

# Notification of Summary of Submissions

## This report contains:

- **The Summary of Decisions Requested in order of Submitter.**
  - The order is by Last Name or Organisation, whichever is applicable.
- **Tables containing the names and contact details of Submitters who supported other specific Submitters, and sought the same decision requested as those Submitters.**
  - Submitters who lodged a submission solely in support of the Submission of the Marine Farming Association.
  - Submitters who lodged a submission solely in support of the Submission of Aquaculture New Zealand.
- **A table containing the Submitters who supported other specific Submitters, and sought the same decision requested as those Submitters.**
  - Submitters who, within their personal submission, also supported the Submission of another Submitter in the manner described above.

## Summary of decisions requested - by surname/organisation

| Sub No             | Submitter  | Point | Volume   | Chapter                                 | Provision          | Type            |
|--------------------|--|-------|----------|---|--------------------|-----------------|
| 1303               | A E Sadd Limited   | 1     | Volume 4 | Zoning Maps                             | Zoning Map 84      | Oppose          |
| Decision Requested | <p>The decision we seek from Council is:</p> <p>Remove W48 from the Proposed Marlborough Environment Plan as it has never been a significant wetland and is in fact a 'man made pond' built in the 1990's, by Mr Mahon for his birds and aviaries.</p> <p>Alter the boundary outline of W47, so that the area parallel to Stream Wharf Road (and located on our four property boundaries) is excluded from W47. We believe that this area has never been a significant wetland and is actually used as part of Council's drainage network for Grovetown.</p> <p>We have no problem with wetlands and their benefit to the environment, but creating wetlands from a Council 'desktop activity', not supported by the property owner or neighbours, is imposing unacceptable conditions and affecting what individuals can do on their own private properties. It is also trying to rewrite the history of a specific area of land and its usage.</p> |       |          |   |                    |                 |
| 514                | A J King Family Trust and S A King Family Trust  | 1     | Volume 1 | 1 Introduction                          | Guiding principles | Support in Part |
| Decision Requested | <p>Add a new Guiding Principle as follows -</p> <p><b>"Economic development."</b></p> <p><i>(Inferred)</i></p>   |       |          |   |                    |                 |
| 514                | A J King Family Trust and S A King Family Trust  | 2     | Volume 1 | 1 Introduction                          | Guiding principles | Support in Part |
| Decision Requested | <p>Add a new Guiding Principle as follows -</p> <p><b>"Recognise that the Sounds has a diverse range of uses and associated relief."</b></p> <p><i>(Inferred)</i></p>  |       |          |   |                    |                 |
| 514                | A J King Family Trust and S A King Family Trust  | 3     | Volume 1 | 4 Use of Natural and Physical Resources | 4.                 | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter                                 | Provision | Type            |
|--------------------|--|-------|----------|---|-----------|-----------------|
| Decision Requested | Add a new provision <i>(type of provision not identified in Submission)</i> as follows -<br><b>"Recognise the infrastructure used for commercial purposes at Elaine Bay, Oyster Bay and Okiwi Bay".</b><br><i>(Inferred)</i>                       |       |          |   |           |                 |
| <b>514</b>         | A J King Family Trust and S A King Family Trust  | 4     | Volume 1 | 4 Use of Natural and Physical Resources | 4.        | Support in Part |
| Decision Requested | Add a new provision <i>(type of provision not identified in Submission)</i> as follows -<br><b>"Recognise that the visual, ecological and physical qualities of the Sounds have been altered by social and cultural use."</b><br><i>(Inferred)</i> |       |          |   |           |                 |
| <b>514</b>         | A J King Family Trust and S A King Family Trust  | 5     | Volume 1 | 4 Use of Natural and Physical Resources | 4.        | Support in Part |
| Decision Requested | Add a new provision <i>(type of provision not identified in Submission)</i> as follows -<br><b>"Recognise existing uses of natural and physical resources".</b><br><i>(Inferred)</i>   |       |          |   |           |                 |
| <b>514</b>         | A J King Family Trust and S A King Family Trust  | 6     | Volume 1 | 6 Natural Character                     | 6.        | Support in Part |
| Decision Requested | Revise methodologies and maps, recognise existing use of and appropriate ongoing use and development in areas of natural character. <i>(Submitter did not identify the specific provisions for which change is sought.)</i>                        |       |          |   |           |                 |
| <b>514</b>         | A J King Family Trust and S A King Family Trust  | 7     | Volume 1 | 7 Landscape                             | 7.        | Support in Part |
| Decision Requested | Revise methodologies and maps, recognise existing use of and appropriate ongoing use and development in areas of natural landscape and features. <i>(Submitter did not identify the specific provisions for which change is sought.)</i>           |       |          |   |           |                 |
| <b>514</b>         | A J King Family Trust and S A King Family Trust  | 8     | Volume 1 | 7 Landscape                             | 7.        | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter                   | Provision | Type            |
|--------------------|--|-------|----------|---------------------------|-----------|-----------------|
| Decision Requested | Revise the identification of the entirety of the Marlborough Sounds as an ONL and amend the maps accordingly.  |       |          |                           |           |                 |
| <b>514</b>         | A J King Family Trust and S A King Family Trust  | 9     | Volume 1 | 8 Indigenous Biodiversity | 8.        | Support in Part |
| Decision Requested | Adopt the cascading approach to manage effects on indigenous biodiversity as set out in the NZCPS and recognise existing use and appropriate ongoing use and development in areas of indigenous biodiversity and associated relief.  |       |          |                           |           |                 |
| <b>514</b>         | A J King Family Trust and S A King Family Trust  | 10    | Volume 1 | 6 Natural Character       | 6.        | Support in Part |
| Decision Requested | <p>Recognise existing uses of the coastal marine area and do not seek that those change; and<br/>           Recognise that minor or transient effects do not need to be avoided; and<br/>           Recognise that avoidance can be achieved through restoration and enhancement, rather than simply preventing an application from occurring; and<br/>           Only require avoidance where practicable, rather than complete avoidance.</p> <p><i>(Submitter did not identify the specific provisions for which change is sought.)</i></p> |       |          |                           |           |                 |
| <b>514</b>         | A J King Family Trust and S A King Family Trust  | 11    | Volume 1 | 7 Landscape               | 7.        | Support in Part |
| Decision Requested | <p>Recognise existing uses of the coastal marine area and do not seek that those change; and<br/>           Recognise that minor or transient effects do not need to be avoided; and<br/>           Recognise that avoidance can be achieved through restoration and enhancement, rather than simply preventing an application from occurring; and<br/>           Only require avoidance where practicable, rather than complete avoidance.</p> <p><i>(Submitter did not identify the specific provisions for which change is sought.)</i></p> |       |          |                           |           |                 |
| <b>514</b>         | A J King Family Trust and S A King Family Trust  | 12    | Volume 1 | 8 Indigenous Biodiversity | 8.        | Support in Part |

|--------------------|--|-------|----------|---|-----------|--------|
| Decision Requested | I request that Council either re-write entire portions of the MEP, or add Amendments to Volumes 1, 2, and Section 32 to repair not only this mammoth document, but our confidence in our District Council as well. While Council cannot undo much of the historical harm done, it can begin working with farmers and vineyard owner who have a special connection to the land. Stop issuing water rights to areas that are unsustainable and require special transporting of water to alter landscapes. Council should acknowledge Rapaura has preeminent rights to unrestricted water from the aquifer immediately beneath our land. Regions using various Water Schemes to fleece water from the Wairau River and Aquifer should be made to fulfill their part of the original negotiations by paying immediately for the dams and catchments promised. End land-grabs done with the sole intention of acquiring Water to transfer to other arid grounds, circumventing the system for financial gain. Recognise the unique position farming families hold in the heritage of our district, that these are the families that founded Marlborough. Return Water Allocations to their original descriptions that recognise "Prior Use" if that purpose is still practicable. District Council will hold the big Corporate Industrial grape-producers responsible for actions and behaviors that risk our natural resources and demand greater investment into the community from which they continue to harvest their profits. Lastly, I want my full water rights returned to the hereditary land my family has farmed generation after generation. |       |          |   |           |        |
| <b>21</b>          | Keith M J Adams  | 1     | Volume 1 | 4 Use of Natural and Physical Resources |           | Oppose |
| Decision Requested | I therefore stand strongly <u>against</u> the current wording of Section 5, and <b>the Council should amend the MEP Section 4 (and related sections) to recognise the necessity of a moratorium or the complete cessation of issuing new Water Resource Consents to areas not traditionally water and unable to provide at least a reasonable portion of their own water supplies or are in the business of redeveloping land otherwise unable to support Industrial Crop-Production if not naturally watered; and "Claw-back" should first be aimed at those institutional properties. Prior Use (to include Natural Watering and Traditional Use) should be explicit in the wording, not just implied to protect businesses and family farms. Lastly, are cognition that much of the responsibility regarding Water Resource fragility lays at the feet of District Council (and their predecessors) for past interventions and more recent issuances of water rights to areas that should have been zoned ineligible.</b>   |       |          |   |           |        |

| Decision Requested | <p>I seek that Council does not alter the current setback of 20m. That other property has only an 8m setback, even 20m can be deemed inequitable. Should this 28m setback be able to be clearly demonstrated to be fair, reasonable and necessary for particular purpose, and benefit to the community at large, I seek that property consultation be undertaken with property owners who have riparian rights; that normally accepted levels of disclosure are undertaken rather than Council taking the laws into their own hands, under cover and passing legislation because someone sees fit. Having demonstrated this, appropriate financial compensation is made available to all land owners with riparian rights who are affected.</p> <p>If the rule does pass, I advise it is my intention to join with others similarly affected and instigate a legal challenge to block it and seek to recover costs.</p> |       |          |   |                             |                 |

|--------------------|---|-------|----------|----------------|--------------------|-----------------|
| Decision Requested | The Council should re-evaluate the various alternatives in accordance with s 32, having particular regard to quantified benefits and costs and associated commentary. In the event that the s 32 evaluation reveals significant alternatives that have not been appropriately considered, it may be necessary to re-notify aspects of the proposed MEP.   |       |          |                |                    |                 |
| <b>401</b>         | Aquaculture New Zealand   | 2     | Volume 1 | 1 Introduction | Guiding principles | Support in Part |
| Decision Requested | It is an omission not to include a guiding principle to promote economic development. The approach taken does not reflect the RMA, and does not reflect the views of the Marlborough community. A guiding principle to that effect should be added, along with consequential changes to the commentary.   |       |          |                |                    |                 |
| <b>401</b>         | Aquaculture New Zealand   | 3     | Volume 1 | 1 Introduction | Guiding principles | Support in Part |
| Decision Requested | The guiding principles should recognise that the Sounds has a diverse range of uses. Its values include economic values. A set of guiding principles that make no reference to that has failed to properly capture the needs of Marlborough. The guiding principles should be amended to reflect this. The clique "jewel in the crown" should be deleted, and replaced with something more reflective of Marlborough and the discussion above.  |       |          |                |                    |                 |
| <b>401</b>         | Aquaculture New Zealand   | 4     | Volume 1 | 1 Introduction | Guiding principles | Support in Part |
| Decision Requested | Support the guiding principle "Providing the community with a streamlined and simplified resource management framework to make it easier for resource users and other interested parties to use." Submit that this philosophy should extend to the application of the MEP provisions, not simply to integrating the regional policy statement with the regional coastal, regional and district plan provisions.   |       |          |                |                    |                 |
| <b>401</b>         | Aquaculture New Zealand   | 5     | Volume 1 | 2 Background   | 2.                 | Support in Part |
| Decision Requested | The document does not sufficiently recognise that the protection of one resource may have a positive or negative effect on another ( <i>New Zealand Shipping Federation v Marlborough District Council</i> W038/06). This is reflected in the insufficient identification of costs in the s32 analysis. There are consistent references to "protection" throughout the MEP. However, the response to environmental integration in the MEP is insufficient. The Council should re-evaluate the various alternatives in accordance with s32, having particular regard to quantified benefits and costs and associated commentary. |       |          |                |                    |                 |
| <b>401</b>         | Aquaculture New Zealand   | 6     | Volume 1 | 2 Background   | 2.                 | Oppose          |

| Sub No             | Submitter  | Point | Volume   | Chapter                                 | Provision  | Type            |
|--------------------|--|-------|----------|---|--|-----------------|
| Decision Requested | <p>Oppose the approach where "avoid" has two meanings, dependent on its context. This results in the MEP being unclear, which in turn is likely to lead to significant future expenditure to determine meaning. We have addressed the use of the term "avoid" in other specific contexts where it arises.</p> <p>"Avoid" should only be used in one sense, consistent with the approach taken by the Supreme Court in <i>New Zealand King Salmon</i> [2014] NZSC 38.</p> <p>Avoid should have only one meaning.</p> <p>Where a different meaning is preferred, this should be clear from the specific provision.</p> |       |          |   |  |                 |
| <b>401</b>         | Aquaculture New Zealand  | 7     | Volume 1 | 2 Background                            | 2.   | Oppose          |
| Decision Requested | A single meaning for "protect" should be adopted, consistent with the Supreme Court's approach in <i>New Zealand King Salmon</i> .   |       |          |   |  |                 |
| <b>401</b>         | Aquaculture New Zealand  | 8     | Volume 1 | 3 Marlborough's tangata whenua iwi      | Issues of significance to Marlborough's tangata whenua iwi | Support in Part |
| Decision Requested | The economic interests of iwi should be expressly recognised.  |       |          |   |  |                 |
| <b>401</b>         | Aquaculture New Zealand  | 9     | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4A   | Support         |
| Decision Requested | Retain Issue 4A. ( <i>Inferred</i> )   |       |          |   |  |                 |
| <b>401</b>         | Aquaculture New Zealand  | 10    | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4B   | Support         |
| Decision Requested | Retain Issue 4B and the supporting policies, but submit that the infrastructure used for commercial purposes at Elaine Bay (Tennyson Inlet), Oyster Bay (Port Underwood) and Okiwi Bay (Croisilles Harbour) be specifically recognised in policy 4.2.1. ( <i>Inferred</i> )  |       |          |   |  |                 |
| <b>401</b>         | Aquaculture New Zealand  | 11    | Volume 1 | 4 Use of Natural and Physical Resources | 4.   | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter                                 | Provision     | Type            |
|--------------------|--|-------|----------|---|---------------|-----------------|
| Decision Requested | <p>Add new Issue 4D - Recognise that the choice whether or not to use natural and physical resources has consequences;</p> <p>Add new Objective 4.4 - Recognise that limiting development has a tradeoff; and</p> <p>Add new Policy 4.4.1 - Identify the consequences of not allowing development in terms of:</p> <p>Substitution;</p> <p>Adverse effects from other alternative activities in the area; and</p> <p>Loss of environmental, economic and social benefits.</p>  |       |          |   |               |                 |
| <b>401</b>         | Aquaculture New Zealand  | 12    | Volume 1 | 4 Use of Natural and Physical Resources | Objective 4.1 | Support in Part |
| Decision Requested | <p>The commentary of Objective 4.1 should refer to aquaculture's need for water space, and high quality water. Recognition should be given to the fact that different water space and site characteristics are necessary for different forms of aquaculture. For example, cool fast flowing water is required for salmon farming, whereas access to high nutrient laden water is necessary for effectively farming mussels.</p> <p>Amend Objective 4.1 to include express reference to related servicing and processing industries; and amend commentary as suggested.</p> |       |          |   |               |                 |
| <b>401</b>         | Aquaculture New Zealand  | 13    | Volume 1 | 4 Use of Natural and Physical Resources | Objective 4.3 | Support         |
| Decision Requested | <p>Retain Objective 4.3, so long as new objective 4.3A is added. Alternatively, Objective 4.3 should be amended to reflect the fact that social and cultural uses are part of the character of the Marlborough Sounds. <i>(Inferred)</i></p>   |       |          |   |               |                 |
| <b>401</b>         | Aquaculture New Zealand  | 14    | Volume 1 | 4 Use of Natural and Physical Resources | 4.            | Support         |
| Decision Requested | <p>Insert new Objective 4.3A - Recognise that the visual, ecological and physical qualities of the Marlborough Sounds have been altered by cultural and social use and those uses have become part of the character of the Marlborough Sounds and do not detract from it.</p> <p><b>NOTE</b> - New policy 4.3.6 should be added to support this Objective.</p>   |       |          |   |               |                 |
| <b>401</b>         | Aquaculture New Zealand  | 15    | Volume 1 | 4 Use of Natural and Physical Resources | Objective 4.1 | Support         |
| Decision Requested | <p>Add new Policy 4.1.1A to recognise existing uses of natural and physical resources.</p>   |       |          |   |               |                 |
| <b>401</b>         | Aquaculture New Zealand  | 16    | Volume 1 | 4 Use of Natural and Physical Resources | Policy 4.1.2  | Support in Part |

| Sub No             | Submitter   | Point | Volume   | Chapter                                 | Provision     | Type            |
|--------------------|---|-------|----------|---|---------------|-----------------|
| Decision Requested | Amend Policy 4.1.2 to read "Enable sustainable use and development of natural resources in the Marlborough environment."  |       |          |   |               |                 |
| <b>401</b>         | Aquaculture New Zealand   | 17    | Volume 1 | 4 Use of Natural and Physical Resources | Objective 4.1 | Support in Part |
| Decision Requested | Insert new Policy 4.1.2A - allow for experimentation and innovation where there are sufficient controls to appropriately manage adverse effects.  |       |          |   |               |                 |
| <b>401</b>         | Aquaculture New Zealand   | 18    | Volume 1 | 4 Use of Natural and Physical Resources | Objective 4.1 | Support in Part |
| Decision Requested | Add new Policy 4.1.2B - Allow for development where it will achieve a net improvement in sustainability or efficiency by:<br><br>Offsetting effects;<br><br>Compensating for effects; or<br><br>Substituting one use for another. |       |          |   |               |                 |
| <b>401</b>         | Aquaculture New Zealand   | 19    | Volume 1 | 4 Use of Natural and Physical Resources | Policy 4.1.3  | Oppose          |
| Decision Requested | Delete Policy.  |       |          |   |               |                 |
| <b>401</b>         | Aquaculture New Zealand   | 20    | Volume 1 | 4 Use of Natural and Physical Resources | Policy 4.2.1  | Support in Part |
| Decision Requested | That the infrastructure used for commercial purposes at Elaine Bay (Tennyson Inlet), Oyster Bay (Port Underwood) and Okiwi Bay (Croisilles Harbour) be specifically recognised in the Policy (along with other proposed changes). |       |          |   |               |                 |

| <b>401</b>         | Aquaculture New Zealand   | 76    | Volume 1 | 7 Landscape | Policy 7.2.5 | Oppose |
| Decision Requested | Delete 7.2.1, 7.2.4 and 7.2.5 and replace with:<br><br><b>New Policy 7.2.5</b> - In the coastal environment:<br><br>Avoid adverse effects of subdivision use, and development on the characteristics and qualities which make up the outstanding values of areas of outstanding natural features and outstanding natural landscapes.<br><br>Where (a) does not apply, avoid significant adverse effects and avoid, remedy or mitigate other adverse effects of subdivision, use and development on natural features and natural landscapes. Methods which may achieve this include: |       |          |             |              |        |

Ensuring the location, intensity, scale and form of subdivision and built development is appropriate having regard to natural elements, landforms and processes, including vegetation patterns, ridgelines, headlands, peninsulas, dune systems, reefs and freshwater bodies and their margins; and

Encouraging any new subdivision and built development to consolidate within and around existing settlements or where natural landscape has already been compromised.

**New Policy 7.2.5A** - Outside the coastal environment avoid significant adverse effects and

avoid, remedy or mitigate other adverse effects (including cumulative adverse effects) of subdivision, use and development on the characteristics and qualities of outstanding natural features and outstanding natural landscapes. Methods which may achieve this include:

(a) In outstanding natural landscapes, requiring that the location and intensity of subdivision, use and built development is appropriate having regard to, natural elements, landforms

and processes, including vegetation patterns, ridgelines and freshwater bodies and their margins; and

(b) In outstanding natural features, requiring that the scale and intensity of earthworks and built development is appropriate taking into account the scale, form and vulnerability to modification of the feature.

**New Policy 7.2.5B** - When considering whether there are any adverse effects on the

characteristics and qualities of the natural features and landscape values in terms of 7.2.5(a), whether there are any significant adverse effects and the scale of any adverse effects in terms of 7.2.5(b) and 7.2.5A, and in determining the character, intensity and scale of the adverse effects:

(a) Recognise that a minor or transitory effect may not be an adverse effect;

(b) Recognise that many areas contain on-going use and development that:

(i) Were present when the area was identified as high or outstanding or have

subsequently been lawfully established

(ii) May be dynamic, diverse or seasonal;

Recognise that there may be more than minor cumulative adverse effects from minor or transitory adverse effects;

Have regard to any restoration and enhancement of the characteristics and qualities of that area of natural features and/or natural landscape;

Recognise it may be appropriate to offset significant residual adverse effects on a landscape or feature to result in no net loss and preferably a net landscape gain;

Recognise that where adverse effects cannot be practicably avoided, adverse effects could be minimised; and

Acknowledge that a future adverse effect may be avoided where the effect is temporary and is authorised for a finite term.

| Decision Requested | Delete Policy 8.3.5.  |       |          |                           |              |                 |
| 401                | Aquaculture New Zealand   | 108   | Volume 1 | 8 Indigenous Biodiversity | Policy 8.3.8 | Oppose          |
| Decision Requested | <p>Delete Policy 8.3.8 and replace with the following:</p> <p>Where a biodiversity offset is proposed, the following criteria will apply [taken from Chapter M, Appendix 8 proposed AUP Independent Hearing Panel's Recommendations]:</p> <p>Restoration, enhancement and protection actions will only be considered a biodiversity offset where it is used to offset the significant residual effects of activities after the adverse effects have been avoided, remedied or mitigated.</p> <p>Restoration, enhancement and protection actions undertaken as a biodiversity offset are demonstrably additional to what otherwise would occur, including that they are additional to any avoidance, remediation or mitigation undertaken in relation to the adverse effects of the activity.</p> <p>Offset actions should be undertaken close to the location of development, where this will result in the best ecological outcome.</p> <p>The values to be lost through the activity to which the offset applies are counterbalanced by the proposed offsetting activity, which is at least commensurate with the adverse effects on indigenous biodiversity. Where possible the overall result should be no net loss, and preferably a net gain in ecological values.</p> <p>The offset is applied so that the ecological values being achieved through the offset are the same or similar to those being lost.</p> <p><b>Note:</b> Offsetting is in addition to avoidance through restoration and enhancement. This policy should be read in conjunction with the New Zealand Government Guidance on Good Practice Biodiversity Offsetting in New Zealand, New Zealand Government et al, August 2014 (or any successor document).</p> |       |          |                           |              |                 |

| Decision Requested | <p>Davidson's mapped sites (including whales and dolphins) should not be equated with Policy 11(a) sites, because the significant sites work did not adopt the NZCPS Policy 11(a) criteria. The assessment of whether the 2011 significant sites fall within Policy 11(a) or 11(b) criteria in the NZCPS is yet to be undertaken.</p> <p>Whales have rarely been observed travelling through Tory Channel. The Davidson 2011 Significant Sites report refers to the migratory route for whales being in Cook Strait, rather than Tory Channel proper. The MFA encourages its members to have appropriate management plans in place in respect of marine mammals.</p> <p>The map should be redrafted to be consistent with the text of the Davidson 2011 Significant Marine Sites report, or it should be expressly recognised that marine farms do not have an adverse effect on whales.</p> |       |          |              |  |                 |

| Sub No             | Submitter  | Point | Volume   | Chapter      | Provision                               | Type            |
|--------------------|--|-------|----------|--------------|---|-----------------|
| Decision Requested | <p>The Marine Mammal (Dolphin) map is based on the Davidson 2011 Significant Sites report. The authors of that report were asked to identify regionally, rather than nationally significant sites. The 2011 report does not mirror the approach taken in Policy 11 of the NZCPS.</p> <p>Arguably only site 8.1 of Map 18 is a nationally significant site (for Hector's dolphins). However, Hector's dolphins are not necessarily seen regularly throughout the full extent of that area. Area 4.17 is not a nationally significant site, and arguably area 2.17 (Admiralty Bay) is significant habitat for Dusky dolphins (as opposed to nationally significant habitat in terms of Policy 11(a) of the NZCPS. For example, the <i>Admiralty Bay Consortium</i> Environment Court decision noted that the site was significant in terms of s6(c), rather than under NZCPS Policy 11(a)).</p> <p>An avoid policy is not, therefore, justified in respect of these sites, or at least not an area including the side bays.</p> <p>The MEP should be amended:</p> <p>So that a strict avoidance approach is not adopted in respect of these sites, consistent with the proposed changes to the policies at Chapter 8;</p> <p>To specify which species of dolphin are relevant to each of the mapped areas; and</p> <p>Maps should be updated in light of recent population research:<br/> <a href="http://www.stuff.co.nz/environment/82818673/research-shows-hectors-dolphin-population-bigger-than-previously-realised">http://www.stuff.co.nz/environment/82818673/research-shows-hectors-dolphin-population-bigger-than-previously-realised</a>.</p> |       |          |              |   |                 |

| Decision Requested | This information is included to complete the submission database only. As set out in MFA and AQNZ submission.  |       |          |   |   |        |
| <b>52</b>          | Anthony Armstrong  | 1     | Volume 1 | 15 Resource Quality (Water, Air, Soil)  | Policy 15.2.1                             | Oppose |
| Decision Requested | <p>I submit that 'outdoor fires' should not be banned.</p> <p>I have incinerated tree waste, after it has completely dried, for the last forty years with never a complaint. This has always been done in spring or summer, when convection takes the smoke, which only occurs on lighting, high above the city. This is not a detriment to the environment.</p> <p>I have never seen in Blenheim, garden fires that pollute. This is a minor problem, if indeed it is a problem at all. During my three times weekly walks up the Wither Hills, I see no smoke coming from Blenheim residences. Thus outdoor fires are infrequent.</p> <p>The outdoor fires do not add to pollution if burnt on a warm summer's day. If you consider they do, where is your proof?</p> <p>I submit that either you ditch this proposal, or you limit fires to a specific timeframe, say April to October. This is what happened in Christchurch.</p> <p>Trusting you give this submission your earnest consideration.</p> |       |          |   |   |        |
| <b>551</b>         | Ben Armstrong  | 1     | Volume 1 | 2 Background                            | Identifying regionally significant issues | Oppose |
| Decision Requested | Add a new issue to Volume 1 to recognise that aquaculture, farming, forestry and vineyards are regionally significant sectors in Marlborough's economy that sustains our communities.  |       |          |   |   |        |
| <b>551</b>         | Ben Armstrong  | 2     | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4B                                  | Oppose |

| Sub No             | Submitter  | Point | Volume   | Chapter                                 | Provision     | Type   |
|--------------------|--|-------|----------|---|---------------|--------|
| Decision Requested | Amend issue 4B to recognise that regionally significant sectors are at risk if unable to operate efficiently and effectively.  |       |          |   |               |        |

|--------------------|---|-------|----------|---|---|-----------------|
| Decision Requested | Amend Issue 6A and Objective 6.1 and flow on policies by recognising and providing for the existing and changing land and seascapes of use of aquaculture, vineyards and pastoral farming.  |       |          |   |   |                 |
| <b>74</b>          | Helen Ashworth  | 1     | Volume 2 | 18 Open Space 2 Zone                    | 18.5.2.                                   | Support in Part |
| Decision Requested | <p>It is therefore requested that provision be made in the Marlborough Environment Plan for organised Guiding and Scouting camp fires to be an authorised activity. It is fully appreciated that this would most likely be a Restricted Activity hence allowing permits/safeguards to be put in place. A mandatory fire permit per camp fire/or per location is considered entirely reasonable to enable MDC/Fire Service spot checks to be made on the location, safety and burn cleanliness of the fire - hence satisfying the intent of the act around air quality while teaching our future adults their responsibilities for the environment.</p> <p>Please don't allow the Marlborough girls to miss out and not get the chance to learn fire safety, care of the environment and the wider values of Girl Guiding.</p> |       |          |   |   |                 |
| <b>76</b>          | Helen Ashworth  | 1     | Volume 2 | 16 Coastal Marine Zone                  | 16.7.2.                                   | Oppose          |
| Decision Requested | The limits applying to discharge of sewage in the Coastal Marine Zone remain at 500 metres to seaward of MHWS and 500 metres of a marine farm.  |       |          |   |   |                 |
| <b>76</b>          | Helen Ashworth  | 2     | Volume 2 | 16 Coastal Marine Zone                  | 16.7.3.                                   | Oppose          |
| Decision Requested | The limits applying to discharge of sewage in the Coastal Marine Zone remain at 500 metres to seaward of MHWS and 500 metres of a marine farm.  |       |          |   |   |                 |

| <b>548</b>         | Awatere Water Users Group Incorporated   | 37    | Volume 1 | 5 Allocation of Public Resources | Policy 5.3.3 | Support in Part |
| Decision Requested | <p>That the second and third paragraph be amended as follows:</p> <p><i>For some rivers, two allocation classes are provided for, referred to as Class A and Class B. In many cases, the two classes are carried over from previous planning instruments. Class A water permits have a greater inherent reliability, due to their lower restrictions, than Class B permits. In some cases, a Class B allocation has been provided for the first time in order to provide for growth in demand (while the constraints of the water resource). These allocations classes provide for run-of-the-river irrigation, <del>and</del> other instantaneous uses and <u>for the pumping into storage.</u></i></p> <p><i>Allocation moves sequentially through the two allocation classes.</i></p> <p><i>Note that Policy 5.8.2 also provides for a Class C allocation for some water resources, <del>specifically</del> <u>primarily</u> for storage purposes, <u>although Class C can be utilised for direct irrigation at lower reliability.</u> Class C water can be applied for at any stage.</i></p> |       |          |                                  |              |                 |

| Decision Requested | Retain Policy 5.8.2.  |       |          |                                  |              |                 |
| <b>548</b>         | Awatere Water Users Group Incorporated  | 69    | Volume 1 | 5 Allocation of Public Resources | Policy 5.8.3 | Support in Part |
| Decision Requested | <p>Amend policy wording:</p> <p>(a) <i>Policy 5.8.3 - In addition to the storage of water as per Policy 5.8.2, Class A and B water may also be stored to provide water users with greater flexibility to manage water use on-site, provided that the rate of take does not exceed the authorised maximum daily rate of take for irrigation purposes.</i></p> <p>(b) Also change the last paragraph from:</p> <p><i>For this reason, the policy limits the rate of take of water for storage purposes to the authorised daily take for irrigation purposes. This still provides the consent holder with flexibility to decide how water will be used on any given day. but also ensures that the abstraction would have no greater effect on existing users than the daily take solely for irrigation purposes.</i></p> <p>Replace last paragraph with the following:</p> <p><i>The policy provides the consent holder with flexibility to decide how water will be used on any given day. However, the policy limits the rate of take of Class A and Class B water for storage to the authorised maximum daily rate of take for irrigation purposes. The total volume of water that can be physically stored will limit the number of consecutive days that a consent holder will pump to storage along with competing need to utilise the water allocation to provide direct irrigation.</i></p> |       |          |                                  |              |                 |

| 351                | Helen Mary Ballinger  | 11    | Volume 2 | 3 Rural Environment Zone | 3.         | Oppose          |
| Decision Requested | <p>SEEK that similar controls on the location and reflectance of new buildings, the planting of commercial forestry and limits on excavation and filling of land are applied to large areas of Outstanding Landscapes in south Marlborough that do not appear to have any land use activity controls in place.</p>  |       |          |                          |            |                 |

| Sub No             | Submitter   | Point | Volume   | Chapter                    | Provision | Type            |
|--------------------|---|-------|----------|----------------------------|-----------|-----------------|
| 351                | Helen Mary Ballinger  | 12    | Volume 2 | 4 Coastal Environment Zone | 4.2.1.11. | Support         |
| Decision Requested | SEEK that appropriate controls apply to all of the Marlborough Sounds environment (both Outstanding and Coastal Landscape).   |       |          |                            |           |                 |
| 351                | Helen Mary Ballinger  | 13    | Volume 2 | 3 Rural Environment Zone   | 3.3.6.1.  | Support in Part |
| Decision Requested | SEEK additional control requiring assessment of the risk of tree spread using the industry Spread Risk calculator, prior to planting taking place. In addition, any spread that is obviously from a plantation area (ie "tree rain" spreading out of a planted area), should be required to be controlled by the landowner to avoid it becoming a future threat.  |       |          |                            |           |                 |
| 351                | Helen Mary Ballinger  | 14    | Volume 2 | 4 Coastal Environment Zone | 4.3.6.    | Support         |
| Decision Requested | SUPPORT <i>Standards 4.3.6..1(a) and (b) Commercial forestry replanting</i> regarding setbacks from rivers and wetlands.  |       |          |                            |           |                 |
| 351                | Helen Mary Ballinger  | 15    | Volume 2 | 4 Coastal Environment Zone | 4.3.6.    | Oppose          |
| Decision Requested | SEEK larger setbacks from the coastal marine area, could be related to slope, ie 30m where the slope for a distance of 500m is less than 20 degrees, otherwise 100 metres. This is likely to have benefits in reducing sedimentation as well as landscape benefits. (refer Urlich Report)   |       |          |                            |           |                 |
| 351                | Helen Mary Ballinger  | 16    | Volume 2 | 4 Coastal Environment Zone | 4.3.7.    | Support in Part |
| Decision Requested | SEEK further provisions relating to the management of any commercial forest species that causes wilding issues, including where existing forestry operations are required to set back for future planting and harvesting (i.e. from the coastal marine area). There should be requirements to control re-growth and manage these areas back into permanent native cover for long term landscape and other benefits. |       |          |                            |           |                 |
| 351                | Helen Mary Ballinger  | 17    | Volume 2 | 3 Rural Environment Zone   | 3.2.1.13. | Support in Part |
| Decision Requested | In regard to all of the references to exterior paint requiring a light reflectance value of 45% or less, I SEEK that this is amended to include " all exterior cladding must have a reflectance value of 45%1 or less" to avoid large areas of unpainted highly reflective corrugated iron on new buildings (including roof).   |       |          |                            |           |                 |
| 351                | Helen Mary Ballinger  | 18    | Volume 2 | 3 Rural Environment Zone   | 3.3.21.   | Oppose          |

| Sub No             | Submitter   | Point | Volume   | Chapter                    | Provision | Type    |
|--------------------|---|-------|----------|----------------------------|-----------|---------|
| Decision Requested | The decision I SEEK is that: <ul style="list-style-type: none"> <li>Livestock should be excluded from the beds of lakes, and Significant Wetlands and suitable setbacks to avoid adverse effects, a minimum of 1 metre from the bank of rivers and a minimum of 3 metres when break feeding practices are in place.</li> <li>All cattle, pigs and deer should all be required to be excluded from rivers, lakes and the coastal marine area on all paddock blocks with an average slope of less than 15 degrees.</li> <li>Sheep should also be excluded where they are being break fed or otherwise very intensively grazed.</li> <li>Exclusion could be through permanent or temporary electric fencing as appropriate. This would capture most of the more intensively farmed lowland areas while not capturing the less intensively farmed hill country areas.</li> <li>Anyone wanting to apply for consent to allow livestock access to waterways could then be required to monitor upstream and downstream of this activity to ensure it is not having adverse effects on water quality, thereby putting the onus for monitoring onto the landowner.</li> <li>Another way to clarify requirements would be to exclude stock from the rivers listed in Volume 1 Chapter 15 as degraded and at risk of degradation (<i>inferred Tables 15.1 and 15.2</i>). This is based on long-term monitoring information and most of these rivers are in areas where livestock access is clearly a contributing factor to the poorer water quality.</li> </ul> |       |          |                            |           |         |
| <b>351</b>         | Helen Mary Ballinger  | 19    | Volume 2 | 4 Coastal Environment Zone | 4.3.20.   | Oppose  |

Decision Requested

Additional Objectives and policies shall be added to Chapter 12 of the objectives and policies Volume 1 requiring the following or words to similar effect;

*Objective 12.....*

To provide opportunity for business development within Business zones adjoining residential areas while protecting the amenities of residential properties and zones adjoining, facing, opposite to and adjacent to areas of Business Zone or on sites that Business activities may be permitted to be established on within an Urban Residential zone.

*Policy 12.....*

*Consideration of the design and appearance, scale, intensity and character of any business development and activity shall be concerned with protecting the existing amenities and amenities that may be expected from the Permitted Activity standards of the surrounding Urban Residential zone.*

*Policy .....*

*Combination of the development and performance standards of the surrounding Urban Residential zone and existing development in the immediately surrounding area shall be used to determine the appropriateness of the scale, intensity and character of building and site development for the business activity.*

*Policy .....*

*The scale, intensity and character of buildings and site development and effects shall be similar or be designed to appear similar to and have effects similar to the scale, intensity and character of development that may be expected from the Permitted Activity standards applicable to the surrounding Urban Residential zone or alternatively that exist in the immediate locality.*

*Policy .....*

Operational effects will comply with the performance standards applicable to the surrounding Urban Residential Area. In circumstances where the ambient conditions applicable to those matters in regard to which performance standards are prescribed are less than the maximums prescribed by those standards or have variable characteristics resulting from the residential nature of the locality, the operational effects of the business activity in these regards shall be no greater than those ambient levels and characteristics.

|--------------------|---|-------|----------|-----------------------------------|-----------|--------|
| Decision Requested | <p>That the following amendments (strike through and bold) are made to standard 4.3.6.1:</p> <p><i>4.3.6.1. Replanting must not be in, or within:</i><br/> (c) <del>30</del> <b>200</b> metres of the coastal marine area.</p> <p>That the following new standards are included (<i>inferred</i>):</p> <p>A buffer zone for all forest plantations is comprised of native bush with its associated under-story.</p> <p>Any pine plantation adjacent to DOC or private land should be made to stop the planting 100 metres from the ridge lines to stop the pines from dominating the skyline and allowing spill over and allowing wilding pines to spread.</p> <p>Any forest that is regarded as an uneconomic forest and the owners have no intention of reharvesting should be compelled to boom spray to kill all the regenerating pines and allow the native bush to regenerate.</p> <p>A harvesting management plan should be required prior to harvest and should include contacting Iwi and Eco tour operators to see if there are any cultural? or environmental issues that they need to be aware of and pay attention too.</p> <p>Every stream bed from the harvest site needs to have debris dams and engineered soak pits or sediment traps that filter out and prevent the sediment from filling up the bays with mud and smothering the benthic life.</p> <p>Kaimoana beds are protected from sedimentation and restored.</p> |       |          |                                   |           |        |
| <b>699</b>         | Pete and Takutai Beech  | 2     | Volume 1 | 13 Use of the Coastal Environment | 13.       | Oppose |
| Decision Requested | <p>That bottom dredging is banned in the Sounds for both Commercial and recreational uses.</p> <p>That the practice of set netting and long lines is banned.</p> <p>That a sustainable management plan is included for the Sounds recreational fishery.</p>   |       |          |                                   |           |        |

Farming (except intensive farming) undertaken in accordance with a council approved Farm Environment Plan template is a permitted activity, provided the Farm Environment Plan is prepared and implemented in accordance with (schedule X or to like effect), and provided to Marlborough District Council on request.

OR

- introduce a method that allows farmers to develop a farm environment plan that enables them to demonstrate compliance with permitted activity rules

- Schedule X could be to the effect of:

A map or aerial photograph showing:

- The boundaries of the property or within the farm enterprise;
- The boundaries of land management units on the property or within the farm enterprise
- The location of permanent and intermittent rivers, streams, lakes, drains or ponds;
- The location of riparian vegetation and fences adjacent to water bodies;
- The location of any areas within the property that are identified in a District Plan as "significant indigenous biodiversity;" and
- The location of any known and recorded heritage sites.

- A description of the Good Management Practices that will be implemented to target the following management areas, where relevant:

- Nutrient Management;
- Irrigation Management;
- Soils Management;
- Waterbody Management; and/or
- Point sources (e.g. offal pits).

|--------------------|---|-------|----------|-------------------|---------------|-----------------|
| Decision Requested | <p>Amendments are requested that when rail corridors are not available and developed for the use of cycling or walking facilities along State Highway 1 that appropriate alternative cycling and walking infrastructure is developed to ensure both walkers and cyclists are provided well defined and safe transportation routes along State Highway 1.</p> <p>For example: Grovetown Shared pathway currently ends at the Opawa Bridge and cyclists heading south are expected to share the road with heavy traffic along Grove Road. As discussed in Policy 17.4.8 "although people do cycle this section of the state highway, the environment is not conducive to the activity." While a 50 km/hr speed limit is in place along Grove Road, and therefore reducing the risk of injuries as a result of collision, Bike Walk Marlborough requests that investigation and installation of appropriate facilities that not only alleviate safety concerns on State Highway 1 but actively encourage methods of active transport. Alternatively, a cycle crossing and route could be provided for to connect with and along Hutcheson Street, being a significantly lower volume road. It is also requested that inclusion of the proposed Opawa bridge be made and the proposal for a separate bike walk bridge and potential for installing an underpass connecting the east and west of Grove Road. Bike Walk Marlborough also advocates that well defined cycling infrastructure (e.g. cycle lanes) would create more cycle aware drivers and would therefore help to alleviate current risks at roundabouts {please note that the MDC 2016 'Crash or near miss reports' indicate 57% of issues are at intersections}.</p> |       |          |                   |               |                 |

| Decision Requested | <p>That Policy 5.7.2 be amended as follows to reflect the submission that reasonable demand relates to irrigation water only.</p> <p><i>Policy 5.7.2 To allocate irrigation water on the basis of reasonable demand given the intended use.</i></p> <p>That an additional policy be added providing direction for decision makers when assessing applications for resource consent to abstract and use water for non-irrigation purposes as follows:</p> <p><i>Policy 5.7.X To recognise that land users require water for uses other than irrigation purposes and applications for allocations of water for such uses shall be assessed on a case by case basis.</i></p> |       |          |   |              |         |
| 462                | Blind River Irrigation Limited  | 29    | Volume 1 | 5 Allocation of Public Resources          | Policy 5.7.3 | Support |
| Decision Requested | <p>That policy 5.7.3 be re-worded as follows to provide for an enabling policy:</p> <p><i>Where based on property specific information, an applicant can demonstrate that an allocation of water in excess of the reasonable demand calculation is required, then that allocation may be granted subject to water availability. Under such circumstances the property specific information will take precedence over the reasonable use calculation.</i></p>  |       |          |   |              |         |
| 462                | Blind River Irrigation Limited  | 30    | Volume 1 | 5 Allocation of Public Resources          | Policy 5.8.3 | Support |

| Sub No             | Submitter  | Point | Volume   | Chapter                                | Provision      | Type   |
|--------------------|--|-------|----------|--|----------------|--------|
| Decision Requested | <p>That policy 5.8.3 be amended as follows:</p> <p><i>In addition to the storage of water as per Policy 5.8.2, Class A and B water may also be stored to provide water users with greater flexibility to manage water use on-site, provided that the rate of take does not exceed the authorised <u>maximum</u> daily rate of take for irrigation purposes.</i></p> <p>That the last explanatory paragraph be deleted and replaced in entirety with following:<br/> <i><u>The policy provides the consent holder with flexibility to decide how water will be used on any given day. However, the policy limits the rate of take of Class A and B water for storage to the authorised maximum daily rate of take for irrigation purposes. The total volume of water that can be physically stored will limit the number of consecutive days that a consent holder will pump to storage along with the competing need to utilise the water allocation to provide direct irrigation.</u></i></p> |       |          |  |                |        |
| <b>462</b>         | Blind River Irrigation Limited   | 31    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.1.32 | Oppose |
| Decision Requested | <p>Policy 15.1.32 – In considering any resource consent application for the disturbance of a river or lake bed, or the seabed, or land in close proximity to any waterbody, regard will be had to:</p> <p>(a) whether the disturbance is likely to result in non-compliance with the clarity standards set for the waterbody, after reasonable mixing;</p> <p>(b) in the event of possible non-compliance with the clarity standards set for the waterbody, after reasonable mixing:</p> <p>(i) the purpose for undertaking the disturbance and any positive effects accruing from the disturbance;</p> <p>(ii)<br/> <u>the economic consequences of not undertaking the disturbance</u><br/> ;</p>  |       |          |  |                |        |

(iii) the scale, duration and frequency of the disturbance;

(iv) the extent to which the bed disturbance is necessary and adverse water quality effects caused by the disturbance are mitigated

by way of site specific management plans that set out how potential adverse effects from such activities are to be avoided, minimised or mitigated; and

(v) for freshwater, the potential effects of increased turbidity on the values of the waterbody set out in Schedule 1 of Appendix 5 of the Marlborough Environment Plan or on the natural character values of the coastal environment in relation to water quality as set out in Appendix 2 of the Marlborough Environment Plan.

| Decision Requested | <p>Yncyca Bay has commercial forestry and native bush within it. The area supports industry and employment within the sounds and Marlborough with forestry and tourism. It co-exists with our marine farm. Both Yncyca and Fairy Bay have housing areas with mixed density. The impacts of sewage leaching from these settlements and affecting water quality would be a great significant to our operation.</p> <p>Recently the Fairy Bay farm came up for renewal and reports were tabled showing the marine farm had negligible impact on the marine and landscape environments.</p> <p>I request that the MDC undertake a review of these areas and provide appropriate justification for their extent and definition. I specifically seek acknowledgement within the schedules to these natural character and landscape areas that my existing marine farms are not causing adverse effects.</p> |       |          |              |                             |        |
| <b>726</b>         | Canantor Mussels Limited and N. I Buchanan-Brown  | 17    | Volume 4 | Overlay Maps | Coastal Natural Character 1 | Oppose |
| Decision Requested | <p>Whakatahuri Bay has housing areas with mixed density. The impacts of sewage leaching from these settlements and affecting water quality would be a great significant to our operation.</p> <p>I request that the MDC undertake a review of the area and provide appropriate justification for their extent and definition. |--------------------|---|-------|----------|--------------------------|-----------|-----------------|
| Decision Requested | This information is included to complete the submission database only.<br>As set out in MFA and AONZ submission.  |       |          |                          |           |                 |
| <b>26</b>          | McGinty, Kathleen and Carter, Alan  | 1     | Volume 2 | 2 General Rules          | 2.9.9.    | Support in Part |
| Decision Requested | We request further strengthening this clause to state that if there are stock on a property, then the streams and rivers need to be fenced off at least 20 metres above the high water line to prohibit access to stock and to allow for the regeneration of native flora.  |       |          |                          |           |                 |
| <b>26</b>          | McGinty, Kathleen and Carter, Alan  | 2     | Volume 2 | 3 Rural Environment Zone | 3.3.11.3. | Support in Part |
| Decision Requested | We request that this clause be further strengthened to say that no clearing of native flora be allowed within 20 metres of the high water line of all waterways, be they streams or rivers. And that It is incumbent on owners of such land to reforest the Queen's Chain with indigenous trees and other plants if it has been cleared in the past. (Perhaps the MDC could provide the seedlings free of charge for such regeneration programs.)   |       |          |                          |           |                 |
| <b>26</b>          | McGinty, Kathleen and Carter, Alan  | 3     | Volume 2 | 3 Rural Environment Zone | 3.3.11.   | Support in Part |
| Decision Requested | Generally, these sub-clauses need to be much stronger in preventing people from clearing indigenous vegetation. They also need to focus on more actively promoting conservation of native vegetation and regenerating land that has been cleared previously with indigenous vegetation.   |       |          |                          |           |                 |
| <b>26</b>          | McGinty, Kathleen and Carter, Alan  | 4     | Volume 2 | 3 Rural Environment Zone | 3.2.      | Support in Part |
| Decision Requested | That forestry operations cease between the hours of 10pm and 7am to enable people living near forestry sites to be able to sleep at night.<br><br>That recreational motor bikes must also adhere to the allowable noise limits and not be exempt from same.   |       |          |                          |           |                 |
| <b>613</b>         | Cawthron Institute  | 1     | Volume 2 | 16 Coastal Marine Zone   | 16.3.9.1. | Oppose          |
| Decision Requested | We request that the rules pertaining to temporary scientific moorings be made more flexible especially with respect to the duration of these installations. The detailed conditions of this scheme may need to be worked out in consultation between MDC, and science providers. It is suggested that:<br><br>- Approval from the Harbour Master after submission of information on: location, details of the installation, mooring tackle, lighting and signage, purpose, duration, etc.<br><br>- A mooring should not be installed over any scheduled ecologically significant marine site (unless the purpose of the installation is protection of this site).<br><br>- Duration of one location be automatically granted up to 12 consecutive calendar months, but with flexibility to adjust or extent the duration up to 36 consecutive months after approval is given by the Harbour Master. |       |          |                          |           |                 |

|--------------------|--|-------|----------|---|--------------------|-----------------|
| 464                | Chorus New Zealand limited   | 1     | All      | All                                     |                    | Oppose          |
| Decision Requested | Amend entire plan, to provide consistency in the use of terms, and inclusion of a specific section detailing objectives and policies relevant to the provision of infrastructure. The structure of the Auckland Unitary Plan is a good example. A list of suggested objectives and policies is attached as an addendum to this submission point (see original submission for addendum).  |       |          |   |                    |                 |
| 464                | Chorus New Zealand limited   | 2     | All      | All                                     |                    | Oppose          |
| Decision Requested | Replace the term 'regionally significant infrastructure' at each instance it is used in the plan with the word 'infrastructure'.   |       |          |   |                    |                 |
| 464                | Chorus New Zealand limited   | 3     | Volume 1 | 1 Introduction                          | Guiding principles | Support         |
| Decision Requested | Retain guiding principle relating to reverse sensitivity.  |       |          |   |                    |                 |
| 464                | Chorus New Zealand limited   | 4     | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4B           | Support in Part |
| Decision Requested | Amend paragraph 1 beneath Issue 4B as follows:<br><i>We rely on a range of physical resources to allow our communities function on a day-by-day basis. These resources include the water, stormwater and waste disposal services provided to townships and small settlements; the transport links within Marlborough and connecting Marlborough to the remainder of the country; the provision of electricity and telecommunications; and, on the Lower Wairau Plain, the drainage of land. Collectively, this infrastructure is regionally significant due to the contribution it makes to our social and economic wellbeing, health and safety. <b>Some of infrastructure is also nationally important, such as the</b> <del>Other infrastructure in (e.g. RNZAF Base Woodbourne, ) or running through Marlborough (e.g. the National Grid, <b>the telecommunications network</b> and state highways) also has national importance.</del> It is important that <del>this strategic</del> <b>all</b> infrastructure is able to operate efficiently, effectively and safely on an ongoing basis for community wellbeing. The ability to maintain, upgrade and replace existing infrastructure without significant constraint is important in this respect. Occasionally, new infrastructure may be required to provide for growth within the district.</i> |       |          |   |                    |                 |
| 464                | Chorus New Zealand limited   | 5     | Volume 1 | 4 Use of Natural and Physical Resources | Objective 4.2      | Support in Part |
| Decision Requested | Amend Objective 4.2 as follows:<br><i>Efficient, effective and safe operation of <del>regionally significant</del> infrastructure.</i>   |       |          |   |                    |                 |
| 464                | Chorus New Zealand limited   | 6     | Volume 1 | 4 Use of Natural and Physical Resources | Policy 4.2.1       | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter                                 | Provision    | Type            |
|--------------------|--|-------|----------|---|--------------|-----------------|
| Decision Requested | Amend subsection Policy 4.2.1 as follows:<br>Policy 4.2.1 – Recognise the social, economic, environmental, health and safety benefits from the following infrastructure, either existing or consented at the time the Marlborough Environment Plan became operative, <del>as regionally significant:</del><br>(h) <del>strategic</del> telecommunications facilities, <del>as defined in Section 5 of the Telecommunications Act 2001,</del> and <del>strategic</del> radio communication facilities, <del>as defined in Section 2(1) of the Radiocommunications Act 1989;</del> |       |          |   |              |                 |
| <b>464</b>         | Chorus New Zealand limited   | 7     | Volume 1 | 4 Use of Natural and Physical Resources | Policy 4.2.2 | Support in Part |
| Decision Requested | Amend Policy 4.2.2 as follows:<br>Policy 4.2.2 – Protect regionally significant infrastructure from the adverse effects of other activities.   |       |          |   |              |                 |
| <b>464</b>         | Chorus New Zealand limited   | 8     | Volume 1 | 4 Use of Natural and Physical Resources | 4.M.7        | Support in Part |
| Decision Requested | Amend Method of Implementation 4.M.7 as follows:<br><b>4.M.7 Specific Zoning and Rules</b><br><i>Recognition will be given to regionally significant infrastructure by providing, where appropriate, explicit zoning for the infrastructure. <b>This, in conjunction with the application of district specific infrastructure (and network utility) rules, zoning will assist to enable the infrastructure to operate efficiently and effectively.</b></i>   |       |          |   |              |                 |
| <b>464</b>         | Chorus New Zealand limited   | 9     | Volume 1 | 4 Use of Natural and Physical Resources | 4.M.8        | Support in Part |
| Decision Requested | Amend Method of Implementation 4.M.8 as follows:<br>4.M.8 Designations<br><i>Encourage requiring authorities (as defined by Section 166 of the RMA) to utilise designations as an effective means of identifying and protecting <del>regionally significant</del> infrastructure. Designations can then be explicitly included in the MEP.</i>   |       |          |   |              |                 |
| <b>464</b>         | Chorus New Zealand limited   | 10    | Volume 1 | 4 Use of Natural and Physical Resources | 4.M.9        | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter            | Provision      | Type            |
|--------------------|--|-------|----------|--------------------|----------------|-----------------|
| Decision Requested | <p>Amend Method of Implementation 4.M.9 as follows:<br/> <i>Rules will be used to enable activities associated with the maintenance, alteration, minor upgrading and replacement of regionally significant infrastructure. Standards will specify the extent of works involved with any of these activities.</i><br/> <i>Rules will be used to control the proximity of land uses in river beds that could have adverse effects on regionally significant infrastructure. This includes development within the National Grid corridor.</i></p> <p>...</p> <p><i>In addition to the rules in the MEP, the Resource Management (National Environmental Standards for Electricity Transmission Activities) Regulations 2009 <b>and the Resource Management (National Environmental Standards for Telecommunication Facilities) Regulations 2008</b> establishes various classes of activity for certain activities relating to existing transmission lines <b>and telecommunications facilities, respectively.</b></i><br/> <i>[Note – if the second generation NESTF is operative prior to the PMEP becoming operative, a small amendment will be needed to the year of the NESTF]</i></p> |       |          |                    |                |                 |
| <b>464</b>         | Chorus New Zealand limited   | 11    | Volume 1 | 7 Landscape        | Objective 7.2  | Support         |
| Decision Requested | Retain objective 7.2 as proposed.  |       |          |                    |                |                 |
| <b>464</b>         | Chorus New Zealand limited   | 12    | Volume 1 | 7 Landscape        | Policy 7.2.6   | Support         |
| Decision Requested | Retain policy 7.2.6(a) as proposed.  |       |          |                    |                |                 |
| <b>464</b>         | Chorus New Zealand limited   | 13    | Volume 1 | 11 Natural Hazards | 11.            | Support in Part |
| Decision Requested | <p>Amend Paragraph 4 to the Introduction as follows:<br/> <i>The Council can act to reduce the risk of natural hazards adversely affecting life, <b>and</b> property <del>and regionally significant infrastructure</del>. Using its functions under the RMA to control the use of land to avoid or mitigate natural hazards, the Council can influence the location and management of new developments to ensure that they are not subject to unreasonable risk. Other land uses may adversely affect hazard mitigation works and these can be similarly controlled to ensure that the integrity of the works is not compromised.</i></p>   |       |          |                    |                |                 |
| <b>464</b>         | Chorus New Zealand limited   | 14    | Volume 1 | 11 Natural Hazards | Issue 11A      | Support in Part |
| Decision Requested | <p>Amend Issue 11A as follows:<br/> <i>Issue 11A – Natural hazards in Marlborough, particularly flooding, earthquakes and land instability, have the potential to cause loss of life and significant damage to property <del>and regionally significant infrastructure</del>.</i></p>  |       |          |                    |                |                 |
| <b>464</b>         | Chorus New Zealand limited   | 15    | Volume 1 | 11 Natural Hazards | Objective 11.1 | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter                           | Provision      | Type    |
|--------------------|--|-------|----------|-----------------------------------|----------------|---------|
| Decision Requested | Amend Objective 11.1 as follows:<br><i>Objective 11.1 – Reduce the risks to life, <b>and</b> property and regionally significant infrastructure from natural hazards. Natural hazards can have significant adverse effects on individuals and the community, including loss of life, personal injury, damage to property and disruption of day-to-day life, business and the provision of community infrastructure. For this reason, the objective seeks to reduce the risks and consequences of natural hazards. This objective also implements direction from the CDEMP, which signals that resource management provisions have an important role to play in risk reduction.</i> |       |          |                                   |                |         |

| <b>1059</b>        | Climate Karanga Marlborough   | 1     | Volume 1 | 19 Climate Change | 19.            | Support in Part |
| Decision Requested | <p>Amend the Introduction as follows (strike through and bold) -</p> <p><i>"Society will continue to rely <del>currently relies</del> on fossil fuels as an energy source for the foreseeable future <b>but needs to find alternatives as quickly as possible</b>. The consumption of these fuels <del>results</del> <b>and livestock farming are the two major contributors to the large increase</b> in the release of carbon dioxide and other greenhouse gases into the atmosphere <b>over the last 150 years</b>. The general consensus of scientific opinion is that the world is getting warmer, causing its climate to change. Global temperatures are approximately <del>0.6 degrees Celsius</del> <b>1.2°C higher than pre-industrial levels and 0.6°C higher now than they were in the early 1990s</b>. <b>To prevent dangerous and potentially irreversible impacts of climate change global temperatures must be kept well below 2°C above pre-industrial levels</b>. <del>While there is not unanimous agreement,</del> There is now strong evidence that most of the warming observed is attributable to increased concentrations of greenhouse gases produced by human activities. As more gases accumulate in the atmosphere, the Earth gets warmer, resulting in rising sea temperatures and levels, the melting of glaciers and ice caps and greater extremes in weather patterns, such as more storms of greater intensity and longer droughts.</i></p> <p><i>In Marlborough, NIWA predicts <del>it is predicted</del> that the mean temperature will increase by approximately <del>1</del> <b>1.8 degrees C</b> by 2040 and <del>2</del> <b>2.8 degrees C</b> by 2090 <b>above the pre-industrial mean</b>. The climate is likely to become drier and the frequency of droughts is expected to increase. There is also a predicted increase in westerly winds, especially in winter and spring.</i></p> <p><i>Section 7 of the Resource Management Act 1991 (RMA) requires the Council to have regard to the effects of these predicted climatic changes in exercising its functions under the RMA. Uncertainty about the nature of these effects at international, national and local level makes this a difficult task. Most projections are also long term and certainly beyond the ten year life of the Marlborough Environment Plan (MEP). Taking all of this into account, the provisions of this chapter focus on applying the best available information to enable people and communities to respond to the adverse and positive effects created by climate change. <b>It is noted that the adverse long term effects of global warming are likely to outweigh any regional short term benefits that may occur.</b> (Inferred)"</i></p> |       |          |                   |                |                 |
| <b>1059</b>        | Climate Karanga Marlborough   | 2     | Volume 1 | 19 Climate Change | Objective 19.1 | Support in Part |
| Decision Requested | <p>Amend the last sentence of the explanation to the Objective as follows (strike through and bold) -</p> <p><i>"In the meantime, it is prudent to promote actions that offset carbon emissions and <del>retain sufficient flexibility in the</del> <b>focus on ecologically wise</b> use, development and protection of natural and physical resources to enable resource users to adapt to a changing climate."</i></p> <p><i>(Inferred)</i></p>  |       |          |                   |                |                 |
| <b>1059</b>        | Climate Karanga Marlborough   | 3     | Volume 1 | 19 Climate Change | Policy 19.1.1  | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter           | Provision     | Type            |
|--------------------|--|-------|----------|-------------------|---------------|-----------------|
| Decision Requested | <p>Amend the Policy as follows (strike through) -<br/> <i>"Promote actions within Marlborough to reduce <del>or offset</del> carbon emissions."</i></p> <p>And, the explanatory text to the Policy be amended as follows (strike through and bold) -</p> <p><i>"Climate change is a global issue that New Zealand's central government is addressing at an international and national level. The RMA effectively excludes regional councils from the role of regulating emissions for climate change purposes (Sections 70A and 104E of the RMA). However, the Council can explore opportunities for supporting national policies and where appropriate promote methods that address climate change problems within New Zealand's national policy framework for climate change. For example, the Council <del>could</del> <b>will</b> assess and then address the carbon footprint of delivering its own services to the community and encourage businesses to do likewise. This is one of many actions the Council could undertake to enable Marlborough's people and communities to play their part in responding to this global issue."</i></p> |       |          |                   |               |                 |
| 1059               | Climate Karanga Marlborough  | 4     | Volume 1 | 19 Climate Change | Policy 19.1.2 | Support in Part |
| Decision Requested | <p>Amend the explanatory text for the Policy to explain how the Policy is going to be achieved in practice. There is no mention of any public outreach or education programme or consultative process to get local people and businesses up to speed with the environmental changes we are facing and how to prepare for them and take actions to mitigate them.</p> <p>And, we recommend that Council establishes a new permanent position of 'MDC Climate Change Advisor'.</p>   |       |          |                   |               |                 |

| Decision Requested | Add a new Method of Implementation as follows -<br><br>" <b>Advisory group - An advisory group be established of science, industry, business and community representatives to work with Council in a collaborative way on identifying climate change threats in Marlborough and on devising appropriate responses.</b> "  |       |          |                   |           |                 |
| 1059               | Climate Karanga Marlborough   | 14    | Volume 1 | 19 Climate Change | Issue 19B | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter           | Provision      | Type            |
|--------------------|--|-------|----------|-------------------|----------------|-----------------|
| Decision Requested | Amend paragraph three of the explanatory text to the Issue as follows -<br><br><i>"Global warming is expected to result in a rise in sea level due to thermal expansion of ocean water and melting of glacial and polar ice. Sea level is predicted to rise around 0.18 to 0.59 metres by 2090. This rise <del>potentially</del> increases the risk of inundation at the coast. Coastal erosion could also become more prevalent, increasing the need for coastal protection measures. Along the coastal margin of the Wairau Plain, the level of the Wairau River bar and river mouth efficiency has far greater influence on the potential for inundation than the projected sea level rise. Further south, the topography and lack of settlement minimises any inundation risk. However, the risks are far greater in the Marlborough Sounds where settlement and associated infrastructure (especially means of access, such as jetties and access tracks) tend to be located in the coastal environment and near the water edge."</i> |       |          |                   |                |                 |

| 484                | Clintondale Trust, Whyte Trustee Company Limited   | 31    | Volume 1 | 5 Allocation of Public Resources | Policy 5.8.3 | Support         |
| Decision Requested | Retain Policy 5.8.3  |       |          |                                  |              |                 |
| 484                | Clintondale Trust, Whyte Trustee Company Limited   | 32    | Volume 1 | 5 Allocation of Public Resources | Policy 5.9.1 | Support in Part |
| Decision Requested | <p>Make the following amendments (strikethrough and bold) to Policy 5.9.1:</p> <p><i>Policy 5.9.1 – Once an allocation limit is reached and that part of the water resource is fully allocated, any water that subsequently becomes free to allocate to other users will only be made available to those users through a system of <del>ballot</del><b>tender</b>.</i></p> <p>This policy sets out in principle that any water that becomes available to re-allocate shall be allocated via <del>ballot</del><b>tender</b>. A <del>ballot</del><b>tender</b> is considered by water users to be the most equitable way to determine who should receive the water given the likely competition for the water amongst existing users. It avoids the situation of a person gaining access to water in preference to other potential users based on the nature of the use or because they were first to make an application.</p>   |       |          |                                  |              |                 |
| 484                | Clintondale Trust, Whyte Trustee Company Limited   | 33    | Volume 1 | 5 Allocation of Public Resources | Policy 5.9.2 | Support in Part |
| Decision Requested | <p>Make the following amendments (strikethrough and bold) to Policy 5.9.2:</p> <p><i>Policy 5.9.2 – On securing the <del>ballot</del><b>tender</b>, the successful <del>ballot</del><b>tenderer</b> must apply for the necessary water permits to authorise the taking and (if relevant) use of water. Until the successful <del>ballot</del><b>tenderer(s)</b> secures the necessary water permits, the water resource is considered fully allocated.</i></p> <p>The policy sets out what the successful <del>ballot</del><b>tenderer</b> must do to secure the allocation gained through a <del>ballot</del><b>tender</b>. As existing water permits define the spatial extent and rate of use, any proposed additional use would exceed existing allocations expressed in consents to take and use water. This means that a separate water permit would be required to authorise the taking and use of water. This policy secures the ability to make such an application without predetermining the outcome. While this process is underway, the water resource is considered to remain fully allocated to prevent a third party making an application for a water permit that would effectively nullify the result of the <del>ballot</del><b>tender</b>.</p> |       |          |                                  |              |                 |
| 484                | Clintondale Trust, Whyte Trustee Company Limited   | 34    | Volume 1 | 5 Allocation of Public Resources | Policy 5.9.3 | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter                           | Provision      | Type            |
|--------------------|--|-------|----------|-----------------------------------|----------------|-----------------|
| Decision Requested | <p>Make the following amendments (strikethrough and bold) to Policy 5.9.3:</p> <p><i>Policy 5.9.3 – If required, any <del>ballot</del><b>tender</b> will be conducted on the following basis:</i></p> <p><i>(a) at least annually for the calendar year;</i></p> <p><i>(b) if the water permit holder already holds a water permit to take and use water for the same purpose, then they must surrender the original water permit before giving effect to the new water permit; and</i></p> <p><i>(c) if the subsequent water permit application to authorise the taking of water is not made within 12 months of the ballot result or the water permit application is refused, then that water will be re-balloted in the subsequent year.</i></p> <p>The matters in (a) to (c) set out procedurally how any <del>ballot</del><b>tender</b> to allocate water would be conducted. These matters will therefore guide the <del>ballot</del><b>tender</b> process, if any <del>ballot</del><b>tender</b> is required.</p> |       |          |                                   |                |                 |

| Decision Requested | <p>Make the following amendment (bold) to Policy 17.6.1:</p> <p><i>Policy 17.6.1 – Maintain amenity values in rural and urban areas by encouraging the use of national and arterial routes by high volumes of traffic and heavy vehicles and discouraging high volume and heavy traffic use of collector routes and local routes, particularly where these pass through residential areas.</i></p> <p>The current state of vehicle technology in New Zealand means that noise and vehicle emissions can be expected from the operation of vehicles on roads. There is little the MEP can do to modify those conditions. However, the Council can control the extent of these effects by adopting a road hierarchy, which encourages higher volumes of traffic and heavy traffic movements on certain routes and discourages them on others. An exception is made for some primary production activities, which need to use collector and local routes to transport produce to processing facilities <b>provided that no viable alternative route or method of transport exists. The maintenance of community amenity values will take precedence over commercial financial considerations.</b></p> |       |          |                                 |                |                 |

|--------------------|--|--------------|---------------|-----------------------------------|------------------|-----------------|
| <b>152</b>         | Clova Bay Residents Association Inc  | 18           | Volume 1      | 6 Natural Character               | Policy 6.2.5     | Oppose          |
| Decision Requested | This policy is inappropriate and should be deleted.  |              |               |                                   |                  |                 |
| <b>152</b>         | Clova Bay Residents Association Inc  | 19           | Volume 1      | 6 Natural Character               | Policy 6.2.3     | Oppose          |
| Decision Requested | That Policy 6.2.3 apply to the coastal marine area irrespective of existing classification of natural character.   |              |               |                                   |                  |                 |
| <b>152</b>         | Clova Bay Residents Association Inc  | 20           | Volume 1      | 6 Natural Character               | Objective 6.1    | Oppose          |
| Decision Requested | We submit that Clova Bay be identified in the MEP as an area at threat or risk from significant adverse cumulative effects on natural character. This will give some long overdue recognition to the over farming issue in Clova Bay and set the platform for some resolution.   |              |               |                                   |                  |                 |

| Decision Requested | Delete the Minimum Flows and Levels for Water Takes applying to the Wairau Aquifer Central Springs Freshwater Management Unit, Wairau Aquifer Northern Springs Freshwater Management Unit and the Wairau Aquifer Urban Springs Freshwater Management Unit. ( <i>Inferred</i> )  |       |          |   |                |                 |
| <b>163</b>         | James Collett   | 1     | Volume 4 | Zoning Maps                               | Zoning Map 165 | Support in Part |
| Decision Requested | My decision requested is to further define the boundaries of W793 to a smaller and more realistic and practical size as the current overlay as presented on the map is close to three times the actual size of the wetland.   |       |          |   |                |                 |
| <b>253</b>         | James Collett   | 1     | Volume 3 | Appendix 6 Environmental Flows and Levels | Schedule 3     | Support in Part |
| Decision Requested | That all Wairau River surface water takes are considered equal (both below and above The Narrows) and therefore have the same minimum flow level cut off of 8m <sup>3</sup> /s at Barnett's Bank. This is effectively the current situation, however it is noted that a portion of consents do have a condition relating to the Wash bridge flow which has never been implemented. With the current management flow of 8m <sup>3</sup> /s for full restriction for all Wairau River users, it has shown that there are no adverse effects on instream values. Whereas any changes will have a significant negative economic and social impact on those consent holders currently above The Narrows. |       |          |   |                |                 |
| <b>235</b>         | Chris Collie-Holmes   | 1     | Volume 2 | 16 Coastal Marine Zone                    | 16.7.2.        | Oppose          |
| Decision Requested | The limits applying to discharge of sewage in the Coastal Marine Zone remain at 500 metres to seaward of MHWS and 500 metres of a marine farm.  |       |          |   |                |                 |

| Decision Requested | <p>1. Leave the ruling as it currently is (at 500m).</p> <p>2. Perhaps a more progressive solution for the unique environment that is the Marlborough Sounds, is to redefine the classification of a "Ship" within the current rules and introduce a tiered system as such:</p> <ul style="list-style-type: none"> <li>- Large commercial ships that regularly enter and exit the Sounds, can reasonably be expected to discharge their sewerage outside of the 1000m mark.</li> <li>- Smaller local commercial operators (taxi's, sight seeing and fishing tours , etc.) could be allowed to use a 500m mark but their vessels should be expected to carry a suitable treatment system (inspected under survey).</li> <li>- Recreational craft &gt;7m must macerate their sewerage prior to discharge via electric toilet or macerator pump. This would eliminate the chances of persistent solids washing ashore and significantly increase the rate of dissipation and degradation. This is a simple enough and relatively inexpensive measure that I believe most boat owner's would consider to be a perfectly reasonable and workable request, in the interests of all.</li> <li>- The remaining untreated discharge from smaller boats would be negligible.</li> </ul> |       |          |  |           |        |

| Decision Requested | <p>That commercial scallop dredging has had a catastrophe effect on the sounds underwater environment. This has been more noticeable in Queen Charlotte due to the fact that these beds are wild (no seeding is done), and have been on the decline for years.</p> <p>That commercial is banned, or not allowed to be restarted to protect the unique underwater habitats, the possibility of recreational dredging only in these areas could be considered. These dredges are much, smaller and lighter.</p> <p>Not all recreational people take scallops with dredges our club gathers by hand therefore causes little damage; but do see the result of siltation in bays.</p> |       |          |   |               |         |

|--------------------|--|-------|----------|----------------------------------|---------------|---------|
| Decision Requested | That the following amendments (bold) are made to Policy 5.5.5:<br><br><i>Policy 5.5.5 – Resolve over-allocation of the Benmorven, Brancott and Omaka Aquifer Freshwater Management Units by reducing individual resource consent allocations on a proportional basis, based on the total allocation available relative to each individual's irrigated land area, <b>and the type of intended use</b>, or equivalent for non-irrigation water uses (excluding domestic and stock water). The reductions will be achieved by reviewing the conditions of the relevant water permits to reallocate the available allocation fairly across all relevant users.</i><br><br>Explanation<br><br>This policy sets out the means by which the over-allocation of groundwater from the Benmorven, Brancott and Omaka Aquifer FMUs will be resolved. A reduction in the allocation that has been granted resource consent, based on reallocating the total allocation available relative to each individual's irrigated land area <b>and current use and reasonable water requirements</b> , is considered to be the most equitable means of reducing total allocation of water from these FMUs. <b>This recognises already established land use reasonable water use needs and associated significant investment that may accompany this existing land use.</b> Where water use is for non-irrigation purposes, such as winery or commercial use, the proportion of the reallocation will be calculated to be relative to irrigation water permit holders. |       |          |                                  |               |         |

| 676                | Dairy NZ   | 74    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.1.2   | Support in Part |
| Decision Requested | That the following amendment (bold) is made after the 5th sentence of the first paragraph of Policy 15.1.2:<br><i>Water quality classifications will be applied through the MEP to all water and coastal waters. The classifications will, as a minimum, reflect the management purposes set out in Policy 15.1.1. However, particular waterbodies and coastal waters may support other natural and human use values and it is appropriate for these values to be reflected in any classification. This means that many waterbodies and coastal waters will have multiple classifications. For those waterbodies or coastal water experiencing degraded water quality, the classifications will reflect the natural and human use values that are to be restored. <b>These values will be form a part of Catchment Enhancement Plans.</b> Water quality standards will apply to each classification.</i> |       |          |  |                 |                 |
| 676                | Dairy NZ   | 75    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.1.3   | Support in Part |
| Decision Requested | That the following amendments (bold) are made to the explanation for Policy 15.1.3:<br>After paragraph 2 of the explanation: <b>Key stakeholders will be given the opportunity to be kept informed or participate in this investigation process.</b><br>After paragraph 4 of the explanation: <b>The date for implementation of cumulative catchment limits has been set at 2024. However, this date may be extended where Catchment Enhancement Groups agree it is necessary to allow resource users sufficient time to implement any changes in land use practices.</b>  |       |          |  |                 |                 |
| 676                | Dairy NZ   | 76    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.1.8   | Support         |
| Decision Requested | Retain Policy 15.1.8.  |       |          |  |                 |                 |

|--------------------|--|-------|----------|-------------------|---------------|-----------------|
| Decision Requested | <p>The Council should decide to take actions that will actually achieve the stated intent of this objective and not just pay it lip service. Council should:-</p> <p>1) Establish a new permanent position of 'MDC Climate Change Adviser'. The purpose of this appointment would be to provide expert advice, information, training, education and support to Council and local residents/businesses, to help them better understand and respond to climate change. This is the greatest environmental challenge we face as a species and probably the greatest threat to civilisation since the second world war. If we are to respond to it with the scale and urgency required then a lot more resources are going to be needed and having someone on the Council team with the right knowledge and expertise will be essential.</p> <p>2) Publish a clear action plan of measures the Council intends to take in the short and medium term to achieve the stated intent of this objective - i.e. to actually improve the community's understanding of climate change - rather than leaving ratepayers in blissful ignorance, as most of them are currently.</p> |       |          |                   |               |                 |
| <b>89</b>          | Peter Deacon   | 6     | Volume 1 | 19 Climate Change | Policy 19.1.3 | Support in Part |
| Decision Requested | <p>The penultimate sentence in the supporting paragraph to Policy 19.1.3 should be removed as it is completely incorrect. There will be no opportunities for aquaculture as a result of increasing water temperatures - quite the reverse - increasing sea temperatures will destroy aquaculture in the Marlborough region.</p> <p>MDC needs to employ people with the necessary expertise to advise them properly on Climate Change and its impacts on marine and terrestrial biology. MDC should urgently appoint a Climate Change Adviser.</p>  |       |          |                   |               |                 |
| <b>89</b>          | Peter Deacon   | 7     | Volume 1 | 19 Climate Change | 19.M.1        | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter           | Provision | Type            |
|--------------------|--|-------|----------|-------------------|-----------|-----------------|
| Decision Requested | Amend Chapter 19 - Method 19.M.1 of the Proposed Plan in accordance with my submission above   |       |          |                   |           |                 |
|                    | The method should therefore read - <i>" Investigate Council operations to establish their carbon footprint, set goals for reducing carbon emissions in accordance with New Zealand's national emissions reduction targets, and develop an action plan to reach those goals"</i>  |       |          |                   |           |                 |
|                    | It is of imperative that the entire Marlborough region takes action to lower carbon emissions, not just Council, and we therefore encourage MDC to promote regional initiatives such as electrification of transport, conversion of waste biomass to energy which could support a thriving local renewable energy industry, regeneration of native forests to act as carbon sinks and increasing carbon sequestration in soils by encouraging farms and vineyards to incorporate more use of biochar and composting in their production systems. |       |          |                   |           |                 |
| <b>89</b>          | Peter Deacon   | 8     | Volume 1 | 19 Climate Change | 19.M.2    | Support in Part |
| Decision Requested | <u>19.M.2Marlborough Regional Land Transport</u>   |       |          |                   |           |                 |
|                    | Council should be more positive in this paragraph and instead of just ' <i>considering</i> ' provisions to reduce GHG emissions this statement should read " <i>In the review of the Marlborough Regional Land Transport Plan, Council will include provisions to reduce emissions of greenhouse gases</i> ".  |       |          |                   |           |                 |
|                    | This is crucial since transport accounts for 20% of New Zealand's GHG emissions and there is huge potential for these emissions to be reduced. All indications are that uptake of electric cars will explode over the next decade and MDC should be proactive in this area by installing rapid charging facilities in the main Marlborough towns, promoting the electrification of local public transport and introducing electric cars to its fleet as soon as possible.  |       |          |                   |           |                 |
| <b>89</b>          | Peter Deacon   | 9     | Volume 1 | 19 Climate Change | 19.M.5    | Support         |
| Decision Requested | Council should ensure this provision remains in the Marlborough Environment Plan.  |       |          |                   |           |                 |

| Sub No             | Submitter   | Point | Volume   | Chapter           | Provision      | Type            |
|--------------------|---|-------|----------|-------------------|----------------|-----------------|
| 89                 | Peter Deacon  | 10    | Volume 1 | 19 Climate Change | 19.M.7         | Support         |
| Decision Requested | <p>Council should ensure this provision remains in the Marlborough Environment Plan.</p> <p>In addition Council should add another Method of Implementation as follows:-</p> <p><u>19.M.8 Regional Climate Change Advisory Group</u></p> <p>"Council will establish a Climate Change Advisory Group comprising representatives from science, industry, business and the local community to work with Council in a collaborative way to identify regional climate change threats in Marlborough and devise appropriate adaptation and mitigation responses."</p> |       |          |                   |                |                 |
| 89                 | Peter Deacon  | 11    | Volume 1 | 19 Climate Change | Issue 19B      | Support in Part |
| Decision Requested | <p><u>Page 19-5 Issue 19B – Climate change could affect natural hazards and create a coastal inundation hazard associated with sea level rise</u></p> <p>Paragraph 3</p> <p>The word '<i>potentially</i>' should be removed from the sentence '<i>This rise potentially increases the risk of inundation at the coast.</i>' Inundation will happen due to sea level rise, particularly during storm events, it is only a matter of how soon this happens as the seas are not going to stop rising for centuries possible millenia.</p>                          |       |          |                   |                |                 |
| 89                 | Peter Deacon  | 12    | Volume 1 | 19 Climate Change | Objective 19.2 | Support in Part |
| Decision Requested | <p><u>Page 19-5 Objective 19.2 - Avoid and mitigate the adverse effects of natural hazards influenced by climate change</u></p> <p>Paragraphs 1 and 2</p> <p>Council should add another Objective here to investigate where and how the effects of sea level rise will be felt in Marlborough, and into what measures are needed to future-proof communities and create resilience to sea level rise.</p>   |       |          |                   |                |                 |

| Sub No             | Submitter   | Point | Volume   | Chapter                                 | Provision      | Type            |

| Decision Requested | It should consider freedom in parking (if safely) everywhere, means not limitation due to "private roads in marinas". I understand that all coastal roads should be freely available as well free parking. this should not be limited to private property. If this happens, interpret it to limit the access to state public spaces. Clarify that it should not limit either the number of car units or the activity that is the public doing (recreational or commercial). |       |          |   |               |                 |

|--------------------|---|-------|----------|---|---------------|---------|
| Decision Requested | <p>I want the Plan to Recognise that aquaculture, farming, forestry and vineyards and tourism are regionally significant sectors in Marlborough's economy that sustains our communities (Add a new Issue to Vol 1, page 2-1). Acknowledge that aquaculture, farming, forestry and vineyards employ people and spread wealth. Council needs to find ways to enable these sectors to grow, while recognising and protecting the special qualities of Marlborough (Amend Issue 4B and Objective 4.2 to recognise that regionally significant sectors are at risk if unable to operate efficiently and effectively (Vol. 1, page 4-5).</p> <p>Provide an opportunity for local businesses to have certainty so as to invest with confidence in their and my future (Add to Policy 4.2.1 a list of areas of significant aquaculture and wine development). Ensure that developments like marine farms, once consented, are allowed to stay, as long as their owner does a good job and obeys the rules (Add a new rule to this effect in Vol 2).</p> <p>Create ways that encourage people and businesses to strive to be more sustainable (Add a wider range of non-regulatory methods to the plan aimed at building awareness). Grow our region while also caring for the environment, our landscapes and protecting natural character (Amend Issue 4C, Objective 4.3, Issue 6A, Objective 6.1 and flow on policies by recognising and providing for the existing and changing land and seascapes of use of agriculture, aquaculture, cattle farming, dairy, vineyards and tourism.</p> |       |          |   |               |         |

|--------------------|--|-------|----------|---------------------------|-----------|-----------------|
| Decision Requested | <p>Include new Appendix XX Biodiversity Offsetting</p> <p><u>The following sets out a framework for the use of biodiversity offsets. It should be read in conjunction with the NZ Government Guidance on Good Practice Biodiversity Offsetting in New Zealand. August 2014 (or any successor Central Government guidance and standards):</u></p> <ol style="list-style-type: none"> <li><u>1. Restoration, enhancement and protection actions will only be considered a biodiversity offset where they are used to offset the anticipated residual effects of activities after appropriate avoidance, minimisation, remediation and mitigation actions have occurred as per new policy XX, i.e. not in situations where they are used to mitigate the adverse effects of activities.</u></li> <li><u>2. A proposed biodiversity offset should contain an explicit loss and gain calculation and should demonstrate the manner in which no net loss or preferably a net gain in biodiversity can be achieved on the ground.</u></li> <li><u>3. A biodiversity offset should recognise the limits to offsets due to irreplaceable and vulnerable biodiversity and its design and implementation should include provisions for addressing sources of uncertainty and risk of failure the delivery of no net loss.</u></li> <li><u>4. Restoration, enhancement and protection actions undertaken as a biodiversity offset are demonstrably additional to what otherwise would occur, including that they are additional to any remediation or mitigation undertaken in relation to the adverse effects of the activity.</u></li> <li><u>5. Offset actions should be undertaken close to the location of development, where this will result in the best ecological outcome.</u></li> <li><u>6. The values to be lost through the activity to which the offset applies are counterbalanced by the proposed offsetting activity which is at least commensurate with the adverse effects on indigenous biodiversity, so that the overall result is no net loss, and preferably a net gain in ecological values.</u></li> <li><u>7. The offset is applied so that the ecological values being achieved through the offset are the same or similar to those being lost.</u></li> <li><u>8. As far as practicable, the positive ecological outcomes of the offset last at least as long as the impact of the activity, and preferably in perpetuity. Adaptive management responses should be incorporated into the design of the offset, as required to ensure that the positive ecological outcomes are maintained over time.</u></li> <li><u>9. The biodiversity offset should be designed and implemented in a landscape context – i.e. with an understanding of both the donor and recipient sites role, or potential role in the ecological context of the area.</u></li> <li><u>10. The consent application identifies the intention to utilise an offset, and includes a biodiversity offset management plan that:</u> <ol style="list-style-type: none"> <li><u>i. sets out baseline information on indigenous biodiversity that is potentially impacted by the proposal at both the donor and recipient sites.</u></li> <li><u>ii. demonstrates how the requirements set out in this appendix will be addressed.</u></li> <li><u>iii. identifies the monitoring approach that will be used to demonstrate how the matters set out in this appendix have been addressed, over an appropriate timeframe.</u></li> </ol> </li> </ol> |       |          |                           |           |                 |
| <b>479</b>         | Department of Conservation   | 97    | Volume 1 | 8 Indigenous Biodiversity | 8.M.4     | Support in Part |
| Decision Requested | <p>Amend method 8.M.4 as follows:</p> <p><i>Identification of the values of various waterbodies within Marlborough is included in Appendix 5. The natural and human use values include ecological, habitat, recreational and natural character values.</i></p> <p><i>The Council has also identified in the resource management plan significant wetlands and ecologically significant marine sites. <u>With regard to ecologically significant marine sites, a further survey is required in some cases to confirm the boundary or value of a site. Once this occurs the Council will update the planning maps to reflect the outcomes of ongoing surveys.</u></i></p>  |       |          |                           |           |                 |

|--------------------|--|-------|----------|-----------------------|----------------|--------|
| Decision Requested | That the following new definition is included in the MEP:<br><i>Community corrections activity means the use of land and buildings for correctional administrative and non-custodial services. Services may include probation, rehabilitation and reintegration services, assessments, reporting, workshops and programmes and offices may be used for the administration of and a meeting point for community work groups.</i>  |       |          |                       |                |        |
| <b>681</b>         | Department of Corrections  | 2     | Volume 2 | 25 Definitions        | 25.            | Oppose |
| Decision Requested | That the following amendment (bold) is made to the definition of <i>community activity</i> :<br><i>Community activity means the use of land and buildings for the purpose of supporting the health, welfare, education, culture and spiritual well-being of the community including not for profit childcare facilities, <b>community corrections activities</b>, active and passive recreation.</i>   |       |          |                       |                |        |
| <b>681</b>         | Department of Corrections  | 3     | Volume 1 | 12 Urban Environments | Policy 12.4.1  | Oppose |
| Decision Requested | That the following amendments (bold) are made to Policy 12.4.1:<br><i>Policy 12.4.1 – Provide for a wide range of commercial, <b>community</b> and industrial activities in a variety of zones to encourage vibrant and viable business centres.</i><br><i>The use of zones enables activities to occur in specified and established areas of Marlborough's urban environments. Areas zoned as Business and Industrial are based in part on the nature of commercial, <b>community</b> and industrial activities that have existed for some time with largely known effects. Some areas have been zoned specifically for large retail format in recognition of the need to provide for retailing that requires large areas of associated car-parking or outdoor space. The variety of business environments within Marlborough's towns is reflected in the differences in zoning approach.</i> |       |          |                       |                |        |

| Decision Requested | EBCS suggests that this policy should be accepted into the Plan  |              |               |  |                  |                 |
| <b>100</b>         | East Bay Conservation Society  | 7            | Volume 1      | 15 Resource Quality (Water, Air, Soil) | Issue 15A        | Support in Part |
| Decision Requested | Recognise that the sea water and Benthic Environment of the Coastal Environment are as important to Marlborough as the freshwater and soil. and draft polices that deliver the same protection.  |              |               |  |                  |                 |
| <b>100</b>         | East Bay Conservation Society  | 8            | Volume 1      | 5 Allocation of Public Resources       | Issue 5J         | Support in Part |

| Sub No             | Submitter   | Point | Volume   | Chapter        | Provision | Type    |
|--------------------|---|-------|----------|----------------|-----------|---------|
| Decision Requested | <p>EBCS strongly supports the introduction of coastal occupation charges by the Marlborough District Council.</p> <p>EBCS also supports the starting point for determining fees from “the actual expenditure considered necessary to promote sustainable management of the coastal marine area” (Policy 5.10.7).</p> <p>The EBCS recommends, however, that the MDC considers further the way in which coastal occupancy charges will be determined. There is a need for an effective, transparent, workable, understandable charging regime linked to a long term plan for sustainable management of the coastal marine area.</p> <p>We recommend the following changes to 5J.</p> <ol style="list-style-type: none"> <li>1. That MDC develops a long term, co-ordinated management plan as the basis for setting the priorities and determining the expenditure necessary to achieve sustainable management of the coastal marine area. This would be a dynamic plan, reviewed and implemented progressively and with possibilities for involvement by interested community organisations and businesses.</li> <li>2. That coastal occupancy charges should be set for a minimum of 4 years ahead, so that those paying can forward manage their marine projects and those implementing the plan have continuity.</li> <li>3. That the directive in s64A RMA - to consider the public benefits lost or gained, and the private benefit gained - should be a criterion for determining the level of coastal occupancy charges in <i>Policy 5.10.7</i>. We suggest this wording is substituted for the wording currently in <i>Policy 5.10.7(c)</i> so that the basis for assessment is clearly understandable.</li> <li>4. That the proportion of public/private benefit is reflected in the coastal occupancy charges for shared use infrastructures, such as substantial public use of jetties, by way of discount or other MDC contribution to private maintenance costs.</li> <li>5. That the public/private assessment methodology should reflect the difference between use of public space for commercial ventures and for residential necessity. We do not support Policy 5.10.4 because it excludes the associated activity from consideration in assessing fees.</li> <li>6. That the community has an opportunity for consultation on the methodology for setting the fees and the actual proposed fees before these are finalised, possibly at the time of release of the Aquaculture Policies and Marine Farms Management Provisions.</li> <li>7. We commend to MDC the simple methodology we proposed previously - <i>“the actual charge should be based on a fixed administrative cost per structure, plus a per square metre charge, divided by a factor reflecting the utility provided to the general public”</i>. We consider this captures the practical issues relevant to any methodology, and has the benefit of being explicit and understandable.</li> </ol> |       |          |                |           |         |
| <b>100</b>         | East Bay Conservation Society   | 9     | Volume 1 | 1 Introduction |           | Support |
| Decision Requested | <p>EBCS support the MEP where it seeks to promote the <b>sustainable</b> management of natural and physical resources</p> <p>Sustainability is defined as (By Webster)</p> <p>ENVIRONMENT, NATURAL RESOURCES <b>the idea that goods and services should be produced in ways that do not use resources that cannot be replaced and that do not damage the environment:</b></p> <p><i>The successful coffee chain promotes sustainability within the coffee-growing regions.</i></p>  |       |          |                |           |         |

|--------------------|--|-------|----------|--------------|--------------------|--------|
| Decision Requested | <p>Amend the section on page 2-13 under the heading "Enable" to read:</p> <p>Enable</p> <p>The RMA <b><u>was intended to install a regulatory regime based on bio-physical bottom lines set to provide for development within the capacity of the environment and the ecosystems that supported. Beyond those bottom lines use and development is enabled for people and communities to provide for their wellbeing. This is reflected in the wording of s5(2) RMA. The RMA has been described as an enabling piece of legislation. The reason for this can be found in the purpose of the RMA at Section 5(2), where it is stated: "</u>sustainable management" means managing the use, development, and protection of natural and physical resources in a way, or at a rate, which enables people and communities to provide for their social, economic, and cultural wellbeing and for their health and safety while ...':</b></p> <p><b><u>(a) Sustaining the potential of natural and physical resources (excluding minerals) to meet the reasonably foreseeable needs of future generations; and</u></b></p> <p><b><u>(b) Safeguarding the life-supporting capacity of air, water, soil, and ecosystems; and</u></b></p> <p><b><u>(c) Avoiding, remedying, or mitigating any adverse effects of activities on the environment.</u></b></p> <p>Additionally, in drafting rules, different approaches are needed for different activities. In general, Section 9 of the RMA states that no person may use land (including the surface of water in any river or lake) in a way that contravenes a rule in a district plan or regional plan. In other words, if there is no rule in a plan, then there is no need for restriction on the activity under Section 9 or any need to obtain resource consent.</p> <p>Sections 12, 13, 14 and 15 adopt the opposite approach. These sections place restrictions on the use of the coastal marine area, on certain uses of the beds of lakes and rivers, on the taking, use, damming or diversion of water and on discharging contaminants into the environment. Essentially, the restrictions mean that there must be a national environmental standard, resource consent or rule in a plan that allows activities of the nature described in Sections 12-15 to occur. This includes permitted activity rules for an activity or effect of a minor nature, which are considered to be enabling rules. Therefore, where the word 'enable' appears within a provision in the MEP, there will be a related rules method.</p> |       |          |              |                    |        |
| 698                | Environmental Defence Society Incorporated   | 6     | Volume 1 | 2 Background | How to use the MEP | Oppose |
| Decision Requested | <p>Amend page 2-13 paragraph entitled "Avoid" to read:</p> <p>Avoid</p> <p><b><u>The word avoid is to be given its plain, ordinary mean: to "not allow" or "prevent the occurrence of". Use of the word 'avoid' may or may not have the same meaning as prevent.</u></b> In some cases the method used to implement an <b><u>avoidance</u></b> policy is a rule that will 'prohibit' something from occurring. In this case the word 'prohibit' is used within the rules method. There are other policies that use 'avoid' though this is not implemented through a prohibited activity rule. <b><u>This will be the case when the avoidance directive is focused on a specific effect or effects as opposed to a specific activity.</u></b> In these policies 'avoiding' an effect can be achieved through undertaking an activity in such a way that the effect does not occur or is significantly reduced. Where this is the case, policies clearly identify that remediation and/or mitigation is an option. It will be important that the explanations and methods accompanying the policies are read to help inform decision makers of the intent of the word 'avoid' where it is used.</p>  |       |          |              |                    |        |

| Sub No             | Submitter   | Point | Volume   | Chapter                                 | Provision          | Type            |
|--------------------|---|-------|----------|---|--------------------|-----------------|
| 698                | Environmental Defence Society Incorporated  | 7     | Volume 1 | 2 Background                            | How to use the MEP | Oppose          |
| Decision Requested | <p>Amend page 2-14 - paragraph entitled "Protect" to read:</p> <p><b><u>'Protect' means to keep safe from harm, injury, or damage. Protection can be achieved in a variety of ways. How protection is achieved in each instance will depend on what is sought to be protected and what it is to be protected from. Similar to other words in this section, 'protect' can be interpreted in a number of ways. It can be interpreted in a narrow way that may effectively In some situations protection might limit or prevent future use and development of some of Marlborough's natural and physical resources. However, 'protect' essentially means to keep safe from harm and this can be achieved in a variety of ways. For example, the protection of areas of indigenous biodiversity In others it might be achieved through allowing use and development subject to specific controls such as height, location and color, or within specific parameters such as the amount of vegetation that can be removed. Sometimes a combination of approaches will be used. could be achieved through rules in a plan, legal protection of land, fencing, active pest control and/or improved land management practices, or a combination of these approaches.</u></b></p> <p><b><u>It is therefore important that decision makers or those using the MEP provisions read the explanation of the relevant provision, as this will inform how 'protection' is to occur. Unless there is a clear direction within a protection policy or its explanation or associated method that an activity/effect is to be prevented from occurring, a policy is open to be interpreted more broadly.</u></b></p> <p><b><u>In summary, the 'protection' anticipated by Sections 6(a) and (b) is not an absolute protection: rather, it is protection from inappropriate subdivision, use and development. Identifying what is inappropriate is informed through other policies of the MEP.</u></b></p> |       |          |   |                    |                 |
| 698                | Environmental Defence Society Incorporated  | 8     | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4C           | Support in Part |
| Decision Requested | <p>Chapter 4 should identify that use and development should only occur within the capacity of the environment, within established non-negotiable environmental bottom lines set (in the regional context) to provide for development within the capacity of the environment and the ecosystems it supports. Beyond those bottom lines resource users would be left to make their own decisions with limited restrictions.</p>  |       |          |   |                    |                 |

|--------------------|--|-------|----------|----------------------------------|---------------|-----------------|
| Decision Requested | Amend Policy 5.2.6 to read:<br><br>Policy 5.2.6 – For rivers, establish whether the flow has reached the management flows set in the Marlborough Environment Plan <b>on the basis of 24 hour averages (midnight to midnight) an instantaneous basis by way of a hydrological model.</b>  |       |          |                                  |               |                 |
| 698                | Environmental Defence Society Incorporated   | 17    | Volume 1 | 5 Allocation of Public Resources | Policy 5.2.3  | Oppose          |
| Decision Requested | Delete Policy 5.2.8 in its entirety.   |       |          |                                  |               |                 |
| 698                | Environmental Defence Society Incorporated   | 18    | Volume 1 | 5 Allocation of Public Resources | Policy 5.2.9  | Support in Part |
| Decision Requested | Amend Policy 5.2.9 to read:<br><br><b>Policy 5.2.9 – When considering a water take application Have regard to decision-makers must consider the adverse effects of the proposed instantaneous rate of take from any river, except an ephemeral flowing river, if that rate of take exceeds or is likely to exceed 5% of river flow at any time .</b><br><br>The minimum flows set for rivers manage the cumulative effects of taking water on natural and human use values. However, it remains possible for a take at a discrete location to have a significant adverse effect on flow immediately downstream of the point of abstraction. The risk is probably greatest in the upper part of a catchment due to lower flow that tends to occur in those reaches. This policy allows decision makers to have regard to the adverse effects of an individual take in certain circumstances irrespective of the minimum flows established in the MEP. The proposed rate of abstraction must be calculated to exceed 5% of the river flow at the point of abstraction. Flows in excess of this threshold are considered to have the potential to adversely affect natural and human use values.<br><br><b>The policy only applies if the river is perennially or intermittently flowing.</b> |       |          |                                  |               |                 |
| 698                | Environmental Defence Society Incorporated   | 19    | Volume 1 | 5 Allocation of Public Resources | Policy 5.2.13 | Support in Part |
| Decision Requested | Separate Policy 5.2.13 into two policies. The first requiring water allocation limits to be set for FMUs and explaining how. The second stating that over-allocation must be avoided. Add additional text to provide clarity as to the relationship between FMUs, water resource units and the values identified in the PMEPP.   |       |          |                                  |               |                 |
| 698                | Environmental Defence Society Incorporated   | 20    | Volume 1 | 5 Allocation of Public Resources | Policy 5.2.15 | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter                          | Provision     | Type            |
|--------------------|--|-------|----------|----------------------------------|---------------|-----------------|
| Decision Requested | Amend Policy 5.2.15 to provide direction (for example through criteria) on when protection of flow variability is required in order to clarify and to ensure consistency in assessment and application by decision-makers.   |       |          |                                  |               |                 |

|--------------------|---|-------|----------|----------------------------------|---------------|-----------------|
| Decision Requested | <p>Amend Policy 5.8.1 to read:</p> <p>Policy 5.8.1 – Encourage the storage of water as an effective response to seasonal water availability issues <b><u>where storage is consistent with safeguarding ecosystem health.</u></b></p> <p>Given Marlborough’s dry climate, especially over the summer months, storage of water has been utilised as a common strategy to offset temporary shortages of water for irrigation purposes. Storage has involved the interception of runoff by damming ephemeral water bodies, the damming of intermittently or permanently flowing water bodies and the placement of abstracted water in purpose-built reservoirs. There may also be the potential to augment river flow from the stored water. All of these approaches provide a back-up supply of water that increases water user resilience. For this reason the storage of water is strongly supported.</p> <p><b><u>Storage can have significant adverse effects on ecosystem health either through changes in flow or as a result of the increased use that storage provides for and the effects of that use on water quality. Water storage should not be encouraged unless it is consistent with safeguarding ecosystem health and achieving water quality targets.</u></b></p> <p>In some cases, activity status will assist to encourage the storage of water by providing for activities involved in storing water as a permitted activity or controlled activity.</p> <p>Damming of intermittently or permanently flowing waterbodies can create the potential for adverse effects. These effects will be considered through Policies 5.2.21 and 5.2.22.</p> |       |          |                                  |               |                 |
| <b>698</b>         | Environmental Defence Society Incorporated  | 36    | Volume 1 | 5 Allocation of Public Resources | Objective 5.9 | Support in Part |

|--------------------|---|-------|----------|---------------------|---------------|-----------------|
| Decision Requested | <p>Amend the Chapter 6 introduction to read:</p> <p>Natural character includes the natural elements, patterns, processes and experiential qualities of an environment. <del>The natural character of the coastal environment, and freshwater bodies and their margins, is comprised of a number of key components which include :</del></p> <ul style="list-style-type: none"> <li>● <b><u>coastal or freshwater landforms and landscapes (including seascape);</u></b></li> <li>● <b><u>coastal or freshwater physical processes (including the movement of water and sediments);</u></b></li> <li>● <b><u>biodiversity (including individual indigenous species, their habitats and communities they form);</u></b></li> <li>● <b><u>biological processes and patterns;</u></b></li> <li>● <b><u>water flows and levels, and water quality; and</u></b></li> <li>● <b><u>the ways in which people experience the natural elements, patterns and processes.</u></b></li> </ul> <p><b>Collectively, t</b> These combine to create the overall natural character of the environment. Provisions included elsewhere in the Marlborough Environment Plan (MEP) target the individual components of natural character and provide direction on how adverse effects on particular values can be managed. These include:</p> <ul style="list-style-type: none"> <li>• Chapter 5 - Allocation of Public Resources</li> <li>• Chapter 7 - Landscape</li> <li>• Chapter 8 - Indigenous Biodiversity</li> <li>• Chapter 9 - Public Access and Open Space</li> <li>• Chapter 13 - Use of the Coastal Environment</li> <li>• Chapter 15 - Resource Quality (Water, Air, Soil)</li> </ul> <p><b>However, there is a need for this m</b> Management <b>needs</b> to be integrated in order to preserve natural character in coastal and freshwater environments. This ensures that the management of the individual components of natural character is co-ordinated to achieve a common end in the context of Section 6(a) of the Resource Management Act 1991 (RMA), of the New Zealand Coastal Policy Statement 2010 (NZCPS) and of the National Policy Statement for Freshwater Management 2014 (NPSFM).</p> |       |          |                     |               |                 |

|--------------------|--|-------|----------|-------------|--------------|-----------------|
| Decision Requested | <p>Reword the Chapter 7 introduction to read:</p> <p><b>Introduction</b></p> <p>Our landscapes provide us with a Marlborough identity and are an integral part of the Marlborough environment. Landscapes are distinct spatial areas influenced by location-specific processes within the environment. These processes can be natural or human-induced (e.g. land use change). Natural features within the landscape can also help to define a landscape. The resulting landscape characteristics are expressed visually, but can be valued for their ecological significance or for intrinsic reasons (e.g. by providing a sense of place).</p> <p>The Resource Management Act 1991 (RMA) identifies the protection of outstanding natural features and landscapes from inappropriate subdivision, use and development as a matter of national importance (Section 6(b)). Those landscapes that do not meet the threshold of being considered 'outstanding' may still make a contribution to the visual appreciation or amenity values of Marlborough. The RMA seeks to maintain and enhance these landscapes with visual amenity value (Section 7(c)). For the purposes of this chapter, landscapes that are identified for Section 6(b) or 7(c) reasons are referred to as "significant landscapes." in provisions that apply to both outstanding natural landscapes and to amenity landscapes[N1] .</p> <p>There are five broad landscape areas in Marlborough: the Richmond Range and associated mountain ranges; the Wairau and Awatere River Valleys; the mountainous interior; the Marlborough Sounds; and the remainder of the coastal environment on the East Coast. The MEP identifies these landscape areas and then identifies outstanding natural landscapes and amenity landscapes within each.</p> |       |          |             |              |                 |

|--------------------|--|-------|----------|---------------------------|---------------|-----------------|
| Decision Requested | <p>Amend the Chapte 8 introduction to read:</p> <p>New Zealand's biodiversity gives our country a unique character and is internationally important. A large proportion of our species are endemic to New Zealand and if they become extinct they are lost to the world. About 90 percent of New Zealand insects, 80 percent of trees, ferns and flowering plants, 25 percent of bird species, all 60 reptile species, four frog species and two species of bat are endemic.</p> <p>New Zealand's biodiversity has helped shape our national identity, with our distinctive flora and fauna contributing to our sense of belonging. The koru and kiwi are internationally recognised. Biodiversity also provides social and economic benefits through recreational opportunities, tourism, research, education, provision of ecosystem services and natural resources for primary industry and customary and medical uses.</p> <p>The Resource Management Act 1991 (RMA) requires the Council to recognise and provide for as a matter of national importance the protection of areas of significant indigenous vegetation and significant habitats of indigenous fauna (Section 6(c)). The protection of these values, whether on land, in freshwater or coastal environments, also helps to achieve other matters of national importance, including landscape and natural character values and historic heritage. However, biodiversity values are also important components of amenity, kaitiakitanga, quality of the environment and ecosystem values, matters to which regard shall be had in terms of Section 7 of the RMA. For this reason there are important links between the provisions of this chapter and others in the Marlborough Environment Plan (MEP).</p> <p>In addition, there are specific roles and functions in relation to protecting significant natural areas and habitats and maintaining indigenous biological diversity. These functions enable the Council to:</p> <ul style="list-style-type: none"> <li>- establish, implement and review objectives, policies and methods for maintaining indigenous biological diversity [Section 30(1)(ga)]; and</li> <li>- control any actual or potential effects of the use, development or protection of land for the purpose of maintaining indigenous biological diversity [Section 31(1)(b)(iii)].</li> </ul> <p><b><u>The New Zealand Coastal Policy Statement 2010 gives specific direction on how protection and management of indigenous biodiversity is to be achieved in the coastal and marine environments .</u></b></p> <p>Marlborough's central location within New Zealand and its varied landforms, climate and rich human history combine to form an interesting and diverse area. The District has a range of important and unusual natural features, native plants and animals, a number of which are at their southern or northern limits of distribution. Part of south Marlborough has been identified as one of five areas of high biodiversity concentration within New Zealand.</p> <p>....</p> |       |          |                           |               |                 |

| Sub No             | Submitter  | Point | Volume   | Chapter   | Provision | Type            |
|--------------------|--|-------|----------|---|-----------|-----------------|
| Decision Requested | <p>Amend Policy 15.1.34 to read:</p> <p>Policy 15.1.34 – Approve land use consent applications for new dairy farms where the proposed farming would have no more than minor adverse effects on ground or surface water quality or on significant wetlands . A land use consent application must identify <b><u>(as part of and in combination with the requirements in Schedule 1 RMA)</u></b> the risks of new dairy farming and provide measures to address those risks, including as a minimum:</p> <p>(a) measures (including fences, bridges or culverts) to prevent stock entering onto or passing across the bed of any river or lake, significant wetland, or any drain or the Drainage Channel Network;</p> <p>(b) provision of an appropriate, non-grazed buffer along the margins of any river, lake, significant wetland, drain or the Drainage Channel Network, to intercept the runoff of contaminants from grazed pasture, with reference to the values of fresh waterbodies as identified in Appendix 5;</p> <p>(c) provision for storage of dairy effluent, with all storage ponds sufficiently sized to enable deferral of application to land until soil conditions are such that surface runoff and/or drainage do not occur;</p> <p>(d) demonstration of appropriate separation distances between effluent storage ponds and any surface waterbodies to ensure contamination of water does not occur (including during flood events); <del>and</del></p> <p>(e) a nutrient management plan that includes nutrient inputs from dairy effluent, animal discharges, fertiliser and any other nutrient input <b><u>and the discharge outputs;</u></b></p> <p><b><u>(f) assessment of the effects of any discharges, in combination with all other discharges to the FMU on the receiving environment and identifying how and why the adverse effects are no more than minor; and</u></b></p> <p><b><u>(e)(g) measures in place to ensure that leaching maxims are met or for existing farms measures in place to reduce leaching down to the maxim by a specified date.</u></b></p> |       |          |   |           |                 |
| 698                | Environmental Defence Society Incorporated   | 109   | Volume 3 | Appendix 3 Biodiversity Criteria for Significance |           | Support in Part |
| Decision Requested | <p>Amend Appendix 3 to read:</p> <p>Ecological Significance Criteria for terrestrial, wetland, <b><u>freshwater, marine</u></b> and coastal environments.</p> <p>The following provides explanations or guidelines for the application of ecological significance criteria in the assessment of sites.</p> <p>Rankings within each criterion are: H = High; M = Medium; L = Low. They collectively contribute to an overall ranking, indicating the degree of significance. For a site to be considered significant, one of the first four criteria (representativeness, rarity, diversity and pattern or distinctiveness) must rank M or H.</p> <p><b><u>The scale at which significance is to be determined depends on the type of environment:</u></b></p>  |       |          |   |           |                 |

**a. Terrestrial environment: the scale of assessment is at the ecological district level. [MDC: Insert an explanation of ecological district].**

**b. Marine environment: the scale of assessment is at the coastal biographic region level. This a region that is defined and classified according to visible ecological patterns and the physical characteristics or a geographic or hydrographic area. New Zealand's coastal biographic regions have been identified and mapped by the Ministry for the Environment. Marlborough falls within the South Cook Strait Region.**

**c. Freshwater environment: [ MDC: Insert assessment classification scale]**

Representativeness

1. Indigenous vegetation or habitat of indigenous fauna that is representative, typical or characteristic of the natural diversity of the relevant ecological district, **coastal biographic region or freshwater environment**. This can include degraded examples where they are some of the best remaining examples of their type, or represent all that remains of indigenous biodiversity in some areas.

2. Indigenous vegetation or habitat of indigenous fauna that is a relatively large example of its type within the relevant ecological district, **coastal biographic region or freshwater environment**.

3. Additionally for the coastal marine area the site is significant if it contains biological features (habitat, species, community) that represent a good example within the biogeographic area.

H: The site contains one of the best examples of the characteristic ecosystem types in the region or ecological district or **coastal biogeographic area region or freshwater environment for sites within the coastal marine area**.

M: The site contains one of the better examples, but not the best, of the characteristic ecosystem types in the region or ecological district or **coastal biogeographic area region or freshwater environment for sites within the coastal marine area**.

L: The site contains an example, but not one of the better or best, of the characteristic ecosystem types in the region or ecological district or **coastal biogeographic area region or freshwater environment for sites within the coastal marine area**.

Rarity

4. Indigenous vegetation or habitat of indigenous fauna that has been reduced to less than 20% of its former extent in Marlborough, or relevant ~~land-~~**environment** , ecological district or **coastal biogeographic region**, or freshwater environment.

5. Indigenous vegetation or habitat of indigenous fauna that supports an indigenous species that is threatened, at risk, or uncommon, nationally or within the relevant ecological district or **coastal** biogeographic **area region, or freshwater environment** ~~for sites within the coastal marine area~~.

6. The site contains indigenous vegetation or an indigenous species that is endemic to Marlborough or that are at distributional limits within Marlborough.

H: The site contains nationally threatened or rare flora, fauna or communities; or the site contains several examples of regionally or locally threatened or rare flora, fauna or communities.

M: The site contains one or a few regionally or locally (but not nationally) threatened or rare flora, fauna or communities.

L: The site is not known to contain flora, fauna or communities that are threatened or rare in the ecological district or **coastal** biogeographic **area region** **or freshwater environment**, regionally or nationally.

#### Diversity and pattern

7. Indigenous vegetation or habitat of indigenous fauna that contains a high diversity of indigenous ecosystem or habitat types, indigenous taxa, or has changes in species composition reflecting the existence of diverse natural features or ecological gradients.

H: The site contains an unusually high diversity of species and ecosystem types.

M: The site contains a moderate diversity of species and ecosystem types.

L: The site contains a relatively low diversity of species and ecosystem types.

#### Distinctiveness

8. Indigenous vegetation or an association of indigenous species that is distinctive, of restricted occurrence, occurs within an originally rare ecosystem, or has developed as a result of an unusual environmental factor or combinations of factors.

H: The site contains any ecological feature that is unique nationally, in the region or in the ecological district **or coastal biogeographic region or freshwater environment**; or it contains several such features that are outstanding regionally or in the ecological district or **coastal** biogeographic **area region or freshwater environment**.

M: The site contains ecological features that are notable or unusual but not outstanding or unique nationally, in the region or in the ecological district or **coastal** biogeographic **region or freshwater environment area**.

L: The site contains no ecological features that are outstanding or unique nationally, in the region or in the ecological district or **coastal** biogeographic **area region or freshwater environment**; i.e. the ecological features are typical rather than distinctive or special.

Size and shape

9. The site is significant if it is moderate to large in size and is physically compact or cohesive.

H: The site is large in size for the region or ecological district **or coastal biogeographic region or freshwater environment and is compact in shape**.

M: The site is moderate in size for the region or ecological district **or coastal biogeographic region or freshwater environment and is compact in shape; or the site is relatively large but not very compact or cohesive**.

L: The site is small in size for the region or ecological district, **or coastal biogeographic region or freshwater environment or the site is moderate in size but not at all compact or cohesive**.

Connectivity/ecological context

10. ~~1~~Vegetation or habitat of indigenous fauna that provides or contributes to an important ecological linkage or network, or provides an important buffering function.

11. A wetland which plays an important hydrological, biological or ecological role in the natural functioning of a river or coastal system.

12. Indigenous vegetation or habitat of indigenous fauna that provides important habitat (including refuges from predation, or key habitat for feeding, breeding, or resting) for indigenous species, either seasonally or permanently.

H: The site is close or well connected to a large natural area or several other natural areas.

M: The site is in the vicinity of other natural areas but only partially connected to them or at an appreciable distance.

L: The site is very isolated from other natural areas.

#### Sustainability

13. The site is significant if it is ecologically resilient, i.e. its natural ecological integrity and processes (functioning) are largely self-sustaining.

H: The site can maintain its ecological integrity and processes with minimal human assistance.

M: The site requires some but not much human assistance to maintain its ecological integrity and processes.

L: The site requires much human assistance to maintain its ecological integrity and processes.

#### Adjacent catchment modification in respect of significant sites within the coastal marine area

14. Catchments that drain large tracts of land can lead to high sediment loading into adjacent marine areas. A site in the coastal marine area is significant if the adjacent catchment is >400 ha and clad in relatively mature native vegetative cover resulting in a long term stable environment with markedly reduced sediment and contaminant run-off compared to developed or modified catchments.

H: The site is dominated by an adjacent land catchment area with stable and relatively mature native vegetation (> 400ha) that is legally protected.

M: The site is dominated by an adjacent land catchment area with stable and relatively mature native vegetation (>400ha) with partial or no legal protection.

L: The site is surrounded by an adjacent land catchment area (>400ha) that is farmed, highly modified or has limited relatively mature vegetative cover.

| <b>698</b>         | Environmental Defence Society Incorporated  | 110 | Volume 3 | Appendix 4 Determining Significant Adverse Effects |                | Support in Part |
| Decision Requested | <p>Amend appendix 4 to read:</p> <p>Criteria for Determining Significant Adverse Effects<br/> The criteria below assists in determining whether a subdivision, use or development proposal will have significant adverse effects. The criteria shall be applied by the decision maker on resource consents or plan changes.</p> <ol style="list-style-type: none"> <li>1. Character and degree of modification, damage, loss or destruction;</li> <li>2. Duration and frequency of effect (for example long-term or recurring effects);</li> <li>3. Magnitude or scale of effect (for example number of sites affected, spatial distribution, landscape context);</li> <li>4. Irreversibility of effect (for example loss of unique or rare features, limited opportunity for remediation, the costs and technical feasibility of remediation or mitigation);</li> <li>5. Resilience of heritage value or place to change (for example ability of feature to assimilate change, vulnerability of feature to external effects).</li> </ol> <p><b><u>The criteria should be used to assess the effects of the proposal in 2 contexts:</u></b></p> <p><b><u>A. The specific effects of the proposal itself.</u></b></p> <p><b><u>B. The cumulative effects of the proposal in combination with all other relevant environmental stressors.</u></b></p> |     |          |  |                |                 |

| Sub No             | Submitter   | Point | Volume   | Chapter                  | Provision | Type   |
|--------------------|---|-------|----------|--------------------------|-----------|--------|
| Decision Requested | This rule must be clarified and relaxed to allow common sense agrichemical application.   |       |          |                          |           |        |
| <b>440</b>         | Ian Esson   | 7     | Volume 2 | 2 General Rules          | 2.33.2.   | Oppose |
| Decision Requested | This rule will apply to all transportation in the region. If not, it should be included in the definition of a permitted activity related to Commercial Forestry Harvesting.  |       |          |                          |           |        |
| <b>440</b>         | Ian Esson   | 8     | Volume 2 | 3 Rural Environment Zone | 3.2.3.3.  | Oppose |
| Decision Requested | Routine forestry activities must also be provided with an exclusion, or the exclusion clause for most of the other activities should be removed.  |       |          |                          |           |        |
| <b>440</b>         | Ian Esson   | 9     | Volume 2 | 3 Rural Environment Zone | 3.3.7.1.  | Oppose |
| Decision Requested | The council will ensure that they listen to the submissions from experienced members of the forestry industry and modify such rules if necessary, to make them fair, reasonable and workable.   |       |          |                          |           |        |
| <b>440</b>         | Ian Esson   | 10    | Volume 2 | 3 Rural Environment Zone | 3.3.7.2.  | Oppose |
| Decision Requested | The council will ensure that a reasonable definition of "material change" is developed. Should minor changes to a harvest plan be included in the definition, the rule must include a much shorter implementation time requirement. The final rule must be reasonable and workable, taking into account the complexities associated with and cost of having a harvesting operation "on sight".  |       |          |                          |           |        |
| <b>440</b>         | Ian Esson   | 11    | Volume 2 | 3 Rural Environment Zone | 3.3.7.6.  | Oppose |
| Decision Requested | The document must make it perfectly clear that there is a mechanism to allow for some land disturbance to enable existing trees on Steep Erosion-Prone land to be harvested and replanted.  |       |          |                          |           |        |
| <b>440</b>         | Ian Esson   | 12    | Volume 2 | 3 Rural Environment Zone | 3.3.7.18. | Oppose |
| Decision Requested | This rule will apply to all significant failures on all land in the region and not just forestry land. If the rule is applied, a clear definition indicating the threshold of notification must be developed.   |       |          |                          |           |        |
| <b>440</b>         | Ian Esson   | 13    | Volume 2 | 3 Rural Environment Zone | 3.3.48.   | Oppose |
| Decision Requested | A clause needs to be inserted that requires the organisers of such events to be aware of the level of fire danger in relation to surrounding properties at the time of the event, to take appropriate precautions, to have a contingency plan in place if a fire was to occur and be obliged to carry appropriate public liability insurance. They should also be obliged to speak with the neighbour who owns the adjacent bush or forest clad land. |       |          |                          |           |        |

| Decision Requested | <ul style="list-style-type: none"> <li>That further explanation is provided before the policy is included in the Plan.</li> <li>That similar policies are developed which apply to the relationships between other groups, such as Marlborough's farming community, and the Council.</li> </ul>   |       |          |   |              |                 |
| 425                | Federated Farmers of New Zealand  | 8     | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4A     | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter                                 | Provision     | Type            |
|--------------------|--|-------|----------|---|---------------|-----------------|
| Decision Requested | <p>That the explanatory text accompanying the issue is amended so that it better reflects the value of the primary sector to Marlborough's social and economic wellbeing, included but not limited to inclusion of the following paragraphs inserted after paragraph 2 (bold):</p> <p><b>"Primary production makes a considerable contribution to Marlborough's economy. In 2015, agriculture, fishery and forestry directly contributed \$254 million to the region's economy; 11.7% of the total GDP, and second only to manufacturing, through which many of the region's primary produce is processed. Agriculture, fishery and forestry also made the largest contribution to overall growth in the region in the year to 2015, growing by over 6.9% over the year, and employing 19.4% of the Marlborough workforce with 4,897 people employed.</b></p> <p><b>Sheep and beef production is extensive in Marlborough, with 397,030ha of land considered pastoral land, and 545,580 sheep and 59,970 beef animals run in Marlborough. Marlborough is a small dairying region, with only 56 herds and a total of 16,661 cows across 5,700 effective hectares. There are over 8000 deer in the Marlborough region.</b></p> <p><b>In addition to pastoral agriculture, the Marlborough Sounds provide 62% of New Zealand's aquaculture production by tonnes, including 62% of greenshell mussels and 61% of salmon production, and contributes almost 6%, or \$162 million, to Marlborough's regional GDP. The Marlborough region is also the largest grape producing region in New Zealand, with 23,203ha in vineyards, and exports representing 74.6% of national production in 2015. Forestry covers 57,500 ha."</b></p> |       |          |   |               |                 |

| 425                | Federated Farmers of New Zealand  | 271   | Volume 1 | 14 Use of the Rural Environment        | 14.       | Support         |
| Decision Requested | <p>Add the following new Objective (<i>Submitter did not identify which Issue the Objective should be under</i>) -</p> <p><i>"Marlborough has a well-structured and economically and socially successful range of business environments where the vitality, viability and identity of these environments is retained and enhanced."</i></p> <p><i>(Inferred)</i></p>  |       |          |  |           |                 |
| 425                | Federated Farmers of New Zealand  | 272   | Volume 1 | 15 Resource Quality (Water, Air, Soil) | 15.       | Support in Part |
| Decision Requested | <p>That the Introduction is amended to read as follows (strike through and bold) -</p> <p><i>"We are fortunate in Marlborough to generally enjoy good water quality in our coastal waters, rivers, lakes, wetlands and aquifers. <b>State of the environment reporting shows that:</b></i></p> <ul style="list-style-type: none"> <li><i>• <b>The quality of Marlborough's groundwater remains high in terms of nitrate content</b></i></li> <li><i>• <b>For median nitrate concentrations across the 14 unconfined aquifer sites, all meet the drinking water standard;</b></i></li> <li><i>• <b>Historically there have been hotspots in areas on the southern margin of the main aquifer where less dilution occurs;</b></i></li> <li><i>• <b>Nitrate leaching rates are likely to have decreased over time;</b></i></li> <li><i>• <b>Seasonal patterns appear stable suggesting current land uses are in equilibrium with water resources;</b></i></li> <li><i>• <b>95% of sites monitored for macro-invertebrates are fair to excellent, only 3 out of 51 sites are graded "poor";</b></i></li> <li><i>• <b>95% of sites are in the A band for secondary contact recreation, with 2 out of 34 sites in the B band;</b></i></li> <li><i>• <b>95% of sites meet the proposed DRP standard, with 2 out of 34 sites at higher levels;</b></i></li> <li><i>• <b>Around 80% of sites meet the proposed SIN standard, with around 6 out of 34 sites at higher levels;</b></i></li> <li><i>• <b>Trend analysis shows a reduction in SIN concentrations for some of the sites with the highest concentrations.</b></i></li> </ul> <p><i>Monitoring has shown that the quality of water in these waterbodies is sufficient to support a wide range of natural and human use values. These include healthy freshwater and marine ecosystems, comprising native fish, plants, algae and invertebrates, trout and salmon; stock and domestic water supplies; commercial uses of water in industry, agriculture, viticulture, marine farming and commercial fishing; and recreational uses such as swimming, shellfish gathering and fishing, scenic and tourism purposes. Water is of considerable cultural and spiritual importance to Marlborough's tangata whenua iwi.</i></p> <p><i>The contribution that these uses and values make to the community's social and economic wellbeing and to public health means that maintaining the quality of water in Marlborough's coastal waters, rivers, lakes, wetlands and aquifers is essential. Any reduction in water quality is therefore a significant issue in Marlborough.</i></p> <p><i>Water quality can be adversely affected by discharges of contaminants resulting from human activities on land or water. Contaminants are those things that have the ability to change the physical, chemical or biological condition of the water. There are two types of contaminant discharge that can affect water quality: "point source" discharges (those that enter water at a definable point, often through a pipe or drain) and "non-point source" discharges (those that enter water from a diffuse source, such as land run-off or infiltration through soils).</i></p> <p><i>The generally good state of water quality in Marlborough reflects the low number of point source discharges into waterbodies and coastal waters, good land</i></p> |       |          |  |           |                 |

management practices and lack of intensive land uses that can impact on water quality (e.g. dairying). It should also be acknowledged that over time, resource users have also taken action to reduce the impact of discharges on water quality. **Significant progress has been made working in partnership with landowners, organisations and the community through catchment programmes. Marlborough has a proud history of examples in this regard, including the Rai Valley.** However, there is always the potential that point source and/or non-point source discharges will occur and adversely affect the life supporting capacity and community use of Marlborough's rivers, lakes, wetlands, aquifers and coastal waters.

Unfortunately, water quality in some rivers has been degraded as a result of point source and non-point source discharges, impacting upon the uses and values that were once supported by the rivers and coastal waters. **In Marlborough most of the rivers and streams have good or fair water quality. The main management aim for water quality is on improving waterways currently classed as poor, in particular where this impacts on swimming values or the health of indigenous aquatic ecosystems.**

The management of water quality has a strong regulatory focus. This is because the Resource Management Act 1991 (RMA) stipulates that the discharge of contaminants into water, or into or onto land in circumstances where it may enter water, is prohibited unless allowed by resource consent or a rule in a regional plan or a regulation **non-regulatory focus, consistent with the MEP principles, the approach for indigenous biodiversity and building forward from earlier successful catchment programmes.**

In addition, the National Policy Statement for Freshwater Management 2014 (NPSFM) sets out objectives and policies that direct the steps that must be taken to manage water in a sustainable manner. In particular, there is a requirement to set objectives for water resources and ~~subsequently~~ to set water quantity and quality limits **in an iterative process informed by costs and achievability** to achieve those objectives. The NPSFM sets as an objective that the overall state of water quality within any region must be maintained or improved.

A key component of the NPSFM is the National Objectives Framework (NOF). The NOF is designed to assist the process of establishing appropriate freshwater quality objectives in a nationally consistent manner. It is based on the identification of values supported by waterbodies and the setting of objectives to protect those values. The NOF contains two compulsory national values: ecosystem health and human health for recreation. **The NOF allows for regions and local communities to determine other important values that they also seek to recognise.** Attributes, or measurable physical, chemical and biological characteristics are identified with respect to these values."

| Decision Requested | <p>That the issue is deleted and replaced as follows (strike through and bold) -<br/> <del>"The discharge of contaminants to water can adversely affect the life supporting capacity and the community's use of Marlborough's coastal waters, rivers, lakes, wetlands and aquifers.</del> <b>Meeting the needs of Marlborough's urban and rural economy whilst ensuring activities do not have adverse effects on water values and uses."</b></p> <p>That the first paragraph of explanatory text is deleted and replaced as follows (strike through and bold) -<br/> <del>"The good state of water quality in Marlborough's coastal waters, rivers, lakes, wetlands and aquifers makes them more vulnerable to point source and non-point source discharges. Any deterioration in water quality would have dramatic implications for Marlborough's social, economic and cultural wellbeing, as good water quality is essential for a wide range of consumptive and non-consumptive uses. A reduction in water quality could also adversely affect freshwater and marine habitats. The main threats to water quality in Marlborough are described below:</del> <b>Urban and rural activities contribute to the social, economic and cultural well-being of people. Inappropriate landuse and development can detract from the values and uses of water, including marine habitats. The MEP seeks to provide an enabling framework for development while prioritising and progressively reducing the adverse effects of discharges to water."</b></p> <p>That the last paragraph of the "Rural activities" section is deleted as follows (strike through) -<br/> <del>"There is the potential for rural activities to change and intensify in the future. For example, in many other regions there has been a change from traditional pastoral farming to dairy farming. This has led to water quality degradation, especially in lowland streams and for groundwater."</del></p> <p>That the final paragraph of the explanatory text is amended as follows (bold) -<br/> <del>"There has been a strong preference for discharges to land since the first Marlborough Regional Policy Statement (MRPS) became operative in 1995. This has resulted in a reduction in the number of point source discharges to water. Consequently, the greatest risk to water quality is probably associated with non-point source discharges. Non-point source discharges are difficult to manage as there is no discrete point to which management can be applied. This situation does not justify inaction, but means that the management of non-point source discharges is challenging and will require innovative approaches. It is important that the MEP provides a framework to deal with the point source and non-point source discharges to maintain and enhance water quality in Marlborough's coastal waters, rivers, lakes, wetlands and aquifers</del> <b>through a framework which enables catchment communities to target sources and develop innovations tailored to the specific catchment situation."</b></p> |       |          |  |           |                 |

| Decision Requested | <p>That the Policy is retained as notified in the Plan.</p>   |       |          |  |                |                 |
| 425                | Federated Farmers of New Zealand  | 298   | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.1.23 | Support in Part |

| Sub No             | Submitter  | Point | Volume | Chapter | Provision | Type |
|--------------------|--|-------|--------|---------|-----------|------|
| Decision Requested | <p>That the Policy is amended to read as follows (strike through and bold) -<br/> <del>"Avoid</del> <b>Reduce</b> the discharge of animal effluent to fresh waterbodies and stock disturbance of river beds to the extent necessary to meet the management purposes established by Policy 15.1.1, <b>policy 15.1.5, and policy 15.1.6</b> by:<br/> <b>(a) assessing causes of elevated E. coli levels and identifying the most appropriate and cost-effective solutions for restricting stock access; and</b><br/> <del>(a)</del> <b>(b) preventing the direct discharge of collected animal effluent to water; and</b><br/> <del>(b)</del> <b>(c) avoiding managing</b> the access of intensively farmed stock to rivers <b>to support achievement of Policy 15.1.5, and Policy 15.1.6."</b></p> <p>That the explanatory text for the Policy is amended to read as follows (strike through and bold) -<br/> <del>"Animal effluent can be discharged directly into rivers and wetlands through either the point source discharge of collected animal effluent (e.g. farm dairy effluent) or through stock access to waterbodies. At the date of notification of the MEP, there were no authorised discharges of animal effluent into water. This policy seeks to avoid the significant risk posed to surface water quality by discharges of collected animal effluent. This will be implemented through a prohibited activity rule.</del><br/> <del>Stock can also access rivers when grazing riparian margins. In such circumstances, it is likely that there may will be a discharge of animal effluent to water and the river bed may will be physically disturbed. The resulting increase in bacteria and turbidity in the receiving waters have the potential to reduce water quality. The adverse effects of casual access on water quality are dependent on a number of factors, including the type and density of stock. Intensively farmed stock such as dairy cattle, pigs, or cattle or deer grazed on irrigated pasture or breakfed on winter crops create a significant risk of adverse effects on water quality. For this reason, the policy seeks to avoid stock access where stock is farmed intensively.</del><br/> <b>This policy seeks to understand the cause of elevated E. coli level and identify the most appropriate and cost effective solutions for restricting access in catchments where there is an identified problem. This work will be completed through the Catchment Enhancement Plans, working collaboratively with landowners, industry, the community and Council to explore options.</b><br/> <del>Due to the practical difficulties in some situations of fencing stock out of waterbodies, particularly where stock are grazed extensively, or where rainfall events can cause ephemeral rivers to flow, and in situations where the costs of fencing and designing stock crossings are prohibitive for limited use, the Council has also adopted an approach of using permitted activity rules for managing the adverse effects of stock access not covered by this policy. The permitted activity rules will require compliance with any relevant water quality standard set for the affected waterbody</del> <b>that good management practice is followed to manage adverse effects on colour and visual clarity."</b></p> <p>That a new method is included in the Plan which provides for the assessment of causes of elevated E. coli levels and identification of the most appropriate and cost effective solutions for restricting stock access; and</p> <p>That a new method is included in the Plan which involves working with landowners and industry to implement good management practice around stock access to waterways, through Catchment Enhancement Groups, based on a better understanding of the causes and solutions.</p> |       |        |         |           |      |
