| Decision Requested | <p>That amendments are made to the Schedule as follows (strike through and bold) -</p> <p><u>Standard/Parameter - Biological growths</u></p> <p>Interpretation of Standard/Parameter</p> <ul style="list-style-type: none"> <li>• <i>Bacterial and/or fungal slime growths must not be visible to the naked eye as obvious plumose growths or mats.</i></li> <li>• <i>The daily average carbonaceous BOD5 due to dissolved organic compounds (i.e. those passing a GF/C filter) must not exceed 2mg/l.</i></li> <li>• <del><i>Dissolved reactive phosphorus (DRP) must be &lt;0.015mg/l when rivers are at &lt; median flow.</i></del></li> <li>• <del><i>Dissolved inorganic nitrogen (DIN) must be &lt;0.444mg/l when rivers are at &lt; median flow.</i></del></li> </ul> <p><u>Standard/Parameter - Turbidity</u></p> <p>Interpretation of Standard/Parameter</p>  |       |          |  |           |                 |

- *Turbidity must be no greater than 5.6 Nephelometric Turbidity Units **when rivers are at < median flow.***
- ***The Awatere River is excluded from this standard.***

Standard/Parameter - Deposited Fine Sediment (DFS) Stoney Bottom Streams

Delete Standard/Parameter.

Standard/Parameter - Suitability for consumption by farm animals

Interpretation of Standard/Parameter

- *Water must not be rendered unsuitable for farm animals.*
- ***E.coli levels must be <1000/100mL.***

Standard Parameter - Macroinvertebrate Community Index (MCI) – Stoney Bottom Streams

Interpretation of Standard/Parameter

- *Must be ~~>10~~ **80** when river flow is < median **flow.***

Standard Parameter - Escherichia coli (E. coli)

Interpretation of Standard/Parameter

- *Between 1 November and 30 April of the following year ~~mean~~ **median** E. coli levels must be ~~<26~~ **260**/100mL when rivers are at < median flow.*
- *At all other times ~~mean~~ **median** E. coli levels must be <260/100mL when rivers are at < median flow.*
- *Between 1 November and 30 April of the following year ~~maximum~~ **the 95th percentile** E. coli levels must be ~~<260~~ **540**/100mL when rivers are at < median flow.*
- *~~Between 1 November and 30 April of the following year maximum E. coli levels must be <260/100mL when rivers are at < median flow.~~*

Standard Parameter - Colour or visual clarity

Interpretation of Standard/Parameter

*Measurements are to be made immediately upstream of the discharge and below the discharge after reasonable mixing.*

- *Hue must not be changed by more than 5 points on the Munsell scale.*
- *Turbidity must ~~be no greater~~ **not change more** than 1.5 Nephelometric Turbidity Units.*

|--------------------|--|-------|----------|---|------------|---------|
| Decision Requested | <p>It is sought that a new "Trade Supplier" definition (and associated activity status) is included in the Proposed Plan which will enable retailers and wholesalers which are best located in industrial areas to be separated from general 'commercial activities'. The following definition is sought:</p> <p><b>Trade Supplier means business engaged in sales to businesses, and may include sales to general public, but wholly consists of sales in one or more of the following categories:</b></p> <p><b>(a) Automotive and marine supplies.</b></p> <p><b>(b) Buildings supplies, including household fixtures, timber, tools, paint, wallpaper and plumbing supplies.</b></p> <p><b>(c) Garden and landscaping supplies.</b></p> <p><b>(d) Farming and agricultural supplies.</b></p> <p><b>(e) Hire services (excluding hire of books, DVD and video).</b></p> |       |          |   |            |         |
| <b>713</b>         | Fletcher Distribution Limited (Trading as 'Placemakers') and Mico New Zealand Limited (Trading as 'Mico')  | 2     | Volume 2 | 12 Industrial 1 and 2 Zones               | 12.1.      | Oppose  |
| Decision Requested | <p>As part of the introduction of the 'Trade Supplier' definition (submission point #1), it is sought that Rule 12.1 be amended to include "Trade Supplier" on the 'permitted activities' list for the Industrial 1 Zone.</p>  |       |          |   |            |         |

| Decision Requested | <p>Retain Standard 12.2.1.</p>   |       |          |   |            |         |
| <b>303</b>         | Ross Flowerday   | 1     | Volume 3 | Appendix 6 Environmental Flows and Levels | Schedule 3 | Oppose  |
| Decision Requested | <p>Remove the 100% blanket cut-off to Springs sector water users. Before implementing a blanket restriction further scientific evidence of the complex aquifer/springs recharge process is required. A better understanding of the long term trend of the aquifer levels is essential before setting lower limits and cut-off thresholds.</p> <p>Treat all Wairau Aquifer groundwater users equally and consider implementing a rationing restriction when the monitor wells drop below a set level. This would give all Wairau Aquifer groundwater users the opportunity to prioritise where their reduced volume of allocated water is utilised.</p>   |       |          |   |            |         |

| Decision Requested | <p>That the following amendments (strike-through and bold) are made to the wording under Explanation of <b>Avoid</b> on page 2-13 (<i>inferred</i>):</p> <p><b>Avoid</b></p> <p><i>Use of the word 'avoid' <del>may or may not have the same meaning as prevent</del> <b>means not allowing or prohibit.</b> In some cases the method used to implement a policy is a rule that will 'prohibit' something from occurring. In this case the word 'prohibit' is used within the rules method. There are other policies that use 'avoid' though this is not implemented through a prohibited activity rule. In these policies 'avoiding' an effect can be achieved through undertaking an activity in such a way that the effect does not occur or is significantly reduced. Where this is the case, policies clearly identify that remediation and/or mitigation is an option. It will be important that the explanations and methods accompanying the policies are read to help inform decision makers of the intent of the word 'avoid' where it is used.</i></p>  |       |          |                                    |  |                 |

|--------------------|---|-------|----------|---|-----------|-----------------|
| Decision Requested | <p>That the following amendments (strike-through and bold) are made (page 4-1)</p> <p><b>Introduction</b></p> <p><i>Section 5 of the Resource Management Act 1991 (RMA) recognises that sustainable management includes the use and development of natural and physical resources to provide for the social and economic wellbeing, health and safety of the community.</i></p> <p><b>(1) The purpose of this Act is to promote the sustainable management of natural and physical resources.</b></p> <p><b>(2) In this Act, sustainable management means managing the use, development, and protection of natural and physical resources in a way, or at a rate, which enables people and communities to provide for their social, economic, and cultural well-being and for their health and safety while-</b></p> <p><b>(a) sustaining the potential of natural and physical resources (excluding minerals) to meet the reasonably foreseeable needs of future generations; and</b></p> <p><b>(b) safeguarding the life supporting capacity of air, water, soil, and ecosystems; and</b></p> <p><b>(c) avoiding, remedying, or mitigating any adverse effects of activities on the environment.</b></p> <p><i>This chapter contains provisions that acknowledge the importance of using and developing our land, water, coastal and air resources and strategic infrastructure in this respect. The objectives and policies provide high level direction on resource use in our environment. This direction is developed further within the resource or activity-based chapters elsewhere in the Marlborough Environment Plan (MEP). Specific provisions within those chapters seek to enable appropriate use and development of natural and physical resources.</i></p> |       |          |   |           |                 |
| <b>716</b>         | Friends of Nelson Haven and Tasman Bay Incorporated   | 28    | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4A  | Support in Part |
| Decision Requested | <p>1. That reference to ecosystem services provided by natural ecosystems associated with freshwater, air, coastal waters and soils in included in the issue's explanatory paragraph.</p> <p>2. That the following amendments (bold) to the wording in the first paragraph, second line on page 4-2:</p> <p><i>Generally, Marlborough has adequate natural resources of sufficient quality to meet the needs of the primary sector. However, the reliance on natural resources also creates an inherent vulnerability to environmental change. The loss of access to natural resources <b>or the environment</b> or a reduction in the quality of the resources <b>or the environment</b> would have a significant impact on the primary sector. The implications would be felt far beyond the farm gate or vineyard, as Marlborough's townships act as service centres to rural land uses and the marine farming industry. Many businesses in Blenheim and other townships are sustained, either directly or indirectly, by the primary sector.</i></p>  |       |          |   |           |                 |

| Decision Requested | <p>That the following amendments (strike-through and bold) are made to Policy 4.1.2:</p> <p><i>Policy 4.1.2 Enable sustainable use of natural resources in the Marlborough environment <b>by including permitted activity rules where adverse effects are no more than minor, taking into account cumulative effects.</b></i></p> <p><i>Many uses of coastal <del>space</del> <b>marine area</b>, river beds, air and water resources are prohibited unless allowed by a rule in a regional plan or by resource consent (see Sections 12 to 15 of the RMA). As a principle, the Council will continue to enable access to natural resources where the subsequent use of those resources has no more than minor adverse effect on the immediate or surrounding environment. This will be achieved through the use of permitted activity rules, including conditions where appropriate, avoiding the need for resource consent. Where the adverse effects are considered more than minor or where there is potential for cumulative effects, then resource consents will be required. Policies throughout the MEP help define sustainable resource use.</i></p> <p><i>The use of allocation frameworks for coastal <del>space</del> <b>marine area</b> and freshwater will also assist to enable the sustainable use and development of these natural resources. These frameworks will provide certainty about the quantities and/or locations of resources available and the circumstances in which they may be used and developed.</i></p> |       |          |   |              |                 |

|--------------------|---|-------|----------|---------------------------|--------------|---------|
| Decision Requested | <p>That the following amendments (strike-through and bold) are made to Policy 8.1.2 (<i>inferred</i>):</p> <p><i>Policy 8.1.2</i> <b>While it is acknowledged that there are significant gaps in knowledge of the Districts' ecological values, in particular within the marine environment, Sites in the coastal marine area and natural wetlands assessed as having significant indigenous biodiversity value will be specifically identified in the Marlborough Environment Plan.</b></p> <p><i>Significant wetlands have been identified in the MEP because these small and fragmented areas are all that remain of the once vast areas of wetland that covered lowland Marlborough. Restoration and protection of wetland systems depends on maintenance and stability of the water tables. As such the scale of all wetlands, independent of their existing significance play a role for restoration projects. It is important to ensure the values of the significant all wetlands are protected to meet Policy 14 of the NZCPS 2010. Areas that meet the RMA's definition of a wetland but do not have significant values in terms of the criteria in Policy 8.1.1 have not been identified in the MEP and therefore are not subject to wetland rules.</i></p> <p><i>Areas or habitats assessed as having significant ecological values and areas that fulfil ecosystem services to maintain healthy ecosystem functionality within the coastal marine area have been specifically identified in the MEP and are referred to as 'ecologically significant marine sites'. This is because the coastal marine area is comprised of resources in public ownership, with the Council having a more direct role in managing these resources including in relation to areas with significant biodiversity value in terms of Section 6(c) of the RMA. Regulation and education will be the Council's main approach in protecting, restoring and enhancing marine biodiversity.</i></p> |       |          |                           |              |         |
| <b>716</b>         | Friends of Nelson Haven and Tasman Bay Incorporated   | 99    | Volume 1 | 8 Indigenous Biodiversity | Policy 8.2.1 | Support |
| Decision Requested | Retain Policy 8.2.1.  |       |          |                           |              |         |
| <b>716</b>         | Friends of Nelson Haven and Tasman Bay Incorporated   | 100   | Volume 1 | 8 Indigenous Biodiversity | Policy 8.2.2 | Support |
| Decision Requested | <p>Retain Policy 8.2.2 and include the following amendment (bold) to the explanation (<i>inferred</i> this is to follow the second paragraph).</p> <p><b>Stressors to wetlands include in particular water abstraction. Identify network of wetlands where conservation and restoration in the long term will be most successful. Integrating wetland remnants in one management area may in the longer term may be most beneficial.</b></p>  |       |          |                           |              |         |

|--------------------|---|-------|----------|-----------------------------------|-----------|-----------------|
| Decision Requested | <p>That the following amendment (bold) is made to the explanation of Policy 13.11.5:</p> <p><i>Policy 13.11.5 Reclamations shall be designed taking into account relevant dynamic coastal processes, including sea level rise. This policy helps to give effect to the provisions of the NZCPS regarding coastal hazards. It is important that reclamations are designed by appropriately qualified experts to ensure these matters are taken into account.</i></p> <p><b><i>If the sea-level rise is not too rapid, high value habitats that are particularly under threat from sea level rise (e.g. Saltmarsh, seagrass, intertidal rocky shore communities and dune land) could re-establish if they are able to migrate inland into areas where the slope of the newly inundated habitat is the same or greater than that in the existing habitat. This requires there to be no barriers to prevent inland migration. To facilitate targeted planning for such events, a more comprehensive assessment based on site specific survey is required.</i></b></p> |       |          |                                   |           |                 |

|--------------------|---|-------|----------|----------------|--|-----------------|
| Decision Requested | Review the proposed plan with the aim of reducing the size of the plan. This should be achieved by reducing the number of objectives and policies where there is overlap. In addition, review all objectives and policies and re-draft these so as to ensure that the purpose and intent of all objectives and policies is clear without relying on extensive explanatory text. Then delete superfluous explanatory text. |       |          |                |  |                 |
| <b>717</b>         | Fulton Hogan Limited  | 2     | Volume 1 | All            |  | Oppose          |
| Decision Requested | Ensure the plan provides objectives, policies and rules addressing all activities, not just the primary production and tourism sector.  |       |          |                |  |                 |
| <b>717</b>         | Fulton Hogan Limited  | 3     | Volume 1 | All            |  | Oppose          |
| Decision Requested | Review all objectives and policies and re-draft these so as to ensure that the purpose and intent of all objectives and policies is clear without relying on extensive explanatory text.  |       |          |                |  |                 |
| <b>717</b>         | Fulton Hogan Limited  | 4     | Volume 1 | 1 Introduction | Guiding principles   | Support in Part |
| Decision Requested | Engage with the quarry/aggregate and construction industry.   |       |          |                |  |                 |
| <b>717</b>         | Fulton Hogan Limited  | 5     | Volume 1 | 1 Introduction | Guiding principles   | Support in Part |
| Decision Requested | Review the proposed plan with the aim of reducing the size of the plan. This should be achieved by reducing the number of objectives and policies where there is overlap. In addition, review all objectives ad policies and re-draft these as to ensure that the purpose and intent of all objectives and policies is clear without relying on extensive explanatory text. Then delete superfluous explanatory text.     |       |          |                |  |                 |
| <b>717</b>         | Fulton Hogan Limited  | 6     | Volume 1 | 1 Introduction | Guiding principles   | Support         |
| Decision Requested | Retain 'reverse sensitivity' as a guiding principle and incorporate into subsequent objectives, policies and rules.   |       |          |                |  |                 |
| <b>717</b>         | Fulton Hogan Limited  | 7     | Volume 1 | 2 Background   | Working with others to sustainably manage Marlborough's natural and physical resources | Support in Part |
| Decision Requested | Include an objective and policy at RPS level setting out how MDC will engage with others including resource users in order to monitor the efficiency and effectiveness of the District Plan.  |       |          |                |  |                 |

| Sub No             | Submitter  | Point | Volume   | Chapter                                 | Provision    | Type            |
|--------------------|--|-------|----------|---|--------------|-----------------|
| 717                | Fulton Hogan Limited   | 8     | Volume 1 | 3 Marlborough's tangata whenua iwi      | Policy 3.1.3 | Oppose          |
| Decision Requested | <p>Amend Policy 3.1.3 to include a link between requirements to maintain and improve mauri, and iwi management plans/policy to ensure these requirements only apply when there is a level of guidance and therefore certainty for consent applicants. For example:</p> <p><b>Policy 3.1.3 - Where an application for resource consent of plan change is likely to affect the relationship of Marlborough's tangata whenua iwi and their culture and traditions, decision makers shall ensure:</b></p> <p><b>(a) the ability for tangata whenua to exercise kaitiakitanga is maintained;</b></p> <p><b>(b) mauri as described in the relevant iwi management plan is maintained or improved where degraded, particularly in relation to fresh and coastal waters, land and air;.....</b></p>  |       |          |   |              |                 |
| 717                | Fulton Hogan Limited   | 9     | Volume 1 | 3 Marlborough's tangata whenua iwi      | Policy 3.1.4 | Support         |
| Decision Requested | Retain Policy 3.1.4.   |       |          |   |              |                 |
| 717                | Fulton Hogan Limited   | 10    | Volume 1 | 4 Use of Natural and Physical Resources | 4.           | Oppose          |
| Decision Requested | Include issues, objectives and policies in Chapter 4 that address a wider range of resource uses than the use for primary industry and tourism in order to achieve 4.AER.1.  |       |          |   |              |                 |
| 717                | Fulton Hogan Limited   | 11    | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4A     | Support in Part |
| Decision Requested | <p>Include within Issue 4A a discussion of other resource uses that Marlborough relies on for its social and economic wellbeing. For example:</p> <p>There are a number of other resource uses that play an important role in providing for Marlborough's social and economic wellbeing. These include the use of the aggregate resource from either land or river based sources. Aggregates are a vital and under recognised component of everyday life. Without them there would be none of the infrastructure on which modern society relies. Challenges for the efficient and cost effective extraction and delivery of aggregates includes: transportation (distance between source and market); a lack of recognition of the importance of the resource including in planning documents and the establishment of incompatible land use activities on or adjacent to aggregate resources.</p> |       |          |   |              |                 |
| 717                | Fulton Hogan Limited   | 12    | Volume 1 | 4 Use of Natural and Physical Resources | 4.           | Support         |

| Sub No             | Submitter  | Point | Volume   | Chapter                                 | Provision     | Type            |
|--------------------|--|-------|----------|---|---------------|-----------------|
| Decision Requested | <p>Include a new objective for resource uses that are not associated with Marlborough's primary production sector and tourism sector. In terms of aggregate extraction and use, this objective needs to recognise the importance of the resource to Marlborough, identify that there are factors that play a significant role in determining the cost of the resource and the products, processes and industries that rely on it, and that this resource use comes with responsibilities. For example:</p> <p><b><u>Objective 4.X - Marlborough's natural resources are recognised as an enabler of the economic and social wellbeing of the region.</u></b></p> |       |          |   |               |                 |
| <b>717</b>         | Fulton Hogan Limited   | 13    | Volume 1 | 4 Use of Natural and Physical Resources | Policy 4.1.2  | Support         |
| Decision Requested | Retain Policy 4.1.2.   |       |          |   |               |                 |
| <b>717</b>         | Fulton Hogan Limited   | 14    | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4B      | Support in Part |
| Decision Requested | Retain Issue 4B but ensure that policies addressing this issue cover more than just the existence of infrastructure but recognises and provides for the materials and processes that contribute to its construction, operation and maintenance.  |       |          |   |               |                 |
| <b>717</b>         | Fulton Hogan Limited   | 15    | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4B      | Support in Part |
| Decision Requested | Retain Objective 4.2 but ensure that policies addressing this issue recognise and provide for the materials and processes that contribute to its construction, operation and maintenance.  |       |          |   |               |                 |
| <b>717</b>         | Fulton Hogan Limited   | 16    | Volume 1 | 4 Use of Natural and Physical Resources | Objective 4.2 | Support         |
| Decision Requested | <p>Include a new policy recognising the importance of access to the materials and processes required to construct use and maintain community infrastructure. For example:</p> <p><b><u>Policy 4.2X - Recognise that the use of natural and physical resources is essential for the construction, operation and maintenance of community infrastructure.</u></b></p>  |       |          |   |               |                 |
| <b>717</b>         | Fulton Hogan Limited   | 17    | Volume 1 | 4 Use of Natural and Physical Resources | 4.M.9         | Support         |
| Decision Requested | Retain method 4.M.9 District and Regional Rules.   |       |          |   |               |                 |
| <b>717</b>         | Fulton Hogan Limited   | 18    | Volume 1 | 4 Use of Natural and Physical Resources | 4.AER.1       | Oppose          |

| Sub No             | Submitter   | Point | Volume   | Chapter                          | Provision     | Type    |
|--------------------|---|-------|----------|----------------------------------|---------------|---------|
| Decision Requested | Amend the objective and policy framework to recognise and provide for the sustainable use of natural resources for all activities.  |       |          |                                  |               |         |
| <b>717</b>         | Fulton Hogan Limited  | 19    | Volume 1 | 5 Allocation of Public Resources | Policy 5.2.1  | Oppose  |
| Decision Requested | Remove any reference to Appendix 5 in Policy 5.2.1 and instead describe generally what natural and human use values associated with freshwater may be. This could be achieved through definitions.  |       |          |                                  |               |         |
| <b>717</b>         | Fulton Hogan Limited  | 20    | Volume 1 | 5 Allocation of Public Resources | Policy 5.2.4  | Oppose  |
| Decision Requested | Amend Policy 5.2.4 to apply to surfacewater generally rather than only to FMUs dominated by surfacewater. For example:<br><br><b>Policy 5.2.4 - Set specific environmental flows and/or levels for <u>surface water</u> Freshwater Management Units dominated by rivers, lakes and wetlands to:</b><br><br><b>(a) protect the mauri of the waterbody;.....</b>                                      |       |          |                                  |               |         |
| <b>717</b>         | Fulton Hogan Limited  | 21    | Volume 1 | 5 Allocation of Public Resources | Policy 5.2.8  | Support |
| Decision Requested | Retain Policy 5.2.8.  |       |          |                                  |               |         |
| <b>717</b>         | Fulton Hogan Limited  | 22    | Volume 1 | 5 Allocation of Public Resources | Policy 5.2.11 | Oppose  |
| Decision Requested | Amend Policy 5.2.11 to apply to aquifers generally rather than only to FMUs dominated by an aquifer. For example:<br><br><b>Policy 5.2.11 - Set specific minimum levels for <u>aquifer</u> Freshwater Management Units dominated by aquifers to:</b><br><br><b>(a) prevent physical damage to the structure of the aquifer;</b><br><br><b>(b) prevent headwater recession of spring flows; ....</b> |       |          |                                  |               |         |
| <b>717</b>         | Fulton Hogan Limited  | 23    | Volume 1 | 5 Allocation of Public Resources | Policy 5.2.12 | Oppose  |

| Sub No             | Submitter  | Point | Volume   | Chapter                          | Provision     | Type            |
|--------------------|--|-------|----------|----------------------------------|---------------|-----------------|
| Decision Requested | Amend Policy 5.2.12 to either:<br>a. remove the conductivity limit requirements; or<br>b. limit the application of Policy 5.2.12 to the coastal FMUs (i.e. Wairau Aquifer Coastal Central FMU).  |       |          |                                  |               |                 |
| <b>717</b>         | Fulton Hogan Limited   | 24    | Volume 1 | 5 Allocation of Public Resources | Policy 5.3.5  | Support in Part |
| Decision Requested | Delete Policy 5.3.5 or amend Policy 5.3.5 to refer to effects on the values associated with water resources as opposed to the water resource itself and to clarify that enable in the context of this policy means permit. For example:<br><br><b>Policy 5.3.5 - Enable as a <u>permitted activity</u> the take and use of water where it will have little or no adverse effect on the <u>values associated with water resources</u>.</b>  |       |          |                                  |               |                 |
| <b>717</b>         | Fulton Hogan Limited   | 25    | Volume 1 | 5 Allocation of Public Resources | Policy 5.3.8  | Support in Part |
| Decision Requested | Retain Policy 5.3.8 with amendments addressing the situation where the FMU is over allocated so as to provide for these activities where there is like for like replacement or a decrease in the amount of water taken and the activity continues to reflect reasonable demand for that use. For example:<br><br><b>Policy 5.3.8 - Approve water permit applications to continue taking and using surface water when:</b><br><br><b>(a) a specific minimum flow and allocation limit for the source Freshwater Management Unit is established in the Marlborough Environment Plan;</b><br><br><b>(ab) the Freshwater Management Unit is not over-allocated in terms of the limits set in the Marlborough Environment Plan;</b><br><br><b>(bc) there is to be no change to the intended use of water, or if there is a change in use, this results in a decrease in the rate of take of water; and</b><br><br><b>(ed) the application is made at least three months prior to the expiry of the existing water permit; or</b><br><br><b><u>(e) the Freshwater Management Unit is over-allocated in terms of the limits set in the Marlborough Environment Plan and there is no change to the intended use of water, no change to the rate and volume of water taken or there is a decrease in the rate and volume of water taken, and the water allocated reflects the reasonable demand given the intended use.</u></b> |       |          |                                  |               |                 |
| <b>717</b>         | Fulton Hogan Limited   | 26    | Volume 1 | 5 Allocation of Public Resources | Policy 5.3.13 | Oppose          |

| Sub No             | Submitter  | Point | Volume   | Chapter                          | Provision     | Type            |
|--------------------|--|-------|----------|----------------------------------|---------------|-----------------|
| Decision Requested | Include guidance within the plan as to the definition of 'full aquifer penetration' by for example:  |       |          |                                  |               |                 |
|                    | a. Specifying a minimum depth below the likely lowest groundwater level for an aquifer;  |       |          |                                  |               |                 |
|                    | b. Specifying a depth below which a significant percentage (e.g. 50%) of bores are drilled at a specific date; or  |       |          |                                  |               |                 |
|                    | c. A depth based on the best available technical information.  |       |          |                                  |               |                 |
| <b>717</b>         | Fulton Hogan Limited   | 27    | Volume 1 | 5 Allocation of Public Resources | Policy 5.3.14 | Oppose          |
| Decision Requested | Delete Policy 5.3.14.  |       |          |                                  |               |                 |
| <b>717</b>         | Fulton Hogan Limited   | 28    | Volume 1 | 5 Allocation of Public Resources | Policy 5.4.1  | Oppose          |
| Decision Requested | Delete Policy 5.4.1.   |       |          |                                  |               |                 |
| <b>717</b>         | Fulton Hogan Limited   | 29    | Volume 1 | 5 Allocation of Public Resources | Policy 5.4.3  | Oppose          |
| Decision Requested | Delete Policy 5.4.3.   |       |          |                                  |               |                 |
| <b>717</b>         | Fulton Hogan Limited   | 30    | Volume 1 | 5 Allocation of Public Resources | Policy 5.4.4  | Support         |
| Decision Requested | Retain Policy 5.4.4.   |       |          |                                  |               |                 |
| <b>717</b>         | Fulton Hogan Limited   | 31    | Volume 1 | 5 Allocation of Public Resources | Policy 5.4.5  | Support in Part |
| Decision Requested | Amend Policy 5.4.5 to remove reference to enhanced transfer system so as to enable the transfer of water as part of this plan. For example:  |       |          |                                  |               |                 |
|                    | <p><b>Policy 5.4.5 - <del>When an enhanced transfer system is included in the Marlborough Environment Plan to enable t</del>The full or partial transfer of individual water allocations between the holders of water permits to take and use water, this will be provided for as a permitted activity where:</b></p> <p>...</p> |       |          |                                  |               |                 |
| <b>717</b>         | Fulton Hogan Limited   | 32    | Volume 1 | 5 Allocation of Public Resources | Policy 5.5.2  | Oppose          |

| Sub No             | Submitter  | Point | Volume   | Chapter                          | Provision    | Type            |
|--------------------|--|-------|----------|----------------------------------|--------------|-----------------|
| Decision Requested | Amend Policy 5.5.2 to refer to allocation as opposed to abstraction so as to provide for further non-consumptive water takes.<br><br><b>Policy 5.5.2 - No new water permit will be granted authorising additional <del>abstraction</del> <u>allocation</u> from the water resources identified in Policy 5.5.1 after 9 June 2016.</b>  |       |          |                                  |              |                 |
| <b>717</b>         | Fulton Hogan Limited   | 33    | Volume 1 | 5 Allocation of Public Resources | Policy 5.5.5 | Oppose          |
| Decision Requested | Delete Policy 5.5.5 and rely on Policy 5.5.4 or Policy 5.7.2 to give effect to Policy B6 of the NPS Freshwater.  |       |          |                                  |              |                 |
| <b>717</b>         | Fulton Hogan Limited   | 34    | Volume 1 | 5 Allocation of Public Resources | Policy 5.7.2 | Support in Part |
| Decision Requested | Amend Policy 5.7.2 to clarify that water will be allocated to non-irrigation uses based on what is reasonable and that this will be determined on a case by case basis based on the specifics of the proposed use. For example:<br><br><b>Policy 5.7.2 - To allocate water on the basis of reasonable demand given the intended use <u>by:</u></b><br><b><u>a) for irrigation, applying the 'irricalc' irrigation demand tool; or</u></b><br><b><u>b) for other uses, determining what is reasonable on a case by case basis based on the specifics of the proposed use.</u></b> |       |          |                                  |              |                 |
| <b>717</b>         | Fulton Hogan Limited   | 35    | Volume 1 | 5 Allocation of Public Resources | Policy 5.7.3 | Oppose          |
| Decision Requested | Amend Policy 5.7.3 to allow specific use and demand information to be considered when making decisions on non-irrigation use consents. For example:<br><br><b>Policy 5.7.3 - Water permit applications to use water <del>for irrigation</del> will not be approved when the rate of use exceeds what is considered the reasonable use <del>calculation</del> in terms of Policy 5.7.2, except where the applicant can demonstrate that they require more water based on property, <u>demand, or activity</u> specific information.</b>   |       |          |                                  |              |                 |
| <b>717</b>         | Fulton Hogan Limited   | 36    | Volume 1 | 5 Allocation of Public Resources | Policy 5.9.1 | Oppose          |
| Decision Requested | Delete Policy 5.9.1.   |       |          |                                  |              |                 |

| Sub No             | Submitter  | Point | Volume   | Chapter                         | Provision      | Type            |
|--------------------|--|-------|----------|---------------------------------|----------------|-----------------|
| <b>717</b>         | Fulton Hogan Limited   | 37    | Volume 1 | 6 Natural Character             | Policy 6.2.5   | Support         |
| Decision Requested | Retain Policy 6.25.  |       |          |                                 |                |                 |
| <b>717</b>         | Fulton Hogan Limited   | 38    | Volume 1 | 11 Natural Hazards              | Policy 11.1.6  | Support         |
| Decision Requested | Retain Policy 11.1.6.  |       |          |                                 |                |                 |
| <b>717</b>         | Fulton Hogan Limited   | 39    | Volume 1 | 11 Natural Hazards              | 11.M.8         | Support in Part |
| Decision Requested | Retain 11.M.8 but amend to make explicit where the method will apply.  |       |          |                                 |                |                 |
|                    | <p><b>11.M.8 Gravel permits</b></p> <p><b>In addition to regional rules, the Council will utilise a system of gravel permits to authorise the extraction of gravel from river beds. These permits will be issued by a Council Rivers and Drainage Engineer and will specify the location of extraction and the amount of material to be extracted. Conditions can be imposed on the gravel permits to manage any site-specific adverse effects not addressed through regional rules. The permits provide flexibility to respond to the accumulation of gravel in river beds in the short term. The duration of the permits will be limited to enable effective monitoring of the effect of the extraction on river bed levels and the surrounding environment. <u>The gravel permit system will apply to all rivers north of and including the Wairau River and its tributaries.</u></b></p> |       |          |                                 |                |                 |
| <b>717</b>         | Fulton Hogan Limited   | 40    | Volume 1 | 11 Natural Hazards              | 11.M.10        | Support         |
| Decision Requested | Retain 11.M.10.  |       |          |                                 |                |                 |
| <b>717</b>         | Fulton Hogan Limited   | 41    | Volume 1 | 11 Natural Hazards              | 11.M.15        | Support in Part |
| Decision Requested | Amend 11.M.15 to explicitly provide for the collaborative development of the Gravel Management Strategy.   |       |          |                                 |                |                 |
| <b>717</b>         | Fulton Hogan Limited   | 42    | Volume 1 | 14 Use of the Rural Environment | 14.            | Oppose          |
| Decision Requested | Amend the plan to ensure that it recognises and provides for uses of the rural resource and the rural environment other than primary production.   |       |          |                                 |                |                 |
| <b>717</b>         | Fulton Hogan Limited   | 43    | Volume 1 | 14 Use of the Rural Environment | Objective 14.1 | Support in Part |

| Sub No             | Submitter   | Point | Volume   | Chapter                         | Provision      | Type            |
|--------------------|---|-------|----------|---------------------------------|----------------|-----------------|
| Decision Requested | Amend Objective 14.1 to recognise that rural environments need to be managed so as to enable not only primary production activities but other activities that rely on the rural resource such as gravel extraction. For example:<br><br><b><u>Objective 14.1 - Rural environments are maintained as a resource for primary production activities and activities that rely on the rural resource, enabling these activities to continue contributing to economic and social wellbeing whilst ensuring the adverse effects of these activities are appropriately managed.</u></b> |       |          |                                 |                |                 |
| <b>717</b>         | Fulton Hogan Limited  | 44    | Volume 1 | 14 Use of the Rural Environment | Objective 14.1 | Support         |
| Decision Requested | Include a new Policy that enables other activities that necessarily rely on the rural resource such as quarrying. For example:<br><br><b><u>Policy 14.1X - Enable the efficient use and development of rural environments for activities that rely on the rural resource and are necessarily located in the rural environment.</u></b>  |       |          |                                 |                |                 |
| <b>717</b>         | Fulton Hogan Limited  | 45    | Volume 1 | 14 Use of the Rural Environment | Policy 14.1.7  | Support in Part |
| Decision Requested | Amend Policy 14.1.7 to apply to all activities that are necessarily located in the rural environment and rely on the rural resource so as to provide protection from the reverse sensitivity effects.<br><br><b><u>Policy 14.1.7 - Recognise that <del>primary production</del> activities that rely on the rural resource, and necessarily occur in rural environments may result in effects including noise, dust, smell and traffic generation, but these will require mitigation where they have a significant adverse effect on the environment.</u></b>                   |       |          |                                 |                |                 |
| <b>717</b>         | Fulton Hogan Limited  | 46    | Volume 1 | 14 Use of the Rural Environment | Objective 14.1 | Support         |

| Sub No             | Submitter  | Point | Volume   | Chapter                         | Provision      | Type            |
|--------------------|--|-------|----------|---------------------------------|----------------|-----------------|
| Decision Requested | <p>Include a new policy that outlines the expectations for activities wishing to establish in the rural environment that may be sensitive to the types of effects associated with rural activities. For example:</p> <p><b><u>Policy 14.7.X1 - Ensure the design and location of new habitable buildings achieve adequate separation distances or adopt other on-site mitigation methods, including acoustic insulation, to mitigate potential reverse sensitivity effects with lawfully established productive rural activities.</u></b></p>  |       |          |                                 |                |                 |
| <b>717</b>         | Fulton Hogan Limited   | 47    | Volume 1 | 14 Use of the Rural Environment | Objective 14.3 | Support in Part |
| Decision Requested | <p>Retain Objective 14.3 but amend the explanation to highlight that there are activities other than primary production activities such as quarrying, that are significant contributors to the economic and social wellbeing of the region and need to be recognised as activities that necessary and appropriately occur in the rural environment.</p> <p>Include a policy enabling land based aggregate extraction within the rural environment.</p>   |       |          |                                 |                |                 |
| <b>717</b>         | Fulton Hogan Limited   | 48    | Volume 1 | 14 Use of the Rural Environment | Objective 14.3 | Support         |
| Decision Requested | <p>Include a new policy enabling quarrying within the rural environment. For example:</p> <p><b><u>Policy 14.3.X - Enable the efficient use and development of rural environments for quarrying,wile managing effects on:</u></b></p> <p><b><u>a) the life supporting capacity of soils, water, air and ecosystems;</u></b></p> <p><b><u>b) natural character of rivers, wetlands and lakes;</u></b></p> <p><b><u>c) water quality and water availability;</u></b></p> <p><b><u>d) areas with landscape significance;</u></b></p> <p><b><u>e) areas with significant indigenous vegetation and significant habitats of indigenous fauna;</u></b></p> <p><b><u>f) the values of the coastal environment as set out in Issue 13A of Chapter 13 - Use of the Coastal Environment; or</u></b></p> <p><b><u>g) the safe and efficient operation of the land transport network and Marlborough's airports.</u></b></p> |       |          |                                 |                |                 |
| <b>717</b>         | Fulton Hogan Limited   | 49    | Volume 1 | 14 Use of the Rural Environment | Issue 14B      | Support in Part |

| Sub No             | Submitter   | Point | Volume   | Chapter                         | Provision      | Type            |
|--------------------|---|-------|----------|---------------------------------|----------------|-----------------|
| Decision Requested | Recognise within Issue 14B that rural character is influenced heavily by the activities that occur within it and that perception is not always reality.   |       |          |                                 |                |                 |
| <b>717</b>         | Fulton Hogan Limited  | 50    | Volume 1 | 14 Use of the Rural Environment | Objective 14.4 | Support in Part |
| Decision Requested | Retain Objective 14.4 but delete the explanation to avoid the objective focusing on primary production activities.  |       |          |                                 |                |                 |
| <b>717</b>         | Fulton Hogan Limited  | 51    | Volume 1 | 14 Use of the Rural Environment | Policy 14.4.1  | Oppose          |
| Decision Requested | <p>Amend Policy 14.4.1 to consider all contributing elements to rural character and amenity. For example:</p> <p><del>Policy 14.4.1 - Subdivision, use and development of Marlborough's rural environments should be of a density, scale, intensity and location that individually and cumulatively recognises that rural character and amenity values vary across the region resulting from the combination of natural and physical resources present, including the location and extent of established and permitted activities. Therefore subdivision, use and development should be of a density, scale, intensity and location that individually and cumulatively recognises</del> the following elements:</p> <p>(a) a lack of buildings and structures;</p> <p>(b) a very high ratio of open space in relation to areas covered by buildings;</p> <p>(c) open space areas in pasture, trees, vineyards, crops or indigenous vegetation;</p> <p>(d) areas with regenerating indigenous vegetation, particularly in the Marlborough Sounds;</p> <p>(e) tracts of unmodified natural features, indigenous vegetation, streams, rivers and wetlands;</p> <p>(f) farm animals and wildlife;</p> <p>(g) noises, smells and sights of agriculture, viticulture, horticulture, <del>quarrying and forestry</del> <u>and a working rural environment</u>;</p> <p>(h) post and wire fences, purpose-built farm buildings and scattered dwellings;</p> <p>(i) low population density;</p> <p>(j) the presence of Blenheim, Omaka and Koromiko airports;</p> <p>(k) generally narrow carriageways within wide road reserves, often unsealed with open drains, low-speed geometry and low traffic volumes; and</p> <p>(l) a general absence of urban-scale and urban-type infrastructure, such as roads with kerb and channel, footpaths, mown berms, street lights or advertising signs.</p> |       |          |                                 |                |                 |

| Sub No             | Submitter  | Point | Volume   | Chapter                                | Provision      | Type            |
|--------------------|--|-------|----------|--|----------------|-----------------|
| 717                | Fulton Hogan Limited   | 52    | Volume 1 | 14 Use of the Rural Environment        | Policy 14.4.10 | Support in Part |
| Decision Requested | <p>Include reference to all activities that are necessarily located in the rural environment and rely on the rural resource, including quarrying, through direct reference in the policy or explanation; or through including a definition of productive rural activities that included all activities that are necessary located in the rural environment and rely on the rural resource, for example:</p> <p><b><u>Productive rural activities means farming, plantation forestry, intensive farming, horticulture and quarrying activities</u></b></p>  |       |          |  |                |                 |
| 717                | Fulton Hogan Limited   | 53    | Volume 1 | 14 Use of the Rural Environment        | Policy 14.4.15 | Oppose          |
| Decision Requested | <p>Amend Policy 14.4.15 and the explanation to ensure that it does not prevent legitimate rural activities such as quarrying from occurring in the rural environment. For example:</p> <p><b>Policy 14.4.15 - The Wairau Plain has been recognised as having particularly amenity and rural character values that are to be maintained and enhanced by:</b></p> <p><b><u>(a) enabling primary production activities as provided for in the underlying Rural Environment Zone and activities the rely on the rural resource such as quarrying activities;</u></b></p> <p><b>(b) avoiding subdivision below eight hectares to help retain primary production options and retain a sense of openness within the Wairau Plain Area;</b></p> <p><b>(c) controlling residential activity, other than that associated with primary production, to avoid conflict between rural and residential amenity expectations;</b></p> <p><b>(d) managing the establishment of subdivision, use and development to avoid, remedy or mitigate effects on the safety functioning and efficiency of the arterial road network; and</b></p> <p><b><u>(e) ensuring that other than as provided for in Policies 14.3.1, 14.5.3 and 14.5.4, activities not related to primary production or quarrying activities in the Wairau Plain Area are to be avoided.</u></b></p> |       |          |  |                |                 |
| 717                | Fulton Hogan Limited   | 54    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | 15.            | Support         |
| Decision Requested | Provide guidance as to the permitted activity threshold for dust discharges from activities such as construction and bulk handling of materials.   |       |          |  |                |                 |

| Sub No             | Submitter  | Point | Volume   | Chapter                                | Provision      | Type    |
|--------------------|--|-------|----------|--|----------------|---------|
| 717                | Fulton Hogan Limited   | 55    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.1.9  | Support |
| Decision Requested | Retain Policy 15.1.9.  |       |          |  |                |         |
| 717                | Fulton Hogan Limited   | 56    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.1.16 | Oppose  |
| Decision Requested | Delete Policy 15.1.6.  |       |          |  |                |         |
| 717                | Fulton Hogan Limited   | 57    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.2.4  | Oppose  |
| Decision Requested | <p>Amend Policy 15.2.4 to provide for applications for discharge consents that are a renewal of an existing discharge. For example:</p> <p><b>Policy 15.2.4 - Refuse discharge permit applications to discharge PM10 into air within the Blenheim airshed if the discharge is likely to increase the concentration of PM10 by more than 2.5 micrograms per cubic metre (24 hour average) in any part of the airshed, unless:</b></p> <p><b>(a) the Blenheim airshed average exceedance is less than 1 per year; or</b></p> <p><b>(b) the application offsets the proposed PM10 discharge by reducing PM10 discharges from another source(s) in the airshed by the same or greater amount; <u>or</u></b></p> <p><b><u>(c) the application is subject to Section 124 of the RMA.</u></b></p> |       |          |  |                |         |

| Sub No             | Submitter  | Point | Volume   | Chapter                                | Provision     | Type    |
|--------------------|--|-------|----------|--|---------------|---------|
| 717                | Fulton Hogan Limited   | 58    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.3.5 | Oppose  |
| Decision Requested | <p>Amend Policy 15.3.5 so as to broaden the scope of the policy beyond discharges from industrial and trade processes. For example:</p> <p><b>Policy 15.3.5 - Manage discharges of contaminants to air not specifically provided for in Policies 15.2.1 to 15.2.3 or 15.3.1 to 15.3.4 by:</b></p> <p><b>(a) allowing, as permitted activities, discharges of contaminants into air from industrial or trade promises or industrial or trade processes activities that have no more than minor adverse effects on the environment;</b></p> <p><b>(b) avoiding or mitigating adverse effects of localised ground level concentrations of contaminants, including cumulative effects on:</b></p> <p><b>(i) human health; and</b></p> <p><b>(ii) amenity values; and</b></p> <p><b>(c) avoiding or mitigating adverse effects on any other values.</b></p> |       |          |  |               |         |
| 717                | Fulton Hogan Limited   | 59    | Volume 1 | 16 Waste                               | Policy 16.1.2 | Support |
| Decision Requested | Retain Policy 16.1.2.  |       |          |  |               |         |
| 717                | Fulton Hogan Limited   | 60    | Volume 1 | 16 Waste                               | 16.M.1        | Support |
| Decision Requested | Retain 16.M.1 Regional rules.  |       |          |  |               |         |
| 717                | Fulton Hogan Limited   | 61    | Volume 1 | 17 Transportation                      | Policy 17.4.5 | Oppose  |
| Decision Requested | <p>Amend Policy 17.4.5 to remove the reference to locating activities on specific properties and to shift the focus to the access and include reference to minimising effects on amenity values associated with secondary routes. For example:</p> <p><b>Policy 17.4.5 - Commercial and industrial activities with potential to adversely affect the arterial road network should preferably be located on properties with access to secondary arterial and collector routes unless this will cause an adverse effect on the amenity of this road.</b></p>   |       |          |  |               |         |

| Decision Requested | <p>Retain Methods of Implementation 8.M.3 <i>The Council's Marlborough Significant Natural Areas programme involves the collection of information about natural ecosystems on private land, with the aim of working with landowners to help protect significant sites. An ecological survey is undertaken with property reports prepared that summarise the ecological values found and suggest management options to ensure their long term survival.</i></p> <p><i>The Department of Conservation has also identified significant sites on private land through its Protected Natural Areas survey programme. There is no duplication in effort as the Council and Department programmes have surveyed different areas of Marlborough.</i></p> <p><i>Although a good proportion of private land in Marlborough has been surveyed, some landowners have not allowed the Council onto their property, therefore the programme of identifying sites is incomplete and ongoing. If a landowner changes their mind or a property changes ownership and a new landowner wishes to have their property surveyed, then the Council will undertake the survey work.</i></p>  |       |          |                           |              |                 |
| <b>424</b>         | Michael and Kristen Gerard  | 35    | Volume 1 | 8 Indigenous Biodiversity | 8.M.6        | Support         |
| Decision Requested | <p>Retain Methods of Implementation 8.M.6 <i>The Council will support, including financially, the protection and/or restoration of areas with biodiversity value in the following ways:</i></p> <ul style="list-style-type: none"> <li><i>through the established landowner assistance programme, which provides both practical and financial help with work such as pest and weed control and fencing;</i></li> <li><i>by the waiving of resource consent application fees for activities that would assist in the protection of significant areas;</i></li> <li><i>through the annual planning process, consider granting reductions in rating for properties where sites are protected through conservation covenants;</i></li> <li><i>from funding made available by central government for the protection of areas of significant indigenous vegetation and habitats of indigenous fauna;</i></li> <li><i>by prioritising available funds for significant sites where sites are subject to protective covenants;</i></li> <li><i>through appropriate investigations to improve our understanding of the nature and state of indigenous biodiversity in Marlborough; and</i></li> <li><i>through supporting initiatives developed by community and industry groups to promote protection and restoration of indigenous biodiversity.</i></li> </ul> |       |          |                           |              |                 |

A feed budgeting plan for the year.</li> </ol> |       |          |                          |           |        |

9. A soil analysis report showing the current nutrient status of the farmed land as at the beginning of the annual Farming Plan.

3.3.1.4. No farming must occur on any land with a slope greater than 35°.

3.3.1.5. Any material change to the annual Farm Plan must be notified to Council at least 20 working days before the change is implemented.

3.3.1.6. Farming must not be in, or within:

(a) 8m of a river (except an ephemeral river when not flowing) or lake

(b) 8m of a Significant Wetland or 30m of a river within a Water Resource Unit with a Natural State classification;

(c) 200m of the coastal marine area.

3.3.1.7. Farming must not be within such proximity to any abstraction point for a drinking water supply registered under section 69J of the Health Act 1956 as to cause contamination of that water supply.

3.3.1.8. Water control measures and sediment control measures must be constructed & maintained in:

(a) All areas disturbed by any excavation or filling undertaken on the land;

(b) All farming roads, tracks or stock water sites on the land (including existing farming roads, tracks or stock water sites);

(c) Such that the areas, roads, tracks and sites are stable.

3.3.1.9. No animal must be mustered through the bed of a river (except an ephemeral river or intermittently flowing river, when not flowing), lake or Significant Wetland or through the coastal marine area.

3.3.1.10. Stock, farmed animal faeces and soil debris must:

(a) Not be within 8m of, or deposited in, a river (except an ephemeral river or intermittently flowing river when not flowing), lake, Significant Wetland or the coastal marine area;

(b) Not be left in a position where it can enter, or be carried into, a river (except an ephemeral river), lake, Significant Wetland or the coastal marine area;

(c) Be placed on stable ground;

(d) Be managed to avoid accumulation to levels that could cause erosion or instability of the land.

3.3.1.11. Wheeled or tracked machinery must not be operated in or within 8m of a river (except an ephemeral river or intermittently flowing river, when not flowing) or lake except where:

(a) Access is essential to muster stock away from the river or lake;

(b) Crossing the bed of a river to enable access;

(c) Stock, farmed animal faeces or soil debris must be removed from the river or lake so as to comply with other Standards for Farming.

In all cases, the Council must be notified at least 2 working days prior to the use of the machinery.

3.3.1.12. Wheeled or tracked machinery must not be operated in or within 8m of a Significant Wetland or the coastal marine area.

3.3.1.13. Stock must be bridged when being mustered across a river (except an ephemeral river or intermittently flowing river, when not flowing).

3.3.1.14. Farming must not cause any conspicuous change in the colour or visual clarity of a flowing river after reasonable mixing or the water in a Significant Wetland, lake or the coastal marine area, as measured as follows:

(a) Hue must not be changed by more than 10 points on the Munsell scale.

(b) The natural clarity must not be conspicuously changed due to sediment or sediment laden discharge originating from the Farming site.

(c) The change in reflectance must be <50%.

3.3.1.15. All significant Farming road failures and slope failures must be reported to Council within 2 working days of the land owner or farm manager (including any employee or contractor of the owner or farm manager) becoming aware of the failures.

3.3.1.16. Water control measures must be designed and implemented to ensure they remain effective at all times.

4 Coastal Environment Zone

4.1.1.

Oppose

Decision Requested

That the following rules 4.3.1.2 to 4.3.1.16 inclusive are added to the permitted activity of "Farming" in the Coastal Environment Zone:

4.3.1.2 Farming on land between 20 and 35 degrees is a discretionary activity for which consent must be applied for.

4.3.1.3 Notification must be given to Council for discretionary Farming. This will take the form of an annual Farming Plan that addresses all of the matters set out in Appendix 22b.

Appendix 22b Notification items:

1. The name and contact details of the landowner, the owner of the stock on the land and the manager of the farming operation.
2. The location on a map of all rivers, lakes or significant wetlands within or adjacent to the area to be Farmed.
3. The location on a map of the coastal marine area if it is within 50 metres of the area to be farmed.
4. The location on a map of all existing and new farming roads, tracks and stock water-points to be used, created or maintained.
5. Any erosion and sediment control methods to be used.
6. The location on a map of any stock bridges.
7. A plan showing the intended stocking of farm animals and the rotational stocking plan.
8. A feed budgeting plan for the year.
9. A soil analysis report showing the current nutrient status of the farmed land as at the beginning of the annual Farming Plan.

4.3.1.4. No farming must occur on any land with a slope greater than 35°.

4.3.1.5. Any material change to the annual Farm Plan must be notified to Council at least 20 working days before the change is implemented.

4.3.1.6. Farming must not be in, or within:

- (a) 8m of a river (except an ephemeral river when not flowing) or lake
- (b) 8m of a Significant Wetland or 30m of a river within a Water Resource Unit with a Natural State classification;
- (c) 200m of the coastal marine area.

4.3.1.7. Farming must not be within such proximity to any abstraction point for a drinking water supply registered under section 69J of the Health Act 1956 as to cause contamination of that water supply.

4.3.1.8. Water control measures and sediment control measures must be constructed & maintained in:

- (a) All areas disturbed by any excavation or filling undertaken on the land;
- (b) All farming roads, tracks or stock water sites on the land (including existing farming roads, tracks or stock water sites);
- (c) Such that the areas, roads, tracks and sites are stable.

4.3.1.9. No animal must be mustered through the bed of a river (except an ephemeral river or intermittently flowing river, when not flowing), lake or Significant Wetland or through the coastal marine area.

4.3.1.10. Stock, farmed animal faeces and soil debris must:

(a) Not be within 8m of, or deposited in, a river (except an ephemeral river or intermittently flowing river when not flowing), lake, Significant Wetland or the coastal marine area;

(b) Not be left in a position where it can enter, or be carried into, a river (except an ephemeral river), lake, Significant Wetland or the coastal marine area;

(c) Be placed on stable ground;

(d) Be managed to avoid accumulation to levels that could cause erosion or instability of the land.

4.3.1.11. Wheeled or tracked machinery must not be operated in or within 8m of a river (except an ephemeral river or intermittently flowing river, when not flowing) or lake except where:

(a) Access is essential to muster stock away from the river or lake;

(b) Crossing the bed of a river to enable access;

(c) Stock, farmed animal faeces or soil debris must be removed from the river or lake so as to comply with other Standards for Farming.

In all cases, the Council must be notified at least 2 working days prior to the use of the machinery.

4.3.1.12. Wheeled or tracked machinery must not be operated in or within 8m of a Significant Wetland or the coastal marine area.

4.3.1.13. Stock must be bridged when being mustered across a river (except an ephemeral river or intermittently flowing river, when not flowing).

4.3.1.14. Farming must not cause any conspicuous change in the colour or visual clarity of a flowing river after reasonable mixing or the water in a Significant Wetland, lake or the coastal marine area, as measured as follows:

(a) Hue must not be changed by more than 10 points on the Munsell scale.

(b) The natural clarity must not be conspicuously changed due to sediment or sediment laden discharge originating from the Farming site.

(c) The change in reflectance must be <50%.

4.3.1.15. All significant Farming road failures and slope failures must be reported to Council within 2 working days of the land owner or farm manager (including any employee or contractor of the owner or farm manager) becoming aware of the failures.

4.3.1.16. Water control measures must be designed and implemented to ensure they remain effective at all times.

|--------------------|--|---|----------|----------------------------|--------|--------|
| <b>1017</b>        | Peter Gilford Gilbert  | 6 | Volume 2 | 4 Coastal Environment Zone | 4.6.4. | Oppose |
| Decision Requested | <p>Create minimum standards, or use existing standards for the same activity permitted in other zones, so that there is a minimum standard for discretionary activities to which might be added specific rules for the discretionary activity.</p> <p>For example, for the discretionary activity of Commercial forestry harvesting in the Coastal Environment Zone (CEZ), as a minimum standard use the standards for the permitted activity of Commercial forestry harvesting in Chapter Three Rural Environment Zone (Heading 3.3.7).</p> |   |          |                            |        |        |

| Sub No             | Submitter  | Point | Volume   | Chapter                          | Provision     | Type            |
|--------------------|--|-------|----------|----------------------------------|---------------|-----------------|
| 1017               | Peter Gilford Gilbert  | 7     | Volume 1 | 7 Landscape                      | Policy 7.2.2  | Oppose          |
| Decision Requested | <p>1. Adopt the proposed rules for Farming in this submission (point #4 and #5), which would cause resource consent to be necessary for farming on fragile environments like this. In this way farming stock-levels and management could be controlled, or prohibited altogether.</p> <p>2. Fence to exclude stock from the gullies, and plant trees and shrubs in the gullies to create riparian strips for soil conservation, amelioration of water flows, birds, bees, and public amenity. Quail Stream lower to mid-length is the sole example of this type of protection.</p> <p>3. Failing the inclusion of the proposed rules for the permitted activity of Farming (submission points #4 and #5) being adopted, where the MDC has control in the Wither Hills Farm Park, restrict grazing to cattle-only, limit the stocking to a minimal level, and embark on a rotational grazing plan that allows the protective grass sward to recover properly.</p> <p>4. MDC buy those areas of the "Wairau Dry Hills Landscape" that are such a poor example of our care for the environment, and apply best management practice to the land as per the above recommendations, or plant forest on the land to protect the soil structure and fertility.</p> |       |          |                                  |               |                 |
| 1017               | Peter Gilford Gilbert  | 8     | Volume 1 | 5 Allocation of Public Resources | Policy 5.3.15 | Oppose          |
| Decision Requested | <p>That the following amendment (strike-through) is made to Policy 5.3.15:</p> <p><del>Policy 5.3.15 Require land use consent for the planting of new commercial forestry in flow sensitive areas.</del></p> <p>Recourse should be via the law, and through the Courts if necessary.</p>   |       |          |                                  |               |                 |
| 1017               | Peter Gilford Gilbert  | 9     | Volume 1 | 5 Allocation of Public Resources | Policy 5.4.4  | Oppose          |
| Decision Requested | <p>1. Water allocation, surplus to the needs of the owner, should be determined by the controlling authority with due process. The surplus water allocation can then be re-allocated on application by another party, by the controlling authority.</p> <p>2. Change the water allocation process so that there is more control by MDC, and so that more efficiency of water use is achieved.</p>  |       |          |                                  |               |                 |
| 1017               | Peter Gilford Gilbert  | 10    | Volume 2 | 5 Urban Residential 1 and 2 Zone | 5.5.5.        | Oppose          |
| Decision Requested | <p>After 15 years, the efficacy and safety of the installation can be certified by a certified installer of small-scale solid-fuel burning appliances, on a yearly basis on or before the anniversary of the installation.</p>   |       |          |                                  |               |                 |

| Decision Requested | That the wording "Removal of wilding pines in the Marlborough Sounds" is included in 7.AER.1.  |       |          |  |               |         |
| 752                | Guardians of the Sounds  | 23    | Volume 1 | 8 Indigenous Biodiversity              | Objective 8.1 | Support |
| Decision Requested | Retain the explanation of Objective 8.1 ( <b><i>inferred</i></b> ).  |       |          |  |               |         |
| 752                | Guardians of the Sounds  | 24    | Volume 1 | 8 Indigenous Biodiversity              | 8.AER.1       | Oppose  |
| Decision Requested | That by 2020 a robust and substantial Marine Protected Areas/Marine Park, including at least all of Queen Charlotte Sound and Tory Channel, is established ( <b><i>inferred</i></b> ).   |       |          |  |               |         |
| 752                | Guardians of the Sounds  | 25    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Issue 15C     | Oppose  |
| Decision Requested | <p>That the following new Methods of Implementation are included under Issue 15C:</p> <p><i>Management purpose (15-11)</i></p> <p><b><i>15.M.X Replanting Management Plan</i></b></p> <p><b><i>A mandatory plan that identifies areas at high risk of erosion and require retirement and implementation of buffers, such as gully heads and steep ephemeral gullies.</i></b></p> <p><b><i>Incentives</i></b></p> <p><b><i>15.M.X Greater recognition and encouragement of planting permanent forest (not for harvest) or allowing native regeneration. Assistance could include rates rebate and funding for control of wilding pines.</i></b></p> |       |          |  |               |         |
| 752                | Guardians of the Sounds  | 26    | Volume 2 | 4 Coastal Environment Zone             | 4.3.13.       | Oppose  |

| Sub No             | Submitter  | Point | Volume   | Chapter                                 | Provision     | Type    |
|--------------------|--|-------|----------|---|---------------|---------|
| Decision Requested | That the following new standards are included under Heading 4.3.13:<br><b>a) All road design, construction, and maintenance to be certified by a Chartered Professional Engineer (CPENZ) for land stability, and effective erosion and water control.</b><br><b>b) All areas of loose fill (soil) to have a grass cover established within 12 months of being created unless covered by natural revegetation.</b>  |       |          |   |               |         |
| <b>752</b>         | Guardians of the Sounds  | 27    | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4C      | Oppose  |
| Decision Requested | That a new policy and rules aimed at preventing wilding pines spreading beyond the borders of commercial forestry are included.<br>That a requirement to use the industry Wilding Spread Risk Calculator to assess the risk of tree spread for a site prior to planting taking place is included.  |       |          |   |               |         |
| <b>752</b>         | Guardians of the Sounds  | 28    | Volume 1 | 13 Use of the Coastal Environment       | Issue 13A     | Oppose  |
| Decision Requested | The submission does not include a decision requested.  |       |          |   |               |         |
| <b>752</b>         | Guardians of the Sounds  | 29    | Volume 1 | 13 Use of the Coastal Environment       | Policy 13.4.1 | Oppose  |
| Decision Requested | That the following amendments are made:<br>1. Habitat protection for Blue Cod, particularly from all fishing impacts in the Marlborough Sounds, should include all the enclosed bays and 463m off all islands (as at Long Island Marine Reserve) and includes fishing of any type only permitted in open channels.<br>2. Commercial dredging is not be allowed to resume at any time in the Queen Charlotte Sound, or ideally anywhere in the Marlborough Sounds.<br>3. There is a permanent and complete ban on recreation dredges in the Marlborough Sounds and that scallops should only be sustainably harvested by scuba/snorkel in future. |       |          |   |               |         |
| <b>752</b>         | Guardians of the Sounds  | 30    | Volume 1 | 13 Use of the Coastal Environment       | Issue 13E     | Support |
| Decision Requested | That permanent moorings should be provided in future marine protected areas and existing identified ecologically sensitive areas.  |       |          |   |               |         |

| Sub No             | Submitter  | Point | Volume   | Chapter                                | Provision      | Type    |

|--------------------|---|-------|----------|--------------|-----------------------------|--------|
| Decision Requested | <p>1. Make changes to the wording of the plan to acknowledge and give due weight to the seriousness of the threats posed by climate change, currently these are downplayed (see submission).</p> <p>2. Strengthen emphasis on the importance of research and acknowledge the sources of information that are available. While there are still elements of uncertainty, these do not reduce the ability of the Council to take action on climate change and make effective decisions as the plan currently implies.</p> <p>3. Focus on reducing regional greenhouse gas emissions, not on offsetting.</p> <p>4. Give climate change its proper place at the forefront of this Environmental Plan, designed to carry through until 2026 or later, Chapter 1 not Chapter 19.</p> |       |          |              |                             |        |

| Decision Requested | Retain Policy 5.1.1.   |       |          |                                  |               |                 |
| <b>688</b>         | Judy and John Hellstrom  | 13    | Volume 1 | 5 Allocation of Public Resources | Policy 5.1.2  | Support         |
| Decision Requested | Retain Policy 5.1.2.   |       |          |                                  |               |                 |
| <b>688</b>         | Judy and John Hellstrom  | 14    | Volume 1 | 5 Allocation of Public Resources | Objective 5.2 | Support         |
| Decision Requested | Retain Objective 5.2 and associated policies.  |       |          |                                  |               |                 |
| <b>688</b>         | Judy and John Hellstrom  | 15    | Volume 1 | 5 Allocation of Public Resources | Policy 5.2.4  | Support         |
| Decision Requested | There should be reference to the issue of toxic metals (copper, chromium and arsenic) the leaching into the aquifers, particularly under vineyard posts. It is noted that the risk of toxic metals (e.g., copper, chromium and arsenic) from vineyard is generally perceived to be small, but if the precautionary principle is used, this issue needs to be covered in the MEP. |       |          |                                  |               |                 |
| <b>688</b>         | Judy and John Hellstrom  | 16    | Volume 1 | 5 Allocation of Public Resources | Policy 5.2.11 | Support in Part |
| Decision Requested | Policy 5.2.11 should be cross-referenced to the Council's climate change policies, as, given the very low height above sea-level in the Lower Wairau Valley (1 -2 m in places), salt-water intrusion into the aquifer will become more of an issue for management in the future.   |       |          |                                  |               |                 |
| <b>688</b>         | Judy and John Hellstrom  | 17    | Volume 1 | 5 Allocation of Public Resources | Policy 5.2.12 | Support in Part |
| Decision Requested | Policy 5.2.12 should be cross-referenced to the Council's climate change policies, as, given the very low height above sea-level in the Lower Wairau Valley (1 -2 m in places), salt-water intrusion into the aquifer will become more of an issue for management in the future.   |       |          |                                  |               |                 |

|--------------------|---|-------|----------|-----------------------------------|-----------------|-----------------|
| Decision Requested | We submit that the last sentence of this policy should be amended to make it clear that it does not provide for routine "free-loading" by local residents who may have declined to pay a share of maintenance or consent costs, or commercial users who will not take responsibility for a share of repairing damage resulting from their (regular) use. We accept that all jetties must be available for public access in principle (examples are for emergencies, and for visitors arriving to a specific location), but that this provision will be taken advantage of, if this policy is retained, with no ability for consent holders to seek redress or contribution for the <u>regular</u> use of jetties by others. |       |          |                                   |                 |                 |

| Decision Requested | We submit that, with rising sea-level, existing sea-wall structures that have either been consented, or which have been in place for 20-60 years (in some cases) should not retrospectively be required to seek consents. Any requirement to take them down could result in even more damage to beachfronts. The exception to this could be those constructed out of old car tyres: there have already been issues in Endeavour Inlet requiring clean-up of abandoned or badly-maintained tyre structures. |              |               |                                   |                  |                 |

| Decision Requested | <p>Make the following amendments (strike-through and bold) to Policy 7.2.10 (<i>inferred</i>):</p> <p><i>Policy 7.2.10 – Reduce the impact of wilding <del>pin</del>es- <b>spread of exotic tree species</b> on the landscape by:</i></p> <p><i>(a) supporting initiatives to control existing wilding <del>pin</del>es <b>spread</b> and limit their further spread; and</i></p> <p><i>(b) controlling the planting of commercial wood species that are prone to wilding <del>pin</del>e spread.</i></p> <p>The ability of <b>exotic tree species</b> <del>pine trees</del> to spread from commercial plantations, soil conservation plantings, rural shelterbelts and isolated plantings is well documented in Marlborough. As <del>pin</del>es <b>these tree species</b> spread, they alter the landscape due to their visual dominance and colour contrast. In addition, where forests have been harvested but not replanted there is the potential for rapid growth of wilding seedlings, creating more unmanaged sources of wilding <del>pin</del>e spread. Many in the community believe that these landscape changes are unacceptable and some locals have initiated control programmes in an effort to reduce the presence of wilding <del>pin</del>es <b>tree species</b> in the landscape and limit their spread to other areas. These efforts are to be supported as a means of effective landscape protection. Additionally, there are certain species of tree grown for commercial wood production that are more prone to wilding <del>pin</del>e spread. Controls on planting certain species will assist to reduce the risk of wilding <del>pin</del>e spread and therefore reduce impacts on landscape values.</p> |       |          |             |               |                 |
| 688                | Judy and John Hellstrom   | 181   | Volume 1 | 7 Landscape | Policy 7.2.11 | Support in Part |
| Decision Requested | <p>Make the following amendments (strike-through and bold) to Policy 7.2.11 (<i>inferred</i>):</p> <p><i>Policy 7.2.11 – Liaise with the Department of Conservation regarding any landscape issues on land administered by the Department and identified as having outstanding natural features and landscapes (including within the Marlborough Sounds Coastal Landscape).</i></p> <p>A significant proportion of outstanding natural features and landscapes occur on Crown land administered by the Department of Conservation. Because this land is managed for conservation purposes and is not likely to attract development, there are fewer threats to the biophysical, sensory and associative values in these landscapes compared to those areas with outstanding natural features and landscapes on privately owned land. However, that is not to say that potential threats do not exist. For example, applications can be made to operate concessions within areas administered by the Department and vegetation change can occur as a result of pest plant incursions (including wilding <del>pin</del>es <b>exotic tree species</b>, broom and gorse). The Council will liaise with the Department on an ongoing basis to discuss landscape issues as they arise and to develop and implement appropriate management responses.</p>  |       |          |             |               |                 |

| <b>688</b>         | Judy and John Hellstrom   | 190          | Volume 2      | 4 Coastal Environment Zone              | 4.1.7.           | Support in Part |
| Decision Requested | That there are requirements to control re-growth and manage these areas back into permanent native cover for long term landscape and other benefits. There should be requirements specifically to restore and/or replant the coastal set-back areas, for example, to indigenous forest. (At present, there are very unsightly remnants of commercial forestry plantings along the foreshore, particularly in parts of Tory Channel, but also elsewhere in the Sounds, after harvesting has been completed.) |              |               |   |                  |                 |

For example to:<br><br>Include in Policy 13.8.2 an additional clause that considers whether there is sufficient space to:<br><br>(i) provide for safe anchorage either outside the proposed Mooring Management Area; or<br><br>(ii) require the provision of some public moorings in the proposed Mooring Management Area; and<br><br>(iii) ensure the most sheltered and safest location within a bay is available for safe anchorage for public use. |       |          |                                   |   |        |
| <b>686</b>         | Ernest and Catherine Henshaw  | 3     | Volume 1 | 13 Use of the Coastal Environment | Objective 13.9                            | Oppose |
| Decision Requested | Recognise in the explanation to Objective 13.9 that safe anchorage may also complete for space with swing moorings.   |       |          |                                   |   |        |
| <b>686</b>         | Ernest and Catherine Henshaw  | 4     | Volume 1 | 13 Use of the Coastal Environment | Policy 13.9.1                             | Oppose |
| Decision Requested | Recognise in Policy 13.9.1 that short term anchorages should be in the most sheltered and safe location within a bay and include as an additional matter the number of moorings held by the "would be consent holder" within the Marlborough Sounds.  |       |          |                                   |   |        |
| <b>686</b>         | Ernest and Catherine Henshaw  | 5     | Volume 1 | 13 Use of the Coastal Environment | Policy 13.9.7                             | Oppose |
| Decision Requested | Make all matters in Policy 13.9.7 (including the amendments sought above) relevant in determining a "renewal" application.  |       |          |                                   |   |        |
| <b>686</b>         | Ernest and Catherine Henshaw  | 6     | Volume 2 | 16 Coastal Marine Zone            | 16.                                       | Oppose |
| Decision Requested | The submission does not include a clear decision requested.   |       |          |                                   |   |        |
| <b>624</b>         | Carol-Ann Herbert   | 1     | Volume 1 | 2 Background                      | Identifying regionally significant issues | Oppose |
| Decision Requested | Add a new issue to Volume 1 to recognise that aquaculture, farming, forestry and vineyards are regionally significant sectors in Marlborough's economy that sustains our communities.   |       |          |                                   |   |        |

|--------------------|---|-------|----------|---|--------------|-----------------|
| Decision Requested | Add a new method of implementation under Objective 7.2 to read:<br><br><b><u>7.M.10 Heritage New Zealand Pouhere Taonga Act 2014</u></b><br><b><u>This Act makes it an offence to destroy or modify an archaeological site without first obtaining an 'archaeological authority'. This applies to both recorded and unrecorded archaeological sites. It is important that the planning for any building or development takes this issue into account and an archaeological assessment may be required. The applicant is advised to contact Heritage New Zealand Pouhere Taonga if any activity such as earthworks, fencing or landscaping may modify damage or destroy any archaeological site. More information is contained in Appendix 13.</u></b> |       |          |   |              |                 |
| <b>768</b>         | Heritage New Zealand Pouhere Taonga   | 21    | Volume 1 | 7 Landscape                             | 7.AER.1      | Oppose          |
| Decision Requested | New clause in the monitoring effectiveness column:<br>The instances of archaeological site damage recorded by Heritage New Zealand decreases or is maintained at zero, and the instances of site avoidance increases.   |       |          |   |              |                 |
| <b>768</b>         | Heritage New Zealand Pouhere Taonga   | 22    | Volume 1 | 9 Public Access and Open Space          | Policy 9.4.4 | Support in Part |
| Decision Requested | Amend 9.4.4(g) to read:<br><br>(g) any historical <del>al</del> <b>heritage</b> , conservation, <del>or</del> ecological, <del>archaeological or waahi tapu</del> values; <b>or spiritual and cultural values of Marlborough's tangata whenua iwi</b> associated with the reserve;  |       |          |   |              |                 |
| <b>768</b>         | Heritage New Zealand Pouhere Taonga   | 23    | Volume 1 | 19 Climate Change                       | 19.          | Oppose          |
| Decision Requested | Council develop an appropriate anticipated environmental result to address Objective 9.4. Heritage New Zealand recommends the following monitoring clauses to address cultural and historic heritage values: <ul style="list-style-type: none"> <li>• The condition, of Heritage Resources as defined in Volume 2, is maintained or improved</li> <li>• The instances of archaeological site damage recorded by Heritage New Zealand decreases or is maintained at zero, and the instances of site avoidance increase.</li> </ul>   |       |          |   |              |                 |
| <b>768</b>         | Heritage New Zealand Pouhere Taonga   | 24    | Volume 1 | 10 Heritage Resources and Notable Trees | 10.          | Support in Part |
| Decision Requested | It is also important to note that Heritage New Zealand retains regulatory responsibilities regarding archaeological sites. Any modification or destruction of a known or unknown recorded or unrecorded archaeological site requires an archaeological authority under the Heritage New Zealand Pouhere Taonga Act 2014 and Heritage New Zealand processes applications for such authorities.   |       |          |   |              |                 |

| Sub No             | Submitter  | Point | Volume   | Chapter                                 | Provision      | Type            |
|--------------------|--|-------|----------|---|----------------|-----------------|
| 768                | Heritage New Zealand Pouhere Taonga  | 25    | Volume 1 | 10 Heritage Resources and Notable Trees | Issue 10A      | Support in Part |
| Decision Requested | <p>Marlborough's historic heritage is vulnerable to the <b>inappropriate</b> use and development of natural and physical resources. Archaeological sites are particularly vulnerable to land disturbance, as they tend to be buried and excavation at, or in close proximity to, the site can <u>unearth</u> disturb the object of significance and its archaeological context. If appropriate action is not taken, the heritage resource <b>that was previously</b> buried can potentially be <b>damaged modified</b> or destroyed. For archaeological sites that have a connection to Marlborough's tangata whenua iwi, such adverse effects can also cause a serious cultural affront to the mana of an iwi.</p> <p><b><u>One of the threats to historic heritage is that there are many unknown areas of heritage significance. A lack of knowledge about the location, extent and values of historic heritage creates risks that require management.</u></b> For example, although past archaeological studies have revealed a little of the Maori and early European settlement patterns and culture, much more remains to be identified, researched and recorded. There will also be forgotten sites. The lack of awareness of the existence of a heritage resource makes the resource vulnerable to irreparable damage as a result of land use change.</p> |       |          |   |                |                 |
| 768                | Heritage New Zealand Pouhere Taonga  | 26    | Volume 1 | 10 Heritage Resources and Notable Trees | Objective 10.1 | Support in Part |
| Decision Requested | <p>Amend Objective 10.1 to read:</p> <p>Objective 10.1 – Retain and protect heritage resources that contribute to <b><u>an understanding and appreciation of Marlborough's and New Zealand's history and cultures. to the character of Marlborough.</u></b></p>  |       |          |   |                |                 |

|--------------------|--|-------|----------|----------------|-----------|--------|
| Decision Requested | Amend 2.32.1.10 to read:<br><br>When a building is increased in floor area, or undergoes a partial change in use, parking requirements for the existing part of the building (if any), or that part remaining in the existing activity, will remain unaltered. Parking requirements for the increased floor area or that area with a new or altered use must be calculated in accordance with Table 2.1. For the purpose of this standard, 'partial' means an addition or alteration of more than 20% of the gross floor area over a 5 year timeframe. <b><u>This rule does not apply for any change of use of a Heritage Resource included in Schedule 1 or 2 of Appendix 13.</u></b>   |       |          |                |           |        |
| <b>768</b>         | Heritage New Zealand Pouhere Taonga  | 66    | Volume 2 | 25 Definitions | 25.       | Oppose |
| Decision Requested | Council should consult with tangata whenua to agree on how sites of significance to Maori should be referred to and then an appropriate definition be included in Chapter 25 Definitions.<br>That the following definitions be added to the plan:<br><b>Alteration</b> means any changes to the fabric or characteristics of a building involving, but not limited to, the removal and replacement of walls, windows, ceilings, floors or roofs, either internally or externally and includes any sign attached to the building. It does not include repair or maintenance.<br><b>Addition</b> means an extension, or increase in floor area, number of stories, or height of a building or structure. It includes the construction of new floors, walls, ceilings, and roofs.<br>Archaeological site has the same meaning as in Section 6 of the Heritage New Zealand Pouhere Taonga Act 2014.<br><b>Repair</b> means the restoration to good or sound condition of any existing building or structure (or part of any existing building or structure) for the purpose of its maintenance. It includes reconstruction after damage caused by natural hazards. |       |          |                |           |        |
| <b>768</b>         | Heritage New Zealand Pouhere Taonga  | 67    | Volume 2 | 25 Definitions | 25.       | Oppose |
| Decision Requested | Amend the definition for Maintenance of a building or structure to read:<br><br>Maintenance <del>of a building or structure</del> means the protective care of a place. For clarity, the maintenance of a building or structure does not extend to the complete rebuild or replacement of the a building or structure.   |       |          |                |           |        |
| <b>768</b>         | Heritage New Zealand Pouhere Taonga  | 68    | Volume 2 | 25 Definitions | 25.       | Oppose |
| Decision Requested | The definition be amended to only focus on replacement and the word 'maintenance' be removed.  |       |          |                |           |        |
| <b>768</b>         | Heritage New Zealand Pouhere Taonga  | 69    | Volume 3 | All            |           | Oppose |
| Decision Requested | That the archaeological requirements appendix in Attachment 2 be added to Volume Three of the Plan.  |       |          |                |           |        |

| Sub No             | Submitter  | Point | Volume   | Chapter  | Provision | Type            |
|--------------------|--|-------|----------|--|-----------|-----------------|
| 768                | Heritage New Zealand Pouhere Taonga  | 70    | Volume 3 | Appendix 1 Landscape Schedule of Values                |           | Support in Part |
| Decision Requested | That the historic heritage related associative values remain as notified.  |       |          |  |           |                 |
| 768                | Heritage New Zealand Pouhere Taonga  | 71    | Volume 3 | Appendix 13 Register of Significant Heritage Resources |           | Oppose          |
| Decision Requested | <p>That Council add a new schedule to Appendix 13 for sites of significance to Maori, including wahi tapu, directly after the existing Schedule 2. Any sites of significance currently in Schedule 1 or 2 should be moved into the new schedule. For Schedule 1, these include MEP Reference 6 and 9. For Schedule 2, these include MEP Reference 1, 2, 3, 4, 49, 50, and 131.</p> <p>That any buildings or structures of historic heritage value located on a site of significance are included in Schedule 1 or 2.</p> <p>That Council note that where iwi do not want the exact location of a site of significance disclosed, specific methods may be required.</p> |       |          |  |           |                 |

|--------------------|---|-------|----------|--|---------------|-----------------|
| Decision Requested | <p>Make the following changes (strikethrough, bold) to Policy 8.3.2:</p> <p><i>Policy 8.3.2 – Where subdivision, use or development <b>that</b> requires resource consent, <b>occurs within areas, habitats or ecosystems with indigenous biodiversity value, significant</b> the adverse effects on <b>those</b> areas, habitats or ecosystems <del>with indigenous biodiversity value</del> shall be:</i></p> <p><i>(a) avoided where it is a significant site in the context of Policy 8.1.1; and</i></p> <p><i>(b) avoided, remedied or mitigated where indigenous biodiversity values have not been assessed as being significant in terms of Policy 8.1.1.</i></p> <p>This policy sets up a hierarchy for decision makers to use when assessing the effects of subdivision, use or development activities on areas, habitats or ecosystems with indigenous biodiversity value. For those sites identified as being significant in terms of Policy 8.1.1, it is important that <b>significant</b> adverse effects are avoided. This recognises that there are few significant sites remaining on private land, especially in southern Marlborough. Where sites have not been identified as significant through Policy 8.1.1, decision makers can also consider remediation or mitigation options to address adverse effects.</p> |       |          |  |               |                 |
| 455                | John Hickman  | 54    | Volume 1 | 8 Indigenous Biodiversity              | Policy 8.3.8  | Support in Part |
| Decision Requested | Amend the policy so that offsetting may be considered on a case by case basis in areas with significant biodiversity values.  |       |          |  |               |                 |

| Decision Requested | Remove the 100% blanket cut-off to Springs sector water users. Before implementing a blanket restriction further scientific evidence of the complex aquifer/springs recharge process is required. A better understanding of the long term trend of the aquifer levels is essential before setting lower limits and cut-off thresholds. Treat all Wairau Aquifer groundwater users equally and consider implementing a rationing restriction when the monitor wells drop below a set level. This would give all Wairau Aquifer groundwater users the opportunity to prioritise where their reduced volume of allocated water is utilised. |       |          |   |                             |        |

| Decision Requested | I therefore stand strongly against the current wording of Section 5, and <b>it should be re-worded to include recognition of "Prior tempore potior iure" and that "Fair &amp; Just" should take precedent over "equitable" in protecting businesses and farming families that have built our community.</b>   |       |          |   |              |                 |
| <b>272</b>         | Dale Hulburt  | 1     | Volume 1 | 5 Allocation of Public Resources        | Policy 5.4.4 | Support in Part |
| Decision Requested | <p>Relief Sought:</p> <p>That Section 5 be <b>amended</b> to include three passages regarding the "Portability/Transferability" of Water User rights (allocations).</p> <ul style="list-style-type: none"> <li>• There should be TWO classifications of Water Users: One termed specifically as "Portable/Transferable" to allow it to be removed to another location off the original property; the other as "Non-Removable/Non-Transferable", which cannot be removed from the property it sits on.</li> <li>• Unless a special "portable" classification of Resource Consent is sought; a Lessee of Land who seeks Resource Consent for the taking of Water, be classified as a Custodian of the Consent, with the ownership transferred automatically to the Land-Owner at the termination or scheduled end of the Lease Agreement.</li> <li>• As part of the approval process, the Land-Owner (Lessor) should be required to sign-off on the application, and sign an acknowledgement form if the Resource Consent application is for a "Portable/Transferable" Water Use permit.</li> </ul> <p>My choice of wording ("portable" / "transferable") is designed to confine any rule change to the REMOVAL of water-usage from a property without the expressed consent of the Land-Owner. It is NOT the intent of the author to prevent a well from being bored elsewhere on the same property under the same Resource Consent, which is a reasonable modification to a Water Take/Use permit. In forwarding this amendment recommendation, I think it is important to state that we are looking to improve the protections of all that benefit from our natural resources, we are not looking for any personal gain or business advantage for ourselves.</p> |       |          |   |              |                 |

| Decision Requested | That the proposed pricing regime is set in the MEP.   |       |          |                                  |               |                 |
| <b>808</b>         | Kroon, Hanneke and Jansen, Joop   | 3     | Volume 1 | 5 Allocation of Public Resources | Policy 5.10.8 | Support in Part |
| Decision Requested | Amend Policy so all monitoring and reports are made public.   |       |          |                                  |               |                 |
| <b>808</b>         | Kroon, Hanneke and Jansen, Joop   | 4     | Volume 1 | 5 Allocation of Public Resources | Policy 5.10.7 | Support in Part |
| Decision Requested | <p>That the following amendments (strike through and gold) are made to the 2nd sentence of the 2nd paragraph of the explanation for Policy 5.10.7:</p> <p><i>In determining who should meet the cost of sustainably managing the coastal marine environment, an allocation of costs needs to occur between beneficiaries. The Council has considered that a contribution towards the costs should be made by ratepayers (<del>25</del><b>51</b>%) as well as those benefitting from the occupation of public space (<del>75</del><b>49</b>%). The Council has also given consideration to anticipated waivers that may be granted and the number and size of the various occupations. From this assessment, a schedule of charges has been derived and is set out in the Council's Annual Plan.</i></p> |       |          |                                  |               |                 |
| <b>808</b>         | Kroon, Hanneke and Jansen, Joop   | 5     | Volume 4 | Overlay Maps                     |               | Support in Part |

| Sub No             | Submitter   | Point | Volume   | Chapter                  | Provision     | Type            |
|--------------------|---|-------|----------|--------------------------|---------------|-----------------|
| Decision Requested | <p>Marlborough Sounds areas.</p> <ol style="list-style-type: none"> <li>1. We submit that the Landscape overlays cannot be evaluated without the notified coastal marine farming provisions and marine farming zoning maps for coastal Marlborough.</li> <li>2. We submit that as part of the submission process for the Coastal Marine Farming Provisions and Zoning Maps after their notification, another round of submissions has to be allowed for all related parts of the MEP, such as Chapter 6 Natural Character, Chapter 7 Landscape, Chapter 8 Biodiversity and Chapter 13 Use of the Coastal Environment. The whole MEP is interrelated and one part cannot be considered in isolation.</li> <li>3. We submit that large areas of the Marlborough Sounds are zoned as Outstanding Natural Feature, which is clearly done to avoid having to include the adjacent seascape. This is not in keeping with the definitions of Outstanding Natural Landscape and Outstanding Natural Feature.</li> <li>4. We submit that the landscape classification of the Outstanding Natural Features in the Marlborough Sounds should be reviewed. Many of these ONF areas should be classified as Outstanding Natural Landscape and thus include the Seascape that is left out in most places in the Inner Sounds and some locations of the Outer Sounds.</li> <li>5. We submit that the anomalies where a "not ONL water hole" is surrounded by ONFL land or sea area should be reviewed and changed to ONL.</li> <li>6. We submit that more importance should be given to the presence of ecologically significant marine sites in the classification of an area as a ONF as opposed to ONL, as they should also be protected according to the NZ CPS. A seascape is not only the watersurface. Descriptions are: "Landscapes with views of the coast or seas, and coasts and the adjacent marine environment" (Landscape Institute/ IEMA 2013, pl 7) and "An area of sea, coastline and land, as perceived by people, whose character results from the actions and interactions of land with sea, by natural and/ or human factors" (Natural England 2012, p8).</li> <li>7. As a final conclusion we submit that the Outstanding Natural Features and Landscape (including seascape) identification done for the Marlborough Sounds is falling short of what is expected by NZCPS Policy 15 (d) and should be redone completely.</li> </ol> <p>Crail Bay and the Central Pelorus.</p> <ol style="list-style-type: none"> <li>1. We submit that Bobbery Bay should be added to the ONFL overlay in the MEP including the seascape of this bay.</li> <li>2. We submit that the little Bay Between Hopai Bay and Elie Bay should be classified as ONFL, including the seascape of this bay and added to the ONFL overlay in the MEP.</li> <li>3. We submit that Grant Bay should keep its classification as Outstanding Natural landscape and be added to the ONFL overlay in the MEP plan as such.</li> <li>4. We submit that the ONFL classification of Tawero Point should include the ecologically significant marine site skirting it.</li> </ol> |       |          |                          |               |                 |

| <b>212</b>         | O'Dwyers Farm Partnership Jones  | 1     | Volume 3 | Appendix 6 Environmental Flows and Levels | Schedule 3    | Oppose |
| Decision Requested | Our request is that common sense prevails with the removal of the 100% blanket cut off to springs sector water users.  |       |          |   |               |        |
| <b>249</b>         | James Jones  | 1     | Volume 3 | Appendix 6 Environmental Flows and Levels | Schedule 3    | Oppose |

| Sub No             | Submitter  | Point | Volume   | Chapter                                   | Provision      | Type            |
|--------------------|--|-------|----------|---|----------------|-----------------|
| Decision Requested | Remove the 100% blanket cut-off to Springs sector water users based on the minimum well levels.  |       |          |   |                |                 |
|                    | Treat all Wairau Aquifer groundwater users equally and consider implementing a rationing restriction (example - restricted all Wairau Aquifer groundwater users to 50% allocation when the monitor wells drop below the set level). This would give all Wairau Aquifer groundwater users the opportunity to prioritise where their reduced volume of allocated water is utilised and help maintain minimum flow levels in Springs. |       |          |   |                |                 |
|                    | Before implementing a blanket restriction further information and knowledge is required of the complex aquifer/springs recharge process. A better understanding of the long term trend of the Wairau Aquifer levels is essential before setting lower limits and cut-off thresholds.   |       |          |   |                |                 |
| <b>249</b>         | James Jones  | 2     | Volume 1 | 5 Allocation of Public Resources          | Policy 5.4.1   | Support         |
| Decision Requested | Retain the policy (inferred).  |       |          |   |                |                 |
| <b>249</b>         | James Jones  | 3     | Volume 1 | 5 Allocation of Public Resources          | Policy 5.6.2   | Oppose          |
| Decision Requested | More data and understanding is required before limits are set. All Wairau Aquifer groundwater users must take responsibility for maintaining minimum aquifer levels/Spring flows, not just Spring sector users.  |       |          |   |                |                 |
| <b>249</b>         | James Jones  | 4     | Volume 1 | 5 Allocation of Public Resources          | Policy 5.7.2   | Support         |
| Decision Requested | Make calculations specific to soil type and property location.   |       |          |   |                |                 |
| <b>249</b>         | James Jones  | 5     | Volume 1 | 5 Allocation of Public Resources          | Policy 5.8.3   | Support         |
| Decision Requested | Retain the policy (inferred).  |       |          |   |                |                 |
| <b>386</b>         | Shirley J Jones  | 1     | Volume 3 | Appendix 6 Environmental Flows and Levels | Schedule 3     | Oppose          |
| Decision Requested | Delete the Minimum Flows and Levels for Water Takes applying to the Wairau Aquifer Central Springs Freshwater Management Unit, Wairau Aquifer Northern Springs Freshwater Management Unit and the Wairau Aquifer Urban Springs Freshwater Management Unit. <i>(Inferred)</i>   |       |          |   |                |                 |

| 404                | Eric Jorgensen  | 41    | Volume 1 | 13 Use of the Coastal Environment | 13.AER.5  | Support in Part |
| Decision Requested | <p>Include in 13.AER.5 that the public survey (about perspectives of values contributing to amenity values in Marlborough's Coastal environment and how activities and uses may be affecting these values) needs to be repeated at 5 yearly intervals. This allows changes in perception to be tracked and to gain a relative sense as to whether important values are better or worse off than before <b>(inferred)</b>.</p> <p>Include in 13.AER.5 about monitoring complaints (about activities and uses in the coastal environment) increased public awareness of the opportunity to note concerns about different activities and uses in the coastal environment and also liaise with harbourmaster and DoC <b>(inferred)</b>.</p> |       |          |                                   |           |                 |
| 404                | Eric Jorgensen  | 42    | Volume 1 | 13 Use of the Coastal Environment | 13.AER.16 | Support         |
| Decision Requested | <p>In addition to MPI, on-going communication should also include other central government agencies, e.g., Ministry for the Environment, in respect of the sustainable management of natural and physical resources as it relates to fishing activities.</p>  |       |          |                                   |           |                 |
| 404                | Eric Jorgensen  | 43    | Volume 2 | 4 Coastal Environment Zone        | 4.2.1.12. | Support in Part |
| Decision Requested | <p>Standard 4.2.1.12 should require a colour palette rather than be encouraged.</p>   |       |          |                                   |           |                 |
| 404                | Eric Jorgensen  | 44    | Volume 2 | 4 Coastal Environment Zone        | 4.3.6.    | Oppose          |

| Sub No             | Submitter  | Point | Volume   | Chapter                    | Provision | Type            |
|--------------------|--|-------|----------|----------------------------|-----------|-----------------|
| Decision Requested | As per the summary recommendations in the paper <i>Mitigating Fine Sediment from Forestry</i> the following should be adopted in the MEP:  |       |          |                            |           |                 |
|                    | (1) Replanting setbacks from the shoreline: 200 m (a precautionary approach should be adopted). <b>Note</b> that Standard 4.3.8.1(c) uses this 200m setback for planting and harvesting where it is much less likely heavy machinery, tracking and hauling logs would occur.           |       |          |                            |           |                 |
|                    | (2) Replanting setback for permanently flowing streams directly coupled to the sea: 5 m for streams less than 3m in width; and 10 m for streams equal to, or greater than, 3m in width.  |       |          |                            |           |                 |
|                    | (3) Replanting controls on steep slopes: A mandatory Replanting Management Plan identifying areas at high risk of erosion which require retirement and implementation of buffers, such as gully heads and steep ephemeral gullies. A similar Plan would be required for afforestation. |       |          |                            |           |                 |
|                    | (4) Replanting requirements to reduce the window of vulnerability:   |       |          |                            |           |                 |
|                    | a) Replanting of areas harvested within 12 months of harvest.  |       |          |                            |           |                 |
|                    | b) Replanting in excess of 1000 stems/hectare.   |       |          |                            |           |                 |
|                    | In addition to replanting controls other recommendations were also made, these were:   |       |          |                            |           |                 |
|                    | (5) Harvest controls: Remove all woody material >100 mm diameter and > 3metres in length from gullies (>5000m2 or 0.5 hectare) as soon as practicable, but no later than 1 month, after harvest.   |       |          |                            |           |                 |
|                    | (6) Earthworks requirements:   |       |          |                            |           |                 |
|                    | a) All road design, construction, and maintenance to be certified by a Chartered Professional Engineer (CPENZ) for land stability, and effective erosion and water control.  |       |          |                            |           |                 |
|                    | b) All areas of loose fill (soil) to have a grass cover established within 12 months of being created unless covered by natural revegetation.  |       |          |                            |           |                 |
|                    | These recommendations apply to the Coastal Environment Zone. However, the other applicable zone for forestry is the Rural Environment Zone (Volume 2: Chapter 3) and they should be equally applicable there.  |       |          |                            |           |                 |
| <b>404</b>         | Eric Jorgensen   | 45    | Volume 2 | 4 Coastal Environment Zone | 4.3.42.2. | Oppose          |
| Decision Requested | Include Sunday 9:00am - 4:00pm for hours of operation for home occupation.   |       |          |                            |           |                 |
| <b>404</b>         | Eric Jorgensen   | 46    | Volume 2 | 4 Coastal Environment Zone | 4.7.1.    | Oppose          |
| Decision Requested | No decision requested.   |       |          |                            |           |                 |

|--------------------|---|-------|----------|-------------|--------------|-----------------|
| Decision Requested | <p>The following paragraphs should also be added to meet the requirements of NZCPS 7:<br/> <i>"Acceptable limits of cumulative effects will be determined by reference to the threshold s specified in a particular policy and by reference to best practice and international assessment standards.</i><br/> <i>Where a retraction of consented activities is required to meet acceptable cumulative effect threshold s then this may occur by re-consenting attrition until acceptable levels of cumulative effects are reached or through the application of activity retraction guidelines developed and agreed with stakeholders"</i></p> <p>For clarity, we note that there is no basis for differentiating cumulative environmental effect assessments for new activities over those for renewal applications. This is not least because there are various areas where there have been significant historical failures to consider appropriate thresholds of development or cumulative effects when granting existing consents. It should thus be made clear that policy 6.2.7 applies to the re- consenting of activities in the coastal environment as well as to the consenting of new activities in the coastal environment.</p> |       |          |             |              |                 |

Where it is necessary to have windows closed to achieve the acoustic design requirements, an alternative ventilation system shall be provided.

A ventilation system installed shall comply with the following:

- Consist of an air conditioning unit(s) provided that the noise level generated by the unit(s) must not exceed 40dB Laeq(30s) in the largest habitable room (excluding bedrooms) and 35dB Laeq(30s) in all other habitable rooms, when measured 1 metre away from any grille or diffuser; or
- A system capable of providing at least 15 air changes per hour (ACH) in the largest habitable room (excluding bedrooms) and at least 5 air changes per hour (ACH) in all other habitable rooms; and
- The noise level generated by the system must not exceed 40dB Laeq(30s) in the largest habitable room (excluding bedrooms) and 35dB Laeq(30s) in all other habitable rooms, when measured 1 metre away from any grille or diffuser; and
- The internal air pressure must be no more than 10 Pa above ambient air pressure due to the mechanical ventilation; and
- Where a high air flow rate setting is provided, the system shall be controllable by the occupants to be able to alter the ventilation rate with at least three equal progressive stages up to the high setting.

Y Sensitive Activities within 60m of a Rail Network – Ground-borne Noise: Annoyance

New, relocated, or altered sensitive activities/buildings within 60 metres of the rail corridor shall be designed and constructed to ensure the following levels

of vibration from trains shall not be exceeded based on the procedures specified in the Norwegian Standard NS 8176E: 2nd edition September 2005

Vibration and Shock Measurement of Vibration in Buildings from Land Based Transport and Guidance to Evaluation of its Effects on Human Beings.

Insert new provisions as follows:

X Sensitive Activities within 100m of a Rail Network – Airborne Noise:

New, relocated and altered sensitive activities shall be designed, constructed and maintained to ensure the following internal design noise limits shall not be exceeded, and shall take into account future use of the rail corridor, by the addition of 3dB to existing measured or calculated sound levels.

Where it is necessary to have windows closed to achieve the acoustic design requirements, an alternative ventilation system shall be provided.

A ventilation system installed shall comply with the following:

- i) Consist of an air conditioning unit(s) provided that the noise level generated by the unit(s) must not exceed 40dB Laeq(30s) in the largest habitable room (excluding bedrooms) and 35dB Laeq(30s) in all other habitable rooms, when measured 1 metre away from any grille or diffuser; or
- ii) A system capable of providing at least 15 air changes per hour (ACH) in the largest habitable room (excluding bedrooms) and at least 5 air changes per hour (ACH) in all other habitable rooms; and
- iii) The noise level generated by the system must not exceed 40dB Laeq(30s) in the largest habitable room (excluding bedrooms) and 35dB Laeq(30s) in all other habitable rooms, when measured 1 metre away from any grille or diffuser; and
- iv) The internal air pressure must be no more than 10 Pa above ambient air pressure due to the mechanical ventilation; and
- v) Where a high air flow rate setting is provided, the system shall be controllable by the occupants to be able to alter the ventilation rate with at least three equal progressive stages up to the high setting.

Y Sensitive Activities within 60m of a Rail Network – Ground-borne Noise: Annoyance

New, relocated, or altered sensitive activities/buildings within 60 metres of the rail corridor shall be designed and constructed to ensure the following levels of vibration from trains shall not be exceeded based on the procedures specified in the Norwegian Standard NS 8176E: 2nd edition September 2005 Vibration and Shock Measurement of Vibration in Buildings from Land Based Transport and Guidance to Evaluation of its Effects on Human Beings.

Receiving Environment

| Decision Requested | <p>We recommend removing the term river from the listed policies and replacing it with Fonterra's definition of an active bed. This is a standard that dairy farmers have been working with for many years. It means animals are excluded from all major rivers and streams but allows farmers to continue to use their land productively. This is a definition that supports sustainability and allows primary production to continue to operate as per Objective 14.1 "Rural environments are maintained as a resource for primary production activities, enabling these activities to continue contributing to economic well being whilst ensuring the adverse effects of these activities are appropriately managed."</p> <p>Livestock entering onto, <del>or passing across</del> <u>an active bed</u> of a <del>river</del> <u>waterway</u>.</p> <p>Definition of <i>active bed</i>:</p> <p>"The bed of a river (including any modified river) or artificial watercourse that is permanently flowing and where the bed is more than a metre wide, permanently un-vegetated and comprises sand, gravel, boulders or similar material.</p> <p>We also recommend extending the period of time allowed for compliance with <b>2.9.9, 3.3.21 and 4.3.20.1</b> to <u>9 June 2022</u>. This is to allow farmers to recover from the financial pressure put on their businesses during recent years when the milk price has been below the cost of production. While fencing materials may seem an insignificant cost, the accumulation of these materials plus concrete and culverts for river crossings, the necessary consents for these crossings and the labour required to complete the work will make compliance a significant expense.</p> |       |          |                          |           |                 |

| Decision Requested | <p>The submission does not provide a clear <i>Decision Requested</i> for Objective 5.3. There are general comments about adding policies and rules, which have been included under Objective 5.3. It is <b><i>inferred</i></b> that these are relevant to this objective.</p> <p>Introduce policies (and rules) to provide for a grandfathering provision to recognise contracts for the full period of the water allocation consent; and which provides for further renewals taking into account commitments and dependence of particular users and industries.</p> <p>Introduce policies/rules/methods relating to water conservation measures and supply integration where feasible to maximise resource use efficiency.</p> <p>Add policies and rules stating that new Industrial subdivisions in water restricted areas (i.e. Riverlands), should be supported and encouraged to supply potable and nonpotable (grey or river water) water connections in order to reduce the use of limited potable water for activities such as watering landscapes, washing down trucks etc.).</p> <p>Add policies and rules which reward sustainable and wise use of Municipal water. Rewards could include giving responsible water users priority to Municipal water in the event that there are water restrictions due to availability issues. This type of tangible incentive would encourage businesses to invest in more expensive water conservation practices on their properties.</p> <p>Ensure that in managing the freshwater resource, the Council properly separates its RMA functions from its service delivery functions, and that the allocations of water take and water use is based on RMA principles and appropriate objectives and policies.</p> |       |          |                                  |              |                 |
| <b>907</b>         | Levide Capital Limited   | 2     | Volume 1 | 5 Allocation of Public Resources | Policy 5.3.1 | Support in Part |
| Decision Requested | <p>That the following amendments (strike-through and bold) are made to Policy 5.3.1 and introduce other policies where necessary to recognise the status and importance of existing water allocations, and relative importance of permanent crops such as viticulture and horticulture.</p> <p><i>Policy 5.3.1 – To allocate water in the following order of priority:</i></p> <p><i>(a) natural and human use values; then</i></p> <p><i>(b) aquifer recharge; then</i></p> <p><i>(c) domestic and stock water supply; then</i></p> <p><i>(d) municipal water supply; <del>and</del> then</i></p> <p><b><i>(e) permanent crops such as viticulture and horticulture; and then</i></b></p> <p><b><i>(ef) all other takes of water.</i></b></p>   |       |          |                                  |              |                 |
| <b>907</b>         | Levide Capital Limited   | 3     | Volume 1 | 5 Allocation of Public Resources | Policy 5.3.4 | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter                          | Provision     | Type            |
|--------------------|--|-------|----------|----------------------------------|---------------|-----------------|
| Decision Requested | Amend Policy 5.3.4 to include specific reference to the Riverlands Irrigation Scheme; being by definition a "municipal water supply" and a protected class of water user, in addition to residential, commercial and industrial activities.  |       |          |                                  |               |                 |
| <b>907</b>         | Levide Capital Limited   | 4     | Volume 1 | 5 Allocation of Public Resources | Policy 5.3.6  | Support in Part |
| Decision Requested | That the wording of Policy 5.3.6 is updated such that it specifically mentions the allocation of municipal water supply to users on a first come, first serve basis. Create new Policies and Rules if required to implement this policy.   |       |          |                                  |               |                 |
| <b>907</b>         | Levide Capital Limited   | 5     | Volume 1 | 5 Allocation of Public Resources | Policy 5.3.11 | Support         |
| Decision Requested | Retain Policy 5.3.11 to confirm that existing water use allocation is not affected by the proposed allocation model; these should apply only to new applications.  |       |          |                                  |               |                 |

| Decision Requested | <ol style="list-style-type: none"> <li>1. Amend the Soil Sensitive Area Overlay applying to the Submitter's sites to remove the areas identified as not meeting the criteria for a soil sensitive area in the ENGEO report.</li> <li>2. Apply rules to encourage landowners to mitigate the effects of tunnel gully erosion. This should include Council drafting best practice standards which should be followed in the creation of new swales or cutoff drains and have this information disseminated to all property owners Council has identified.</li> <li>3. The maintenance of existing swales and cutoff drains be a permitted activity when meeting the prescribed (best practice) standards.</li> <li>4. Excavation and such remedial actions as may be required to repair or remove Tunnel Gully Erosion on slopes less than 25 degrees be a permitted activity.</li> <li>5. Create new rules to ensure the continued operation of vineyards and the creation of new vineyards remain a permitted activity on loess soil.</li> </ol> |       |          |                 |                        |                 |
| 907                | Levide Capital Limited   | 34    | Volume 2 | 2 General Rules | 2.2.                   | Support in Part |

| <b>254</b>         | Scott MacKenzie  | 1     | Volume 3 | Appendix 6 Environmental Flows and Levels              | Schedule 3    | Support in Part |
| Decision Requested | That all Wairau River surface water takes are considered equal(both below and above The Narrows) and therefore have the same minimum flowlevel cut off of 8m <sup>3</sup> /s at Barnett's Bank. This is effectively the currentsituation, however it is noted that a portion of consents do have a conditionrelating to the Wash bridge flow which has never been implemented. With thecurrent management flow of 8m <sup>3</sup> /s for fullrestriction for all Wairau River users, it has shown that thereare no adverse effects on instream values. Whereas any changes will have asignificant negative economic and social impact on those consent holderscurrently above The Narrows. |       |          |  |               |                 |

| Decision Requested | Remove outstanding natural feature and landscape overlay from the vicinity of marine farms 8452, 8297, 8397, 8399, 8402, 8403, 8404, 8420, 8425, 8435, 8194, 8081, 8083, 8287, 8144, 8447, 8449, 8455, 8529, 8553, 8559, 8264, 8263, 8248, 8193; or record that aquaculture will not affect the relevant values.  |              |               |   |                    |             |
| <b>426</b>         | Marine Farming Association Incorporated   | 1            | Volume 1      | 1 Introduction                          | 1.                 | Oppose      |
| Decision Requested | The Council should re-evaluate the various alternatives in accordance with s 32, having particular regard to quantified benefits and costs and associated commentary. In the event that the s 32 evaluation reveals significant alternatives that have not been appropriately considered, it may be necessary to re-notify aspects of the proposed MEP. |              |               |   |                    |             |
| <b>426</b>         | Marine Farming Association Incorporated   | 2            | Volume 1      | 1 Introduction                          | Guiding principles | Oppose      |

| Sub No             | Submitter   | Point | Volume   | Chapter        | Provision          | Type    |
|--------------------|---|-------|----------|----------------|--------------------|---------|
| Decision Requested | <p>There is a statement under "A healthy Marlborough economy requires a healthy environment" that it is not the role of the MEP to directly address economic matters. That is incorrect. The definition in s2(1) of the RMA of "environment" includes the economic conditions that affect people and communities. Sustainable management includes enabling people to provide for their economic and social wellbeing (s 5(2) RMA).</p> <p>The guiding principles seem to ignore the fact that the farming, viticulture, aquaculture, forestry and tourism sectors all rely on resource use.</p> <p>It is an omission not to include a guiding principle to promote economic development. The approach taken does not reflect the RMA, and does not reflect the views of the Marlborough community.</p> <p>A guiding principle to that effect should be added, along with consequential changes to the commentary.</p> |       |          |                |                    |         |
| <b>426</b>         | Marine Farming Association Incorporated   | 3     | Volume 1 | 1 Introduction | Guiding principles | Oppose  |
| Decision Requested | <p>The guiding principles should recognise that the Sounds has a diverse range of uses. Its values include economic values. A set of guiding principles that make no reference to that has failed to properly capture the needs of Marlborough.</p> <p>The guiding principles should be amended to reflect this.</p> <p>The clique "jewel in the crown" should be deleted, and replaced with something more reflective of Marlborough and the discussion above.</p>   |       |          |                |                    |         |
| <b>426</b>         | Marine Farming Association Incorporated   | 4     | Volume 1 | 1 Introduction | Guiding principles | Support |
| Decision Requested | <p>Support the guiding principle "Providing the community with a streamlined and simplified resource management framework to make it easier for resource users and other interested parties to use."</p> <p>Submit that this philosophy should extend to the application of the MEP provisions, not simply to integrating the regional policy statement with the regional coastal, regional and district plan provisions.</p>   |       |          |                |                    |         |
| <b>426</b>         | Marine Farming Association Incorporated   | 5     | Volume 1 | 2 Background   | 2.                 | Oppose  |
| Decision Requested | <p>The Council should re-evaluate the various alternatives in accordance with s 32, having particular regard to quantified benefits and costs and associated commentary.</p>  |       |          |                |                    |         |
| <b>426</b>         | Marine Farming Association Incorporated   | 6     | Volume 1 | 2 Background   | 2.                 | Oppose  |
| Decision Requested | <p>Avoid should have only one meaning. Where a different meaning is preferred, this should be clear from the specific provision.</p>  |       |          |                |                    |         |
| <b>426</b>         | Marine Farming Association Incorporated   | 7     | Volume 1 | 2 Background   | 2.                 | Oppose  |

| Sub No             | Submitter  | Point | Volume   | Chapter                                 | Provision     | Type            |
|--------------------|--|-------|----------|---|---------------|-----------------|
| Decision Requested | Oppose the approach where "protect" can be interpreted in a number of different ways. This makes the MEP unclear.<br>A single meaning should be adopted, consistent with the Supreme Court's approach in <i>New Zealand King Salmon</i> .  |       |          |   |               |                 |

| Sub No             | Submitter   | Point | Volume   | Chapter                                 | Provision     | Type            |
|--------------------|---|-------|----------|---|---------------|-----------------|
| Decision Requested | <p>There needs to be express reference to related servicing and processing industries in objective 4.1. The tourism and primary production sectors cannot operate in the absence of related services.</p> <p>The commentary of objective 4.1 should refer to aquaculture's need for water space, and high quality water. Recognition should be given to the fact that different water space and site characteristics are necessary for different forms of aquaculture. For example, cool fast flowing water is required for salmon farming, whereas access to high nutrient laden water is necessary for effectively farming mussels. Logistical considerations are important for all types of aquaculture.</p> <p>a) Amend objective 4.1 to include express reference to related servicing and processing industries; and</p> <p>b) Amend commentary as suggested.</p> |       |          |   |               |                 |
| <b>426</b>         | Marine Farming Association Incorporated   | 13    | Volume 1 | 4 Use of Natural and Physical Resources | Objective 4.3 | Support         |
| Decision Requested | Support, so long as new objective 4.3A is added (see separate submission). Alternatively, Objective 4.3 should be amended to reflect the fact that social and cultural uses are part of the character of the Marlborough Sounds.  |       |          |   |               |                 |
| <b>426</b>         | Marine Farming Association Incorporated   | 14    | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4C      | Support in Part |
| Decision Requested | <p>Insert new Objective 4.3A - Recognise that the visual, ecological and physical qualities of the Marlborough Sounds have been altered by cultural and social use and those uses have become part of the character of the Marlborough Sounds and do not detract from it.</p> <p>Note - New policy 4.3.6 should be added to support this Objective. Industry supports policies 4.3.1 - 4.3.5, provided this proposed objective and policy are added (as outlined below).</p>  |       |          |   |               |                 |
| <b>426</b>         | Marine Farming Association Incorporated   | 15    | Volume 1 | 4 Use of Natural and Physical Resources | Objective 4.1 | Support in Part |
| Decision Requested | Add new Policy 4.1.1A to recognise existing uses of natural and physical resources.   |       |          |   |               |                 |
| <b>426</b>         | Marine Farming Association Incorporated   | 16    | Volume 1 | 4 Use of Natural and Physical Resources | Policy 4.1.2  | Support in Part |
| Decision Requested | <p>Amend Policy 4.1.2 to read as follows (bold) -</p> <p><i>"Enable sustainable use <b>and development</b> of natural resources in the Marlborough environment."</i></p>  |       |          |   |               |                 |
| <b>426</b>         | Marine Farming Association Incorporated   | 17    | Volume 1 | 4 Use of Natural and Physical Resources | Objective 4.1 | Support in Part |
| Decision Requested | Insert new Policy 4.1.2A - allow for experimentation and innovation where there are sufficient controls to appropriately manage adverse effects.  |       |          |   |               |                 |
