</del> <u>may</u> be required to be removed from the coastal marine area in the following circumstances:</i></b><br/> <b><i>(a) where there is no longer a need for the structure;</i></b><br/> <b><i>(b) when a coastal permit for a structure expires and no new permit has been sought; or</i></b><br/> <b><i>(c) where consent to authorise an existing structure is refused.</i></b></p> <p><i>There may be circumstances where coastal structures are no longer required or are not granted new resource consents in terms of (b) or (c). Where this is the case it is appropriate for the structure to be removed from the coastal marine area. This will help to achieve Policy 6(2)(e) of the NZCPS by promoting the efficient use of the coastal marine area. This policy will be achieved through conditions imposed on resource consents granted. <u>There are circumstances where the removal of structures in the coastal marine area is not preferred because the removal may not be practicable or the potential adverse effect of the removal may be significant.</u>"</i></p> |       |          |                                   |                 |         |

| Decision Requested | Trustpower seeks the following relief from the Marlborough District Council:<br>1. Amend Policy 8.2.4 as follows:<br><i>"Priority will be given to <u>encouraging</u> the re-establishment of indigenous biodiversity in Marlborough's lowland environments, <u>and acknowledging that many of these areas occur on privately owned land.</u>"</i><br>2. Any similar or consequential amendments to the PMEP that stem from the submission and relief sought.  |       |          |                           |               |                 |
| 1201               | Trustpower Limited   | 80    | Volume 1 | 8 Indigenous Biodiversity | Policy 8.2.9  | Oppose          |
| Decision Requested | Trustpower seeks the following relief from the Marlborough District Council:<br>1. Amend Policy 8.2.9 as follows:<br><i>"<u>Encourage the maintenance or voluntary enhancement of</u> <del>Maintain, enhance or restore</del> ecosystems, habitats and areas of indigenous biodiversity even where these are not identified as significant in terms of the criteria in Policy 8.1.1, but are important for:<br/> ..."</i><br>2. Any similar or consequential amendments to the PMEP that stem from the submission and relief sought.   |       |          |                           |               |                 |
| 1201               | Trustpower Limited   | 81    | Volume 1 | 8 Indigenous Biodiversity | Policy 8.3.2  | Oppose          |

| Sub No             | Submitter   | Point | Volume   | Chapter                   | Provision    | Type    |
|--------------------|---|-------|----------|---------------------------|--------------|---------|
| Decision Requested | Trustpower seeks the following relief from the Marlborough District Council:<br>1. Amend Policy 8.3.2 as follows:<br><i>"Where subdivision, use or development requires resource consent, the adverse effects on areas, habitats or ecosystems with indigenous biodiversity value shall be:<br/>(a) avoided, and otherwise remedied or mitigated, where it is a significant site in the context of Policy 8.1.1; and<br/>(b) avoided, remedied or mitigated where indigenous biodiversity values have not been assessed as being significant in terms of Policy 8.1.1."</i><br>2. Any similar or consequential amendments to the PMEP that stem from the submission and relief sought.  |       |          |                           |              |         |
| <b>1201</b>        | Trustpower Limited  | 82    | Volume 1 | 8 Indigenous Biodiversity | Policy 8.3.6 | Oppose  |
| Decision Requested | Trustpower seeks the following relief from the Marlborough District Council:<br>1. The deletion of Policy 8.3.6 in its entirety.  |       |          |                           |              |         |
| <b>1201</b>        | Trustpower Limited  | 83    | Volume 1 | 8 Indigenous Biodiversity | Policy 8.3.8 | Oppose  |
| Decision Requested | Policy 8.3.8 Oppose. Policy 8.3.8 is opposed by Trustpower as it seeks to exclude the provision of offsetting in areas of significant indigenous biodiversity value, which would mean that adverse effects in these areas would always have to be avoided (in accordance with Policy 8.3.2). In addition, Trustpower consider that offsetting should only be utilized where there are significant residual adverse effects that cannot be avoided, remedied or mitigated – rather than any residual effects. In this respect, the RMA is not a 'no effects' statute. Trustpower seeks the following relief from the Marlborough District Council:<br>1. Amend Policy 8.3.8 as follows:<br><del><i>"With the exception of areas with significant indigenous biodiversity value, w</i></del> <i>Where indigenous biodiversity values will be adversely affected through land use or other activities, a biodiversity offset can be considered to mitigate residual <u>significant</u> adverse effects. Where a biodiversity offset is proposed by a <u>resource consent applicant</u>, the following criteria will apply:<br/>(a) the offset will only compensate for <u>significant</u> residual adverse effects that cannot otherwise be avoided, remedied or mitigated;<br/>(b) the <u>significant</u> residual adverse effects on <u>indigenous</u> biodiversity are capable of being offset and will be fully compensated by the offset to ensure no net loss of biodiversity;<br/><del>(c) where the area to be offset is identified as a national priority for protection under Objective 8.1, the offset must deliver a net gain for biodiversity;</del><br/>(d) there is a strong likelihood that the offsets will be achieved in perpetuity;<br/><del>(e) where the offset involves the ongoing protection of a separate site, it will deliver no net loss and preferably a net gain for indigenous biodiversity protection; and</del><br/>(f) offsets should re-establish or protect the same type of <u>indigenous</u> ecosystem or habitat that is adversely affected, unless an alternative ecosystem or habitat will provide a net gain for indigenous biodiversity."</i><br>2. Any similar or consequential amendments to the PMEP that stem from the submission and relief sought. |       |          |                           |              |         |

| Decision Requested | The decision we seek from the Council is for the threshold for the Wairau River Class B Water Right to remain at the original 8m <sup>3</sup> /s.   |       |          |                                  |           |                 |
| <b>66</b>          | Karen and John Wills  | 1     | Volume 2 | 5 Urban Residential 1 and 2 Zone | 5.2.1.18. | Oppose          |
| Decision Requested | <p>1. The 90m restriction be removed.</p> <p>2. In the event of any decision to apply the restriction; this be done in a manner that accommodates residential activities, development and subdivision.</p> <p>3. Any restrictions and discretion applied residential activities, development and subdivision not be of a nature that has the practical effect of or specifically preventing or prohibiting residential activities, development or subdivision from being carried out. Use of Controlled Activity classification is requested in the event that any standards required to be applied to Permitted Activities may not be complied with and for the matters over which control will be exercised include consideration of all methods by which the protections and purposes of the restriction can be achieved in a manner that does not prevent or make it impracticable for residential use, development or subdivision of residential zoned land.</p> <p>4. Provision of a rule or rules that require the location of transmission lines and associated infrastructure to be located so they avoid preventing residential use, development or subdivision of residential zoned land and that include activity status, standards and objectives and policies that prescribe the matters required to be considered and that these include avoidance of adverse effects on residential use, development and subdivision of residential zoned land.</p> <p>5. Objectives and policies be included in the Plan that recognise effects these provisions may have on residential activities, development and subdivision and amenities and the location of any new or replacement lines and associated equipment, installations or facilities should be such that they do not present restrictions or effects on land used for and zoned or otherwise identified or provided for use, development and subdivision for residential purposes.</p> <p>6. Rules, objectives and policies be included in the Plan that prescribe that as a pre-requisite to implementation of the restriction of the 90m zone, that the operator of the substation or any line associated with it or any other line or facility presenting the requirement for this restriction, to provide means by which restrictions and costs caused by the restrictions are mitigated.</p> |       |          |                                  |           |                 |

7. Controls be placed on or volunteered by the operators of the lines and substation that will avoid, remedy or mitigate the need for the restriction.

8. The submitter is willing to discuss means by which the significant impact of this provision may be avoided, remedied or mitigated with both the Council and the line and substation operator and is open to discussion of the full range of options available pursuant to the RMA.

|                    |  |
|--------------------|--|
| Decision Requested | <p>1. The 90m restriction be removed.</p> <p>2. In the event of any decision to apply the restriction; this be done in a manner that accommodates residential activities, development and subdivision.</p> <p>3. Any restrictions and discretion applied residential activities, development and subdivision not be of a nature that has the practical effect of or specifically preventing or prohibiting residential activities, development or subdivision from being carried out. Use of Controlled Activity classification is requested in the event that any standards required to be applied to Permitted Activities may not be complied with and for the matters over which control will be exercised include consideration of all methods by which the protections and purposes of the restriction can be achieved in a manner that does not prevent or make it impracticable for residential use, development or subdivision of residential zoned land.</p> <p>4. Provision of a rule or rules that require the location of transmission lines and associated infrastructure to be located so they avoid preventing residential use, development or subdivision of residential zoned land and that include activity status, standards and objectives and policies that prescribe the matters required to be considered and that these include avoidance of adverse effects on residential use, development and subdivision of residential zoned land.</p> <p>5. Objectives and policies be included in the Plan that recognise effects these provisions may have on residential activities, development and subdivision and amenities and the location of any new or replacement lines and associated equipment, installations or facilities should be such that they do not present restrictions or effects on land used for and zoned or otherwise identified or provided for use, development and subdivision for residential purposes.</p> |

| Decision Requested | <p>That policy 5.7.3 be re-worded as follows to provide for an enabling policy:<br/>Where based on property specific information, an applicant can demonstrate that an allocation of water in excess of the reasonable demand calculation is required, then that allocation may be granted subject to water availability. Under such circumstances the property specific information will take precedence over the reasonable use calculation.</p>  |       |          |                                  |                |         |
| <b>431</b>         | Wine Marlborough  | 72    | Volume 1 | 5 Allocation of Public Resources | Policy 5.8.3   | Support |
| Decision Requested | <p>That policy 5.8.3 be amended as follows:</p> <p>In addition to the storage of water as per Policy 5.8.2, Class A and B water may also be stored to provide water users with greater flexibility to manage water use on-site, provided that the rate of take does not exceed the authorised maximum daily rate of take for irrigation purposes.</p> <p>That the last explanatory paragraph be deleted and replaced in entirety with following:<br/>The policy provides the consent holder with flexibility to decide how water will be used on any given day. However, the policy limits the rate of take of Class A and B water for storage to the authorised maximum daily rate of take for irrigation purposes. The total volume of water that can be physically stored will limit the number of consecutive days that a consent holder will pump to storage along with the competing need to utilise the water allocation to provide direct irrigation.</p> |       |          |                                  |                |         |

|--------------------|---|-------|----------|---|---|--------|
| Decision Requested | <p>The decision I seek from council is:</p> <p>Identify the A and B class of water consent in MEP Vol 3 Appendix 6 for Southern Springs recognising the obligations associated with those currently on A class water and remove the restrictions for A Class consent holders associated with the limits the MEP is introducing.</p> <p>Continue to manage the A class right as best practice for the vineyard volume of water, as was implemented with us recently when we renewed our consent, with the release of water historically unused. This water should not be reallocated but used to boost the water in the Southern Springs aquifer benefiting those on B class restrictions. Because this was historically the case, any reallocation of this water will result in a net increase of water use and subsequently negatively impact on the volume of water measured in Southern Springs.</p> <p>Cancel all consents transferring water out of the Southern Springs areas. Any ongoing MDC support of these activities, while limiting those within this area, is highly questionable.</p> <p>Remove the immediate implementation effect of restrictions for A Class consent holders as identified in Vol 2 Chap 2.</p> |       |          |   |   |        |

| 1004               | Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited  | 13    | Volume 1 | 12 Urban Environments                  | Policy 12.5.3 | Support |
| Decision Requested | Retain Policy 12.5.3 as notified.   |       |          |  |               |         |
| 1004               | Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited  | 14    | Volume 1 | 12 Urban Environments                  | Policy 12.6.1 | Oppose  |
| Decision Requested | <p>Amend policy 12.6.1 to recognise the functional design requirements of certain activities and to recognise that, for certain land uses including service stations and truck stops, it is inappropriate to seek to provide for such design requirements as continuous building frontages along the adjoining street, or for verandahs. This could be achieved by making amendments as follows:?</p> <p><i>Policy 12.6.1 – Require, <b>except where the functional design requirements of the activity mean that it is impracticable to do so</b>, development to maintain or enhance streetscape amenity in business zones by ensuring <b>to the extent</b>:</i></p> <p><i>(a) an attractive street interface is maintained through landscaping where buildings are not built to the street frontage;</i></p> <p><i>(b) service and outdoor storage areas are not visible from ground level of a public place;</i></p> <p><i>(c) architecturally-interesting façades are presented through variation in building design, scale and the use of glazing;</i></p> <p><i>(d) a continual frontage of buildings is provided along the street, <b>where practicable</b>, apart from pedestrian alleyways;</i></p> <p><i>(e) clear and direct visual connection is provided between the street and the building interior; (f) direct physical connection is provided to the building interior through clearly identified pedestrian entrances;</i></p> <p><i>(g) shelter is provided for pedestrians on footpaths in the form of a veranda, <b>where practicable</b>; and</i></p> <p><i>(h) buildings are designed to have commercial activities at the ground floor, with an adequate ground floor to ceiling height to accommodate these activities.</i></p> <p><u><i>Where functional design requirements mean that one or more of the above criteria are not met, require development to positively contribute to the streetscape.</i></u></p> |       |          |  |               |         |
| 1004               | Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited  | 15    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Issue 15A     | Support |

| Sub No             | Submitter   | Point | Volume   | Chapter                                | Provision      | Type    |
|--------------------|---|-------|----------|--|----------------|---------|
| Decision Requested | <p>Amend Issue 15A Stormwater Reticulation and Disposal to recognise in this discussion that stormwater discharges into the reticulated network are not controlled by the regional rules in the MEP, and otherwise retain the Issue. This could be achieved by making the following changes:</p> <p><i>Stormwater reticulation and disposal</i><br/> <i>Most of Marlborough's towns are serviced by reticulated stormwater systems, <b>with the inputs into those systems not being controlled by regional rules.</b> Urban stormwater will pick up contaminants including sediment, solids, organic matter, nutrients, heavy metals and petroleum and product residues as it runs over impervious surfaces. Given the volume of water created by rainfall events, the stormwater receives little or no treatment prior to discharge into the receiving waters.</i></p> <p><i>Monitoring of fresh and coastal water quality has demonstrated that stormwater discharges do sometimes degrade the quality of receiving waters. Periods of contamination tend to be episodic and are associated with rainfall events. The exception is when contaminants are deliberately washed or poured into the road kerb or stormwater drains.</i></p> <p><i>Stormwater can also pick up sewage through cross-connections between sewerage and stormwater pipes. This has been a particular problem in Picton and has caused periodic contamination of coastal water during rainfall events.</i></p> |       |          |  |                |         |

|--------------------|---|-------|----------|--------------------------|-----------|---------|
| Decision Requested | Support rule but suggest it should be provided for in Chapter 2 - General Rules. This applies to the equivalent rules and standards in each zone chapter. (inferred)  |       |          |                          |           |         |
| <b>1004</b>        | Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited  | 36    | Volume 2 | 3 Rural Environment Zone | 3.1.18.   | Support |
| Decision Requested | Support rule but suggest it should be provided for in Chapter 2 - General Rules. This applies to the equivalent rules and standards in each zone chapter. (inferred)  |       |          |                          |           |         |
| <b>1004</b>        | Z Energy Limited, Mobil Oil New Zealand Limited and BP Oil Limited  | 37    | Volume 2 | 2 General Rules          | 2.16.     | Support |
| Decision Requested | <p>Adopt new rules that permit the discharge of dewatering water from dewatering activities associated with maintenance, upgrading or installation of underground tanks at service stations, utilities and infrastructure and permit investigations in relation to sites with possible historic contamination and that provide for passive discharges associated with this ensuring that the framework enables a better understanding of the nature and characteristics of the discharge over time, facilitates the appropriate management of contaminants in ground over time and permits active management to cease when that is appropriate. These outcomes could be achieved by inserting a new section providing for the use of land and discharge of contaminants onto or into land where it may enter water as follows:</p> <p><b><u>2.## The following activities shall be permitted without resource consent where they comply with the applicable standards in 2.##</u></b></p> <p><b><u>2.## Permitted Activities</u></b></p> <p><b><u>2.##.1 The discharge of contaminants from dewatering activities associated with maintenance, upgrading or installation of underground tanks at service stations, utilities and infrastructure into water or onto or into land where the discharge may enter water.</u></b></p> <p><b><u>2.##.2 The use of land to assess the concentration of hazardous substances that may be present in the soil/groundwater and any associated discharge to air.</u></b></p> <p><b><u>2.##.3 The discharge of contaminants from contaminated land into water, or onto or into land where the discharge may enter water.</u></b></p> <p>AND</p> <p><b><u>Discharge of Contaminants Provided for In Rules 2.##.1 and 2.##.3</u></b></p> <p><b><u>2.## Standards that apply to specific permitted activities</u></b></p> <p><b><u>2.##.1 Where the discharge may enter groundwater, the discharge is not located within 50m of a bore used for water abstraction for potable supply or stock water.</u></b></p> <p><b><u>2.##.2 If the discharge is from dewatering, the discharge is not from contaminated land, except where it is from land where the contaminant is petroleum hydrocarbons and the discharge contains no more than 15mg/l TPH.</u></b></p> <p><b><u>2.##.3 The discharge shall not cause any erosion of the channel or banks of the receiving waterbody or the coastal marine area.</u></b></p> <p><b><u>2.##.4 The discharge shall not give rise to the following effects after the zone of reasonable mixing:</u></b></p> <p><b><u>a) a change in the pH of ±0.5pH unit, or</u></b></p> <p><b><u>b) the production of conspicuous oil or grease films, scums or foams, or floatable or suspended materials, or</u></b></p> <p><b><u>c) any conspicuous change in the colour or visual clarity, or</u></b></p> |       |          |                          |           |         |

- d) any emission of objectionable odour, or**
- e) the fresh water is unsuitable for consumption by farm animals, or**
- f) any significant adverse effects on aquatic life.**

AND

Introduce a rule to permit investigations and assessments of potentially contaminated land as a permitted activity along the following lines:

**The use of land to assess the concentration of hazardous substances that may be present in the soil/groundwater and any associated discharge to air.**

**2.## Standards that apply to specific permitted activities:**

**2.##.1 The assessment is undertaken in accordance with Contaminated Land Management Guidelines No. 5: Site Investigation and Analysis of Soils (2011).**

**2.##.2 The assessment is reported in accordance with the Contaminated Land Management Guidelines No. 1: Reporting on Contaminated Land (2011).**

**2.##.3 A copy of the report is provided to the Marlborough District Council within two months of the completion of the assessment**

AND

Introduce a consenting framework for passive discharges from contaminated land that provides certainty through establishment of an appropriate permitted threshold and a consent requirement (preferably a controlled activity) if the permitted threshold is exceeded. This could be achieved as follows:

**The (passive) discharge of contaminants from contaminated land into water, or onto or into land where the discharge may enter water.**

**2.## Standards that apply to specific permitted activities**

**2.##.1 There has been a detailed site investigation report supplied to Marlborough District Council in accordance with Rule 2.##.3 that:**  
**(a) finds that the discharge of contaminants is highly unlikely to be a risk to human health or the environment at present or in the future;**  
**or**

**(b) determines that the concentration of contaminants in groundwater:**

**(i) either 50 metres from the source (i.e. the notional boundary) or at the property boundary (whichever is the lesser distance); and**

**(ii) anywhere a surface water or bore used for abstraction of water (excluding monitoring bores) intersects or lies within (b)(i)**

**Does not breach the following standard:**

**• Where the discharge is to groundwater identified on the planning maps as a freshwater management unit or groundwater protection area used for water supply purposes; either the Drinking Water Standards of New Zealand 2005 (Revised 2008) or, where ambient water quality is naturally less than this standard it is not being degraded; or**

**• Where the discharge is to a groundwater not identified on the planning maps as a freshwater management unit or groundwater protection area for water supply or as a sensitive aquifer: the Australia and New Zealand Guidelines for Fresh and Marine Water Quality (ANZECC) Guidelines (2000) at the level of protection for 80% of species, except for benzene where the level of protection is 90% of species (i.e. 1mg/l).**

**2.##.2 The passive discharge of contaminants onto or into land that has previously held resource consent for discharges and where the risk has been assessed and found to be within acceptable levels without control mechanisms and that all the consent conditions have been met to the satisfaction of Council.**

**2##. Controlled Activities**

**Application must be made for a Controlled Activity for the following:**

**2.##.1 The (passive) discharge of contaminants from contaminated land into water, or onto or into land where the discharge may enter water not meeting the permitted activity standards shall be a controlled activity.**

**Matters over which the Council has reserved control:**

**2.##.1.1 the adequacy of the detailed site investigation report including:**

**(i) site sampling;**

**(ii) laboratory analysis; and**

**(iii) risk assessment.**

**2.##.1.2 the need for and adequacy of a site management plan (contaminated land);**

**2.##.1.3 the need for and adequacy of a remedial action plan (contaminated land);**

**2.##.1.4 how the discharge is to be:**

**(a) managed;**

**(b) monitored, including frequency and location of monitoring; and**

**(c) reported on.**

**2.##.1.5 the physical constraints of the site and operational practicalities;**

**2.##.1.6 the transport, disposal and tracking of soil and other materials taken away in the course of the activity;**

**2.##.1.7 the effect on potable water supplies;**

**2.##.1.8 methods to identify contaminant risks prior to works commencing such as qualitative assessments of risk;**

**2.##.1.9 protocols around notifying the Council of contaminant risks;**

**2.##.1.10 how stormwater is to be managed;**

**2.##.1.11 soil management during work and at the completion of the works;**

**2.##.1.12 odour control;**

**2.##.1.13 vapour control;**

**2.##.1.14 groundwater management;**

**2.##.1.15 contingency plans;**

**2.##.1.16 remediation or ongoing management of the site, its timing and standard;**

**2.##.1.17 the nature and type of close out criteria if proposed;**

**2.##.1.18 the need for a financial bond;**

**2.##.1.19 the need for any review conditions in the event that standards to be achieved are not achieved;**

**2.##.1.20 the timing and nature of the review conditions;**

**2.##.1.21 the duration of resource consent.**
