| 426                | Marine Farming Association Incorporated   | 59    | Volume 1 | 6 Natural Character | Policy 6.2.9 | Support in Part |
| Decision Requested | Amend the Policy to read as follows (bold) -<br><br><b>"Encourage and support private landowners, community groups, businesses and others in their efforts to restore the natural character of the coastal environment, wetlands, lakes and rivers."</b>  |       |          |                     |              |                 |
| 426                | Marine Farming Association Incorporated   | 60    | Volume 1 | 6 Natural Character | 6.           | Support in Part |
| Decision Requested | Add new 6.M.2A – <b>"Natural Character Assessment Method."</b> New Appendix 2A should be included in the MEP, setting out a detailed method to encourage consistency of approach between landscape architects.  |       |          |                     |              |                 |
| 426                | Marine Farming Association Incorporated   | 61    | Volume 1 | 6 Natural Character | 6.           | Support         |
| Decision Requested | Anticipated environmental results - focus is on retaining natural character. This is consistent with the wording in the issues and objectives (focus on maintenance/preservation). Supports approach where existing activities are allowed.<br><br>Support, on the basis that natural character can be retained while allowing for existing activities, including existing aquaculture. |       |          |                     |              |                 |
| 426                | Marine Farming Association Incorporated   | 62    | Volume 1 | 6 Natural Character | 6.           | Support in Part |
| Decision Requested | General opposition to use of the word "degree" throughout policies, if that is intended to refer to the scale outstanding - very low. The focus should be on the magnitude of the change, not whether the classification is affected.<br><br>Amend the natural character policies to make it clear that "degree" refers to the magnitude of change, not the classification.             |       |          |                     |              |                 |
| 426                | Marine Farming Association Incorporated   | 63    | Volume 1 | 6 Natural Character | 6.           | Oppose          |

| Sub No             | Submitter   | Point | Volume   | Chapter                                 | Provision     | Type            |
|--------------------|---|-------|----------|---|---------------|-----------------|
| Decision Requested | <p>Alternative submission:</p> <p>Delete Natural Character chapter 6 altogether. Reference to natural character can be made in the indigenous biodiversity chapter (biophysical elements) and in the landscape chapter (experiential elements).</p> <p>Or consider whether all three topics (landscape, natural character and indigenous biodiversity) could be dealt with under one category "Natural Heritage," which is the approach taken in the proposed Bay of Plenty Regional Coastal Plan and the Regional Policy Statement for Northland (May 2016).</p> |       |          |   |               |                 |

| Decision Requested | Delete 7.2.1 7.2.4 and 7.2.5 and replace with: New Policy 7.2.5 - in the Coastal Environment:<br><br>a) Avoid adverse effects of subdivision use and development on the characteristics and qualities which make up the outstanding values of areas of outstanding natural features and outstanding natural landscapes.<br><br>b) Where a) does not apply, avoid significant adverse effects and avoid, remedy or mitigate other adverse effects of subdivision, use and development on natural features and natural landscapes. Methods which may achieve this include:<br><br>(i) Ensuring the location, intensity, scale and form of subdivision and built development is appropriate having regard to natural elements, landforms and processes, including vegetation patterns ridgelines, headlands, peninsulas, dune systems, reefs and freshwater bodies and their margins; and<br><br>(ii) Encouraging any new subdivision and built development to consolidate within and around existing settlements or where natural landscape has already been compromised.<br><br>New Policy 7.2.5A - Outside the coastal environment avoid significant adverse effects and avoid, remedy or mitigate other adverse effects (including cumulative adverse effects) of subdivision, use and development on the characteristics and qualities of outstanding natural features and outstanding natural landscapes. Methods which may achieve this include:<br><br>a) In outstanding natural landscapes, requiring that the location and intensity of subdivision, use and built development is appropriate having regard to, natural elements, landforms and processes, including vegetation patterns, ridgelines and freshwater bodies and their margins; and |       |          |   |              |        |

b) In outstanding natural features, requiring that the scale and intensity of earthworks and built development is appropriate taking into account the scale, form and vulnerability to modification of the feature.

New Policy 7.2.5B - When considering whether there are any adverse effects on the characteristics and qualities of the natural features and landscape values in terms of 7.2.5(a), whether there are any significant adverse effects and the scale of any adverse effects in terms of 7.2.5(b) and 7.2.5A, and in determining the character, intensity and scale of the adverse effects:

- a) Recognise that a minor or transitory effect may not be an adverse effect;
- b) Recognise that many areas contain on-going use and development that:
  - (i) Were present when the area was identified as high or outstanding or have subsequently been lawfully established
  - (ii) May be dynamic, diverse or seasonal;
- c) Recognise that there may be more than minor cumulative adverse effects from minor or transitory adverse effects;
- d) Have regard to any restoration and enhancement of the characteristics and qualities of that area of natural features and/or natural landscape;
- e) Recognise it may be appropriate to offset significant residual adverse effects on a landscape or feature to result in no net loss or preferably a net landscape gain;
- f) Recognise that where adverse effects cannot be practicably avoided, adverse effects could be minimised; and
- g) Acknowledge that a future adverse effect may be avoided where the effect is temporary and is authorised for a finite term.

| 426                | Marine Farming Association Incorporated  | 88    | Volume 1 | 7 Landscape | 7.            | Support |
| Decision Requested | Add new 7.M.3A – “Landscape Assessment Method.” New Appendix 1A should be included in the MEP at volume 3, setting out a detailed method to encourage consistency of approach between landscape architects.  |       |          |             |               |         |
| 426                | Marine Farming Association Incorporated  | 89    | Volume 1 | 7 Landscape | 7.            | Support |
| Decision Requested | Support the anticipated environmental result - landscapes are protected from degradation (rather than enhanced).<br>a) Policies, issues and objectives should be consistent with this intended outcome; and<br>b) Recognition that landscape is not degraded by allowing for the continuation of existing activities, such as aquaculture. |       |          |             |               |         |
| 426                | Marine Farming Association Incorporated  | 90    | Volume 1 | 7 Landscape | 7.            | Oppose  |

| Sub No             | Submitter   | Point | Volume   | Chapter                   | Provision     | Type            |
|--------------------|---|-------|----------|---------------------------|---------------|-----------------|
| Decision Requested | The s 32 analysis should be redone to take account of consenting costs, using publicly available information where possible. The NZIER reports commissioned by the MFA should be referenced. Where existing marine farms are at risk, the cost of loss of farming space should be acknowledged.   |       |          |                           |               |                 |
| <b>426</b>         | Marine Farming Association Incorporated   | 91    | Volume 1 | 8 Indigenous Biodiversity | Issue 8A      | Oppose          |
| Decision Requested | The MEP should better address the concepts of "avoid" and risk.   |       |          |                           |               |                 |
| <b>426</b>         | Marine Farming Association Incorporated   | 92    | Volume 1 | 8 Indigenous Biodiversity | Objective 8.1 | Support in Part |
| Decision Requested | Amend objective 8.1 to read "Marlborough's remaining areas of significant indigenous biodiversity in terrestrial, freshwater and coastal environments are protected."   |       |          |                           |               |                 |
| <b>426</b>         | Marine Farming Association Incorporated   | 93    | Volume 1 | 8 Indigenous Biodiversity | Objective 8.2 | Support         |
| Decision Requested | Support objective 8.2, provided other relief sought in respect of chapter 8 is granted.   |       |          |                           |               |                 |

| Decision Requested | Retain Chapter 25 - Definitions. (inferred)   |              |               |   |                  |                 |
| <b>426</b>         | Marine Farming Association Incorporated   | 239          | Volume 2      | 25 Definitions                          | 25.              | Support         |
| Decision Requested | Add definition of "Outstanding" to read "Obviously exceptional, notable, eminent."  |              |               |   |                  |                 |
| <b>426</b>         | Marine Farming Association Incorporated   | 240          | Volume 3      | Appendix 1 Landscape Schedule of Values |                  | Oppose          |

| Sub No             | Submitter   | Point | Volume   | Chapter  | Provision | Type    |
|--------------------|---|-------|----------|--|-----------|---------|
| Decision Requested | (a) The entirety of Appendix 1 needs to be re-written, so that it is consistent with the definition in Policy 7.1.1 and the requirement in Policy 7.1.4;<br>(b) This potential methodological flaw has resulted in incorrect mapping, meaning the landscape overlay maps should be redrafted accordingly; and<br>(c) Where existing marine farms are present, there should be an express statement that those farms do not affect landscape values. This reflects the approach taken in Northland, the Bay of Plenty and Auckland.  |       |          |  |           |         |
| <b>426</b>         | Marine Farming Association Incorporated   | 241   | Volume 3 | Appendix 2 Coastal Natural Character Schedule of Values                          |           | Oppose  |
| Decision Requested | (a) The entirety of Appendix 2 needs to be re-written, so that it is consistent with the definition in Policy 6.1.1 and the requirement in Policy 6.1.4;<br>(b) This potential methodological flaw has resulted in incorrect mapping, meaning the coastal natural character overlay maps should be redrafted accordingly; and<br>(c) Where existing marine farms are present, there should be an express statement that those farms do not affect natural character values. This reflects the approach taken in Northland, the Bay of Plenty and Auckland.  |       |          |  |           |         |
| <b>426</b>         | Marine Farming Association Incorporated   | 242   | Volume 3 | Appendix 3 Biodiversity Criteria for Significance                                |           | Oppose  |
| Decision Requested | A note should be added at the beginning of Appendix 3 stating "These criteria are intended to be applied by suitably qualified and experienced ecologists." (This is modelled off the approach in the Regional Policy Statement for Northland (May 2016), at Appendix 5); and<br><br>(a) Delete Appendix 3 and replace with approach taken in the proposed Regional Policy Statement for Northland (May 2016) at Appendix 5, pages 175 – 178;<br>(b) The MEP should clearly distinguish between areas of national significance and areas of regional significance; and<br>(c) A cascading approach to managing effects on these different areas should be included in the Chapter 8 Policies, consistent with Policy 11 of the NZCPS, rather than a straight avoidance approach (this is reflected in the submissions in respect of the Policies in Chapter 8). |       |          |  |           |         |
| <b>426</b>         | Marine Farming Association Incorporated   | 243   | Volume 3 | Appendix 4 Determining Significant Adverse Effects                               |           | Oppose  |
| Decision Requested | (a) Delete Appendix 4; or<br>(b) Use appropriate quantitative measure to define significance.   |       |          |  |           |         |
| <b>426</b>         | Marine Farming Association Incorporated   | 244   | Volume 3 | Appendix 5 Water Resource Unit Values and Water Quality Classification Standards |           | Support |

| Sub No             | Submitter   | Point | Volume   | Chapter                             | Provision                   | Type            |
|--------------------|---|-------|----------|-------------------------------------|-----------------------------|-----------------|
| Decision Requested | Retain Water Quality Classification of SG for all coastal water in respect of the value of food gathering (page 5-17). Support the interpretation of the temperature, dissolved oxygen and suitability of fish for human consumption standards/parameters for SG classification on pages 5-21 and 5-22.   |       |          |                                     |                             |                 |
| <b>426</b>         | Marine Farming Association Incorporated   | 245   | Volume 3 | Appendix 7 Scheme Plan Requirements |                             | Support in Part |
| Decision Requested | (a) Add new item 24 under "Other Relevant Site Details" - "The location of any relevant marine farm protection overlay"; and<br>(b) Under heading "Sewerage" add - "Any subdivision of land within the marine farm protection overlay must assess the potential for contamination of coastal water."  |       |          |                                     |                             |                 |
| <b>426</b>         | Marine Farming Association Incorporated   | 246   | Volume 4 | Overlay Maps                        | Coastal Natural Character 1 | Oppose          |
| Decision Requested | The 2014 Natural Character of the Marlborough Coast study does not separate characteristics from values. It uses a different set of definitions than that contained in the MEP at Policy 6.1.1. Adoption of a different methodology means that the maps contained in the MEP (derived from the 2014 Study) are inconsistent with the policy approach in the MEP.<br>The Coastal Natural Character maps (1-5) and/or the policies in the MEP need to be redrafted accordingly.       |       |          |                                     |                             |                 |
| <b>426</b>         | Marine Farming Association Incorporated   | 247   | Volume 4 | Overlay Maps                        | Coastal Natural Character 1 | Oppose          |
| Decision Requested | Redraft the Coastal Natural Character maps (1-5) to show a reduction in the seaward extent of the outstanding/very high/high natural character areas.   |       |          |                                     |                             |                 |
| <b>426</b>         | Marine Farming Association Incorporated   | 248   | Volume 4 | Overlay Maps                        | Coastal Natural Character 1 | Support in Part |
| Decision Requested | Support the natural character mapping in respect of Waihinau Bay.<br>Oppose the mapping of the waters of Fitzroy Bay as high natural character and the surrounding land as very high natural character.<br>(a) Amend the natural character mapping in those locations where the mapping is opposed; or<br>(b) If Fitzroy Bay rating is correct, the MEP should expressly recognise that the presence of marine farming does not affect the values that lead to that classification. |       |          |                                     |                             |                 |
| <b>426</b>         | Marine Farming Association Incorporated   | 249   | Volume 4 | Overlay Maps                        | Coastal Natural Character 2 | Support in Part |

|--------------------|--|-------|----------|-----------------------------------|----------------|-----------------|
| Decision Requested | <p>That the following amendments (bold) are made to the explanation of Policy 5.10.7:</p> <p><i>Policy 5.10.7 – The manner in which the level of coastal occupancy charges has been determined is as follows:</i></p> <p><i>In deciding how to set charges, the Council has used as its starting point the actual expenditure considered necessary to promote the sustainable management of the coastal marine area <b>in as much as it may be affected by the identified effects of coastal occupiers</b>. The budgeted expenditure for this is described year to year in the Council's Annual Plan for the Environmental Science and Monitoring Group, Environmental Policy Group and Environmental Compliance and Education Group.</i></p> <p><i>In determining who should meet the cost of sustainably managing the coastal marine environment, an allocation of costs needs to occur between beneficiaries. The Council has considered that a contribution towards the costs should be made by ratepayers (25%) as well as those benefiting from the occupation of public space (75%). <b>The balance of funding required to promote the sustainable management of the coastal marine area in the wider sense will be sourced from elsewhere</b>. The Council has also given consideration to anticipated waivers that may be granted and the number and size of the various occupations. From this assessment, a schedule of charges has been derived and is set out in the Council's Annual Plan.</i></p> |       |          |                                   |                |                 |
| <b>960</b>         | Marlborough Berth and Mooring Association Incorporated   | 3     | Volume 1 | 5 Allocation of Public Resources  | Policy 5.10.8  | Support in Part |
| Decision Requested | <p>That the following amendments (strike-through and bold) are made to Policy 5.10.8:</p> <p><i>Policy 5.10.8 - Any coastal occupancy charges collected will <del>be used on</del> <b>contribute towards</b> the following to promote the sustainable management of the coastal marine area:</i></p>   |       |          |                                   |                |                 |

| Decision Requested | <u>Add</u> (m) Retirement villages, worker accommodation, medium low rise density housing  |       |          |   |                |                 |
| <b>961</b>         | Marlborough Chamber of Commerce  | 27    | Volume 1 | 12 Urban Environments                   | 12.            | Support in Part |
| Decision Requested | Add new Issue 12D- The Marlborough District is recognised as an area with an aging population growth, and a desirable place to retire to and live. Meeting the needs of the elderly and supporting their well-being needs to be considered to allow the integration and assimilation in both terms of housing and support services.                            |       |          |   |                |                 |
| <b>961</b>         | Marlborough Chamber of Commerce  | 28    | Volume 1 | 12 Urban Environments                   | 12.            | Support in Part |
| Decision Requested | Add new Issue 12E- There is an increasing reliance on seasonal workers and migrants to provide the work force in the Marlborough District. This will be across the vineyards, wineries, home and elderly person care. Accommodation in non-traditional or conventional housing needs to be evaluated to be able to assimilate this into the Urban Environment. |       |          |   |                |                 |
| <b>961</b>         | Marlborough Chamber of Commerce  | 29    | Volume 1 | 12 Urban Environments                   | 12.            | Support in Part |

| Sub No             | Submitter   | Point | Volume   | Chapter                           | Provision     | Type            |
|--------------------|---|-------|----------|-----------------------------------|---------------|-----------------|
| Decision Requested | Add new Issue 12F - The provision of affordable housing in Marlborough needs to be addressed through Council and private developers, together with Central Govt incentives for infrastructure.  |       |          |                                   |               |                 |

| 91                 | Marlborough District Council  | 135   | Volume 1 | 16 Waste                          | 16.AER.3  | Support |
| Decision Requested | The requested amendment to the second Indicator associated with 16.AER.3 is as follows (bold) - " <i>There is no major non-compliance with permitted activity rules or discharge permit conditions for dairy shed effluent and winery wastewater discharges <b>that cause significant adverse effects</b> in any year.</i> "  |       |          |                                   |           |         |
| 91                 | Marlborough District Council  | 136   | Volume 1 | 14 Use of the Rural Environment   | 14.M.7    | Support |
| Decision Requested | Amendments to 14.M.7 are requested as follows (strike through and bold) - " <i>14.M.7 Council works - The Council has historically maintained the <b>Drainage Channel Network</b> <del>drainage network</del> on the Wairau Plain in a hydraulically efficient state to ensure primary production activities can continue to occur. The works involved include the following: (a) establishing a range of acceptable water levels for the drains and small rivers that make up the Council administered <b>Drainage Channel Network</b> <del>drainage network</del>; (b) as necessary, removing aquatic vegetation and sediment from the drains and small rivers to achieve the acceptable water levels; and (c) where necessary, installing and using pumps to assist with the removal of excess water. The determination of acceptable water levels for each of the drains and small rivers allows for more efficient control of water levels. This will effectively provide triggers for active intervention and in doing so minimise the cost of drainage maintenance work. The use of acceptable water levels will also provide criteria for determining when further intervention such as pumping is required to control water levels. The drains and small rivers that make up the <b>Drainage Channel Network</b> <del>drainage network</del> also provide habitat for indigenous flora and fauna and provide opportunities for the development of ecological corridors. The development and use of triggers for drain maintenance will help to mitigate the impact of the works on the habitat that the <b>Drainage Channel Network</b> <del>drainage network</del> provides. It may also be appropriate to undertake drain maintenance works in a certain manner to further mitigate any adverse effect on habitat values; see Chapter 8 - Indigenous Biodiversity for further details.</i> " |       |          |                                   |           |         |
| 91                 | Marlborough District Council  | 137   | Volume 1 | 13 Use of the Coastal Environment | 13.AER.13 | Support |
| Decision Requested | The amendment of this Indicator for 13.AER.13 is requested as follows (strike through and bold) - " <i><del>Few</del> <b>A decrease in the number of</b> resource consents <del>are</del> required for port and marina related activities.</i> "  |       |          |                                   |           |         |
| 91                 | Marlborough District Council  | 138   | Volume 1 | 13 Use of the Coastal Environment | 13.AER.9  | Support |
| Decision Requested | The amendment of the Indicator for 13.AER.9 is requested as follows (strike through) - " <i>A five yearly assessment is carried out to determine the need to undertake monitoring specified in Policy 13.16.4 and the monitoring method (13.M.4922) set out for water transportation.</i> "   |       |          |                                   |           |         |

|--------------------|---|-------|----------|------------------------|-----------|---------|
| Decision Requested | Amendments requested to Standard 23.2.2.1 as follows (strike through and bold) - " <i>Noise from a source other than an aircraft movement, aircraft engine testing, or a national or international gliding event, must comply with the following noise limits measured at or within the boundary of any land zoned Urban Residential 1, Urban Residential 2 (including Greenfields) or Urban Residential 3, or at or within the notional boundary of any noise sensitive activity on any land zoned Rural Environment:</i> <p><b>7.00 am to 10.00 pm 50 dBA LAeq</b></p> <p><b>10.00 pm to 7.00 am 40 dBA LAeq 70dB LAFmax</b></p> <p><del>Monday to Saturday 7.00 am to 6.00 pm 55dBA LAeq</del></p> <p><del>Monday to Saturday 6.00 pm to 10.00 pm 50dBA LAeq</del></p> <p><del>Monday to Sunday 10.00 pm to 7.00 am 45dBA LAeq</del></p> <p><del>Monday to Sunday 10.00 pm to 7.00 am 70dBA Lmax</del>"</p>  |       |          |                        |           |         |
| 91                 | Marlborough District Council  | 153   | Volume 2 | 19 Open Space 3 Zone   |           | Support |
| Decision Requested | Add new heading under 19.3 as follows - " <b><i>Livestock entering onto, or passing across, the bed of any river.</i></b> " and standards as follows - <b>1. "The entering onto or passing across the bed of a river of livestock must not involve intensively farmed livestock if there is water flowing in the river." 2. " After reasonable mixing, the entering onto or passing across the bed of a river by livestock must not cause any conspicuous change in the colour or visual clarity of a flowing river, measured as follows: (a) hue must not be changed by more than 10 points on the Munsell scale; (b) the natural clarity must not be conspicuously changed due to sediment or sediment laden discharge originating from the activity site; (c) the change in reflectance must be &lt;50%." 3. "After reasonable mixing, the entering onto or passing across the bed of a river by livestock must not result in a change in concentration of following: (a) daily average carbonaceous BOD5 due to dissolved organic compounds (i.e. those passing a GF/C filter); (b) dissolved reactive phosphorus; (c) dissolved inorganic nitrogen; (d) Escherichia coli (E. coli)."</b> |       |          |                        |           |         |
| 91                 | Marlborough District Council  | 154   | Volume 2 | 19 Open Space 3 Zone   |           | Support |
| Decision Requested | Add a new Permitted Activity rule under 19.1 to as follows - " <b><i>Livestock entering onto, or passing across, the bed of any river.</i></b> "  |       |          |                        |           |         |
| 91                 | Marlborough District Council  | 155   | Volume 2 | 16 Coastal Marine Zone |           | Support |
| Decision Requested | The addition of the following Prohibited Activity rule is requested - " <b><i>Rafting of logs as a means of transportation through the Coastal Marine Zone.</i></b> "   |       |          |                        |           |         |
| 91                 | Marlborough District Council  | 156   | Volume 2 | 16 Coastal Marine Zone | 16.7.4.   | Support |

| Sub No             | Submitter   | Point | Volume   | Chapter                                | Provision      | Type    |
|--------------------|---|-------|----------|--|----------------|---------|
| Decision Requested | The amendment requested is as follows (bold) - "16.7.4. - Discharge of treated or untreated human sewage <b>from land based activities</b> into the coastal marine area, except for the discharge of treated human sewage from regionally significant infrastructure."  |       |          |  |                |         |
| 91                 | Marlborough District Council  | 157   | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.1.19 | Support |
| Decision Requested | The amendment requested is as follows (bold) - "Policy 15.1.19 – Progressively work toward eliminating the discharge of human sewage <b>from land based activities</b> to coastal waters in the Marlborough Sounds, with the exception of regionally significant infrastructure."                                 |       |          |  |                |         |
| 91                 | Marlborough District Council  | 158   | Volume 1 | 15 Resource Quality (Water, Air, Soil) | 15.AER.2       | Support |
| Decision Requested | To provide greater clarity to Plan users, an amendment is requested to the Indicator for 15.AER.2 as follows (bold) - "With the exception of regionally significant infrastructure, there are no discharges of human sewage <b>from land-based activities</b> into the coastal waters of the Marlborough Sounds." |       |          |  |                |         |
| 91                 | Marlborough District Council  | 159   | Volume 1 | 15 Resource Quality (Water, Air, Soil) | 15.AER.1       | Support |
| Decision Requested | An amendment is requested to the Indicator for 15.AER.1 as follows (bold) - "Stormwater Management Area Plans are developed <b>and implemented</b> for all stormwater catchments that discharge into waterbodies and coastal waters with degraded water quality."   |       |          |  |                |         |
| 91                 | Marlborough District Council  | 160   | Volume 1 | 14 Use of the Rural Environment        | 14.AER.3       | Support |
| Decision Requested | A new Indicator for 14.AER.3 is requested as follows - " <b>Land use change to alternative land uses as recorded in the Land Cover Database and resource consents.</b> "  |       |          |  |                |         |
| 91                 | Marlborough District Council  | 161   | Volume 1 | 15 Resource Quality (Water, Air, Soil) | 15.AER.1       | Support |
| Decision Requested | Add a new Indicator for 15.AER.1 as follows - " <b>The number of complaints about unlawful discharges of contaminants to water or discharges to land in circumstances where contaminants may reach water.</b> "   |       |          |  |                |         |

|--------------------|--|-------|----------|----------------|------------------------------|-----------------|
| Decision Requested | The boundaries of the Lower and Upper Pelorus Freshwater Management Units need to be adjusted to correct a mapping error (see attachment - black line is new proposed boundary). The amended boundaries will be consistent with the description of the boundaries in Appendix 6.   |       |          |                |                              |                 |
| <b>91</b>          | Marlborough District Council   | 315   | Volume 4 | Overlay Maps   | Freshwater Management Unit 2 | Support in Part |
| Decision Requested | Amend the boundaries of the Boundary Freshwater Management Unit to reflect the following (see attachment - black line is new proposed boundary) -<br><br><i>"The north-eastern extent of the Boundary Creek FMU was intended to include all areas where groundwater takes were likely to cause stream depletion from the spring derived streams such as Excell Stream, Huddleston Stream, and Mill Creek. However the northern boundary was placed too far north, and captured a number of takes which are closer to the Wairau River, and more correctly placed in the Wairau River FMU. The boundary between the two FMUs has been redefined slightly south, generally following the main terrace, below which the Wairau river is the predominant influence. At the same time slight corrections have been made on the southern edge of the Mill Creek catchment to better reflect the hydrology of this area."</i> |       |          |                |                              |                 |
| <b>91</b>          | Marlborough District Council   | 316   | Volume 4 | Overlay Maps   | Steep Erosion Prone Land 3   | Support in Part |
| Decision Requested | A slope factor has not been applied to the mapping of the Steep Erosion Prone Land therefore Class 8 and 7e land that is not on a slope but is unproductive land, e.g. estuaries have been inappropriately picked up. Two examples are attached, it is requested that these and similar features are removed from the Steep Erosion Prone Land Overlay.  |       |          |                |                              |                 |

| Sub No             | Submitter  | Point | Volume   | Chapter                                | Provision     | Type            |
|--------------------|--|-------|----------|--|---------------|-----------------|
| Decision Requested | <p>Make the following changes (strikethrough, bold) to Policy 8.3.2:</p> <p><i>Policy 8.3.2 - Where subdivision, use or development <del>that</del> requires resource consent, <b>occurs within areas, habitats or ecosystems with indigenous biodiversity value, significant</b> the adverse effects on <del>those</del> areas, habitats or ecosystems with indigenous biodiversity value shall be:</i></p> <p><i>(a) avoided where it is a significant site in the context of Policy 8.1.1; and</i></p> <p><i>(b) avoided, remedied or mitigated where indigenous biodiversity values have not been assessed as being significant in terms of Policy 8.1.1.</i></p> <p>This policy sets up a hierarchy for decision makers to use when assessing the effects of subdivision, use or development activities on areas, habitats or ecosystems with indigenous biodiversity value. For those sites identified as being significant in terms of Policy 8.1.1, it is important that <b>significant adverse effects are avoided</b>. This recognises that there are few significant sites remaining on private land, especially in southern Marlborough. Where sites have not been identified as significant through Policy 8.1.1, decision makers can also consider remediation or mitigation options to address adverse effects.</p> |       |          |  |               |                 |

| Decision Requested | <p>That the definition of farming be amended as follows:</p> <p>Farming means a land based activity, having as its primary purpose the commercial production and sale of any livestock or vegetative matter. Farming does not include intensive farming, forestry, and in the case of vegetative matter, does not include the processing of farm produce beyond cutting, cleaning, grading, chilling, freezing, packaging and storage of produce grown on the farming unit. <u>For clarity farming includes the slaughtering and processing of animals for personal consumption but not for sale purposes.</u></p> |       |          |   |            |                 |

| <b>973</b>         | Ministry for Primary Industries  | 3     | Volume 2 | 13 Port Zone   | 13.3.4.   | Oppose |
| Decision Requested | <p>In-water cleaning of vessel hulls and structures is an important tool for both routine maintenance of early stage biofouling and emergency management of significant biosecurity risk (when using approved recapture technologies and suppliers). It is recognised under the Guidelines that the acceptability of in-water cleaning risk is dependent on factors such as vessel type, level and type of fouling (whether it is established in the location), and whether the capture of biofouling discharge will be achieved to an acceptable extent.</p> <p>MPI therefore requests that Marlborough District Council amend the provisions relating to the removal of biofouling to include provisions for in-water cleaning, with standards that take into consideration the guidance in the Australia and New Zealand Anti-fouling and In-water Cleaning Guidelines, specifically relating to the level, type and origin of fouling (including restricting in-water cleaning of vessels that have become fouled whilst overseas) and the method of in-water cleaning.</p>  |       |          |                |           |        |
| <b>973</b>         | Ministry for Primary Industries  | 4     | Volume 2 | 15 Marina Zone | 15.3.3.   | Oppose |

|--------------------|---|-------|----------|----------------------------------|---------------|-----------------|
| Decision Requested | <p>In-water cleaning of vessel hulls and structures is an important tool for both routine maintenance of early stage biofouling and emergency management of significant biosecurity risk (when using approved recapture technologies and suppliers). It is recognised under the Guidelines that the acceptability of in-water cleaning risk is dependent on factors such as vessel type, level and type of fouling (whether it is established in the location), and whether the capture of biofouling discharge will be achieved to an acceptable extent.</p> <p>MPI therefore requests that Marlborough District Council amend the provisions relating to the removal of biofouling to include provisions for in-water cleaning, with standards that take into consideration the guidance in the Australia and New Zealand Anti-fouling and In-water Cleaning Guidelines, specifically relating to the level, type and origin of fouling (including restricting in-water cleaning of vessels that have become fouled whilst overseas) and the method of in-water cleaning.</p> |       |          |                                  |               |                 |
| <b>973</b>         | Ministry for Primary Industries   | 5     | Volume 1 | 5 Allocation of Public Resources | Policy 5.3.15 | Support in Part |
| Decision Requested | <p>1. MPI recommends that the rule is updated to make it explicit that resource consent is not required for replanting existing forests where these exist within one of the afforestation flow sensitive sites. This could be done by inserting a new definition for afforestation which includes new commercial, woodlot and farm plantings but does not include replanting of forests established before the commencement date of the Marlborough Environment Plan.</p> <p>2. MPI recommends that Policy 5.3.15 be clarified by indicating whether the Council would consider that the threshold has been reached in these sensitive areas through a small number of applications for larger- scale commercial forestry (i.e. whole property planting), or whether they will be looking to have only a proportion of each property planted (i.e. woodlot planting).</p>   |       |          |                                  |               |                 |
| <b>973</b>         | Ministry for Primary Industries   | 6     | Volume 1 | 5 Allocation of Public Resources | Policy 5.3.16 | Support in Part |
| Decision Requested | <p>1. MPI recommends that Policy 5.3.16 be clarified by citing the supporting council research on the threshold calculations and indicating what the threshold would translate to (in forestry planting) for the respective sensitive areas. This information could be placed in the Policy or in one of the meta data fields for the map layer.</p> <p>2. MPI recommends that Policy 5.3.16 be clarified by indicating whether the Council would consider that the threshold has been reached in these sensitive areas through a small number of applications for larger- scale commercial forestry (i.e. whole property planting), or whether they will be looking to have only a proportion of each property planted (i.e. woodlot planting).</p>  |       |          |                                  |               |                 |
| <b>973</b>         | Ministry for Primary Industries   | 7     | Volume 2 | 3 Rural Environment Zone         | 3.3.11.5.     | Oppose          |

| Sub No             | Submitter   | Point | Volume   | Chapter                        | Provision     | Type            |
|--------------------|---|-------|----------|--------------------------------|---------------|-----------------|
| Decision Requested | <p>1. MPI seeks changes to the environment plan (section 3.3.11) that recognizes sustainable indigenous forest management as an activity distinct from vegetation clearance resulting in total forest removal.</p> <p>2. MPI seeks clarity on the interpretation of the vegetation clearance area rule as it pertains to the harvesting of single trees and/or groups of trees from intact indigenous forest. This will assist landowners in more accurately identifying what forest management activities, including indigenous timber harvesting under approvals issued pursuant to Part 3A of the Forests Act 1949, require a discretionary resource consent. The current rules and in fact the proposed rule do not provide clear guidance.</p> <p>3. MPI seeks a review of the amended rule for indigenous forest clearance over 6 metres in height as it applies to the Marlborough Sounds area, which by Council's own admission (Policy 8.3.2), does not have extent of habitat loss evidenced in southern Marlborough.</p> <p>4. Sustainable indigenous forest management should be permitted on forests that lie outside those areas recognised as Significant Natural Areas.</p> |       |          |                                |               |                 |

| Decision Requested | <p>In accordance with Council's policy and objectives I proposed that a Marlborough Sounds Land Management Plan be established. The reclassification of the Marlborough Sounds land together with Council's obligations under Part XII of the RMA 1991 would redefine permitted uses. Detailed management plans for each permitted and other land based activities would be established. This would bring about current and up-to-date management practices to commence the path to sustainability and deal with sedimentation issues.</p> |       |          |                                   |                |                 |

|--------------------|---|-------|----------|-----------------------|-----------|--------|
| Decision Requested | <p>Remove the 100% blanket cut-off to Springs sector water users. There are significantly better options available to protect water than a 100% cut-off. Nelson has a significantly better system that includes stepped reductions in water use rather than the sledge hammer approach of 100% cut-off. This would allow the people of Marlborough to manage their water use in times of drought to ensure their businesses can survive</p> <p>Water users west of the 3 proposed areas use significantly more water per hectare than the 3 proposed area's so need to be included in any water protection measures. A better understanding of how water restrictions on certain areas will affect the aquifer is needed. We also need a better understanding of long term trends of the aquifer levels before setting lower limits and cut-off thresholds.</p> |       |          |                       |           |        |

|--------------------|--|-------|----------|---|--|-----------------|
| 990                | Nelson Forests Limited   | 159   | Volume 1 | 1 Introduction                          | Guiding principles   | Support in Part |
| Decision Requested | Review the rationale and justification for having separate commercial forestry rules as compared to general activity rules. Delete the specific commercial forestry rules and re-instate the rules for land disturbance as per the previous plans as a measure to manage forestry operations before the proposed NES-PF is passed into law (April 2017).   |       |          |   |  |                 |
| 990                | Nelson Forests Limited   | 160   | Volume 1 | 1 Introduction                          | Guiding principles   | Support         |
| Decision Requested | Ensure the MEP provides for controls on the siting of houses and essential infrastructure below steep land, with natural hazards being a key driver.   |       |          |   |  |                 |
| 990                | Nelson Forests Limited   | 161   | Volume 1 | 2 Background                            | Identifying regionally significant issues  | Oppose          |
| Decision Requested | Revise this section of the MEP to fairly reflect the history of consultation.  |       |          |   |  |                 |
| 990                | Nelson Forests Limited   | 162   | Volume 1 | 2 Background                            | Working with others to sustainably manage Marlborough's natural and physical resources | Oppose          |
| Decision Requested | Revisit the manner in which commercial forestry is treated in the MEP to ensure that there is equity between land users.   |       |          |   |  |                 |
| 990                | Nelson Forests Limited   | 163   | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4A   | Oppose          |
| Decision Requested | Amend this paragraph as follows (or with words with similar effect) (bold) -<br><i>"The value of <b>the tall vegetation (eg areas of the conservation estate, which makes up 45% of Marlborough's land area, and commercial forests – 8%)</b> should not be underestimated. For example, the use of the Queen Charlotte Track, part of which occurs in the conservation estate, adds approximately \$10 million to the Marlborough economy annually. There are other ecosystem services provided by <b>the commercial forestry and the conservation estate</b> that, although not quantified in a monetary sense, contribute to social wellbeing, such as reducing flood risk, sustaining whitebait catches and other fish and game, <b>providing habitat, recreational opportunities and carbon sequestration.</b>"</i> |       |          |   |  |                 |
| 990                | Nelson Forests Limited   | 164   | Volume 1 | 4 Use of Natural and Physical Resources | Policy 4.1.1   | Support in Part |

|--------------------|--|-------|----------|--|-----------------|--------|
| Decision Requested | Amend the first and second paragraphs under the heading " <i>Natural processes</i> " as follows -<br><i>"In the context of the above, it is also important to note that natural processes may influence water quality. For example, groundwater quality often reflects the mineralogy of the aquifer it originated from, especially if the groundwater has high residence time. This means that some Marlborough groundwaters have high levels of naturally occurring contaminants such as salt, iron and arsenic. There is also potential for bacteria from the faeces of feral animals (e.g. goats, pigs and possums) and other wildlife to contaminate fresh and coastal waters.</i><br><br><del>Occasionally,</del> <i>Natural processes will result in sediment reaching both fresh and coastal water, particularly during rainfall events. This affects the clarity and turbidity of water and the resulting <del>dirty</del> <b>discoloured</b> waters can have an impact on freshwater and marine life."</i> |       |          |  |                 |        |
| 990                | Nelson Forests Limited   | 232   | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Issue 15A       | Oppose |
| Decision Requested | Review the Issue. If the issue is non-point source discharges, then make this clear. If it is not an issue of no-point source discharges, then delete this sentence and review the provisions that apply to the non-issue.   |       |          |  |                 |        |
| 990                | Nelson Forests Limited   | 233   | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Objective 15.1a | Oppose |
| Decision Requested | Amend the first paragraph of the explanation to the Objective to state as follows (or with words of similar effect) -<br><i>"Marlborough's coastal waters, rivers, lakes, wetlands and aquifers contain a diverse range of natural and human use values and are used extensively by the community. The existing water quality in the majority of our waterbodies is sufficient to support these values, but it is important that no <b>long term</b> degradation of water quality is allowed to occur. In addition....."</i>   |       |          |  |                 |        |
| 990                | Nelson Forests Limited   | 234   | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.1.1   | Oppose |
| Decision Requested | Amend the explanation for this Policy to state as follows (or with words of similar effect) (strike through and bold) -<br><i>"This policy establishes a minimum expectation of water quality in Marlborough's rivers, lakes, wetlands, aquifers and coastal waters. The policy will be primarily implemented through the application of water quality classifications, against which the impact of point source discharges on water quality can be assessed in the preparation of permitted activity rules and the consideration of resource consent applications. The use of "potential" in the criteria reflects a community expectation that contact recreation and/or food gathering should <del>always</del> <b>generally</b> be able to be undertaken safely in coastal waters, rivers, lakes and wetlands. This policy assists to give effect to Policy A1, CA2 and D1 of the NPSFM and Policy 8 of the New Zealand Coastal Policy Statement 2010 (NZCPS)."</i>  |       |          |  |                 |        |

|--------------------|---|-------|----------|--|---------------|--------|
| 990                | Nelson Forests Limited  | 246   | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.4.4 | Oppose |
| Decision Requested | Any rules resulting from this Policy should either be a Permitted Activity (subject to performance standards) or a Controlled Activity. The rainfall event return period should be stated and practical. Direction should be provided to determine how close a land use needs to be to any fresh waterbody or coastal water in the application of this Policy.  |       |          |  |               |        |
| 990                | Nelson Forests Limited  | 247   | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.4.6 | Oppose |
| Decision Requested | Reword the Policy to provide clear guidance and expand it to require significant focus / regulation on the eroding hill country around Blenheim and the Weld Pass. Any rules resulting from this Policy should either be a Permitted Activity (subject to performance standards) or a Controlled Activity.  |       |          |  |               |        |
| 990                | Nelson Forests Limited  | 248   | Volume 1 | 15 Resource Quality (Water, Air, Soil) | 15.M.39       | Oppose |
| Decision Requested | Amend the first paragraph under the Method to read as follows (or with words of similar effect) (strike through and bold) -<br><i>"To work with <del>established</del> rural industry groups to develop and implement sustainable land management programmes. The initial focus will be on viticulture, pastoral farming (especially dairy and beef farming), arable farming and forestry, and <del>may</del> <b>will</b> extend to other rural activities if the need arises."</i><br>And, amend the third paragraph under the Method to read as follows (or with words of similar effect) (strike through and bold) -<br><i>"<del>Farm</del> <b>Sustainable land</b> management plans may assist rural property owners to identify appropriate responses to soil erosion issues on their land. The Council will help to develop such plans if requested."</i> |       |          |  |               |        |
| 990                | Nelson Forests Limited  | 249   | Volume 1 | 15 Resource Quality (Water, Air, Soil) | 15.M.45       | Oppose |
| Decision Requested | Amend the second paragraph under Method 15.M.45 as follows (strike through) -<br><i>"Undertake monitoring of the effect of specific land disturbance activities and land use changes on the soil resource. This can be implemented through monitoring required as a condition of resource consent or through state of the environment monitoring. <del>Monitoring the effects of forest harvest activities in the coastal environment of the Marlborough Sounds is a priority.</del>"</i><br>And, amend the description of the Method to focus on monitoring the effects of land use in the highly erodible loess soils in the Wither Hills and Weld Pass area.   |       |          |  |               |        |
| 990                | Nelson Forests Limited  | 250   | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.5.1 | Oppose |

| Sub No             | Submitter   | Point | Volume   | Chapter                                | Provision     | Type            |
|--------------------|---|-------|----------|--|---------------|-----------------|
| Decision Requested | Amend the explanation to the Policy as follows (strike through) -<br><br><i>"The Hazardous Substances and New Organisms Act 1996 (HSNO) states the minimum controls for the use, storage, transportation and disposal of all hazardous substances throughout New Zealand. Although the Council is able to impose additional and/or more stringent requirements, it is satisfied that the requirements imposed by HSNO regulations are sufficient to minimise the potential for inadvertent release of hazardous substances into the environment.</i><br><br><i>Exceptions to this policy include:</i><br><i>(a) the use and storage of hazardous substances in groundwater protection areas and on river beds, due to the vulnerability of the aquifers and rivers to contamination; and</i><br><i>(b) the discharge of hazardous waste to land or water.</i><br><br><i>In these circumstances, the Council will use its powers under the RMA to impose controls more stringent than the HSNO regulations."</i> |       |          |  |               |                 |
| <b>990</b>         | Nelson Forests Limited  | 251   | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.5.3 | Support in Part |
| Decision Requested | Amend the explanation to the Policy to state as follows (or with words of similar effect) (bold) -<br><br><i>"A majority of the sites on the Register are identified as potentially contaminated and are included on the basis of HAIL. However, the risk of human health effects or adverse effects on the environment is unclear. For this reason, the Council will <b>engage and work with affected parties to progressively screen those sites on the Register to determine the likely risk that the contaminants pose to human health and/or the surrounding environment. The degree of risk and the reasons will be recorded on the Register and shared with the affected parties.</b>"</i>   |       |          |  |               |                 |
| <b>990</b>         | Nelson Forests Limited  | 252   | Volume 1 | 16 Waste                               | Issue 16A     | Oppose          |
| Decision Requested | Develop policies and methods to address the issue of illegal dumping of solid waste – whether it is on public or private land.  |       |          |  |               |                 |
| <b>990</b>         | Nelson Forests Limited  | 253   | Volume 1 | 17 Transportation                      | Policy 17.4.1 | Support in Part |
| Decision Requested | Amend the explanation to the Policy as follows (or with words of similar effect) (bold) -<br><br><i>"A major method in the MEP for managing the efficiency of the road network is through identification of a road's function, which is established by the road hierarchy. It is important that subdivision or activities that generate traffic (whether on land or in the coastal marine area) are managed so that their location, density and/or scale does not impair the function of a particular road. <b>The functions of the roads (and hierarchy) must equally provide for expected rural/coastal industry transport needs.</b> Management will occur through district rules that describe where there is a need to consider the impacts of activities on the function of a road through <del>the</del> <b>a Controlled Activity</b> resource consent process."</i>   |       |          |  |               |                 |

| Sub No             | Submitter   | Point | Volume   | Chapter           | Provision     | Type            |
|--------------------|---|-------|----------|-------------------|---------------|-----------------|
| 990                | Nelson Forests Limited  | 254   | Volume 1 | 17 Transportation | Policy 17.5.6 | Oppose          |
| Decision Requested | <p>Amend the Policy as follows (strike through) -</p> <p><i>"Subdivision and land use activities shall avoid, remedy or mitigate adverse effects on the safety of and accessibility to the road network by ensuring:</i></p> <p><i>(a) buildings, vegetation and activities do not reduce clear sight lines for trains and road vehicles at level rail crossings or for vehicles at road intersections;</i></p> <p><i>(b) vegetation planted on land alongside rural roads is set back so that roads are not shaded and subjected to icing in winter;</i></p> <p><i>(c) adequate formal crossing facilities are provided where high levels of pedestrian activity are generated from an activity located adjacent to an arterial road or in a Business or Industrial zone;</i></p> <p><i>(d) activities do not create distractions for any road or rail users, including from glare, inappropriate lighting, smoke, <del>discharges</del> or other distractions;</i></p> <p><i>(e) vehicle crossing places and entrances from roads are constructed and maintained to standards appropriate to the circumstances of traffic volume, pedestrian and cycle movement and local traffic speed; and</i></p> <p><i>(f) new urban subdivisions and developments incorporate facilities for nonmotorised transport users, including:</i></p> <p><i>(i) footpaths or access ways intended to be used by both cyclists and pedestrians and their separation for safety reasons where practicable;</i></p> <p><i>(ii) provision for cycle traffic within road carriageways in such a way that lane width, design and surface finish are adequate to safely accommodate both motorised vehicles and cycles; and</i></p> <p><i>(iii) pedestrian access routes connecting residential areas, schools, shopping centres, recreation reserves and public transport collection points and terminals where appropriate."</i></p> <p>And, clarify what is mean by "<i>other distractions</i>" in clause (d).</p> <p>Amend the setback from roads for vegetation planting rule to align with the policy direction.</p> <p>Any rules resulting from this policy should either be a Permitted Activity (subject to performance standards) or a Controlled Activity.</p> |       |          |                   |               |                 |
| 990                | Nelson Forests Limited  | 255   | Volume 1 | 17 Transportation | Policy 17.6.1 | Oppose          |
| Decision Requested | <p>Amend the Policy as follows (or with words with similar effect) (bold) -</p> <p><i>"Maintain amenity values in rural and urban areas by encouraging the use of national and arterial routes by high volumes of traffic and heavy vehicles and discouraging high volume and heavy traffic use of collector routes and local routes, <b>when they do not need to use these roads to access their freight/produce</b>, particularly where these pass through residential areas."</i></p> <p>And, amend the explanation to the Policy as follows (or with words with similar effect) (bold) -</p> <p><i>"The current state of vehicle technology in New Zealand means that noise and vehicle emissions can be expected from the operation of vehicles on roads. There is little the MEP can do to modify those conditions. However, the Council can control the extent of these effects by adopting a road hierarchy, which encourages higher volumes of traffic and heavy traffic movements on certain routes and discourages them on others. An exception is made for some primary production activities, which need to use collector and local routes to transport produce to processing facilities, <b>ports or customers</b>."</i></p>  |       |          |                   |               |                 |

| Decision Requested | Please see attached submission.   |       |          |                |  |                 |
| 280                | Nelson Marlborough District Health Board  | 2     | Volume 1 | All            |  | Support         |
| Decision Requested | It is considered that the MEP would be more workable and user-friendly through merging and simplifying a large number of objectives and policies which seek overlapping outcomes, both within and between chapters. In achieving this, the style of the earlier part of Chapter 15 (relating to water) whereby Objectives are grouped together with a suite of policies below to collectively achieve those aims may be a good option. This section of the chapter avoided duplication and was found to be well set out and easy to follow.   |       |          |                |  |                 |
| 280                | Nelson Marlborough District Health Board  | 3     | Volume 2 | 25 Definitions | 25.  | Support in Part |
| Decision Requested | Provide definitions for the different terms used for water supplies which are consistent with other existing legislation.   |       |          |                |  |                 |
| 280                | Nelson Marlborough District Health Board  | 4     | Volume 1 | 2 Background   | Integrated management of the Marlborough environment | Support in Part |
| Decision Requested | <p>Amend the wording of the definition of integrated management to the following:<br/> <i>'Integrated management is an active process of managing the use, development and protection of natural and physical resources as a whole and recognises the following:</i><br/> ...<br/> <i>(d) That natural and physical resources cannot be managed without having regard to the social, economic, and cultural <b>and health and safety</b> interests of the community.</i><br/> ...'</p> <p>Amend the first sentence of the explanation to the following:<br/> <i>'The social, economic and cultural wellbeing <b>and health and safety</b> of our community relies on the use, development and protection of our land, water, air, soil, mineral and energy resources, plants and animals and structures.'</i></p> |       |          |                |  |                 |

| Sub No             | Submitter   | Point | Volume   | Chapter                                 | Provision  | Type            |
|--------------------|---|-------|----------|---|--|-----------------|
| 280                | Nelson Marlborough District Health Board  | 5     | Volume 1 | 2 Background                            | Working with others to sustainably manage Marlborough's natural and physical resources | Support in Part |
| Decision Requested | That the Nelson Marlborough District Health Board Public Health Service is identified under the 'Statutory agencies' section.   |       |          |   |  |                 |
| 280                | Nelson Marlborough District Health Board  | 6     | Volume 1 | 4 Use of Natural and Physical Resources | Issue 4B   | Support in Part |
| Decision Requested | That the explanation to Issue 4B recognises healthcare services and facilities as regionally significant infrastructure. That a definition is included in the MEP for 'healthcare services and facilities' which provides for physical and mental health facilities and services including, but not necessarily limited to, the Wairau Hospital, emergency services, general practices, and community support services.   |       |          |   |  |                 |
| 280                | Nelson Marlborough District Health Board  | 7     | Volume 1 | 4 Use of Natural and Physical Resources | Objective 4.2  | Support in Part |
| Decision Requested | <p>That the wording of the explanation to Objective 4.2 is amended to the following:<br/> <i>'... This includes the ability to <b>operate</b>, maintain, upgrade, and replace <b>and expand</b> existing infrastructure.'</i></p> <p>That an objective is included which recognises the importance of the establishment of regionally significant infrastructure.</p> <p>That policies are provided which give effect to Objective 4.2 in relation to existing regionally significant infrastructure (including the above recommended amendments) and the above recommended objective relating to the establishment of regionally significant infrastructure.</p> |       |          |   |  |                 |
| 280                | Nelson Marlborough District Health Board  | 8     | Volume 1 | 4 Use of Natural and Physical Resources | Policy 4.2.1   | Support in Part |
| Decision Requested | Amend Policy 4.2.1 so that 'healthcare services and facilities' is explicitly listed and provided for, as defined in point 5. above.  |       |          |   |  |                 |
| 280                | Nelson Marlborough District Health Board  | 9     | Volume 1 | 4 Use of Natural and Physical Resources | Policy 4.2.2   | Support in Part |
| Decision Requested | Amend the wording of the explanation to Policy 4.2.2 to the following:<br>'The effective and efficient operation of regionally significant infrastructure can be protected by avoiding the establishment of incompatible activities in locations where reverse sensitivity effects may arise close proximity to the infrastructure in the first place.'   |       |          |   |  |                 |
| 280                | Nelson Marlborough District Health Board  | 10    | Volume 1 | 5 Allocation of Public Resources        | 5.   | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter                          | Provision     | Type            |
|--------------------|--|-------|----------|----------------------------------|---------------|-----------------|
| Decision Requested | That the chapter is renamed so that it explicitly relates to the allocation of freshwater resources and coastal space (or occupation).   |       |          |                                  |               |                 |
| <b>280</b>         | Nelson Marlborough District Health Board   | 11    | Volume 1 | 5 Allocation of Public Resources | 5.            | Support in Part |
| Decision Requested | That the second paragraph of the introduction recognises that the allocation of public resources is integral to the health and safety of people and communities, including the provision of an example for the reader.   |       |          |                                  |               |                 |
| <b>280</b>         | Nelson Marlborough District Health Board   | 12    | Volume 1 | 5 Allocation of Public Resources | Objective 5.2 | Support in Part |
| Decision Requested | Amend the wording of the explanation to Objective 5.2 to the following:<br>'The natural and human use values supported by Marlborough's freshwater bodies are important to retain given their contribution to the social, economic and cultural wellbeing and health and safety of the community.'   |       |          |                                  |               |                 |
| <b>280</b>         | Nelson Marlborough District Health Board   | 13    | Volume 1 | 5 Allocation of Public Resources | Policy 5.3.1  | Support in Part |
| Decision Requested | That the consumptive uses and order of priority for water allocation are reviewed and that municipal water supply is given a higher priority which recognises its importance as a critical use and provides consistency with Policy 5.3.4 of the MEP.  |       |          |                                  |               |                 |
| <b>280</b>         | Nelson Marlborough District Health Board   | 14    | Volume 1 | 5 Allocation of Public Resources | Policy 5.3.4  | Support in Part |
| Decision Requested | Consider expanding Policy 5.3.4 to also include networked community water supplies not administered by the MDC.  |       |          |                                  |               |                 |
| <b>280</b>         | Nelson Marlborough District Health Board   | 15    | Volume 1 | 5 Allocation of Public Resources | Policy 5.3.11 | Support in Part |
| Decision Requested | Amend the wording of Policy 5.3.11 so that it provides for reverse sensitivity effects on other activities including the effects of a water take on existing lawful point source discharges and the ability to maintain adequate assimilative capacity within receiving waters to ensure adverse effects on people's safety or the environment do not arise. |       |          |                                  |               |                 |
| <b>280</b>         | Nelson Marlborough District Health Board   | 16    | Volume 1 | 9 Public Access and Open Space   | Policy 9.3.7  | Support in Part |
| Decision Requested | Amend the explanation to Policy 9.3.7 to recognise the importance of walking and cycling linkages in supporting connected neighbourhoods and communities, active transport options, and reducing vehicle and fossil fuel usage.  |       |          |                                  |               |                 |

| Sub No             | Submitter  | Point | Volume   | Chapter                        | Provision      | Type            |
|--------------------|--|-------|----------|--------------------------------|----------------|-----------------|
| 280                | Nelson Marlborough District Health Board   | 17    | Volume 1 | 9 Public Access and Open Space | Policy 9.3.9   | Support in Part |
| Decision Requested | <p>That the following amendments ( strike through bold and bold) are made to Policy 9.3.9:</p> <p><i>Policy 9.3.9 – In assessing the impacts of subdivision or development through resource consent applications, consideration shall be given to the need for public open space and recreation areas to provide for:</i></p> <p><i>(a) additional neighbourhood parks needed as a result of additional residential and visitor accommodation across Marlborough;</i></p> <p><i>(b) additional open space necessary for visual relief and plantings amongst the built environment; <del>and</del></i></p> <p><i>(c) the development of neighbourhood parks and open space areas that are <b>safe</b>, useable and enjoyable <b>and</b></i></p> <p><b><i>(d) the development of walking and cycling linkages to support connected neighbourhoods and communities, active transport options, and recreational opportunities.</i></b></p> |       |          |                                |                |                 |
| 280                | Nelson Marlborough District Health Board   | 18    | Volume 1 | 12 Urban Environments          | Objective 12.1 | Support in Part |
| Decision Requested | Amend Objective 12.1 to recognise and provide for compatible and appropriately managed mixed use developments within residential zones.  |       |          |                                |                |                 |
| 280                | Nelson Marlborough District Health Board   | 19    | Volume 1 | 12 Urban Environments          | Policy 12.1.3  | Support in Part |
| Decision Requested | Re-consider the potential policy outcomes of not providing for infill development, smaller lot sizes and greater density in Urban Residential 2 Zone (in addition to providing for intensification development) in relation to addressing Issue 12A of the MEP (providing for flexibility in the size and type of dwelling options available including in relation to an aging population and increase in single person households) and providing for consolidated development (e.g. Policy 17.6.3)  |       |          |                                |                |                 |
| 280                | Nelson Marlborough District Health Board   | 20    | Volume 1 | 12 Urban Environments          | Policy 12.2.1  | Support in Part |

| Sub No             | Submitter   | Point | Volume   | Chapter               | Provision     | Type            |
|--------------------|---|-------|----------|-----------------------|---------------|-----------------|
| Decision Requested | Amend the wording of Policy 12.2.1 to the following:<br><i>'The character and amenity of residential areas within Marlborough's urban environments will be maintained and enhanced by:</i><br>(a) <i>providing for a range of areas with different residential densities and lot sizes, including for infill, greenfield and large lot developments</i><br>(b) <i>ensuring there are residential areas within walkable distance to community, social and business facilities</i><br>(c) <i>providing for sufficient <b>open spaces and parks</b> that are <b>equitably distributed</b>, and integrated, <b>accessible and safe, and vary in size, form and their use including through incorporating diverse aspects such as streets, walkways, vegetation and views</b> <del>open spaces and parks to meet people's recreational needs</del></i><br>(d) <i><b>providing for walking and cycling linkages to support connected neighbourhoods and communities, active transport options, and recreational opportunities</b></i><br>(e) <i>higher standards of <b>urban design that positively contributes to public space amenity and safety</b>, visual interest and <b>amenity and activity</b></i><br>(f) <i>ensuring people's health and wellbeing through good building design, including energy efficiency and the provision of natural light; and</i><br>(g) <i>effective and efficient use of existing and new infrastructure networks.</i> |       |          |                       |               |                 |
| <b>280</b>         | Nelson Marlborough District Health Board  | 21    | Volume 1 | 12 Urban Environments | Policy 12.3.3 | Support in Part |
| Decision Requested | Amend Policy 12.3.3 to recognise and provide for compatible and appropriately managed mixed use developments within all residential areas.  |       |          |                       |               |                 |
| <b>280</b>         | Nelson Marlborough District Health Board  | 22    | Volume 1 | 12 Urban Environments | Policy 12.4.2 | Support in Part |
| Decision Requested | Amend Policy 12.4.2 to recognise residential living as an accepted activity within the central business areas of Blenheim and Picton.   |       |          |                       |               |                 |
| <b>280</b>         | Nelson Marlborough District Health Board  | 23    | Volume 1 | 12 Urban Environments | Policy 12.6.2 | Support in Part |
| Decision Requested | Provide separate policies for amenity outcomes sought for business and industrial zones and amend the wording of Policy 12.6.2 to the following:<br><i>'Development <del>of activities in business or industrial</del> zones will provide good amenity outcomes through the following:</i><br>(a) <i>ensuring people's health and wellbeing are maintained and enhanced through good building design</i><br>(b) <i>requiring a high standard <b>of design that positively contributes to amenity, public safety and</b> visual interest and <del>amenity qualities</del> (noise levels, minimal dust and odour, privacy, overall volumes of traffic movements, building bulk and density and access to daylight, <b>street lighting and visibility</b>)</i><br>(c) <i><b>ensuring a layout that allows easy access for people of all ages and abilities, is convenient and safe for pedestrians and cyclists, and includes connections within the development and/or with surrounding areas and services</b></i><br>(d) <i>providing planting on road reserve</i><br>(e) <i>requiring integration of landscaping on individual allotments to soften the appearance of buildings fronting the road in areas outside of the streets identified in Appendix 18.</i>  |       |          |                       |               |                 |
|                    | That the permitted activity standards for commercial activity (rules 9.3.1 and 10.3.1.1), and large format retail (rule 11.3.1) reflect the above changes   |       |          |                       |               |                 |

| Sub No             | Submitter   | Point | Volume   | Chapter                                | Provision      | Type            |
|--------------------|---|-------|----------|--|----------------|-----------------|
| 280                | Nelson Marlborough District Health Board  | 24    | Volume 1 | 14 Use of the Rural Environment        | Policy 14.1.2  | Support in Part |
| Decision Requested | Amend the wording of Policy 14.1.2 to the following:<br>'Subdivision <b>location, density and P</b> parcel size in rural environments shall ensure there is adequate choice for primary production and avoids the fragmentation of land for primary productive use.'  |       |          |  |                |                 |
| 280                | Nelson Marlborough District Health Board  | 25    | Volume 1 | 14 Use of the Rural Environment        | Policy 14.1.4  | Support in Part |
| Decision Requested | Amend Policy 14.1.4 to address potential adverse effects on the health and safety of people and the ability of adjacent landowners to enjoy their land.   |       |          |  |                |                 |
| 280                | Nelson Marlborough District Health Board  | 26    | Volume 1 | 14 Use of the Rural Environment        | Policy 14.1.5  | Support in Part |
| Decision Requested | Review the volume of water required to be of a drinking water standard to ensure that it is both reasonable and feasible.   |       |          |  |                |                 |
| 280                | Nelson Marlborough District Health Board  | 27    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.1.24 | Support in Part |
| Decision Requested | Include a policy that requires operators to appropriately locate, design, construct and manage treatment and/or spill response facilities (where appropriate) for hazardous substances.<br><br>That the same or similar policy is required in relation to preventing or mitigating the contamination of soils (for instances where activities do not occur on impervious surfaces where stormwater contamination is of more concern). |       |          |  |                |                 |
| 280                | Nelson Marlborough District Health Board  | 28    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | 15.M.11        | Support in Part |
| Decision Requested | That Method 15.M.11 is amended to include the Nelson Marlborough District Health Board as one of the parties to liaise with in determining uses and values of waterbodies.  |       |          |  |                |                 |
| 280                | Nelson Marlborough District Health Board  | 29    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.1.32 | Support in Part |
| Decision Requested | Amend Policy 15.1.32 to include a criterion for considering the effects of sedimentation on the aquatic/marine environments and associated social, cultural and economic values of areas not identified within Schedule 1 of Appendix 5 or Appendix 2 of the MEP.   |       |          |  |                |                 |
| 280                | Nelson Marlborough District Health Board  | 30    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.2.2  | Support in Part |

| Sub No             | Submitter   | Point | Volume   | Chapter                                | Provision     | Type            |
|--------------------|---|-------|----------|--|---------------|-----------------|
| Decision Requested | Amend the wording of Policy 15.2.3 to the following:<br>'Require all new <b>and replacement</b> multi-fuel <b>and wood</b> burning appliances to comply with the National Environmental Standards for Air Quality design standard for wood burning appliances'  |       |          |  |               |                 |
| <b>280</b>         | Nelson Marlborough District Health Board  | 31    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.2.3 | Support in Part |
| Decision Requested | Amend the wording of Policy 15.2.3 to the following:<br>'Require all new and replacement multi-fuel and wood burning appliances to comply with the National Environmental Standards for Air Quality design standard for wood burning appliances'  |       |          |  |               |                 |
| <b>280</b>         | Nelson Marlborough District Health Board  | 32    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | Policy 15.3.5 | Support in Part |
| Decision Requested | Amend the wording of Policy 15.3.5 to the following:<br>'Manage the discharge of contaminants to air not specifically provided for in Policies 15.2.1 to 15.2.3 or 15.3.1 to 15.3.4 by:<br>...<br>(c) avoiding or mitigating adverse effects on any other values <b>including as a result of cross media effects between air and other receiving environments</b> . |       |          |  |               |                 |
| <b>280</b>         | Nelson Marlborough District Health Board  | 33    | Volume 1 | 15 Resource Quality (Water, Air, Soil) | 15.M.30       | Support in Part |
| Decision Requested | Amend Method 15.M.30 so that the community is well informed about how to operate their wood burners correctly to ensure more efficient heating and less pollution. This includes burning the right wood (dry, seasoned hardwood; no chemical treatment or rubbish) the right way (hot and not smouldering fire, not overloading the appliance).                     |       |          |  |               |                 |

| Sub No             | Submitter  | Point | Volume   | Chapter           | Provision     | Type            |
|--------------------|--|-------|----------|-------------------|---------------|-----------------|
| 280                | Nelson Marlborough District Health Board   | 34    | Volume 1 | 16 Waste          | Policy 16.2.6 | Support in Part |
| Decision Requested | <p>Amend the wording of Policy 16.2.6 to the following:<br/> <i>'In deciding whether to grant resource consent for any discharge of solid waste to land and the need to impose consent conditions to avoid, remedy or mitigate adverse effects, decision makers need to determine whether there will be:</i></p> <ul style="list-style-type: none"> <li><i>(a) soil or groundwater contamination from the accumulation <b>or leaching</b> of heavy metals <del>and other</del>, hazardous substances <b>or other contaminants</b></i></li> <li><i>(b) contamination of waterbodies through runoff of sediment or leachate</i></li> <li><i>(c) erosion, land instability and/or run-off of sediment into waterbodies due to land disturbance activities associated with the activity</i></li> <li><i>(d) <b>adverse effects on public health or amenity</b></i></li> <li><i>(e) <del>reduced amenity values due to disposal of unauthorised material resulting in odours, rubbish accumulation and vermin</del></i></li> <li><i>(f) adverse effects to the mauri of ecosystems, waahi tapu sites and other sites of cultural significance by discharges of sediment or leachate onto or into land.</i></li> </ul> |       |          |                   |               |                 |
| 280                | Nelson Marlborough District Health Board   | 35    | Volume 1 | 17 Transportation | Policy 17.6.3 | Support in Part |
| Decision Requested | <p>Amend Policy 17.6.3 to reflect other measures in reducing vehicle and fossil fuel usage, including through incorporating the intent of Policy 17.6.4.<br/> Suggested amendment:<br/> <i>'Mitigate the adverse effects of vehicle and fossil fuel usage where practicable <b>and foster improved community health by:</b></i></p> <ul style="list-style-type: none"> <li><i>(a) reducing potential travel times <del>to and from home, work community and business places</del>, through consolidated development of Marlborough's towns</i></li> <li><i><b>(b) providing active transport routes such as walkways and cycleways;</b></i></li> <li><i><b>(c) providing an integrated public transport, walking and cycling network</b></i></li> <li><i><b>(d) providing walkable and connected neighbourhoods and communities; and</b></i></li> <li><i><b>(e) promoting local economies for food, produce and other production.</b></i></li> </ul>   |       |          |                   |               |                 |
| 280                | Nelson Marlborough District Health Board   | 36    | Volume 1 | 18 Energy         | Policy 18.2.1 | Support in Part |
| Decision Requested | <p>That the explanation to Policy 18.2.1 is amended to recognise the importance of retrofitting insulation into existing housing stock in terms of increasing energy efficiency (alongside behavioural change).</p> <p>That a non-regulatory method is included whereby MDC will consider supporting programmes that retrofit insulation into existing homes and/or other initiatives aimed at improving thermal efficiency and home heating.</p>  |       |          |                   |               |                 |

|--------------------|--|-------|----------|---|--------------------|-----------------|
| 509                | Nelson Marlborough Fish and Game   | 10    | Volume 1 | 2 Background                              | How to use the MEP | Oppose          |
| Decision Requested | <p>This section of the Plan needs to be amended to better reflect the full range of policy settings and stances available under the RMA, from protection through to enabling. The RMA is not only about enabling. While Section 5 of the RMA enables people and communities to provide for their social, economic and cultural well-being this enabling is undertaken in the context of sustaining the potential of natural and physical resources, safeguarding the life-supporting capacity of air, water, soil and ecosystems and avoiding, remedying or mitigating any adverse effects on the environment. For freshwater matters, an environmental bottom line approach applies, in order to give effect to the National Policy Statement on Freshwater Management 2014</p> <p>Clarification should be made that the "Sections 12, 13, 14 and 15" referred to are in fact sections of the Resource Management Act and not sections of the PMEP.</p> |       |          |   |                    |                 |
| 509                | Nelson Marlborough Fish and Game   | 11    | Volume 1 | 2 Background                              | How to use the MEP | Oppose          |
| Decision Requested | <p>Amend the description of what it means to "avoid" adverse effects to reflect the meaning of "not allow" or "prevent the occurrence of" clarified through the King Salmon Supreme Court decision.</p> <p>Consequently, those policies using the term 'avoid' should be amended and interpreted to reflect this same meaning and not remediation or mitigation as suggested in the existing explanation.</p>  |       |          |   |                    |                 |
| 509                | Nelson Marlborough Fish and Game   | 12    | Volume 1 | 2 Background                              | How to use the MEP | Oppose          |
| Decision Requested | <p>Amend the description of what it means to "protect" to reflect the meaning that the adverse effects to be avoided, and what is inappropriate should be assessed with reference to what is being 'protected' clarified through the King Salmon Supreme Court decision. Consequently, those policies using the term 'protect' should be amended and interpreted to reflect this same meaning and not in the "number of ways" as the Plan suggests.</p>  |       |          |   |                    |                 |
| 509                | Nelson Marlborough Fish and Game   | 13    | Volume 3 | Appendix 6 Environmental Flows and Levels | Schedule 1         | Oppose          |
| Decision Requested | <p>Clarify the relationship between water resource availability and the allocation limits set to ensure that limits set are actually within a realistic standard and align with the requirements of the draft National Environmental Standard on Flow Setting (2008). Introduce new objectives, policies, and rules to underpin freshwater management, environmental flow and level setting, and surface and groundwater allocation in the Marlborough Region.</p>   |       |          |   |                    |                 |
| 509                | Nelson Marlborough Fish and Game   | 14    | Volume 1 | 4 Use of Natural and Physical Resources   | Issue 4A           | Support in Part |
| Decision Requested | <p>Amend the issue to reflect the importance of the "sustainable management" of "natural and physical resources".</p>  |       |          |   |                    |                 |
| 509                | Nelson Marlborough Fish and Game   | 15    | Volume 1 | 4 Use of Natural and Physical Resources   | Objective 4.1      | Oppose          |

| Decision Requested | Retain the policy with amendments that amend Policy 5.2.5 to replace the use of the term prevent with avoid.  |       |          |                                  |              |                 |
| 509                | Nelson Marlborough Fish and Game  | 37    | Volume 1 | 5 Allocation of Public Resources | Policy 5.2.6 | Oppose          |

| Sub No             | Submitter   | Point | Volume   | Chapter                          | Provision     | Type            |
|--------------------|---|-------|----------|----------------------------------|---------------|-----------------|
| Decision Requested | Fish and Game seek that 24-hour averaging is replaced with "on an instantaneous basis by way of a hydrological model."<br>The use of 24-hour daily flow averaging to assess when irrigation restrictions are triggered is problematic due to fluctuations in flow, sometimes large, over a 24 hour period, due to natural variance, abstraction and/or hydro generation. This is particularly problematic during periods of low flow and when large volumes of water have been allocated for abstraction. Using a 24 hour average flow can enable abstractive use to manipulate flows substantially below the minimum for significant periods of time.<br>An instantaneous minimum flow can be implemented as a synthetic flow at particular points on the river through the adoption of a hydrological model that filters out the effect of fluctuating inputs into the main stem Wairau from the Branch River hydro scheme, taking into account transit time, inputs from higher catchment recorders, and the existing recorder. The rules for this model should be written into the MEP by way of an Appendix, to ensure clarity, transparency, and consistency for all users. |       |          |                                  |               |                 |

| Decision Requested | Retain as proposed  |       |          |                                  |               |                 |
| <b>509</b>         | Nelson Marlborough Fish and Game  | 39    | Volume 1 | 5 Allocation of Public Resources | Policy 5.2.8  | Oppose          |
| Decision Requested | Remove the policy and replace it with a policy that ensures that limits cannot be changed without a plan change through the First Schedule process.   |       |          |                                  |               |                 |
| <b>509</b>         | Nelson Marlborough Fish and Game  | 40    | Volume 1 | 5 Allocation of Public Resources | Policy 5.2.9  | Support in Part |
| Decision Requested | Having regard to adverse effects does not provide any protection or mitigation to waterbodies from the instantaneous rate of take. The policy does not provide sufficient direction for decision makers. It also potentially sets up two classes of river, permanently flowing rivers and those that are ephemeral, and creates the risk of a more lax environmental management regime for those rivers.<br>Fish and Game seek to retain the policy with amendments that avoid adverse effects on any waterbody from an instantaneous rate of take.   |       |          |                                  |               |                 |
| <b>509</b>         | Nelson Marlborough Fish and Game  | 41    | Volume 1 | 5 Allocation of Public Resources | Policy 5.2.10 | Support in Part |
| Decision Requested | The policy takes into account the connectivity of waterbodies and the contribution that intermittently flowing rivers make to hydrology in other waterbodies. However, the policy requires amendment to ensure that the values of the intermittently flowing rivers are also recognised and protected. Fish and Game seek to retain the policy with amendments that ensure that the values of the intermittently flowing rivers are recognised and protected.   |       |          |                                  |               |                 |

|--------------------|--|-------|----------|----------------------------------|--------------|-----------------|
| Decision Requested | <p>Replace the policy with a more thorough policy, one reasonable to achieve the same intent as Policy 5-12 of the One Plan .</p> <p>The amount of water taken by resource users must be reasonable and justifiable for the intended use. In addition, the following specific measures for ensuring reasonable and justifiable use of water must be taken into account when considering consent applications to take water for irrigation, public water supply, animal drinking water, dairy shed wash down or industrial use, and during reviews of consent conditions for these activities.</p> <p>(a) For irrigation, resource consent applications must be required to meet a reasonable use test in relation to the maximum daily rate of abstraction, the irrigation return period and the seasonal or annual volume of the proposed take. When making decisions on the reasonableness of the rate and volume of take sought, the Regional Council must:</p> <p>(i) consider land use, crop water use requirements, on-site physical factors such as soil water-holding capacity, and climatic factors such as rainfall variability and potential evapo-transpiration lower application efficiency), or on the basis of a higher efficiency where an application is for an irrigation system with a higher efficiency</p> <p>(iii) link actual irrigation use to soil moisture measurements or daily soil moisture budgets in consent conditions.</p> <p>(b) For domestic use, animal drinking water and dairy shed wash down water, reasonable needs must be calculated as:</p> <p>(i) up to 300 litres per person per day for domestic needs</p> <p>(ii) up to 70 litres per animal per day for drinking water</p> <p>(iii) up to 70 litres per animal per day for dairy shed wash down.</p> <p>(c) For industrial uses, water allocation must be calculated where possible in accordance with best management practices for water efficiency for that particular industry.</p> <p>(d) For public water supplies, the following must generally be considered to be reasonable:</p> <p>(i) an allocation of 300 litres per person per day for domestic needs, plus</p> <p>(ii) an allocation for commercial use equal to 20% of the total allocation for domestic needs, plus</p> <p>(iii) an allocation for industrial use calculated, where possible, in accordance with best management practices for water efficiency for that particular industry, plus</p> <p>(iv) an allocation necessary for hospitals, other facilities providing medical treatment, marae, schools or other education facilities, New Zealand Defence Force facilities or correction facilities, plus</p> <p>(v) an allocation necessary for public amenity and recreational facilities such as gardens, parks, sports fields and swimming pools, plus</p> <p>(vi) an allocation necessary to cater for the reasonable needs of animals or agricultural uses that are supplied by the public water supply system, plus</p> <p>(vii) an allocation necessary to cater for growth, where urban growth of the municipality is provided for in an operative district plan for the area and is reasonably forecast, plus (viii) an allocation for leakage equal to 15% of the total of (i) to (vii) above.</p> <p>(e) When making decisions on consent applications where the existing allocation for a public water supply exceeds the allocation determined in accordance with (d)(i) to (d)(vi) above:</p> <p>(i) consideration must be given to imposing a timeframe within which it is reasonably practicable for the existing allocation to be reduced to the determined amount, or</p> <p>(ii) if (i) is not imposed, an alternative allocation must be determined based on the particular social and economic circumstances of the community serviced by the public water supply and the actual and potential effects of the abstraction on the relevant Schedule B Values for the reach of river or its bed affected by the take.</p> |       |          |                                  |              |                 |

| Decision Requested | Retain Policy 13.5.1 as notified.   |       |          |                                   |               |                 |
| <b>993</b>         | New Zealand Fire Service Commission   | 17    | Volume 1 | 14 Use of the Rural Environment   | Policy 14.1.5 | Oppose          |
| Decision Requested | Amend the Policy and the explanation to the Policy as follows (bold) -<br><i>" Policy 14.1.5 – Require rural subdivisions to provide a minimum of two cubic metres of drinkable water per new allotment, per day <b>and adequate firefighting water supply</b>.<br/> The Provisions of the MEP enable a dwelling house to be established on rural properties (including those in the coastal environment) as a permitted activity. This reasonably creates an expectation that there will be sufficient water of adequate quality on the property to provide for an individual's reasonable domestic needs <b>and for firefighting purposes</b>. Those <b>domestic</b> needs including drinking, other household uses, garden water and other incidental uses around the household. To ensure that these needs are able to be met, the policy requires any application for a subdivision creating a new allotment(s) where no reticulated water supply is available to demonstrate that each allotment has access to at least two cubic metres of drinkable water per day and is able to provide adequate water supply for firefighting purposes. The policy does not specify the source of the water or the method of provision, providing the flexibility (through the Code of Practice) to determine arrangements appropriate to the circumstances."</i> |       |          |                                   |               |                 |

| <b>994</b>         | New Zealand Fish Passage Advisory Group  | 1     | Volume 1 | 5 Allocation of Public Resources        | Policy 5.2.4 | Support in Part |

Decision  
Requested

Add to these policies so they apply more broadly to include all structures in waterways. Add to these policies with respect to consent renewal and delaying the legal effect of the rules to allow time to remediate the in-stream structures:

**Policy (a):** To assess the need to provide for the passage of fish at existing structures when renewing consents or when setting priorities for remedial or enforcement action, by taking into account:

- (a) quantity of habitat upstream of the barrier;
- (b) whether the stream is continuously flowing or ephemeral, and the extent to which the barrier affects fish passage at a range of stream flows;
- (c) significance and quality of the habitat, including presence of threatened species or effects of predator species on indigenous species;
- (d) proximity of barrier to the sea;
- (e) costs associated with any works required to provide fish passage at a site or several sites on the same river and including any likely adverse effects of the retrofit on adjacent landowners and any adverse effects on hydraulic efficiency;
- (f) proximity and effects of other fish barriers, including natural barriers in the same stream;
- (g) whether the structure is still used or the time until any programmed replacement;
- (h) whether there are alternative methods of providing for the passage of fish.

**Policy (b):** To delay the legal effect of the rules regulating culverts, fords and tidal flood gates existing as at [plan notification date] until five years from the operative date and to:

- (a) require resource consents or
- (b) take enforcement action for structures that do not provide for fish passage at that time unless:
  - (i) the structure has been assessed against policy (a) as not requiring provision of fish passage or
  - (ii) a plan is prepared which includes:
    - (-) a description of the works required to provide for fish passage;
    - (-) a target completion date for the required work.
- (e) the works have been completed by the specified date.

- (c) significance and quality of the habitat, including presence of threatened species or effects of predator species on indigenous species;
- (d) proximity of barrier to the sea;
- (e) costs associated with any works required to provide fish passage at a site or several sites on the same river and including any likely adverse effects of the retrofit on adjacent landowners and any adverse effects on hydraulic efficiency;
- (f) proximity and effects of other fish barriers, including natural barriers in the same stream;
- (g) whether the structure is still used or the time until any programmed replacement;
- (h) whether there are alternative methods of providing for the passage of fish.

**Policy (b):** To delay the legal effect of the rules regulating culverts, fords and tidal flood gates existing as at [plan notification date] until five years from the operative date and to:

- (a) require resource consents or
- (b) take enforcement action for structures that do not provide for fish passage at that time unless:
  - (i) the structure has been assessed against policy (a) as not requiring provision of fish passage or
  - (ii) a plan is prepared which includes:
    - (-) a description of the works required to provide for fish passage;
    - (-) a target completion date for the required work.
- (e) the works have been completed by the specified date.

| Decision Requested | That Policy 5.10.6 is amended to provide for any other relevant matter to be considered as well.<br>Add new rules, or modify existing rules to give effect to the objective and policy modifications sought.   |       |          |                     |               |        |
| <b>995</b>         | New Zealand Forest Products Holdings Limited   | 12    | Volume 1 | 6 Natural Character | Objective 6.2 | Oppose |
| Decision Requested | <p>It is considered some primary production activities may serve to enhance the natural character of an area. It is anticipated that this may occur when an area of pastoral farming is planted in forest. Commercial forestry should be enabled in these circumstances.</p> <p>Without limiting the generality of the foregoing, to address matters the Submitter also seeks the following relief:</p> <p>(a) Include new policies which recognise that where land containing commercial forestry is identified as having natural character, the effects of forestry and the intensification and development of forestry is not an adverse effect, but is inherent to the character of the area, otherwise areas of land which are currently commercial forestry should not be recognised as having natural character;</p> <p>(b) The objectives and policies, particularly (but not limited to) Policy 6.13 and 6.15 which recognise 'human induced modification' affects the 'natural character' of an area be retained;</p> <p>(c) The objectives and policies, particularly (but not limited to) Policy 6.2.5 should be retained and amended to enable the ongoing use of existing primary production activities in such locations;</p> <p>(d) The objectives and policies, particularly (but without limitation) Policies 6.2.1 to 6.2.3 which require that adverse effects only be 'avoided' should be amended to include 'remedied or mitigated';</p> <p>(e) Recognise that primary production activities such as commercial forestry have the potential to enhance the natural character in an area. To that extent Policy 6.2.6 is supported subject to specific amendments being made to recognise commercial forestry; and</p> <p>(f) Add new rules, or modify existing rules to give effect to the objective and policy modifications sought.</p> |       |          |                     |               |        |

|--------------------|--|-------|----------|---------------------------|-----------|-----------------|
| Decision Requested | <p>Without limiting the generality of the foregoing, to address matters the Submitter also seeks the following relief:</p> <p>(a) The objectives and policies particularly (but not limited to) Objective 7.1. and Policies 7.1.1 to 7.1.4 should be amended so that land subject to commercial forestry is excluded from being classified as an Outstanding Natural Features/Landscapes. Additionally, land with existing commercial forestry should be excluded from areas of Outstanding Natural Features/Landscapes. Much of that land comprises commercial forestry. It is inappropriate for land comprising commercial forestry to be Identified as part of an Outstanding Natural Feature I Landscape when it is well known that is was planted for commercial purposes and would be cleared at some time in the future, with consequent visual effects arising from clearing. The Submitter seeks the exclusion of the areas of Outstanding Natural Feature/Landscape insofar as it consists of commercial forestry. The significant problems with including commercial forestry in Outstanding Natural Features/Landscapes are addressed below by reference to a particular policy that applies to the Coastal Environment Zone.</p> <p>In the alternative, if the land with existing commercial forestry is not excluded from areas of Outstanding Natural Features/Landscapes then the following relief is sought:</p> <p>(a) the objectives and policies, particularly (but not limited to) the Introduction, Policy 7.2.3, Policy 7.2.6, Policy 7.2.7 and Policy 7.2.8 should be amended to recognise that commercial forestry forms, contributes to and is part of the identifiable Marlborough Sounds landscape and should be enabled (including its development, optimisation and expansion) within the rules that seek to protect landscape values; and</p> <p>In addition to the relief sought above:</p> <p>(a) New objectives and policies are required to recognise the importance of primary industry (specifically commercial forestry), rural industry and transport infrastructure, to the region, even within the Marlborough Sounds landscape;</p> <p>(b) The objectives and policies particularly (but not limited to) the Introduction, Policy 7.2.3, Policy 7.2.6, Policy 7.2.7 and Policy 7.2.8 be amended to:</p> <p>(i) Enable minor expansion of existing forestry without resource consent</p> <p>(ii) Enable the intensification of commercial forestry in those areas where it is already established and In areas adjacent existing commercial forestry, particularly where such a use may be anticipated by the underlying zoning; and</p> <p>(iii) Recognise commercial forestry activities in areas not identified as outstanding, only require controlled or restricted discretionary consent.</p> <p>(c) Add new rules, or modify existing rules to give effect to the objective and policy modifications sought.</p> |       |          |                           |           |                 |
| 995                | New Zealand Forest Products Holdings Limited   | 14    | Volume 1 | 8 Indigenous Biodiversity | 8.        | Support in Part |

| Sub No             | Submitter  | Point | Volume   | Chapter                        | Provision | Type   |
|--------------------|--|-------|----------|--------------------------------|-----------|--------|
| Decision Requested | <p>Without limiting the generality of the foregoing, to address matters the Submitter also seeks the following relief:</p> <p>(a) The objectives and policies, particularly (but not limited to) Objective 8.1 and Policy 8.1.2 should be amended to make it clear that appropriate (not absolute) protection of significant indigenous biodiversity is to be achieved. The current provisions suggest that the protection of significant indigenous biodiversity is too absolute;</p> <p>(b) The objectives and policies, particularly (but not limited to) Policy 8.1.1 should be amended to provide that even where an area has been assessed as having significant indigenous biodiversity value, it may not be mapped as "significant" where doing so would be inconsistent with the other objectives and policies of the plan;</p> <p>(c) The objectives and policies, particularly (but not limited to) Policy 8.2.9 overreaches by seeking to maintain, enhance or restore all ecosystems, irrespective of whether they are significant. It is not clear that the Council properly understood the impact of this policy. Policy 8.2.9 should be amended so that it is not directive and instead uses wording similar to Policy 8.2.5 - by seeking to encourage the positive outcomes identified. The objectives and policies, particularly (but not limited to) Policies 8.3.1, 8.3.2 and 8.3.8 fail to make appropriate provision for development (rural industry) and infrastructure that has a locational need to be in a particular location and where there are no reasonably practical alternatives. The objectives and policies should be amended to provide a limited exemption in this circumstance and expressly provide for effects to be remedied, mitigated or off-set in such circumstances. This is significant in Marlborough where there are large areas of land devoted to primary produce, significant roading constraints and emphasis on greater use of the CMA as a transport option; and</p> <p>( d) Add new rules, or modify existing rules to give effect to the objective and policy modifications sought.</p> |       |          |                                |           |        |

|--------------------|--|-------|----------|-----------------------------------|-----------|--------|
| Decision Requested | <p>The Submitter seeks the following relief:</p> <p>(a) The objectives and policies, particularly (but not limited to) Policy 9.1.1 should recognise that there is sufficient public access to Port Underwood in a number of locations and it should not be a priority for public access. Furthermore enhancing public access in this area could create health and safety issues with the extent of logging trucks on the road;</p> <p>(b) The objectives and policies, particularly (but not limited to) Policy 9.1.12 should recognise that some types of subdivision and development (including transport and infrastructure), which require an operational connection between the land and the sea, cannot provide esplanade reserves and achieve operational requirements (including health and safety) and that in such situations, the Council should properly take account of those operational issues, alternative access to (or from point to point) the CMA proposed by the Applicant so that overall a net improvement in public access is achieved (in a similar way to Policy 9.1.14) along with any other relevant factors;</p> <p>(c) The objectives and policies should seek to avoid zoning land as open space where it is privately held and the owner does not consent to such zoning. otherwise the zoning may be in breach of section 85 of the Act;</p> <p>(d) The Open Space zoning of land not owned by the Council or the Department of Conservation, or that neither of them have agreement with the owners to zone as open space is opposed; and</p> <p>(e) Add new rules, or modify existing rules to give effect to the objective and policy modifications sought.</p> |       |          |                                   |           |        |
| <b>995</b>         | New Zealand Forest Products Holdings Limited   | 16    | Volume 1 | 11 Natural Hazards                | 11.       | Oppose |
| Decision Requested | <p>The objectives and policies should recognise that some areas of land may be appropriately used for certain activities such as forestry. This should be recognised in Policy 11.1.21.</p> <p>The policy should also be amended to recognise that work or land use on slopes classified as having land instability issues can appropriately occur, where adverse effects on land instability can be appropriately remedied or mitigated.</p> <p>In addition, new rules should be added, or existing rules modified to give effect to the objective and policy modifications sought.</p>   |       |          |                                   |           |        |
| <b>995</b>         | New Zealand Forest Products Holdings Limited   | 17    | Volume 1 | 13 Use of the Coastal Environment | 13.       | Oppose |

|--------------------|---|-------|--------|---------|-----------|------|
| Decision Requested | <p>Without limiting the generality of the foregoing, to address matters the Submitter also seeks the following relief:</p> <p>(a) New objectives and policies will need to be inserted into the Coastal Environment chapter that enable and provide for commercial forestry and associated activities that are the same as or similar to those used in the Rural Environment Zone. However specific objectives and policies may also be required and could include for example (but without limitation):</p> <p>(i) A new objective under Issue 13A to enable the ongoing use, optimisation and development of commercial forests in the Coastal Environment Zone. The associated policies will need to:</p> <p>A. Enable the harvesting and replanting of commercial forests along with associated land use and stormwater diversion activities;</p> <p>B. Enable the expansion of commercial forests within existing titles by up to 10%; and</p> <p>C. Enable increased intensification of commercial forests (including increased stocking rates and rotation rates).</p> <p>(ii) A new objective to enable rural industry to be located in the Coastal Environment Zone where it supports an existing primary industry In that zone. Associated policies will need to:</p> <p>A. Enable rural industry to support primary industry;</p> <p>B. Recognise that rural industry often has a functional need to establish in certain locations;</p> <p>C. Recognise that the topography of Marlborough means that there are limited sites suitable for rural industry;</p> <p>D. Allow rural industry to establish, notwithstanding potentially significant local effects, where there are limited alternatives.</p> <p>(iii) A new objective will need to be Inserted that enables transport infrastructure that supports the use and development of primary industry. Associated policies will need to:</p> <p>A. Enable the development and construction of new roads, the widening of existing roads, and the establishment and operation of forestry roads;</p> <p>B. Enable the use of existing roads by vehicles associated with primary production activities;</p> <p>C. Enable the development and construction of water based transport infrastructure within the Coastal Environment Zone and Coastal Marine Zone.</p> <p>(b) Add new rules, or modify existing rules to give effect to the objective and policy modifications sought.</p> |       |        |         |           |      |

| Sub No             | Submitter  | Point | Volume   | Chapter                                | Provision     | Type   |

|--------------------|---|-------|----------|---------------------------------|---------------|-----------------|
| Decision Requested | That the following amendment (bold) is made to the explanation of Policy 14.1.1:<br><br><i>Currently, a wide range of primary productive land uses are undertaken in Marlborough's rural environments, from viticulture to extensive forestry, pastoral farming, dairy farming, <b>intensive farming</b> and cropping. This policy provides for those uses to continue, which will assist in achieving Objective 14.1, although the management regime in the MEP will include controls to manage adverse effects. At times there may be a change in land use or management practices for primary production to enhance the efficient use of land resources and the MEP does not intend to unduly curtail any opportunity for this to occur. However, the management framework for rural environments, which includes rural areas within the Marlborough Sounds and elsewhere in the District, does include standards to maintain environmental quality, character and amenity values.</i> |       |          |                                 |               |                 |
| <b>998</b>         | New Zealand Pork Industry Board   | 9     | Volume 1 | 14 Use of the Rural Environment | Policy 14.1.2 | Support         |
| Decision Requested | Avoid inappropriate subdivision and development of land used for primary production.<br><br>Lifestyle/rural-residential subdivision should be limited in scale and extent to defined locations to avoid conflict with production use.   |       |          |                                 |               |                 |

| Decision Requested | The tributaries to the Wairau Lagoon Seventeen Valley and Pukapuka Stream are missing from Diagram 15.1 These need to be included.   |       |          |   |               |                 |
| <b>150</b>         | Will and Rose Parsons  | 3     | Volume 1 | 8 Indigenous Biodiversity                 | Issue 8A      | Support in Part |
| Decision Requested | We wish that a provision be made to include in ('Terrestrial and Fresh Water Environments') 'the accidental introduction of oxygen weed to the Taylor River, noting the adverse effects of cutting, it to the environment downstream in the lower Opawa River and efforts being made to mitigate this. (We would welcome the opportunity to show environment committee what it looks like and discuss possible solutions).   |       |          |   |               |                 |
| <b>150</b>         | Will and Rose Parsons  | 4     | Volume 1 | 8 Indigenous Biodiversity                 | Policy 8.2.11 | Support in Part |
| Decision Requested | It is essential that the trees in the lower Wairau Valley delta which form a wildlife corridor between the North and South of the valley be given some form of protection from industrial development. If any trees are removed, a similar area of indigenous trees need to be planted as replacement in the same zone, for the beautification of the area and to attract birdlife.  |       |          |   |               |                 |
